VOL. LII. NO. 1.

DES MOINES, IOWA, JANUARY 3, 1907.

WHOLE NO. 2581

### THE SLOW PROGRESS OF MARKET- ING GRAIN.

It is estimated that not more than 25 per cent of the corn raised in the central West is marketed directly, the balance being fed to live stock and thereby marketed through that medium. At first it might seem that this is an exceedingly small percentage and that the showing is a good one in favor of a high type of agriculture engaged in by corn raisers.

However, we consider the percentage much too large. In a state like Iowa it means the marketing of practically 100,000,000 bushels of the 1906 crop. It is doubtful if the money actually received for this grain would purchase the fertility removed by it in the form of commercial fertilizers, and as that day has not arrived in the central West when much attention is being given to the introduction of commercial fertility, it becomes apparent at once that right here we have an enormous leakage. Just how long our soils will stand this is a little difficult to estimate, but one thing is certain that unless this leak is stopped, soils will grow less productive than they are at present in the very near future.

But apart from the fact that selling grain from the farm takes from it the

very essence of productiveness, the system in itself is wrong. One might spend the entire winter hauling corn to market at thirty cents a bushel and not realize more than enough to pay the wage bill and taxes on a 200-acre farm. The labor of hauling is exceedingly arduous and monotonous, apart from the fact that it means the tearing down of the productiveness of the soil.

Let the grain that it would require a winter to haul be put into any kind of good live stock and there is no question but what one will realize more on it than the market is paying for the grain. Furthermore, by this system one introduces an entirely different kind of labor. The feeding of either horses, hogs, cattle or sheep is pleasurable work, and during the winter all the labor can be performed in daylight hours. It is true that the care of live stock creates the necessity for being regular, and in a sense one who engages in this line of industry is more or less tied down. In this respect, however, the farmer's business differs but little from the merchant, the lawyer or the doctor, because these men are at their grind practically every day, year in and year out.

We often think that men calculate wrongly when they estimate that their feeding operations have been a losing

game when only market price is received for it through the medium of live stock, in addition to covering the cost of labor. True, the feeder should have more than this. On corn at the present time he ought to have fifty, sixty or seventy cents a bushel at least, but even though this margin is not realized, if the grain is marketed at grain prices it means the starting of the right system on the farm. The manure pile should be regarded as the chief corner stone of one's whole operations, and the feeding out of a bunch of steers, accompanied by hogs, means that a start can be made in the building up of the soil.

Of course men have lost money in feeding steers, and we advise no man who is badly handicapped by debt to undertake it too extensively. However, our advice in this case is to the man who owns the eighty or quarter section of land he lives on and who is content to get along with such income as is realized by the marketing of a few hundred bushels of corn, oats, and possibly wheat annually. We say that for the benefit of the man who is on the farm now, for the benefit of those who come after him, and for the benefit of the commonwealth, it is better that this grain be put through live stock before it is marketed.

### KEROSENE FOR KILLING HOG LICE.

One of our subscribers, Mr. D. C. Bowman, sends the following communication:

"I notice that some of your subscribers make a practice of using kerosene for lice on hogs. I think I have heard it advocated that kerosene, when applied to the skin of brood sows, will sometimes cause them to abort. Is there anything in this theory?"

This is the first time, so far as we remember, that this question has been asked, and we cannot answer it from any scientific data that we have on hand. We fail to see, however, that there can be any connection between the application of a little kerosene to the skin of a hog and abortion. Of course if enough is applied to blister the hog, there might be trouble of this kind. In order to avoid blistering it is recommended by those who have used kerosene for killing lice that it be mixed with machine oil at the rate of half and half, or with lard that has been melted.

Speaking of blistering hogs, we recall an experience where a 600 pound sow was turned into a field of weeds and rape. She became very badly blistered from the wet weeds and rape and s., especially on the lower part of her body, and the outcome was that she lost her pigs. This was an extreme case, as the

This mill, which is actually two mills in one, is manufactured and sold by the Bovee Grinder & Furnace Works, Waterloo, Iowa. A grist mill at home. Grinds 30 to 50 bushels corn per hour. See their advertisement on page 22.

sow in question became exceedingly sore and the skin on about half her body cracked and peeled off.

If any of our readers have had experience in the use of kerosene for killing lice and have had any bad luck result, we would be glad to hear from them for the benefit of others.

### A PLAN FOR STORING AND TESTING SEED CORN.

The following contribution has been received from one of our subscribers, Mr. P. Petersen, of Audubon county, Iowa:

The safest plan that I have found so far for the storing of seed corn is to put it in a thoroughly ventilated and vermin-proof box and keep it there until wanted in the spring. Such a box is easily made in the following manner: Take a twelve-inch board twelve feet long and cut from it two pieces two feet long and two pieces four feet long, to be used for ends and sides of the box. For the bottom use ordinary wire screen, which should be tacked well on and reinforced with five or six slats of half-inch stuff. The lid is a frame of half-inch stuff covered with wire screen. A box like this will hold about three bushels of seed corn and is easily carried by two men. It can be made for \$1 and will last for years. In filling, the box is set one side and the corn corded until the box is filled, then the lid may be nailed on and the box set away in a dry, well-ventilated place. It should not rest on the floor, but on a couple of blocks. Then the ears are standing on end (the natural position) and the ventilation will be perfect.

There are many methods for the testing of seed corn, some more natural than others. One of the most unnatural that I ever heard of was to test it between damp blotters in a cigar box. The man who suggested that must have done more writing and smoking than real farming.

The easiest and about the best way that I have found is to take a box, such as I have described, and set it in a slanting position, then take a box of the same size and shape, but with a tight bottom, and put in about three inches of wet sand, which should be well firmed and leveled. Mark the nearest corner of both boxes on the left end and lay out a row of ears in the first box so that the tips will all point toward you. Now if there are, say, twenty-five ears in the row, make twenty-five holes in the sand in the last box so that their position will correspond with that of the ears and place five grains from each ear in the hole that corresponds to that ear. The next row of ears will only contain twenty-four and they should be placed with the tips pointing away from you. Five grains should be taken from each and placed in holes corresponding to the position of the ears. Continue in this way, alternating rows of even and uneven numbers and pointing toward and away from you. When the first box is full, the second should have five grains from each ear in a position corresponding to the ear from which they were taken. The box of corn is then covered with a lid and nailed, and the sand and grains to be tested are covered first with muslin or calico and next with several thicknesses of wet blankets or gunny sacks. This box should be left in a room where the temperature will average about 50 degrees. After six days both boxes may be carefully uncovered. As each ear is taken from the first box, the five grains from that ear are taken from the sand, and the value of that ear for seed may be pretty accurately known.

I have found the above method both safe and convenient, but if a man desired he might get dirt from the very field he intended to plant the corn in and use that instead of sand. He might also use dirt on top of the calico instead of blankets or sacks, and expose the box to the sun in a place where it would not be disturbed. That would be about the nearest possible approach to natural conditions. In conclusion, I will only say that I know from experience that it pays well to test seed corn. Since I have commenced to test my seed corn in this way I have averaged from sixty to seventy bushels to the acre, mostly on spring plowing and old land.

The plan suggested here for storing corn and also the method of testing given are excellent in every way. Every man who has tried to store seed corn in his dwelling house finds that the mice become a great nuisance, but the plan of using screen wire, as suggested by Mr. Petersen, solves this problem. As the ears are made to stand on end and they are therefore not allowed to press one on the other, a good opportunity for drying is afforded and there will be little danger of the seed molding.

### ILLINOIS SWINE BREEDERS' MEETING.

The annual meeting of the Illinois State Swine Breeders' Association will be held at Washington, Ill., January 8th and 9th. Geo. H. Heyl, secretary and treasurer of this company, has prepared the following program:

Tuesday evening, January 8th—Call to order and address by the president, M. A. Krachel, Macon, Ill.; response, C. P. Cress, Mayor, Washington, Ill.; calling of the roll and opportunity given to pay dues and become members of the association; "How I Got Corrector to Breed," Dr. T. B. Spaulding, Decatur, Ill.; general discussion; "How I Fit Show Animals," Frank Wolgemuth, Elgin, Ill.; general discussion; "Reminiscences of the Past," D. P. McCracken, Paxton, Ill.; general discussion; address, "Stand Pat," H. O. Correll, Taylorville, Ill.; general discussion; "Points to be Observed and Things to be Avoided by the Beginner," S. H. Kaylor, Macon, Ill.; general discussion; "The Hog Business," W. M. McFadden, secretary Amer-

ican Poland China Record Association, Chicago, Ill.; general discussion.

Tuesday, January 8th, 1:30 p. m., and Wednesday, January 9th, 9 a. m.—Scoring school under the direction of the committee, J. M. Kemp, Kenney, Ill.; Geo. M. Camrall, Chicago, Ill.; Geo. A. Heyl, Washington, Ill.

Wednesday, January 9th, 1:45 p. m.—"How to Feed Pigs for the Best Results That Have Been Farrowed in the Spring and are to be Sold at Public Sale in the Fall," C. E. Ogg, Auburn, Ill.; general discussion; "What to do to Make a Public Sale a Success," A. L. Bliss, Tuscola, Ill.; general discussion; "To What Extent do Blood Lines in a Pedigree Enhance or Decrease the Value of an Animal, and Why?" Linc Lukens, Disko, Ind.

Wednesday, January 9th, 7 p. m.—Election of officer and Transaction of such other business as may come before the meeting. Final adjournment to partake of annual banquet at Danforth Hotel.

The swine industry of Illinois was never in a more thriving condition than it is at present, and for that reason there should be a large attendance on the dates mentioned above. The program is certainly an attractive one, because the names on it are of men who know what they are talking about when they undertake to prepare an address on any phase of the swine question.

### EFFECT OF FARMYARD MANURE ON SOILS.

A ton of farmyard manure contains all the way from nine to fifteen pounds of nitrogen; four to nine pounds of phosphoric acid, and nine to fifteen pounds of potash. When one considers the fact that nitrogen sells in the open market in the form of fertilizer at about fifteen cents a pound, it is at once apparent that this element alone in a ton of manure makes it worth nearly \$2. The mineral elements—potash and phosphoric acid—at five cents a pound practically adds another dollar to its value.

Possibly the day has not arrived when the average farmer thinks it worth his while to compute the value of manure in cold dollars and cents, as we have in our preceding paragraph. Nevertheless, it is a financial problem after all, because in a very few years, if care is not taken of the soils of the corn belt, fertility in commercial form will have to be resorted to, and it will then be found to be a business proposition strictly.

One of the eastern stations has recently published a bulletin dealing with the subject of farmyard manure, and among other things says, after commenting on the actual fertility constituents:

Farmyard manure adds a large quantity of organic material, furnishing humus to the soil; this increases the water-absorbing, and retaining powers of soils. It exerts a beneficial influence on the texture of the soil, making close and heavy clay soils more open and porous. On this class of soils it is best applied in the fresh condition. On light, sandy soils, which are already too porous and open, it should be applied in the well rotted condition. The tendency of the humus here will be to bind these soils and make them more retentive. This decomposition exerts considerable influence on the fertilizing constituents in the soil through the action of the carbonic acid formed which greatly increases the solvent power of the soil water. The organic acids formed also exert a beneficial effect on the insoluble plant food of the soil. From these considerations we may conclude that the indirect benefit of farmyard manure to the soil is probably greater than its direct; but whatever these benefits may be, we may safely say that there is no other single manure which when applied to poor land gives to it a more lasting and more natural enrichment than stable manure.

We resort to literature that emanates from the East for the reason that farmers there have found to their sorrow what it means to waste fertility, and as a result of this waste in the past one will now find on the farms of New England and the eastern states that the farmyard manure is given as much attention as would be given to the very best kind of fodder used for feeding purposes.

It is not allowed to lie around the yards and leach away, but is hauled to the field soon after it is made. Furthermore, it is not spread in the old-fashioned manner where an application of fifteen or twenty tons per acre is made, but, on the other hand, a given amount of manure is made to go three times as far as when it was spread by hand. Of course the invention of machinery has helped considerably along this line. The introduction of the manure spreader in eastern, central and even the western states has not only solved the fertility problem, which is a financial one, but it has tended to solve the labor problem by relieving the farmers of one of the most irksome and disagreeable kinds of labor.

There is time yet to stop the flow of fertility from the farms of the corn belt. It must be done by feeding the grain and the fodder grown on the farm and by more skilfully managing such

manures as is made around the yards. Let this be spread thinly as soon as possible, after it is made on the fields, particularly on the meadows and pastures, and there is no reason why pro-

ductiveness of the soil cannot be maintained and even increased. In order to do it rightly, however, one must cut out hand labor and use machinery to the greatest possible extent.

## The Horse Market, Its Present Condition And Future Prospect.

BY JAMES B. DAVIDSON, ILLINOIS.

There has never been a time in the history of this country, or any other, when horses have yielded as good returns to the producer as the present and never have the prospects been so bright as they now are.

One has only to visit the leading horse markets or consult market reports to verify this conclusion and the farmer who wants to buy a good horse has only to make the attempt to buy in order to be convinced that horse breeding would have been a good proposition had he begun operations a few years ago.

Horses of the best draft type and with size are bringing from \$170 to \$250 and if good enough will sell for \$350, and the supply is below the demand.

The same may be said of carriage horses. Carriage pairs are selling from \$275 to \$650 and if well fitted and maneuvered will bring much higher prices.

Any kind of a horse sells well and common horses are higher than ever before.

Pure-bred horses for breeding purposes are beginning to feel the effects of this upward tendency in market values and they are beginning to appreciate in value very materially.

Pure-bred mares in 1905 could have been bought for 50 or 60 per cent less than now, and at the advanced price it is easier to find buyers than sellers.

Taking the sales of H. G. McMillan, held at Sioux City, Iowa, as a criterion, we find the top price for a mare in 1905 about \$625, while at his last sale, \$1,105 was paid for an untied brood mare, while an average price of \$539 was obtained for eighty-six head and there were a number of yearlings included in the offering.

Enough for present conditions, for it is patent to everyone that conditions are about as favorable to the producer as could be desired.

What of the future? Is it safe to breed horses now, or will they be a drug on the market before the prospective horse can be developed?

As I said in the beginning, prospects were never brighter than now. Some may say that this is too optimistic and that conditions do not justify such a conclusion. There is the development of electric power, the automobile. The fact that farmers will begin breeding, as is natural, when the prospects are so bright, and these agencies working together will cause a depreciation in horse values. True, auto-cars for pleasure and commercial purposes are in use to some extent, but they will never take the place of the horse or be a competitor. When there is light work to be done and conditions of the highway are very favorable, they can be used at certain times of the year, but when the auto is required to do heavy work it must be made so heavy that it becomes a burden to itself and is useless unless conditions are just right.

When it comes to hauling heavy loads through mud holes, up slippery pavements or over steel rails, it requires the shoulder in the collar and the weight to hold the horse to the ground, and nothing but the horse can meet these conditions. Electric cars can never be the competitor of the horse except in very prescribed limits, for the reason that there must be a road bed and track for the trolley and the development that follows the advent of the electric car increases the demand for horse power rather than diminishes it.

Once bicycles threatened the extermination of the horse and we know how it happened.

When binders first came into use laboring men felt that they were going to be put out of business, but it is a curious fact that with the introduction of the binder, wages began to advance and it is the same with electric and railroad development as affecting the horse business.

Back in the '90s farmers stopped breeding horses because it was not a paying proposition and there was not sufficient outlet for our surplus stock.

When prices had reached the bottom

European buyers were attracted to this country by the condition of our markets. Buyers were the first to be affected and these same buyers stood an increase in values of about 80 per cent before they quit the field.

The same was true of drafter buyers. They stood the same increase because they had learned the value of the American horse and only desisted because they could not compete with American horse users. Should prices depreciate so these European buyers can handle our horses, we will have an enlarged outlet and that will mean paying prices.

As the timber lands are becoming cleared and lumber is getting dearer, cement, sand, rock and steel are becoming large factors in building construction, and where one load was required for a frame building, five or six are now required and this will mean another outlet for man's noblest assistant.

We are now feeling the effects of the lull in breeding operations before mentioned and the supply has been cut off to a certain extent. The increasing activity in all commercial lines has created a demand for horses unequalled before. The supply of horses is low, the demand is great and buyers who formerly would refuse anything younger than a six-year-old are now quick takers of three-year-olds, and the result is that these horses are worn out before they have really reached maturity. This in itself will prevent our overtaking the demand for a long time.

The development of the new agricultural lands of the Southwest, West and Northwest, is causing a demand, and with the increased development there will be lands to be cultivated and increased loads at each end of the railroads, and this all means more outlets for horses.

As the people of the Southwest wish to improve their horses, it will give us another market for our breeding stock and especially mares. Unless horses are taken to that country quite young they do not acclimate and are generally a failure as breeders, and as conditions warrant it, that market will develop for us and we will have a demand without any competitors.

It is rumored that a big deal is about to be closed whereby a Minneapolis company will consign a large quantity of Minneapolis flour for Russian consumption. The gravity of the Russian situation as regards the wheat famine renders the hitherto unheard-of conditions of American wheat exportation to Russia a necessity. The exportation of Minneapolis flour in Russia will be without precedent. Only through the immense shortage in the Russian crop could this condition arise, a shortage so great that Russian flour prices have advanced to a notch where foreign millers can figure upon paying the high import duty, plus freight and still realize a fair profit.

### A GUARANTEED PAINT.

The name of O. L. Chase, the paint man of St. Louis, Mo., has almost become a household word in the homes of the corn belt. This is because Mr. Chase has been putting on the market for some years an exceedingly good paint at exceedingly low prices. He is able to keep up the quality and keep down the price on account of the fact that he has a new way of manufacturing and selling paints. The paint sold by Mr. Chase is ready to use, but is not ready mixed. The paint is made for each order after it is received. He ships his thick pigment, double strength, freshly ground, in separate cans and in another can the old process linseed oil. All the user has to do is to stir these together. As to the guarantee behind this paint, the offer is simply this: That there will be a cash forfeit of \$100 if the paint sold by Mr. Chase is found to contain water, benzine, whitening or barytes, and the same guarantee stands behind the oil, that it is the old-fashioned linseed oil and contains absolutely no foreign substance whatever. The buyer is given an opportunity to test two gallons of this paint, which will double-coat 600 square feet. If after that it is not found perfectly satisfactory the balance of the order can be returned and the two gallons will not cost you a cent. A postal card addressed to Mr. O. L. Chase, Dept. 27, St. Louis, Mo., will bring you a paint book, the most complete of its kind ever published, also the instruction book, entitled, "This Little Book Tells How to Paint." If you expect to do any painting next spring, send in your request for these books and mention The Homestead when you write.

## Farm Furrows

Turned by a Practical Farmer.

A man's creditors generally stick closer to him than any brother he ever had.

Some preachers now-a-days get almost as large a salary as football coaches.

Texas has a rate law known as the "Love bill." However, it has failed to appeal to the finer instincts of railroad men.

Why is it that the average man finds the seat on the corner of a dry goods box softer than the cushioned pew in a church?

The man or boy who likes to "fool around" with pigs or sheep or any other farm stock usually develops into a good stockman.

There is as much difference in brood sows as in dairy cows. A good mother cannot keep herself fat and her pigs, too. Remember this when you make apologies for the old sow that has to her credit twice the number of vigorous youngsters that her more elegant appearing herd mate has.

When I think how dull and lazy I get after sitting around in the house on stormy days I wonder how those city fellows stand it to sit all day in those stuffy offices. More and more we farmers are coming to realize that country life is the only life worth living. Edward Everett Hale says, "To live in the open air develops us morally, physically, intellectually and spiritually."

A Chicago seed firm has a new wrinkle in what is called a "seeded string." This is nothing more or less than a tissue paper string filled with seeds of different garden plants. In place now of planting seeds by guess out of the hand one can just lay a string of lettuce or radish in the furrow and cover in less time than it takes to tell. The rows can be kept straight in this manner and cultivation made easier, it is said.

Whenever you think that it would be a nice and pleasant thing to retire from the farm and take up life in the city, consider the change that would take place in your bill of fare. We know the road seems long on the way to church or town, but for our part we would prefer to go that way on a rashier of home-cured bacon and eggs and plenty of butter than to walk five blocks on some detestable breakfast chaff with skin milk and maybe some eggs of questionable vintage.

A good way to get the corn stalks off the field for spring seeding is to let the stock graze them down. Our stock has the range of the cornfield all winter and when spring comes there is nothing but stubs of stalks left. We have often watched the cows and young stock walk out to the field from a rack of clover or good oat straw. The food value of bleached stalks of course is not of much consequence; however, the old cow likes the change and, besides, it is good exercise for her to spend an hour or so in this way every day.

The feeding of stock can be resolved down to a problem of profit and loss. If you fed yesterday so as to put on a pound of gam, that was profit. If

# Make More Money Keep Your Stock Thrifty

## Here's the Whole Truth of the Matter.

**S**TANDARD STOCK FOOD is not a medicine, a drug, or a "dope."

It is a condimental food; a "seasoning" which takes the same place in the animal's ration that salt and pepper and mustard and sage and flavors and sauces take in your diet.

The animal needs this condiment just as you need condiments.

Because, first, it flavors and seasons the ration and makes it taste better.

So that the animal eats with a keener appetite and a greater relish.

That means a greater flow of saliva in the animal's mouth, a greater flow of all the juices and fluids in the digestive organs.

Hence the animal digests its feed more easily, more quickly and more thoroughly.

It gets more good from every pound of grain and hay it eats, and less of the ration is wasted by passing through the animal undigested

\* \* \*

But that is not all. The tonic properties of Standard Stock Food quicken the circulation, aid in assimilation, tone up the entire digestive system, and produce that healthy, vigorous condition which means greater thrift in animals and bigger profits for you.

\* \* \*

Honestly now, don't you believe, don't you know, that a stock food which will do this, will make money for you?

Standard Stock Food will do it. There is no "theory" about it. More than 400,000 of the best farmers, feeders, and breeders in the world use Standard Stock Food—and have proved that it does make stock thrive.

## As to Quality.

Standard Stock Food is good all the way through—every particle in it has honest stock food value.

If you will just compare it with any other stock food made,—look at it, smell it, taste it—you can see and smell and taste its superiority.

**STANDARD STOCK FOOD**  
**"IT MAKES STOCK THRIVE"**

It is stronger, purer, more concentrated.

That's why it goes so much farther than other stock foods.

That's why it costs you less to use Standard Stock Food than to use any other.

A dollar's worth of it contains more feeds than a dollar's worth of any other.

Simply compare the feeding directions on packages of various makes and you can see this for yourself.

It costs you less per animal, per month, than any other.

\* \* \*

We want you to try Standard Stock Food, not because we want to make a single sale to you, but because we know that if you give it a fair test you will become an enthusiastic, permanent customer.

More than 400,000 farmers and feeders have proved that "It Makes Stock Thrive."

We will sell it to you on a square deal, money-back guaranty—your money back if it does not do all we claim it will do.

You run no risk in trying it, and its use means bigger profits to you.

## GO TO YOUR DEALER

and ask him to supply you. If he cannot, do not take a substitute but send to us direct.

We will ship immediately and protect you with our square-deal, money-back guaranty.

## FREE TO YOU.

Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

Standard Stock Food Co., 1516 Howard St., Omaha, Neb.

the same animal was stunted today so that he was compelled to draw on yesterday's profit to maintain the functions of life, that was loss. There are too many people practicing the theory that the old Missourian had for making first-class bacon. Every other day he fed heavy; the days between the feed was light. In the end this resulted in a layer of fat always interspersed with a layer of lean.

We all have the welfare of our children at heart more than that of any other earthly possession. Yet how few of us ever visit the little white school house where some dear little school-ma'am is struggling to make dry grammar and arithmetic seem real to a dozen vigorous youngsters. Just imagine their delight and surprise if you should some afternoon drop in with a half dozen ears of good corn, or several different varieties of apples, potatoes, etc., and give a half hour's talk on the history, development and other points of interest on such subjects. We venture to say that you all would feel wiser and happier.

We always feel a bit conscious-stricken after turning away a beggar. Perhaps he was worthy of food and a night's lodging and perhaps not. One never can know whether he is sheltering an unfortunate or a criminal. In warm weather their condition does not generally arouse our pity, but these cold days it is different. Whenever we are now approached

we point to a good wood pile. At that place an hour of good work will bring a substantial meal. Don't feed him first; he may sneak away without expressing his gratitude at the saw buck. The fellow too lazy to saw wood knows the sign from his brother travelers and passes by on the other side.

## Cancerol has the Confidence of the People

A record of successful cancer cures of people from every part of the Union and in every situation about the body contained in a valuable free book, which will be sent to those interested. Write today. Address Dr. L. T. Leach, Drawer 88, Indianapolis, Ind.

## SENDING HIDES TO TANNERY.

Those who wish to obtain the highest market price for hides, pelts, furs, wool, tallow, etc., should communicate with Messrs. J. S. Smith & Co., of Chicago. This company tan hides and they buy directly instead of through dealers, and therefore pay top prices. This firm was established in 1865 and has grown every year, so that now it is one of the largest tanneries in the United States. Small shipments are given exactly the same close attention as large ones. A booklet has been prepared entitled, "How to Prepare Hides and Furs for Market," and this will be furnished free upon application to Messrs. J. S. Smith & Co., Department 16, Chicago. The advertisement will be found on page 30 of this issue. When you write for their folder, please mention The Homestead.

## "NOTHING TO EQUAL ABSORBINE."

Mr. Frederick Angell, of Bayville, Long Island, N. Y., writes under date of February 5, 1906: "I must say I have never used or seen anything to equal Absorbine in my experience. It has proved all you represent it to be. I have used it on capped hock, bruised knee, wind puffs and thick neck. I always

use it after the horses come out of the ring. I spray them all over and that seems to cool them off and freshen them up. I use it on myself after a bath and think it is a real luxury; after shaving diluted with witch hazel it is very nice, also on my hair." No well regulated barn is without Absorbine to keep the stock in "horse show" condition. It is a prompt and effective remedy for removing blemishes, healing cuts, sprains, bruises, etc. Just as valuable for allaying pain, healing cuts, sprains, bruises and the various accidents that happen to mankind. Absorbine can be procured from your druggist or will be sent express prepaid upon receipt of \$2. W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass.

## SEED CORN SOLD ON APPROVAL.

The above is the slogan of Mr. G. D. Sutton, of Mason City, Ill., whose advertisement will be found on page 10 of this issue. He is selling Sutton's Improved Boone County White, Sutton's Favorite White, Reed's Yellow Dent, Gold Standard Leaming and Premium Yellow Dent. Eight thousand bushels of fine seed ears have been selected from 600 acres and when this seed is sold business will stop, as Mr. Sutton does not believe in buying up cheap corn and selling it for high-class seed. It can be ordered in the ear or shelled. All shelled corn is nubbled at both ends and afterwards graded. But the best thing about the offer made to customers is that if corn does not stand a test the buyer can return it within ten days at the expense of Mr. Sutton and have his money refunded. In other words, you may test the seed corn and if it does not germinate as it is guaranteed to germinate, you do not need to keep it. An illustrated seed corn book will be furnished upon application. Address Mr. G. D. Sutton, Dept. D, Mason City, Ill., and please mention The Homestead when you write.

When writing to advertisers please mention this paper.

## THE AUTO-FEDAN HAY PRESS

3-Stroke Self-Feed 2 Men Can Run It.

Satisfaction Guaranteed.

THE AUTO-FEDAN HAY PRESS CO.  
1062 Jefferson St., Topeka, Kan.

## CUT ICE

With the Dorsch Double Row Ice Plow We guarantee it will cut more than 20 men sawing by hand. Cakes are uniform, of any size and thickness. One man and a horse will cut more ice in a day than the ordinary farmer and dairy man can use. You can cut for others and make the price of our plow in two days' use. Ask for catalogue and introductory prices. JOHN DORSCH & SONS 216 WELLS ST., MILWAUKEE, WIS.

# THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

## ANNUAL MEETING NEBRASKA SHORT-HORN BREEDERS' ASS'N.

Attention is called to the annual meeting of the Nebraska Short-horn Breeders which will be held at Lincoln, Neb., January 18, 1907, during the week of meetings of agriculture. The Nebraska Short-horn Breeders' Association has grown to be a very strong organization with a membership of one hundred or more breeders and the program this year is full of excellence. Addresses will be made by such able men as Mr. B. O. Cowan of Chicago, and others of like ability. On the evening of January 17th at the Windsor hotel a banquet will be given at 8 p. m., preceding which it is probable that the annual business meeting will be held in order to leave the entire day of the 18th to the program. It is hoped that all members of the association and others interested in Short-horns will be present at the business meeting and subsequently at the banquet. The banquet last year was a big success, plates being in place for over eighty persons. It is hoped the number will be increased to one hundred or more this year. Headquarters will be at the Windsor hotel and arrangements have been made for rates. Those desiring to have rooms reserved will write the secretary, S. R. McKelvie, Lincoln, Neb.

## EXPERIMENT STATION IN ALASKA, HAWAII, AND PORTO RICO.

A systematic effort has been begun to determine the feasibility of the livestock industry in Alaska. A small herd of Galloway cattle has been purchased and located at Kenai, in Cook Inlet, and at Wood Island. These cattle have subsisted during the summer upon the native grasses, and a considerable supply of grain hay has been grown at the Kenai station with which to maintain them during the winter. Wheat, rye, barley and oats matured in 1905 and 1906 in the Yukon Valley, but 300 miles farther south, in the Copper River Valley, cold and drouth killed all but the hardiest varieties of cereals. A large amount of grain hay was obtained at the Copper Center station and sold at a highly remunerative price. It has been shown that many of the Alaskan soils require lime, and a method has therefore been devised for the cheap local production of lime in small quantities.

The Hawaii station reports an increasing appreciation of its efforts toward diversifying the agricultural industries of the islands, and as a direct result of three years' experimental work with tobacco it is said that this year fully 200 acres were planted. The discovery by the station chemist that Hawaiian feeding stuffs are deficient in lime is an important one, and will make it possible to arrange more satisfactory rations for live stock. The investigations on the marketing of tropical fruits promise to open markets in the Pacific coast, which can best be supplied from Hawaii. Investigations begun with the object of rehabilitating the rice industry have been so favorably received that private individuals have generously contributed considerable sums of money to aid in carrying them on.

The Porto Rico station is extending its influence, and requests for co-operative work are coming from numerous sources.

While the income of the station has been too limited to enable it to meet these demands, yet they show a growing sentiment in favor of the station which is very encouraging. The coffee experiments have begun to show results, and the improved methods of pruning and cultivation are quite apparent in the increased yields obtained. A successful effort is being made to grow lowland rice, and this industry should be greatly extended. The Porto Ricans are large consumers of rice, most of which is now imported. Among the forage crops, experiments with cowpeas have been most successful, and it is believed that they can be grown throughout the island. Numerous horticultural experiments are in progress, and studies are being made of insect pests and plant diseases.

### BOY'S TERRIBLE ECZEMA.

Mouth and Eyes Covered With Crusts  
—Hands Pinned Down—Miraculous Cure by Cuticura.

"When my little boy was six months old, he had eczema. The sores extended so quickly over the whole body that we at once called in the doctor. We then went to another doctor, but he could not help him, and in our despair we went to a third one. Matters became so bad that he had regular holes in his cheeks, large enough to put a finger into. The food had to be given with a spoon, for his mouth was covered with crusts as thick as a finger, and whenever he opened the mouth they began to bleed and suppurate, as did also his eyes. Hands, arms, chest, and back, in short the whole body, was covered over and over. We had no rest by day or night. Whenever he was laid in his bed, we had to pin his hands down; otherwise he would scratch his face, and make an open sore. I think his face must have itched most fearfully.

"We finally thought nothing could help, and I had made up my mind to send my wife with the child to Europe, hoping that the sea air might cure him, otherwise he was to be put under good medical care there. But, Lord be blessed, matters came differently, and we soon saw a miracle. A friend of ours spoke about Cuticura. We made a trial with Cuticura Soap, Ointment, and Resolvent, and within ten days or two weeks we noticed a decided improvement. Just as quickly as the sickness had appeared it also began to disappear, and within ten weeks the child was absolutely well, and his skin was smooth and white as never before. F. Hohrath, President of the C. L. Hohrath Company, Manufacturers of Silk Ribbons, 4 to 20 Rink Alley, South Bethlehem, Pa., June 5, 1905."

### E. R. Morgan's Hereford Sale.

The sale of Hereford cattle held by Mr. E. R. Morgan, of Blue Rapids, Kan., on December 19th, was well attended by breeders and cattlemen from northeast Kansas and southeast Nebraska. The cattle were offered in just nice breeding condition. Many thought the offering of thirty-five bulls would not find buyers, but twenty-eight head were sold. The larger part of these were quite young and cut the average to a great extent. Mr. Wm. Henn, of Kansas City, Mo., bought several of the older bulls for the western trade. The top on bulls was \$210, paid by Mr. Henry Kaump, of Randolph, Kan., for Lot 30, a May yearling got by Earl of Willowbrook. The heifers bred and in calf to Mr. Morgan's great herd bull, Onward 18th, were ready sellers. The top on these and the top of the sale was \$215, paid by Mr. L. A. Oberhelman, of Winkler, Kan., for Lot 29, a granddaughter of Beau Brummel, with a corkscrew bull calf at foot got by Onward 18th. All the females found ready buyers and at reasonable prices. Col. R. E. Edmonson in his opening address spoke at some length on the pedigrees on Hereford cattle, explaining clearly to the man who might be contemplating starting in the Hereford business that he had nothing to fear as to families, as this is one breed that is not affected by any family craze. A list of all sales with the averages follows:

### BULLS.

Julia's Keep On, one year, Peter Peterson, Morganville, Kan.	\$ 55
Stanford, one year, J. M. Williams, Home City, Kan.	65
Gershon, one year, Wm. Henn, Kansas City, Mo.	60
Hero, one year, W. B. Hobe, Barnes, Kan.	65
Perfection, one year, L. Pfle, Palmer, Kan.	70
Roseberry, one year, Ed Rice, Blue Rapids, Kan.	45
Sir William, one year, Wm. Henn	65
Daniel, one year	50
Kansas Boy, one year, F. W. Toburen, Cleybourn, Kan.	50
Gladys Keep On, one year, Wm. Henn	60
Bobby Shafto, one year, E. L. Axelson, Garrison, Kan.	40

Troubadour, one year, same	55
John Halifax, one year	40
My Beau, six years, F. E. Swansen, Randolph, Kan.	

A three-year-old black Percheron, weighing 1,970 pounds. The kind that Messrs. Peter Hopley & Son, of Lewis, Iowa, have always sold at their farm. This is the kind of stallion this well-known firm have always sold, and the kind that makes old customers come back and bring new ones with them. They now have a grand lot of two and three-year-old Percheron stallions on hand and are offering them at prices that the same class of horses cannot be bought for elsewhere.

## This High Grade Door 2-0 x 6-0, All White Pine, a Really Wonderful Value, Worth Nearly Three Times Our Price

If you have any use for doors, windows, storm or barn sash, moulding, porch brackets, columns, etc., don't buy elsewhere at any price or under any circumstances until you have written for our factory prices.

You will then receive by mail, postpaid, FREE, Our Grand Millwork Catalog, a book of the latest and best styles of doors, windows, storm sash, moulding, porch brackets, columns, stair rails, ladders, art glass, etc.

We will explain why we can sell at prices so much lower than were ever before known.

Our prices are next to nothing compared with what you have been in the habit of paying.

Modern Front Door, glazed clear glass, "B" quality ..... \$1.99

Four-Panel Door, painted ..... .71

Two-Light Window, glazed clear glass ..... .63

Storm Sash, glazed clear glass ..... .64

Art Front Window, Battenberg Lace design ..... 3.35

% x % Quarter Round per 100 feet ..... .25

Porch Brackets ..... .05

Colonial Staved Columns ..... 1.60

Our prices on all other millwork equally low. If you intend to build, or if you need millwork for any purpose, do not think of buying until you get our estimate. Our goods

**CORDON, VAN TINE & CO., Station 845, DAVENPORT, IOWA**

are high grade as well as wonderfully low in price. Our lumber is first air dried and then, as an extra precaution, is put through a scientific drying process. Joints are made with heavy hard wood dowel pins, glued with imported glue, pressed together by heavy steam power press. There is no "come apart" to our work.

Door Panels have a heavy raise on both sides. The panels are sandpapered on a special machine of our own invention before the door is put together, and the entire is then smoothed with fine grained sandpaper. We guarantee our goods to be strictly up to the official grade adopted by the Sash, Door & Blind Manufacturers' Association of the Northwest.

We operate the largest mill in the world—163,000 feet of floor space (four acres)—have been in business since 1865—own our timber lands, saw-mills and lumber yards. We carry a large stock and can therefore ship promptly. We have no traveling men—sell only for cash. We are the only large manufacturers of sash, doors and blinds selling direct to the consumer. Our prices will astonish you. Don't buy anything in our line until you get our catalog, the greatest woodwork catalog published. It's Free—write for it today. Address

### McLemore Made Good Sale.

The sale of Short-horn cattle held at Columbus, Neb., December 28th, by Mr. W. M. McLemore, of Kearney, Neb., was well attended by breeders and farmers of central Nebraska. The cattle offered were in nice breeding condition and were all disposed of at a figure satisfactory to Mr. McLemore. Local buyers seemed very eager for the bull offering and picked them up at a good, fair price, average \$100.25. An average of \$75 was secured on the cows, which was way below their value. Below is a list of those selling for over \$75:

Gentle Mary, Joe Russell, Seward, Neb.	\$100.00
Independence Belle, J. C. Deshler, Columbus, Neb.	75.00
Augusta, H. Olcott, Columbus, Neb.	80.00
Myrtle 6th, A. D. McGlaughlin, Cokeville, Wyo.	92.50
Bonnie, Fred Wollie, Columbus, Neb.	87.50
Myrtle 3d, A. D. McGlaughlin	77.50
Roxie, Henry Kohler, Schuyler, Neb.	75.00
Lizette, J. Kohler, Schuyler, Neb.	75.00
Independence, J. C. Dineen, Oconee, Neb.	92.50
Polite, Fred Wollie	82.50
Prince, J. B. Keil, Duncan, Neb.	105.00
Chas. Malone, Wm. Klug, Richland, Neb.	122.50
Victoria's Knight, D. A. Beecher, Columbus, Neb.	80.00
Monarch, Oscar Eng, Newman's Grove, Neb.	100.00
Mazurka's Thicket, J. C. Dineen	100.00
Favorite, Joseph Leibig, Columbus, Neb.	97.50
Prince Lovely, Fred Wollie	105.00
Golden Lad, August Loske, Columbus, Neb.	85.00
Victor Dudding, Tom Oconee, Spalding, Neb.	92.50
Roan Lad, John Galley, Columbus, Neb.	115.00
Total average on the whole consignment	\$86.25.

On page 5 of this issue will be found the latest of the Litchfield continer stories, telling you all about "How It Happened." Read it.

Milk soured to the first degree is good pig food. Soured to the putrefactive stage it is unfit for any use.

There are three things essential to success in the dairy: the man, the cow, the feed, in the order named.

## IOWA DUROC JERSEY MEETING

The annual mid-winter meeting of the Iowa State Duroc Jersey Swine Breeders' Association was held in Des Moines on Thursday of last week. There assembled at that meeting about fifty enthusiastic champions of this great breed. The meeting was a pronounced success, because every man there came with the idea of helping along the cause and with the purpose in view of receiving some instruction from the program and from meeting with his fellow breeders that would help him in his own business.

The spirit that prevailed at this meeting and the feeling that permeated the hotel lobbies where those attending made their headquarters indicated that the flag of the Duroc Jersey is floating higher than ever before—brought about by the brisk sales made during the last few months of the year 1906 and by the prospects that are now in sight for the female offerings later on.

There were few items of business transacted, as this is generally done at the annual meetings held on the Iowa State Fair grounds. However, a committee was appointed to represent the Duroc interests in conferences held during the coming months regarding new equipment that the state will in all likelihood place on the fair grounds in 1907. It was also decided to hold the meeting during state fair week on Wednesday evening, while the next December meeting will be held during the week of the state farmers' institute and board of agriculture meeting.

Mr. H. C. Sheldon, secretary of the National Duroc Jersey Record Association, was present and gave a talk relating to the needs of the Duroc Jersey men on the state fair grounds. In part Mr. Sheldon said:

"They have assigned to me 'The Needs of the Duroc Men on the State Fair Grounds.' I would consider that the needs of Duroc men are in common with the needs of all swine men or swine exhibitors, whether Duroc or some other on our state fair grounds. I cannot conceive of anything that the Duroc breeders would need in the shape of improvements that is not needed by all exhibitors of swine on the fair grounds. Of course, there is no doubt that some of our Duroc breeders there think they need some things that others think they do not in the shape of luxuries around their tents or something like that.

"One of the most important needs of exhibitors—I will say exhibitors of all breeds of swine—on our fair grounds, I would consider better sanitary arrangements. But there is a question in my mind whether we could blame the management of the fair association. I believe they have done everything in their power for the swine breeders with the limited means they have had at their disposal. The matter of new buildings has been taken up a year or two ago and while we have never gotten them yet, we think there has been enough accomplished that we feel confident our state legislature will make an appropriation the coming winter for improvements in the way of buildings and barns.

"Another thing we need is facilities for handling our feed and bedding and better sleeping quarters. Our camping quarters for the Duroc breeders have been very poor, especially if we have a wet time. I recollect two years ago that we were all drowned out. If we slept at all we had to sleep in the hog barns. We have no place to store feed or bedding where it will not be exposed to the weather unless we use the hallways in the barns and, while we have been using them and will have to continue to do so, it should not be done. It takes up the room that the visitors to the barns should have in passing back and forth.

"Another thing that we think is very important for the Duroc breeders is that we ask, and not only ask, but demand, from our swine superintendent, that our judge or judges at the state fair be selected from Duroc breeders and not from breeders of other breeds. I may be questioned on that, but it is my honest conviction. The past fall I attended three state fairs where the judges for the Durocs were breeders of other breeds of hogs. They were men of rep-

utation and good breeders of their own breed, and their ability and honesty was unquestionable, but as Duroc judges they were not satisfactory to the majority of exhibitors."

Mr. L. H. Roberts, of Paton, Iowa, read an interesting paper relating to the benefits to be derived from the state association, and in part said:

"We all feel the value of these associations, and it is just this indescribable feeling of enthusiasm which we have after attending a good association that is one of the direct benefits. It is something that makes a man study harder. It enables us to go home with the impression that the breeding of hogs is a great calling, and it is. The man who goes about his work thinking that his effort will tell in the future is going to do better work in the present. At this meeting we generate enthusiasm in hog breeding that we seldom get anywhere else. Who is there that does not become animated and intensely interested during the lively discussion of a subject on which he has spent many years of study and work? It gives the impulse to do more and better work in the future, and it is from such impulses that come our best efforts.

"Another point I would dwell upon is that we may keep in touch with and informed on the latest experiments and improvements in hog breeding. In any calling the person who keeps informed regularly is the one who will usually succeed. At the present time in this city the leading educators of Iowa are holding an association. The best teachers are in attendance because they wish to keep in personal touch with the leading educational questions. And to us there is the urgent need of knowing the latest and most authoritative opinions of those who are devoting special attention to hog breeding. Certain misconceptions and mistakes have been corrected and we must know these corrections and the new conclusions, if we are going to be progressive. Even though we may not put into immediate practice the things we learn here, there may come the time when they will be of untold value.

"It has been said that experience is a dear teacher, and we agree that it is, but it is often the best school. As in the association we hear of the latest theories and attempted improvements, so also do we hear of their practical application. The failure or success of certain experiments is discussed, and it may not be necessary for us to conduct the same experiments. All theories may here be sifted in the sieve of practice. It is inconceivable that every idea or new thought brought out should be correct. We need some such discussion as is possible here for the correction of errors that creep into our work.

"Then if we would have these meetings a success we must not only get all the old breeders to attend, but if the work which we are now doing is to be carried on in the future we older members must invite and encourage the younger men to attend and to take an active part in this work. Well do I remember the time when I first went to the associations with my father, how he encouraged me in the work. When in after years I think over the interest and enlightenment, even then received, I feel that there will not be the progress there ought to be in the future unless the young men of today attend meetings like these. I believe you will find that several of us took our first real interest in the breeding of hogs after attending our first meeting of this kind. Then we need to realize that it is a duty to bring as many young men as possible. We should get them into the active work quickly. New blood coming into the meeting will keep us from getting into ruts. Usually those who have achieved eminence in any vocation have learned the first principles while they were young and their minds impressionable. If our younger members are active and wide awake they will be calling upon us to explain established principles, and in such explanations we will be compelled to keep our knowledge fresh.

"Not by any means the least valuable feature of the association is the meetings of members before and after the regular sessions. The members may

## HOW IT HAPPENED

### We Explain

TO TELL our customers how the Litchfield Spreader happened to be produced with the "Litchfield" style of swinging section or self cleaning endless conveyor, has been one of the thoughts in mind for a number of weeks. We have felt that this was interesting to our readers because of the numerous inquiries as to how we, with the Litchfield Machine, are offering to the trade the only spreader on the market which has a hinged section conveyor, one that is automatic in its work and which others would naturally build if they could.

The strong need for an endless conveyor was easy to see at the beginning, but how to get it without the objections that had always been common with all endless conveyers was another question. The inventors who applied their energies to this work soon brought out the hinged section, making it impossible for anything to clog on the lower surface because all slats or sections swing down and hang edgewise while passing under towards the front of the machine. This feature being absolutely new and never before known or heard of in connection with spreaders, was easily protected and gave an extremely broad or strong patent.

The strength and individuality of the Litchfield Spreader was originally due largely to this one particular, exclusive feature. The machine stands today as the only representative of a perfect endless conveyor and it is perfect because there are no obstructions and no objections that can possibly be offered when the value of this form of "Apron" is considered.

Every dairyman who wants to use his spreader daily, as the modern "cow man" is insisting on doing, has no use for a machine that will not work successfully under all conditions, including the coldest kind of weather in any climate. Right here, with this particular kind of land owner, is where the Litchfield machine stands out with the strength of perfection.

When any article comes onto the market and steadily gains in its "circulation" year after year as the Litchfield Spreader has been doing for the last five years; and when the "other fellows" put up a strong fight against this certain specialty, it is well for the men who foot the bills (the land owners) to look thoroughly into this question and become posted.

The very best evidence we can offer of the superiority of the Litchfield style of self-cleaning or hinged conveyor sections, is the fact that this plan of "Apron" is confined entirely to the Litchfield Machine and the fact that other spreader companies condemn it.

What do you think about our position? Are we not correct? If you want to know more concerning the details of this style of conveyor, let us send you descriptive folders.

We invite your correspondence. Don't miss us next issue.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

continue the discussions of the meeting or talk over personal experiences, or even arrange matters of business. Oftentimes business can be arranged much more satisfactorily than through correspondence.

"In closing, I wish to emphasize that I believe one of the greatest things we receive at a good association is inspiration. In curs as in other lines of endeavor the man with ideals wins. There never was yet any enterprise that did not have its ideal. If there had been no ideal there would have been no accomplishment, but we must work out the ideal. Our ideal should be the perfect hog. We may never reach this high standard, it is true, but we will come nearer to perfection if we have an ideal than if our work has no standard. I believe this association is one of the greatest factors in reaching the ideal."

Mr. H. S. Allen, of Russell, Iowa, gave an address entitled "The Showman and His Herd." This was full of meat and contained many valuable suggestions to beginners in the show business. Mr. Allen had nothing to withhold concerning his methods, and the frankness with which these were given accurately indicates just why it is that Duroc Jersey men pull so well together. The slogan seems to be to each encourage and support the other. This, possibly as much as the merit of the Duroc hog, has been responsible for the rapid increase in their popularity. In part, Mr. Allen said:

"In order for a herd to win in the ring there must be good individuals to start with. In order to produce these individuals we must plant good seed, for like produces like. This has been proven time and again by champions producing champions and prize winners producing prize winners. On the other hand, there are prize winners and champions whose ancestors never saw a show ring. Then, again, there are prize winners and champions who have not the power of reproducing prize winners. Therefore, when buying breeding stock to produce a show herd, we would say, if possible choose good individuals backed up by a show-yard pedigree.

"Feed flesh-forming foods, such as oats, mill feed or any other feed containing lots of protein. Cut out fat-forming food, such as corn, and give plenty of range with good pasture. Now for picking out the individuals for show.

## HIDES TANNED

SEND YOUR HIDES TO US  
They are valuable  
Don't trust them

to unreliable tanners. We are the oldest, the largest and most reliable tanners in the Northwest. Write us for price list. J. H. Cowdle Glove Co., Des Moines, Iowa

Go out into your herd and look them over carefully. Discard all poor feet and weak pasterns, for a slightly weak pastern or foot when starting to fit for show means a very weak pastern or foot when finished. Get with these good feet and pasterns a good, strong, flinty bone with good, straight legs, set well apart. Next look for a good back with a well-sprung rib. These should be coupled to a good ham. Now look for a good, wide head, wide between the eyes, and an eye that won't feed shut; and a good ear, for a good, wide head and well-turned ear speak volumes for quality. Add to these all the size you can possibly get, for quality without size is as naught in the show ring, as well as the feed lot. If you are going to show pigs under six months, commence when they are ten or twelve weeks old, and carry along gradually. If fitting older hogs, eight months is none too soon. Start with oats, mill feed or any good flesh former. Get them on full feed of these in about thirty days, and carry along gradually. Never fail to give plenty of range with good grass in season, and never overfeed. If good separator or fresh milk can be added to the above ration, so much the better. If we are fitting one that we feel sure is going to be a winner, we make it a point to get fresh milk for him. Someone has said that nature might have made a better food than fresh milk, but she never did.

"About ninety days before the show, if some are getting fat or overdone, hold them down by hard driving. Some say, 'Yes, but we have no time to drive.' If you expect to win you may expect to spend a good deal of time preparing your herd for this honor. No man ever won by slipshod methods. About sixty days before the show, begin feeding a little oil meal, very lightly at first. This is to put the hair in good condition. Also about this time the animals will begin to get lazy from long feeding and will refuse to exercise. Here is where

you will find trouble galore if you are not very careful. See that they take lots of exercise. If an animal is getting overdone, we do not cut off feed, but drive hard and feed right on. If you cut off feed they are apt to lose their bloom and this bloom they must have to be a winner at any of our great shows. Now we are ready to start for the show. If it is hot weather we will need to use lots of care. We always use a furniture car. Would not use a stock car unless it was thoroughly disinfected. When loaded in the car give all the ventilation possible. If it is very hot get a large piece of ice before starting and if one is getting too hot, break this in small pieces and lay under and around it. This may save a fine hog sometimes. If you are not over twenty-four hours in transit, do not feed anything, but give plenty of water. When we arrive at the grounds we unload as quickly as possible and let them rest a few hours before feeding. Now they will likely be very hungry, so we are careful not to feed too much. Before starting for the ring we get everything ready and are sure the animals are looking their very best for the first look the judge gets of a well-fitted animal often brings him around again.

"We will now speak of the showman. When we say showman, we mean a gentleman in the show ring. No doubt you have all seen the kicker in the show ring. The man who kicks every time his hog is turned down, nine times out of ten there is no ground for him to kick. His hog usually has some defect which he has overlooked or cannot see. When we drive a hog into a ring to show against from twenty to eighty of the best individuals the breed can produce we must have a mighty good hog, in the pink of show condition, to get a second look from the judge, let alone get inside the money. As breeders and showmen, we should feel proud to have an animal in the ring which will compare favorably with the best in such shows as we have in Iowa. On the other hand, you men who have been showing for a number of years, have, no doubt, been in the ring when the incompetent man was judging, or perhaps you have shown under the partial judge. Of all the troubles a showman can have while in the ring, the partial judge takes the lead and here is the only place where the showman should register a kick. Yet he has one consolation and that is that he is very seldom called upon to show under such a judge. Let us learn to take defeat gracefully and hold ill will toward none, for remember the other fellow is just as anxious to win as we. But if we are turned down let us not give up but look carefully at the winners and go home determined to try a little harder next year. The man who sticks is the man who wins out. Last of all we wish to say, choose your type of hog and stick to him but be sure and choose a good type. Our type is the large hog carrying lots of quality."

Mr. W. A. Staples, of Glidden, Iowa, addressed the association dealing with the benefits of pure-bred animals on the rising generation. He pointed out that there was just as much culture in the study of animals as in the study of Greek and Latin, and stated that the salvation of American agriculture rests on the attitude of the rising generation toward improved stock. Much has been accomplished in recent years by way of improving the common animals of the country, and this has been done through the efforts of those who have handled foundation material in the form of pure-bred stock. There are just as great opportunities along the line of breeding pure-bred animals, said Mr. Staples, as there is in any other line and the young man who has a taste for the business and who has average talent can build up a business along this line that will make him independent and bring to him as much genuine fame as can be attained along other lines.

Mr. M. T. White, of The Homestead field force, presented a paper entitled, "How to Prepare for Duroc Sales," and among other things, said:

"On my arrival home last Saturday evening I found a program of the National Duroc Jersey Swine Breeders' State Association awaiting me. From it I learned that I was slated for a paper on 'How to Prepare for Duroc Sales.' What I do not know about the topic would fill a volume. What little I have learned leads me to conclude that the best way to prepare for a Duroc

sale would also be the best way to prepare for a sale of any other breed.

"The question was once asked, 'When should the education of a child begin,' and the answer was 'A hundred years before it was born.' While this would hardly apply to Duroc Jersey sales, it nevertheless carries with it a meaning that is far reaching, and if one would prepare for a successful sale, he must necessarily lay the foundation for the same years in advance. The first requisite for a successful Duroc sale is first class stock. To be able to offer a bunch of say forty or fifty head of first class animals, you must first select the very best brood sows that your means will allow. The boar is an all important factor in your herd, and inasmuch as he will sire a whole crop of pigs, everything depends on him. Many a successful sale was made largely on account of the boar at the head of the herd. Granting that he is a first class animal, and that he is capable of siring first class stock, the sale will be the more successful if the brood sows belong to the same class. There was never a good show animal that did not have a good mother, and the more perfect she is the greater the possibility of her transmitting her good qualities to her offspring. Innumerable instances could be cited of animals that have won prizes in show rings, as well as making a fortune for their owner, that have had good mothers. While not necessarily perfect as an individual, she nevertheless possessed certain characteristics that stamped themselves indelibly on her get, and placed her in the front rank of the great brood sows of her time.

"This foundation being laid the next essential is the care of your stock. I have seen many a good foundation laid that was afterwards shattered by lack of proper care and attention. If you purchase a high class boar and keep him in a 2x4 pen, with a board floor in one end and a mud hole in the other, without any opportunity for exercise, you cannot hope for the best results. But with ample room, good feed and a good yard for exercise, you may hope for good results, and when you come to make a sale you will find that you have a healthy, vigorous lot of hogs, with good constitutions, that you may force to the limit of development without fear of overdoing.

"The feeding of a bunch of Durocs is one of the essentials in preparing for a sale. A good growth is attained by proper feeding and is absolutely necessary if you get all there is to be had out of a bunch of hogs. A mistake that many breeders make is the attempt to fit hogs for sale on an absolutely corn ration. This is too often the case and sows fitted in this way do not always do well for the men who buy them, and

of course the seller comes in for his share of criticism.

"One of the first things that breeders should do is to settle on a date, and then not wait until the last minute to make the necessary preparations. The time when a sale is made sometimes makes a great difference, and there are certain seasons that are better than others for the success of your sale. Having decided on your date the next thing is to procure an auctioneer, and I would advise you to get a good one. In fact the best is none too good, and I have often seen a good salesman pay for his services on one animal.

"A question that confronts every breeder who contemplates making a public sale is the advertising of the same. The agricultural press has done its share in building up the pure-bred sales, and the medium that will reach the greater number of people interested in your sale is the one you should make use of in placing your advertisements. This will reach both the farmer and the breeder, and let me say here that the farmer has been one of the very best buyers in public sales. To reach him should be the desire of every breeder who is making a sale, because it is absolutely necessary that he become interested. The farmer of today may be the breeder of tomorrow and it always pays those making public sales to see to it that he is made acquainted with the class of stock you are selling. The breeder, as a rule, keeps posted, and knows what sale he wants to attend.

"When sale day arrives everything should be provided for. The sale tent should be up early, and if cold, a stove should be put up for the comfort of those in attendance. The hogs should be marked before the buyers arrive so they may inspect the offering with the least possible delay. Sufficient help should be provided so that everything will move along in good shape and the breeder should know before the sale begins the order in which the hogs are to be sold. The marking of your hogs is another thing to which particular attention should be paid, and if this is done properly many mistakes will be avoided, and much confusion will be prevented.

"In conclusion let me say that one of the very best ways to prepare for your sale is to treat your customers as you would wish to be treated. Have your pedigrees made out and see to it that the buyer does not have to wait a year for the same. Sell them a good hog, and an honest hog, and if your stock is as recommended and they do well in the buyer's hands you will be sure to have made a future customer. If you sell a man a gold brick you not only lose his custom, but you also lose the custom of all his friends. It always pays a breed-

er to be honest with his patrons and see that they get all for which they pay."

The papers given above only convey to the minds of our readers a partial conception of the character of this meeting. An interesting discussion followed every paper, and not for years have we seen men more heartily enter into the discussion of topics. All remarks were to the point and delivered in a way that reflects most favorably on the ability of these men who are in the front rank in breeding pure-bred foundation stock.

#### Free Book On "Tools and Their Uses."

Every farmer should know something about the materials and manufacture of the tools he uses. If the materials are right and the methods of manufacture correct better and easier work results, and durability and other advantages accrue. The American Fork & Hoe Co., 135 American Trust Building, Cleveland, Ohio, will send to any Homestead reader who writes them a postal card request to the above address, a free book on "Tools and Their Uses," showing hundreds of special-purpose tools and how to save time, labor and money in selecting farm and garden tools. This reliable company manufactures forks, hoes, rakes, hooks, weedeaters, cultivators, beet tools, floral tools and every desirable pattern of hand tools. Their "True Temper" and other brands are old favorites. They have both the right temper and the right "hang," which makes work easier. Write them today to above address; and read their advertisement on page 10.

#### EXCELLENT STOCK WATERING TANK.

If your stock watering arrangements are not satisfactory, just turn the pages of The Homestead until you see the striking advertisement of the Bushnell Pump Company. It's a new advertisement. Your eye will catch it as soon as you come to it. If you can furnish the water, the Bushnell people will furnish you a satisfactory tank, or pump or most any other water appliance, for that matter. The advertisement pertains particularly to the excellent wooden tanks made by the Bushnell Company. So far as we know, there is nothing superior made. It must be remembered that Bushnell tanks are made from select lumber—not from rejected pieces, where vehicles, furniture, finishings, etc., are made out of the better parts of the lumber. Those who know how shingles, plastering lath, staves, etc., are made out of rejected pieces of logs which would otherwise be total waste to the saw mill man, will know what we mean by saying that Bushnell tanks are made of select tank lumber. Take one of the Bushnell tanks with thick, solid, tongued and grooved staves, hooped as the Bushnell people hoop them, set it on a proper foundation and keep it painted, and hardly any stock man will need another in his lifetime. The advertisement calls attention to round and flat steel hoops, adjustable lugs, galvanizing, etc. They are all important. Don't fail to read this advertisement if good stock watering tanks of any capacity interest you. Catalog and all particulars from the Bushnell people by writing for them. See page 12.

DR. HESS, M.D., D.V.S.  
IN HIS  
LABORATORY

## Knowledge—not guesswork

Dr. Hess (M.D., D.V.S.) who formulated Dr. Hess Stock Food is a regularly licensed Doctor of Medicine and a Veterinary Surgeon. He is a graduate of the University of Wooster, Cleveland, Ohio; a graduate of College of Physicians and Surgeons, Baltimore, Md., and a graduate of the Chicago Veterinary College, and in addition is a practical stock feeder of many years' experience. Dr. Hess Stock Food is a medicinal food prepared from a highly successful prescription used by Dr. Hess in his many years regular practice before the food was put on the market. It requires only common sense to see that unprofessional manufacturers cannot equal a preparation formulated by a practical physician and based upon accurate knowledge, long experience and observation. Furthermore,

## DR. HESS STOCK FOOD

### FOR CATTLE, HOGS, SHEEP AND HORSES

is sold under a positive guarantee to do all that is claimed for it. It contains tonics for the digestion, iron for the blood, nitrates to expel poisonous materials from the system, laxatives to regulate the bowels. It has the recommendation of the Veterinary Colleges, the Farm Papers, is recognized as a medicinal tonic and laxative by our own Government, and is sold on a written guarantee at

100 lbs. \$5.00  
25 lb. pail \$1.60

{ Except in Canada  
and extreme  
West and South.

Smaller quantities at a slight advance.

Where Dr. Hess Stock Food differs is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic and this paper is back of the guarantee.

Veterinary advice given free. From the 1st to the 10th of each month by naming this paper, stating what stock you have and what Stock Food you have fed, we will furnish you free veterinary advice and prescriptions. Enclose two cent stamp for reply. Dr. Hess 96 page Veterinary Book will be mailed free for giving the above information.

**Instant Louse Killer Kills Lice.**

## IN THE GREAT SOUTHWEST.

The implement trade in the Southwest has amounted to thirty-four million dollars the past season.

Bank clearings have made a gain of eleven per cent this past year in Kansas City or in round figures have been 1,300 millions.

More than 36,000 ear loads of wheat, 15,000 of corn and 12,000 of hay have been gathered together at Kansas City from the rich country surrounding.

The reason for the great growth of business in the large cities of the great Southwest has been the opening of thousands of acres of territory in Oklahoma, Texas and adjoining states. Crops have been good and prosperity is universal. Thousands of dollars' worth of business has been lost by the difficulty of getting goods from the factories.

That kiln-dried corn is merchantable, and that the raising of the grade through kiln-drying does not impose any handicap on the commercial value of the grain, was decided recently by the advisory board of the Kansas Grain Inspection department.

Because much corn bought by large Kansas elevators originally graded No. 3, owing to dampness and was raised through the kiln-dried process to No. 2, it was refused.

Nearly half of the Indians of the United States live in Oklahoma. The new state has 105,700 Indians as compared to 284,000 in the United States.

The Kansas State Board of Horticulture has elected the following officers: Edwin Taylor, of Wyandotte, president; Edwin Snyder, of Jefferson, vice-president; Edward Hoover, of Sedgwick, treasurer, and Walter Wellhouse, of Topeka, son of the "apple king" of Kansas as secretary.

The Oklahoma Live Stock Sanitary Board has done excellent work this year in preparing for serious work in fighting the cattle fever tick during the coming years. The work of the board of 1906 has done more along this line of preparing for future attacks than in actually heading off the disease. Owing to the difficulty of the field force engaged in this work in getting board it has been decided to work in squads of six and use a camp wagon and a cook.

Two students of the Kansas Agricultural College, Clifton Stratton and Roy Graves, recently started out for their homes on the walk, a distance of 125 miles. They were to walk the distance in a given time and were to receive twenty-five cents per minute for every minute earlier than this time they reached their destination and were to pay twenty-five cents per minute for every minute later.

The state board of agriculture in its session recently held at Columbia, recommended the following appropriations: For an agricultural building, \$200,000; soil survey, \$15,000; poultry barn, \$10,000; experiments, \$25,000; other departments, \$16,000.

In the first two weeks of the opening and reading of the offers on the big pasture farms 4,508 bids had been recorded on December 29th and 3,113 still remained unopened. The highest bid received was \$5,007 for this northwest quarter section nine, township one and range eight west.

Harrison Parkman, who is said to have introduced alfalfa into Kansas, died at Emporia recently at the age of seventy-three years. Mr. Parkman first saw alfalfa growing in Chili.

Farmers' week at the Missouri Agricultural College promises to be the event of the year. It begins Monday, January 7th, and ends on Friday.

**TO CURE A COLD IN ONE DAY**  
Take LAXATIVE BROMO Quinine Tablets. Drug-gists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

## The Week in Kansas.

To the Editor of The Homestead:

The holiday week has treated Kansas like a lord, as far as weather is concerned. It has been just like a week at the commencing of fall, instead of a time when there is supposed to be snow enough on the ground for Santa Claus to use his sleigh and reindeer.

The ground has been frozen too much for plowing. Though it has been cold at

## CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted under this heading. Each number and initial letter or abbreviation counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 165,000, reaching a farm population of at least 825,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## PLYMOUTH ROCKS.

ROCKY CREST FARM is offering choice Barred Rocks, both cockerel and pullet bred lines, with score cards by Judge McClure. Prices reasonable. These birds line bred for years. At Rochelle, Ill., in strong competition, won four firsts and tied for fifth first. Eggs for sale in season. Write for prices. Member American Plymouth Rock Club. Will D. Quick, Ashton, Ill.

EVERGREEN Lawn Farm, M. Hummel, prop., Monroe, Iowa, breeder of heavy-boned Barred Plymouth Rocks for 22 years, line for sale 450 birds sired by high-scoring Iowa State Fair and Jasper County Fair first prize-winners. We won nine first prizes at the Jasper County Fair in 1905. Nothing but first-class stock shipped.

BARRED and White Rocks, Buff, Golden and Silver Laced Wyandottes. Eggs in season. Write for prices. A. L. Anderson, successor to Anderson Bros., Indianapolis, Iowa.

300 CHOICE Barred Plymouth Rock cockerels and hens. Large and healthy, narrow barred to skin. \$1.00 each, six for \$5.00. Willis Sheilbon, Merrill, Iowa.

MASON C. OGG, Fairmount, Iowa, breeder of extra large, well-shaped, nicely marked Barred Rocks. 100 choice cockerels for sale. Eggs in season.

75 BARRED Plymouth Rock cockerels for sale. Nicely barred and with large bone. Prices reasonable. L. M. Churchill, Fairmount, Iowa.

BARRED Plymouth Rock cockerels, scored and unscored. Mrs. A. S. Wilkinson, Paton, Iowa.

## LEGHORNS.

300 ROSE COMB White Leghorns, either sex \$1.00 each, lending strain. Egg producers. Circular free. M. F. Horning, Alden, Minn.

## COCHINS.

FOR SALE—A fine lot of Partridge Cochins cockerels and pullets, Geo. Mitchell strau, \$1.00 and up. Mrs. C. O. Brewer, Route 4, Atlantic, Iowa.

## RHODE ISLAND REDS.

Rhode Island Red cockerels. Extra large, good color. For sale very cheap. Mrs. J. Holmgren, Gilmore City, Iowa.

## BRAHMAS.

LIGHT BRAHMA cockerels for sale cheap if taken within thirty days. Write for prices. J. G. Goddard, R. R. 5, Box 61, Galesburg, Ill.

## GEESSE.

TOULOUSE GEESSE and ganders eight months old, weight 15 to 21 lbs. Prices reasonable. Mrs. E. C. James, Plankinton, S. Dak.

## MISCELLANEOUS POULTRY.

MAMMOTH Bronze turkeys, sired by 48-lb. tom, scored 98½; Toulouse geese, Pekin ducks, Single Comb Buff Orpingtons, Single Comb, Brown, White and Buff Rose Comb, Brown and White Leghorns. Wm. Guida, Osgood, Iowa.

PURE BRED poultry and eggs of all kinds for sale. Barred and Buff Rocks, Pekin ducks and Bronze turkeys a specialty. Enclose stamp for catalog explaining our method of business. J. F. Foy, Redfield, Iowa.

TWENTY-FIVE Breeds geese, ducks and chickens. Catalog free. Largest poultry farm in the northwest. Grant Western Poultry Farm, Rural Route No. 4, Mapleton, Minn.

MAMMOTH White Holland turkeys, Imperial Pekin ducks and Barred Plymouth Rocks from prize-winners of extra heavy weight and high scoring. Fred Post, Monticou, Iowa.

MAMMOTH Bronze turkeys: fifty from stock scoring 96 to 97. Two hundred choice Barred Plymouth Rock cockerels, \$1 each. J. C. Watts, Berwick, Iowa.

CHOICE White Wyandotte pullets, \$10 per dozen. White Wyandotte and Barred Plymouth Rock cockerels, \$1.00 each. Murtha Reeh, Emmetsburg, Iowa.

WHITE Holland turkeys, White Wyandottes for sale. Write for prices. W. A. Marsh, Jr., Aledo, Ill.

no time, the temperature has been even—very little freezing or thawing. This is the kind of weather that is just right, according to our standard.

There has been little going on in a business way this week. The folks seem to have decided that they have earned a short rest, and are taking it. A few spent Christmas in the corn fields, but very few. All except the very backward ones now have their corn in the cribs, or are near enough through so they did not spoil a holiday with work.

The neighborhood below us organized a hunt, with rabbits for the game. The side that won ate oysters at the expense of the losers. In all, 370 rabbits were killed. As we are better off without the rabbits, and no one was "accidentally shot," the day was well spent.

The roads have been good for the past week, making traveling not dreaded and

## REAL ESTATE.

TEXAS FARM for sale. Section of valley land near Vernon; produce anything; sandy loam. Write to owner for details. Joseph W. Laud, owner, Vernon, Texas.

TO EXCHANGE for clear eastern farm. 3400 acres grass land and 1400-acre farm, central Kansas, clear of incumbrance. J. B. Cramer, Kiowa, Kansas.

FOR SALE. A fine lot of farm bargains in east Kansas. Any size; write for free list and map. Iler & Mansfield, Garnett, Kansas.

FOR QUICK SALE. 8,000-acre improved ranch, Central Kansas, \$4.50 per acre, no trade. J. E. Cramer & Co., Kiowa, Kansas.

800-ACRE well improved farm near Fessenden, N. D., 640 acres under plow, for sale at \$35.00 per acre. F. G. Riedesel, Oto, Iowa.

EASTERN Colorado farm land, \$6.00 to \$8.00 per acre. No irrigation required. Large crops of corn and small grains. Name this paper. F. C. Lougee, Council Bluffs, Iowa.

A BARGAIN—214 acres, well improved, one mile from railroad and creamery, five miles from county seat. Write owner for particulars. Box 76, Osgood, Iowa.

BAYFIELD County farm lands. I own and have for sale all sorts of lands close to Washburn. Low prices; easy terms. O. P. Swallow, Washburn, Wis.

NOTICE TO HOMESSEKERS—If you want homes in eastern Kansas please write for lists of land. Burger Brothers, Burlington, Kan.

640 ACRES top wheat land for sale direct to purchaser, less real estate dealer's commission. J. Q. Voyles, McCracken, Kansas.

## CREAM EXTRACTOR FREE

This is a genuine offer made to introduce the PEOPLES CREAM EXTRACTOR in every neighborhood. It is the best and simplest in the world. We ask that you show it to your neighbors who have cows. Send your name and the name of your nearest freight office. Address PEOPLES SUPPLY CO., Dept. 150, Kansas City, Mo.

our fine "Italian" weather coming to a more or less abrupt close. We hope not; yet it may be as some say, if we do not have our winter soon, we'll catch it in the spring. Henry Hatch. Coffey Co., Kan., Dec. 26, 1906.

Regarding the Litchfield Continued Story, we wish to call attention to page 5 where they tell you "How It Happened."

## ADDITIONAL FIELD NOTES.

## LARGE LAND DEALERS.

One of the largest deals of the year has just been closed by the Western Land Company, of Des Moines, Iowa, which gives them control of 300,000 acres of the richest lands in the Panhandle and southern Texas lands. This section has been held out these many years by ranchmen, but the constant incoming of immigrants has used up all the surrounding lands available and compelled them to sell. It is the plan of the Western Land Company to run their own special car to this section every first and third Tuesday of the month. They are in a position to quote you some unusually low prices, due to the vast amount purchased in one deal. They are also in close touch with the railroads and can secure very low rates for your trip down there. There is no part of the country that is attracting more attention now than this section, which gives so great promise of advance in values. Write the Western Land Company, whose advertisement appears on page 26 of this issue, at 530 Good Block, Des Moines, Iowa, and they will send you a descriptive catalog, giving location and prices.

## THE HOMESTEAD DOES THE BUSINESS.

A recent letter to one of our traveling representatives from Mr. William D. McTavish, the prominent breeder of Berkshire swine, of Coggon, Iowa, says: "Boars all sold and am tired answering so many inquiries. Please make this fact known to your Homestead readers. I have the best lot of large, lengthy, heavy-boned Berkshire gilts bred for April and May farrow that I have ever owned. They are bred to four of the very best boars in the West, namely, Lee Duke 2d 65576, Ringmaster 96330, Corporal 96281 and Black Premier, a grandson of Premier Long-fellow. You can say that these sows will be priced at from \$35 to \$50 safe in pig, but for goodness' sake stop those orders for boars. Tell your Homestead readers that if they want boars from Chapel Hill they must get their orders in early next summer for the boar trade." We can truthfully state that Mr. McTavish is one of the most painstaking breeders of Berkshire swine in the middle West. He is the gen-try of Iowa, is thoroughly reliable and perfectly safe to deal with. A Homestead representative has seen the gilts above referred to and can heartily recommend them to all our readers as being strictly choice from every point of view.

## IAMS' SWEEPSTAKES PERCHERON AND BELGIAN STALLIONS AT NEBRASKA STATE FAIR, 1906, LARGEST PAIR FOUR-YEAR-OLD IMPORTED STALLIONS IN THE UNITED STATES, WEIGHT 5,080 POUNDS.

Mr. Middleman—"You can't preach and rob your neighbors, too," by helping that "slick stallion salesman" sell that fourth-rate stallion to twenty neighbors for \$4,000. "It's up to you," Farmer John! Form your own "horse company," then keep a "pushin' and a shovin'" until you arrive at Frank Iams' "town of stallion barns," St. Paul, Neb. Then "butt in," buy a "Peaches and Cream" stallion at \$1,000 or \$1,500 of Iams, so good that he will make that "\$4,000 company stallion" go back behind "the old apple tree" and wish he was in his own class working with the old (gentlemen gelding horses), and you will save \$1,000 or \$1,500 and get a stallion that will be a "king in a bunch." The fact that Iams imported or bred the stallion stamps him as a "top notcher," as Iams' reputation as an expert horseman and "square dealing" business man is well known in the United States and Europe. No importer of stallions is so widely known as Iams, of Nebraska. His stallions are living advertisements for him, and his old customers are always his best friends and many of them he has made wealthy. Iams is proud of the enemies he makes in the way of "hammer throwers." He makes them all "squirm and wiggle" because he is the stallion buyer's best friend, saving them thousands of dollars annually in middlemen's profits and commissions. Iams' "horse show" at Illinois, Iowa and Nebraska State Fairs was an "eye opener." He had the "big black boys" better than the pictures. They said, "Iams has competitors beat a mile." No wonder they want Iams' stallions "barred" from the "show ring." Iams is cutting the "middle" out of "high prices." He has 160 "top notchers," two to six years old, weight 1,600 to 2,500 pounds, 90 per cent blacks, 50 per cent ton horses, and they are all "up in the air" looking for a new owner. Iams' twenty-five years of successful business is his best recommendation to buyers. If you visit him and do not find every statement made in his advertisement or catalog true, you can get that \$500 he hangs up. He furnishes \$1,000 or \$1,500 insurance. You say, "Why can Iams sell better stallions at half price of others?" Iams buys and sell every stallion himself at his home barns. He buys stallions by "special train load," eighty or 150 at a time. He speaks the languages, saving you 20 per cent. He is not in the "stallion trust," saving you \$300. He pays no "slick salesman" \$100 to \$1,000 to sell you a fourth-rate stallion. He has no two to ten men to share profits with. He pays spot cash for his stallions; owns his farms, houses, barns, stocks and stallions. He sells

stallions by "bot advertising" and baving the goods to make every statement good. Iams sells stallions so good they do not need a "slick salesman" or the auction block to sell them. Our illustration is Iams' Trallala, four-year-old Percheron, sweepstakes winner at Nebraska State Fair and defeated the champion prize winner of France at Iowa State Fair in 1906; Tosteau, four-year-old Belgian, sweepstakes winner at Nebraska State Fair, 1906, largest pair of stallions in the United States, weight 5,100. A sensational, big-class, big-boned drafter of symmetrical proportions. A "wide-as-a-wagon" stallion that makes buyers take their number and ask for a "second look." He storms down the avenue like a "whirlwind." He is "Iams' kind." "Ready money." Iams' daily "horse show" will set you "going some." He will suit you in stallions at "cut rate prices." His "selling clothes" fit all buyers. You won't get away from Iams with your money or bankable note. Write for eye-opener or catalog.

## THE ANGUS AUCTION AT SOUTH OMAHA, JANUARY 18TH.

It is likely that no man in America has had as much experience as Mr. W. C. McGavock, of Springfield, Ill., in the selling of pure-bred Angus cattle, and he wishes it distinctly understood that the offering to be sold at Omaha on January 18th is one of the best that he has ever made and absolutely the best of the breed that he has ever cataloged for an Omaha auction. Mr. C. B. Gray, of Corwith, Iowa, is selling four sons and daughters of Imp. Prince Ito, the \$9,100 and record-breaking champion bull, and they are from Blackbird, Barbara and Crocus dams. He also includes a Blackbird bull by Bell's Eclipse, the sire of Black Woodlawn, one of the greatest bulls of the day. Mr. W. D. Reynolds, of Villisca, Iowa, catalogs some of the best specimens of the champion producing Drumin Lucy family that have gone under the hammer within recent years. Messrs. N. G. Daughmer & Son, of Douglas, Ill., catalog ten sons and daughters of the double Blackbird bull, Blackset, a first-prize winner at the American Royal, and an international prize winner and son of the sire of champions, Black Monarch of Emerson, and the dam of champions, Blackcap 5th. Messrs. Barr & Lonecker, of Dexter, Iowa, consign a very highly-bred Blackbird bull and some high-class females along with him. Mr. M. H. Knudson, of Farmingdale, Ill., and B. H. Keck, of Cornland, Ill., also have choice consignments. The catalog will prove interesting to all friends and admirers of the breed and it should be in the hands of all. It can be obtained by addressing Mr. McGavock at Springfield, Ill.

## OREGON OPPORTUNITIES.

The Portland, Oregon, Daily Journal, in a recent issue, had the following in regard to the work being done in the interest of Oregon by the Oregon Development League and the Portland Commercial Club: "The Portland Commercial Club is receiving about 500 letters a day inquiring about Oregon resources and opportunities. The larger part of the letters are from farmers in the middle West, who have been moved by one influence or another to consider changing their residence to the Pacific Northwest. The inquiries are being distributed among the sixty-three organizations forming the Oregon Development League. A great deal of this correspondence is being carried on through the name of the Oregon Development League. The letters received are answered, giving the information desired about each section of the state where the seeker for information may find conditions suitable to his needs. The man who wants to raise Angora goats or wool is told where he can find conditions right for that industry. The fruit grower, the agriculturist, the mill man and the manufacturer are given special attention. The dairyman is told how western Oregon especially is adapted to his business, with green pastures the year round, and high prices for milk and butter. It is really difficult for a resident in any section of the East to make inquiry about anything that Oregon cannot furnish in the line of opportunity. This great state is singularly wide in its business latitude as well as its area. It furnishes openings for the eastern sugar beet growers,

## ONE MONTH FREE

"Belvidere, Neb., June 5, '06.

Dr. T. F. Williams,  
Des Moines, Iowa.

Dear Doctor:—I am feeling excellent at this writing. I have not used more than half of the last treatment, and I think it is needless to take it any longer.

I have a ravenous appetite. I think I could almost eat an iron wedge, I feel that strong.

I shall continue to use the inhalation. I think the little Inhaler a wonderful institution. I find it a preventive of headaches. I have had "others" try it and they say it is ALL RIGHT.

Wishing you success through the remainder of your life, I am,

Very respectfully,

(Miss) Hannah Houts, R. F. D."

"Alva, Okla., April 20, '06.

T. F. Williams, M. D.,  
Des Moines, Iowa.

Dear Doctor:—I am feeling so well that I really see no necessity of continuing the treatment. I have a good appetite, bowels are very regular, and I have gained ten or twelve pounds in flesh since taking your treatment. I have a part of the medicine left, which I do not think I will need to take.

My lungs are not uncomfortable any more and my hearing is good. If I should need any further treatment I shall be glad to write you again. The medicines are all right and I think the Vaporizer is fine.

Thanking you for good health, I am,

May God bless you and your remedies."

T. F. WILLIAMS, M. D.  
Consulting Physician.

Yours truly,  
Joseph Kiss, Box 69, R. F. D. No. 3.

## MCLEAN'S SHORT-HORN SALE.

On January 14th at Rock Valley, Iowa, Mr. W. J. McLean, one of the most prominent Short-horn breeders in northwest Iowa will sell a draft of forty-two head from his well-known herd. It is with extreme pleasure that we call the attention of Homestead readers to his sale. The cattle that he will offer at this time are an especially choice lot, and the sale is not lacking in Scotch. In fact, he is putting in some of the very best that he has in the herd, there being seven head of Scotch females and four Scotch bulls. The most prominent families are Victoria, Mysie, Matchless, Narcissus, Generosity and Honey Flower, and these are well along in calf or with calf at foot by the splendid Victoria bull, Valley Sovereign, Morning Joy and other well-bred sires. The Scotch-topped sorts Mr. McLean is selling in this sale are as good as he has. These have from three to five and six Scotch tops on them, and as individuals they are

as good as have been sold anywhere in late years. One of the best things that Mr. McLean will sell in the sale is the splendid cow, Imp. Celia 9th. She was sired by the Durbie bull Proud Star, is a roan in color and is bred to Choice of Archers, considered one of the very best breeding bulls in northern Iowa. She is a Miss Ramsden, and is certainly an attractions that should call forth our very best breeders. Another very choice three-year-old is Golden Lass, a daughter of Sittytown Hero, and she is due to have calf about sale time by the noted show bull, Ceremonious Archer. Queer Victoria 7th is a richly-bred two-year-old Victoria heifer and she is safe in calf to Valley Sovereign. Mysie Lady is a seven-year-old daughter of Abiquill. She is a Mysie and will also be bred to Valley Sovereign. Generosity of Lakewood is another of the good ones and she will have a bull calf at foot by Morning Joy. Evelyn of Lakewood is another of the plums and she is well along in calf to Morning Joy. Besides these is a grand lot of Scotch-topped cows, many of which will have calf at foot, and others well along in calf. He is selling a good bunch of bulls, some of

LADY WONDER.

Lady Wonder, a litter sister to the great Crimson Wonder, to be sold in the closing out sale of W. W. Wheeler, Harlan, Iowa, January 16.

which are straight Scotch. Sittytton Chief is a good, strong, vigorous roan bull. He was sired by Sittytton Lad and his dam was Imp. Henry Flower. He is selling a richly-bred Narcissus bull, and also sels a son of Ceremonious Archer. Viscount of Ogile is a good bull proposition and is a son of Golden Charity Prince. There are several good young bulls in the offering, and the sale as a whole is a high-class one. Write Mr. W. J. McLean, Rock Valley, Iowa, for catalog and kindly mention The Homestead. FAIRCHILD & STEVENSON'S DUROC JERSEY SALE.

The opening of the Duroc Jersey sale season begins at Onawa, Iowa, on January 11th, when Messrs. Fairchild & Stevenson sell fifty head of sows and gilts. This is their first annual brood sow sale, and of course they are anxious to make a good one, and in consequence have drawn on some of the best they have in their herd. This herd has been built up along the very best blood lines and it ranks along with the best in western Iowa. It came rather prominently before the Duroc Jersey world this year, because at the head of the herd stands Orion's Profit, the sire of the Minnesota sweepstakes boar, Dale. In the sale will be a number of daughters of Orion's Profit and there will also be a good sister of the noted winner, Dale. Her name is Rose Orion and she is No. 3 of the catalog. She was bred to Prince Tolstoy, a grandson of old Tolstoy, the sire of Crimson Wonder. A number of the sows are sired by Advance Lad, a full brother to Proud Advance, and a boar that was used in the herd of Messrs. Manley & Co., of Lyons, Neb. Some of the sows are bred to Happy Medium, a son of the noted boar, Junior Jim, and out of a daughter of Orion. This boar is owned jointly by Messrs. Manley & Co. and Fairchild & Stevenson, and he is one of the good young hogs now used in the West. Three aged sows that will be sold are daughters of old Long John, and these are all bred to Orion's Profit. There are a number of excellent young gilts in the sale sired by Orion's Profit and Advance Lad, and the breeder who wants something bred in prize-winning blood will not make a mistake in attending this sale. Write Messrs. Fairchild & Stevenson, of Onawa, Iowa, for catalog and kindly mention The Homestead.

#### HAMMER SELLS DUROCS JANUARY 17TH.

On January 17th Mr. John Hammer, of Greenwood, Neb., will sell a draft of Duroc Jersey hred sows from his herd that should be sought for by the breeder and farmer who is looking for the right type of Duroc Jersey sow. They are large, heavy-bodied, broad-backed sows that are pleasing to the eye of the hog man and are bred along the right lines. It will be remembered that this is the home of Happy Hollow Chief 46277, one of the very best sons of the great boar, Crimson Wonder, living today. This hog is an extra good individual and has proven a great breeder, as you will notice by looking over his gilts on sale day. He is the sire of the greater part of the gilts in this sale and those not sired by him will be bred to him. This boar is assisted by Nebraska Chief, a very good son of Ohio Chief, which Mr. Hammer is crossing on his Happy Holly Chief gilts, and something extra good can be expected from this cross. Mr. Hammer has also purchased a grandson of Tip Top Notcher which he will use to some extent on a number of the sows going in this sale. He will offer about forty head in all, of which the majority will be gilts, including two daughters of the great Ohio Chief. There will also be a number of aged and yearling sows that should attract buyers from all parts of the hog raising belt. We can recommend these sows to anyone looking for the right kind of useful stuff, being very growthy and richly bred. Remember the date, January 17th. Parties from a distance can reach the farm by going to either Ashland or Greenwood where free hotel accommodations and transportation to and from the farm can be had. Write for a catalog which is now ready and arrange to attend the sale. Mr. C. E. Olsen, of Colon, Neb., will sell the day following, and Mr. Jacob Wernsman, of Cedar Bluffs, on the 19th. Arrange to attend the circuit.

#### H. J. HESS, OF WATERLOO, IOWA, SELLS ABERDEEN ANGUS.

Pursuant to an announcement that will be found in another part of this paper. Mr. Harvey J. Hess, of Waterloo, Iowa, a well-known breeder of Aberdeen Angus cattle, will sell at the new pavilion in Waterloo, Iowa, forty-eight head of choicely-bred doddies, represented by the following families: Trojan Ericas, Prides, Blackbirds, Queen Mothers, Coquettes, etc. Mr. Hess has been a breeder of Aberdeen Angus cattle for a number of years and has been a conspicuous figure around the leading ring sides where choice Aberdeen Angus cattle were offered for sale, and has been a stubborn bidder for the best things that met his approval and for which he had a desire to own. The sale catalog of Mr. Hess is now out and shows a rich line of Aberdeen Angus blood. Few breeders of Aberdeen Angus cattle are in position to offer a better lot, except it be that they are making a dispersion sale. A goodly number of cows will sell with calves at foot. Mr. Hess makes a liberal guarantee on every animal sold to this extent, that every animal of breeding age is guaranteed a breeder, and if they should not prove to be, after six months' trial, they may be returned to him under certain conditions, but if such animals should prove barren, the purchase price will be refunded. A heifer of superior breeding will be noted in Lot 1 of the catalog, Ethel of Quietdale, by name; she was sired by Pabno and he by Baltimore of Gendale and he by Golden Abbott by Guinea. Ethel of Quietdale is out of Imp. Ellora 4th of Tullylany; she is a beautiful Pride-topped Trojan Erica and has coursing her veins the blood of some champion bulls at the Highland Society shows. Better Trojan Erica blood would be hard to find. Another splendid individual of the same family is Elba of Quietdale, sired by Ebony of Quietdale and out of the imported cow, Elapis. She represents the richest of the Erica blood and is individually as good as her rich breeding would indicate; in fact, Mr. Hess considers her one of the top notchers of his offering. One of the choicest-bred Blackbird heifers in the offering is Blackbird of Quietdale 3d. She was sired by Prince Eryn of Quietdale and out of Blackbird McHenry 8th; she by Heather Lad 4th. She is not only a typical doddie, but has the

appearance of making a great producing cow; her sire is a Pride-topped Trojan Erica bull, and her dam is a great show and dam of show animals that has gained for herself a reputation that might well be envied by any breeder of Aberdeen Angus cattle. The purchase of this beautiful heifer would afford some young breeder an opportunity to start a herd of Blackbirds on a foundation that would never need any apology. If indeed she can be surpassed, it would be by Blackbird of Quietdale 4th, sired by the same bull, and out of a half sister to Blackbird of Quietdale 3d. This is a low-down, thick-set, typical doddie, possessed of all the requirements necessary to make up the ideal Aberdeen Angus type, such as all breeders love to put in their herd. Her dam was sired by Imp. Progress, a Mulben Pride. She is considered the equal of any Blackbird that has ever entered the sale ring. A splendid Pride heifer is listed as Lot 8, Pride 3d of Quietdale. She was sired by Quibo of Cranewood and out of Imp. Pride 3d of Dargfield. This is also a Mulben Pride cow and her sire was cut of the famous show cow, Lucia Estel 2d, a show cow that stood without a peer in her day. She is a full sister to the \$3,050 bull, Gay Lad. This is an exceptional heifer and one considered good enough to have her picture taken for the catalog. A fitting companion to her is Pride 4th of Quietdale, sired by Blacklawn Lad and out of Pride of Cherokee, she being sired by Pride 11th of Braevail, her dam Pride of Dalmeny 6th out of Pride of Aberdeen 13th. The breeding from a Pride standpoint could scarcely be

GRAND LOOK 38305

The above is a correct photo of the great hog, Grand Look, owned jointly by H. C. Dawson & Sons, Endicott, Neb.; Wm. McKeever, Hubbell, Neb., and John Bakewell, of Endicott, Neb. He was first in class at Nebraska State Fair this fall and first and sweepstakes at Kansas State Fair and St. Joseph Interstate Fair. Several of the very best sows in the Dawson sale at Fairbury, Neb., January 12th, will be bred to this hog.

Improved upon and in individual merit she is par excellence. Another of the same family is Lot 19, Pride of Fashion 3d, sired by Imp. Baron Inca and out of Pride of Fashion by Imp. Postboy 5th. Her sire is unquestionably one of the best doddie bulls that has come to America in recent years; his sire was Prince Inca, champion of the Royal and Highland Shows of 1892. Prince Inca's dam was the renowned show cow, Pride of Inveresbie, also the dam of the noted bulls, Prince Inca, Prince Illad and Prince Ito. Baron Inca himself won ten first prizes, nine challenge cups and six Polled Cattle Society's champion gold medals before being imported into America. This is a splendid heifer and will be a very large cow; hence is not quite so close to the ground as the major portion of the offering. There will be about thirteen bulls in this sale, and the remainder cows and heifers suitable to be placed in any herds that wish aristocratic breeding. The particulars of this sale are set forth on page 33. Application for catalogs of this important sale should be made direct to Mr. H. J. Hess, of Waterloo, Iowa, mentioning The Homestead.

#### WHEELER'S DISPERSION SALE OF DUROCS.

On Wednesday, January 16, 1907, at the sale pavilion in Harlan, Iowa, the well-known breeder, Mr. W. W. Wheeler, will dispose of his entire herd of Duroc Jerseys at public auction. Mr. Wheeler regrets to part with his herd, but a pressure of other business compels him to do it at this time. No man has bought better than Mr. Will Wheeler, and in no herd in Iowa will be found a better line of fashionable Duroc Jersey blood. He will sell three sisters of the noted boar, Crimson Wonder, and one of these is a litter sister. He also sells a daughter of the great Orion in this sale and a daughter of old Duroc Challenger. There will be thirty-three gilts in the sale sired by Carmine Wonder, a half brother to Crimson Wonder, and also by Scarlet Wonder, a son of Pericles, and out of a full sister to

Crimson Wonder, and there will also be a number sired by Belle's Perfect King, a son of the noted sweepstakes sow, Nebraska Belle. These are all bred to a grandson of Ohio Chief and Improver 2d. In the sale will be an opportunity to secure the blood of the winners. Every Duroc that he has will be sold, and we know of no better time to secure some of the tops than he will offer on this occasion. When he laid the foundation for this herd it was the pleasure of a representative of this paper to be present on many an occasion when he bought, and we want to say that we never saw Mr. Wheeler buy a poor sow, but on the other hand always secured the very best sows to be sold. He was not only a painstaking and exacting buyer, but he always was after the good ones and never hesitated to pay his good money when he found what he wanted. The boars that have been used in the Wheeler herd have been the best that money could buy, and it is the get of many of these that he now offers in this dispersion sale. Many of these sows could not be bought were it not that Mr. Wheeler has decided to close out. Breeders and farmers get the benefit, therefore, and this will be one of the sales that it will pay the boys to attend. Write for his catalog and kindly mention this paper.

#### WINTER HOG TROUBLES.

Now that winter is on in full force, its effects are seen in the unhealthy hogs. The fall pigs that are wormy, or out of condition, are not growing. The older hogs are not getting ready for market as they would if they were clear of worms. In many

which will suit the most discriminating breeder. It is only in dispersion sales that the public is given an opportunity to secure an animal of such merit as Buddy K. IV., and they should not be slow to grasp the opportunity given in this noted dispersion sale. Twenty-two tried brood sows from one to three years old, five of which are sired by Buddy K. IV.; seventeen bred to Buddy K. IV., and four yearling sows by this noted sire, together with twenty spring gilts by him, make up part of the offering. Ten yearlings by such noted boars as Tip Top Notcher, Proud Advance, Hanley, Gold Cloud, Major Jr. and other sires of equal merit will please breeders present sale day. Many of these are bred to Buddy K. IV. In our next issue we will have more to say regarding this offering, but would advise our readers to write at once for illustrated catalog, kindly mentioning this paper.

#### McGAVOCK'S SHORT-HORN SALE AT SOUTH OMAHA.

On the first day of the great three days' auction to be held under the management of Mr. W. C. McGavock, of Springfield, Ill., at South Omaha, January 17th, 18th and 19th, Short-horns will be sold. Mr. McGavock characterizes this as the best all-round offering of Short-horns that he has ever cataloged, and this is indeed high praise. Many western breeders who have attended his auctions can testify as to the superiority of the cattle composing many of these events. The largest consignors to the auction are Messrs. Hadley & Leach, Cedar Rapids, Neb., and it would indeed be difficult to find a grander string of thick-fleshed cows of grand scale and conformation than these gentlemen will present on this occasion. The bull, Prosperity, a high-class show animal, and both his bulls and heifers in the sale will show that he is also a getter of show stock. Rarely has such an offering of cattle been made from any herd. It is not only good individually, but the cows demonstrate by their produce in the auction that they are absolutely good breeders. In a future issue, notes concerning the blood lines of these cattle will be given. S. E. Prather Company, Sherman, Ill., are consigning to the auction a half dozen high-class young cows and heifers, two of which are of the Cruickshank Secret family and absolutely straight Scotch. Several high-class stock bulls are cataloged and further particulars will be given later. One of the best sires imported within recent years, we hear, will be cataloged and breeders and farmers generally are asked to attend this sale and see one of the most magnificent collection of Short-horns ever assembled for a public auction. Catalog can be obtained by addressing W. C. McGavock, Sale Manager, Springfield, Ill.

#### DAWSONS SELL PRIZE-WINNING POLAND CHINAS JANUARY 12TH

On January 12th Messrs. H. C. Dawson & Sons, of Endicott, Neb., will offer a very choice lot of bred sows at public auction, sale to be held in Fairbury, Neb. This we consider an offering that any man would be proud to run through a sale ring. They are what Messrs. Dawson & Sons consider the very best offering they have ever put before the public, being mostly of the blood of old Expansion, the sire of more of the large type of Poland Chinas than any hog living. That it is possible for a breeder to produce such an offering is because he has used breeding stock of the right type and noted for its size and quality. Any man who desires to trace through the catalog of Messrs. Dawson & Sons will find that the sires and dams of his herd boars, as well as his old tried brood sows have been great breeding animals, producing some of the greatest prize-winning animals known to the breed. It is with these great sires and dams and the use of proper judgment in mating this great breed of hogs that Messrs. Dawson have been able to breed this great herd of Poland Chinas to its present standard of excellency. The offering will consist of most of their show herd which won many of the ribbons at the leading shows last fall. These great sows will be bred to such boars as Grand Look, the first-prize hog over twelve months at the Nebraska State Fair this fall, also winning first and sweepstakes at the Kansas State Fair and St. Joseph Interstate Fair. There will be quite a number bred to old Expansion. Every sow to be sold in this sale is a good one and their produce is what will be called next year the Expansion-Grand Look cross, so send for a catalog and arrange to attend the sale. Fairbury is a good railroad point and can be easily reached from any direction and parties attending the sale will be able to find trains to most any point after the sale. In writing for catalog please mention The Homestead.

#### PILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

We wish to call the attention of our readers to the dispersion sale of the Pawnee herd of Duroc Jerseys owned by Mr. Ed A. Baxter, of Pawnee, Ill., which occurs on Wednesday, February 6th. The writer representing this paper has inspected the offering and is pleased to recommend it to our readers as one of the best to go under the hammer this year. This is positively a closing out sale. Mr. Baxter has fully made up his mind to close out his entire herd. Buddy K. IV., champion at Illinois State Fair and one of the best breeding boars ever produced, sells at the high dollar. Mr. Baxter will place no reserve bid of any kind upon this noted sire and the breeders in search of a prize winner and breeder of good stock will find in Buddy K. IV. the boar

HORTICULTURAL TOPICS

NOTES FROM THE HORTICULTURAL MEETINGS.

The horticultural societies in a great many states are devoting a large portion of the time at their annual meetings to discussions upon the San Jose scale. Iowans may well be thankful that that pest has not yet invaded their state. Prevention should be the slogan and quarantine and inspection laws should be made very strict and rigidly enforced.

Spraying has come in for its share of discussion. The consensus of opinion seems to be that the dust spray is unsatisfactory and its use not to be commended. Reports from various experiments are to the effect that it pays to spray winter varieties of apples about August 1st for the late brood of codling moth. The late brood is responsible for all the wormy apples, as those that are affected by the early brood fall in early summer. The second brood is the offspring of the first and as complete destruction of the early brood is never possible, those which survive the crusade of poison have sufficient progeny to accomplish much havoc. The date of appearance of the second brood is somewhat irregular and covers a much longer time than that of the first brood. But spraying with an arsenate between July 25th and 27th and August 3d and 6th has proven most satisfactory.

But the questions of storage, marketing, commission rates and freight rates were a predominating feature in nearly every meeting, showing that horticulturists feel competent to produce fruit of good quality and are now chiefly concerned with the problems of turning it into cash. Many complaints were made that at the time when the fruits had to be harvested, particularly apples, the price was very low. There was no alternative but to leave the fruit upon the tree. As a consequence someone who is undeserving is now reaping an enormous profit from the great apple crop, while the man who produced the apples is debating whether or not to cut down his trees and devote the ground to corn.

In this connection it is pleasing to note that a company is being formed to install a \$50,000 cold storage plant at Council Bluffs. This is in the heart of a great fruit country comprising southwest Iowa, northwest Missouri and eastern Nebraska. It is only a short distance from "Queen Mills." Iowa's banner apple county. This venture and others similar to it, if properly conducted, and particularly if put upon a co-operative plan, we predict will be of more benefit to apple growers than anything of recent years.

Berries for the Farmer.

To the Editor of The Homestead:

During the winter every farmer who owns his home should plan to set out a berry patch in the spring. Many seem to think that berries entail too much labor for the average farmer, but this is a great mistake. Some work, of course, is involved, but it is light and quickly accomplished and most of it can be done at odd times that would otherwise be wasted. If a trial is made, I predict that after one or two crops, there will be only one sentiment in the family as to the profit and pleasure afforded by the berry garden. No one who has not raised berries can imagine their fruitfulness under good treatment.

A plat alongside of the garden and protected from stock and poultry, is a convenient location. A rich soil—the richer one better—is essential to large crops and plump, juicy berries. Plant black and red raspberries, early and late blackberries, gooseberries and strawberries. For varieties I should recommend Kansas and Cumberland for blackcaps, and King and Loudon for red raspberries. Early Harvest and Snyder for medium and Taylor's Prolifer for late for a succession of blackberries. Houghton and Downing for gooseberries, and Michel's Early, Dunlap and Aroma to cover the strawberry season. The varieties mentioned are all bi-sexual and

HIGHEST GRADE & SPECIALTEST

TRUE TEMPER

FARM AND GARDEN HAND-TOOLS

AMERICAN FORK & HOE CO. CLEVELAND, OHIO

The best tools you have ever bought

Same prices you have always paid

That's what the "True Temper" Label on your Farm and Garden Hand-Tools Stands for

STUDY it well. Because the better you know "True Temper," the more you will appreciate how much it means to you.

The Forks, Hoes and Rakes we manufacture have long been famous for their excellence. Some of our brands are nearly three-quarters of a century old.

But we also make many other Hand-Tools of valuable special-purpose features which are not generally known.

Moreover, farmers and gardeners need them and are anxious to have them, when their time, labor and money saving advantages are known and appreciated.

For that reason we adopted advertising to tell you about our hundreds of Farm and Garden Hand-Tools.

But first the combined knowledge and skill of all our manufacturers were called into council, and the best process for making each kind of tool was formulated and adopted. In fitting testimony of

the high quality represented by this standard process, it was named "True Temper."

All tools must pass tests and inspections, and only those which prove true in quality, construction, "hang" and temper are labeled "True Temper."

That is why "you know a tool is just right when it is "True Temper."

Every farmer and gardener knows the importance of the "hang" of a Hand-Tool. If it is correct, the tool helps in the work. If it is awkward, the tool hinders. "True Temper" tools are the kind that help.

"True Temper" tools also have those rare qualities of toughness and elasticity of temper which are so much sought after by makers and users of tools.

The line includes Forks, Hoes, Rakes, Hooks, Weeders, Cultivators, Beet Tools, Floral Tools—every desirable pattern of Hand-Tools.

Ask Your Dealer For TRUE TEMPER Tools

Write for our FREE BOOK, "Tools and Their Uses." It shows hundreds of special-purpose tools and tells you how to save time, labor and money. Just drop us a postal today.

SEED CORN SOLD ON APPROVAL

Test it any way you please for ten days. If not perfectly satisfactory, return at our expense and money will be refunded. Best and largest yielding varieties: Sutton's Improved Boone Co. White; Sutton's Favorite White; Reid's Yellow Dent; Gold Standard Learning and Premium Yellow Dent. All corn carefully selected, placed in our mammoth dry house and perfectly dried with steam pipes and air shafts. From 600 acres we selected 8000 bushels of fine seed ears. When sold we quit, so order now. We handle no outside corn. Shipped in the ear (Bushel box crates) or shelled. All shelled corn rubbed at both ends and graded. The highest germinating power, and stands cold spring rains better than common corn. Letters from Iowa, Missouri, Ohio and Illinois this year, state that our corn out-yielded all other, making from 85 to 125 bushels per acre. Send for catalog and read these letters signed by the parties raising the corn. The actual test is what talks. My seed corn may double your yield. Write for illustrated Seed Corn Book and samples. Free. Address My ad will appear every other week. C. D. SUTTON, Dept. D., Mason City, Ill.

no attention need be paid to the order of the rows.

All the above kinds of berries should be planted just as early in the spring as the ground will permit. An hundred plants each of raspberries and blackberries and two dozen gooseberries, and an hundred each of the three varieties of strawberries will afford a family supply. Learn how to prune—the shrub fruits and hoe and cultivate them enough to keep down weeds and grass. Strawberries for the farm I will deal with at some future time.

L. R. Johnson. Missouri.

The Pure Food Law.

To the Editor of The Homestead:

The effect of the pure food law will be greater upon fruit growing than upon perhaps any other industry. In times gone by a very small percentage of the fruit preparations upon the market would have passed inspection and such goods will not be saleable under the new order of things. The result will be that many concerns will be obliged to go out of business or get inside the law. Many will do the former.

In the meantime the manufacture of prepared food products from pure fruits will undoubtedly take a great boom. In times past it was simply impossible to put up any product containing nothing but pure fruit and cane sugar and sell it in competition with the common brands upon the market. Little wonder this when the nature of the ingredients of the compounds are inquired into.

Samples of strawberry jam were found to be absolutely innocent of strawberries. The seeds were there, 'tis true, but they were clover seeds; the sweetening was glucose, the color aniline dye (a coal tar product) and the flavor had been manufactured in a chemistry shop. Other instances are as flagrant. Ap-

SPRAYING FRUIT TREES

is no longer an experiment, but a necessity. Prevents wormy fruit by destroying all insect pests and fungus diseases. Every farmer, gardener, fruit or flower grower should write for my free catalogue, describing 21 styles of Spraying Outlets, and containing a full treatise on spraying fruit and vegetable crops, and much valuable information.

WM. STAHL SPRAYER CO., Box 103 L, Quincy, Ill.

ple butter was found to be pumpkin butter colored and flavored in the same manner as the strawberry jam. A fine rosy red cherry which the soda fountain man put upon the "sundae" was dropped in water. The water immediately turned red and a woolen stocking which was dipped in it colored as quickly as any dye could color it, and as permanently. More water was added and the operation continued over and over again, and in the end, behold, the cherry was green.

Jellies were found to be made of gelatin, not fruit juice, and colored and flavored to imitate the real. Canned fruits were wholly composed of either green or decaying specimens and the process of decay held in check by acids and preservatives.

Yet all these rank outrages were foisted upon the public under a stock label which guaranteed them "Absolutely Pure." And if anyone attempted to put up an honest article and sell it at a reasonable price, he was promptly branded as a cheat.

These facts have been known to those who cared to investigate for a number of years. They have been preached

from the housetops with but little result. At last after most strenuous efforts we have both state and national pure food laws. The former apply only to local business (inside the state), while the national law applies only to articles which are to be sent outside the state in which they are manufactured. Between the two the citizen of any state which has an adequate pure food law have ample protection against adulterated foods.

From humanitarian motives everyone should do his part to see that these laws are enforced. But the horticulturist is interested from a standpoint of dollars and cents, for their enforcement means to him a market for all that can possibly be produced in his industry.

Franklin Brown.

Polk county, Iowa.

#### Cow Peas as a Hay Crop.

To the Editor of The Homestead:

The last of June we went into our wheat stubble with a riding lister having an eight-hole plate in the hopper which allowed four peas through at a time. We decided that this planted too many peas so we put lead rings in each hole of the plate in order that only two peas could be dropped at a time. After the peas were up we harrowed them and cultivated them once.

The peas were ready to harvest the latter part of August and then we began to reap the harvest of our mistakes. In the first place, the rows in which we planted four peas to the hill had three times as many vines, leaves and pods to the row as the rows that we planted two peas to the hill. In the second place, we had failed to cultivate enough to smooth down the ridges and when we mowed the peas we left about a fourth, which we couldn't cut because of the peas being down in the furrow. We used a bull rake and cable stacker to put up the peas, and in spite of mistakes, lack of knowledge on the subject, etc., we harvested one hundred tons from about forty-five acres.

And now comes the most wonderful part: We find those cow peas are a balanced ration that beats everything else about twenty miles, giving everything else twenty miles the start. Did you ever see anything that would make hogs leave corn, ground feed, cooked feed, milk, in fact, everything that tickles a hog's palate? Cow peas will do it. A hog will leave everything for cow peas, never gets tired of them and will fatten just twice as fast. It is also true with cattle, horses, sheep and chickens.

If you happen to have an old brindle cow, of no particular breed, and you want Jersey milk, just feed her cow peas and you will have equal to that of

a Jersey cow. If you want your hen to lay two eggs a day, feed her cow peas and she will come nearer to it than on any other feed. Give cow peas half a chance and they will double your profits. Plant them early, cultivate them two or three times, harvest them before frost, and you have a feed that has cost less and is worth more than any other feed or combination of feeds, and at the same time you have been building up your soil. Walter Phelps.

Oklahoma.

Every shipper to the Kansas City live stock market has reason to feel a personal pride in the showing made by that market during the year just closed, for he has contributed toward the most complete job of record breaking ever done by any live stock market. Other markets break records now and then, but Kansas City the past year has smashed them by wholesale. Not only were the receipts of all kinds of live stock greater than in 1905, but receipts of cattle, of calves and of sheep were the largest in the history of the market, and the aggregate of all kinds of live stock received was greater than that of 1901, the drought year when so many cattle and hogs were forced upon the market for lack of feed.

Receipts for 1906 were, in round numbers, as follows: Cattle, 2,300,000, calves 260,500, hogs 2,680,000, sheep 1,609,000, horses and mules 69,500. Compared with 1905, these receipts show a gain of approximately 119,500 cattle, 28,400 calves, 172,500 hogs, 290,000 sheep and 4,000 horses and mules. The total number of cars of live stock received was approximately 138,900, a gain of nearly 10,000 over 1905, and of nearly 4,000 over 1901, the previous record year. These gains do not represent simply Kansas City's share of an increased supply of live stock. The receipts at the five leading Western markets combined show an increase of something like 135,000 cattle and 315,000 sheep for the year, but little more than Kansas City's gain alone. Some of the markets show material losses. While Kansas City shows an increase of upwards of 170,000 hogs, the five leading markets combined show a loss of about 250,000. These figures show that Kansas City has made a much larger proportionate gain in cattle and sheep receipts than the other western markets, and that during the past year it has led all the markets in popularity among the hog shippers. This, too, in spite of the fact that there is a considerable shortage in the hog supply in the Southwest. The increased demand from the Kansas City packers for hogs maintained prices at Kansas City on a higher level than at the other Missouri river markets, and materially narrowed the margin between Kansas City and eastern markets. The activity of the packers has been responsible for the gain in cattle and sheep receipts, also. A larger percentage of the receipts of these have been slaughtered at Kansas City this year than ever before. While

## A PRESENT FOR YOU

A Beautiful Life Size Portrait Free to Readers of This Paper

Every reader of this paper can secure one of the most beautiful life size (16x20 in.) bromide portraits made from their own small photo and valued at \$10.00, absolutely free. The St. Louis Seed Co., of 617-619 N. Fourth St., St. Louis, Mo., are making this exceptional offer. Never before has such a bona fide announcement been made by any other reliable firm. Below we illustrate a reduced fac-simile of this beautiful gift:

You are not required to pay one cent for the enlarged portrait, neither do any work for it, as it is sent to you with their compliments absolutely free; the only restriction being is that your small photo must be sent for enlargement with your order for seeds. This season their big, handsome 112-page catalogue is full of new offerings, including their wonderful new corn, "Nichols Yellow Queen," with a record of 383 bushels per acre. Their famous new "White Comet Oats," which they offer \$100.00 in gold for the largest acre yield in 1907; "Nichols Wall Street Favorite Wheat" and many other farm offerings that cannot be found elsewhere, as well as a variety of new vegetable introductions that are phenomenal. Their new "Early Dix" potato having attained the remarkable yield of over 1,000 bushels per acre.

It will pay you to write for their big catalogue today, mention this paper and they will send you a packet of their famous New Wonder Magnus Tomato seed absolutely free. Last season this tomato grew to the enormous weight of 7 1/2 lbs. Write them today. Address them as above.

there has been a slight decrease in the number of stockers and feeders sent to some sections on account of local crop conditions, the increased supply of cattle has been readily absorbed by the packing houses.

Improved train service and better facilities for handling live stock in the yards at Kansas City have contributed materially toward the splendid record made the past year. The Kansas City Stock Yards Company during 1906 expended a quarter of a million in enlarging and improving its facilities. The result has been that at no time during the year, not even when the runs were the heaviest, has there been any serious congestion in the yards. Other improvements are under way and still others have been planned with a view to keeping the yard facilities in advance of the increasing receipts. At its present rate of growth the Kansas City market will in a short time, lead the world in live stock receipts.

#### THE HOME BEAUTIFUL.

There is an increased interest of late in the laying out and arrangement of the home lawn, the garden and the orchard. Most everyone has set up an ideal of his home as he would wish to have it, and yet everyone has not the ability to lay out the plans properly, to select the proper trees, shrubs and plants, to make his home show up to the best advantage. Hence it is desirable to put such work as this into experienced hands. There are but few men who have made a life study of this work. Perhaps there is no one of the Iowa horticulturists that is more familiar to the reading classes of the farmers and fruit growers of Iowa than Mr. M. J. Wragg. His advertisement appears in this issue and we take pleasure in calling our readers attention to it. We have known Mr. Wragg for many years as a conscientious, scientific, far-seeing man in his profession. He has made a life study of his work, educating himself in particular branches that go to make up a thorough and practical horticulturist. His work down here in our own community is his test praise and we want to recommend him to our readers as perfectly reliable. Mr. Wragg gives the subject of landscape gardening his personal attention. He is business manager of the firm of M. J. Wragg Nursery Company, of Des Moines. We are confident that those who patronize his firm will be more than satisfied with the results. This firm has lately issued a special price list, and a beautifully illustrated work on land-

## FREE A Nursery Book

Fully worth \$1.00 to any tree planter. It will give you the real facts about the care of trees. Has over 100 beautiful illustrations mostly from photos. DAY BY DAY

Agricola

Social conditions and political conditions are so strangely intermixed that we often mistake the controlling factors—confuse cause with coincidence. When Agricola was a boy it was believed that potatoes must be planted "in the dark of the moon," and the moon and the signs of the zodiac were studied to the verge of fanaticism.

Now taking it for granted in this year of grace 1907 that there is nothing whatever in this planting-in-the-moon business, how can we reconcile it with the proofs—if they were proofs—that the "moon farmers" had better crops, better calves and pigs, etc., than their skeptical neighbors who paid no attention to the moon theory?

This is the way Agricola accounts for it. The moon farmers took pains, they were alert, they were industrious, they had more interest in their work than the heedless farmers who watched neither signs in the starry heavens above or in the earth below. Where the heart is there will be the treasure be also. They put their heart into their work. A poor method well followed is better than no method.

As a barefoot boy I used to listen with sad feelings to the song beginning, "Give me three grains of corn, mother, Only three grains of corn." It referred to the famine in Ireland then throwing a pall over the land, and the suffering and starvation resulting. To relieve this condition and give the suffering inhabitants food at less cost the "Corn Laws" were repealed, and free trade became the fixed policy of Great Britain. It continues to this day. And to recoup for the loss of revenues an income tax law was enacted, and that continues to this day. Now some of our own statesmen urge the income tax for Uncle Sam. But we have not the famine to drive us to it. Our conditions are dissimilar.

Farmers' institutes are growing in favor and public usefulness in this part of the state. The Agricultural College Extension idea is an excellent one, as it gives the farmers a chance to hear some of the best lecturers and teachers connected with the college, and those best suited to the particular localities. Tile drainage where it is a live topic, and the same with dairying, pig feeding, horsebreeding, and so on through the entire list of agricultural subjects.

Horace Greeley, the quaint philosopher, week in and week out fought these superstitions and made many converts, but there were still whole communities wherein moon theories were tenaciously held.

The professor of domestic economy also takes the field this winter, and explains the kind of food needed by the family, and how to get it and prepare

A Common-Sense Talk On

Manure Spreaders

THERE'S no doubt that the right kind of manure spreader is a good thing for you to have. It is probably true that there is no other farm machine that, if rightly chosen, is as valuable to the farmer. If manure is spread properly and at the right time, its money value far exceeds what you're apt to think.

But when you buy a manure spreader have a care. There are many of them on the market, and many with various "special features"—fancy affairs that do them more harm than good.

When you buy a spreader look out for these things—and avoid them. What is chiefly to be desired is strength and simplicity of construction.

Strength is essential because a manure spreader has to carry a heavy load and the rear end—the machine end—has hard work to do.

Simplicity of construction lessens the chance of the machine getting out of order and gives light draft. You know there are a good many manure spreaders that don't get out of the shed after the first year. They make too much trouble and cause too much delay.

I. H. C. Corn King and Cloverleaf Spreaders

are strong and simple. The frame is carefully selected, well-seasoned lumber, and is strengthened by heavy cross sills and truss rods. They have steel wheels with staggered spokes, and both hind wheels have clutches. The box is made of selected stock and is securely fastened to the frame by heavy steel cleats. Corners are re-enforced with steel plates. Everything is of the very best.

Both of the rear wheels are drivers, and insure plenty of power. A large sprocket with heavy chain drive transmits the power to the cylinder. The cylinder is large and strong, and the square teeth (extra long) are made of the best high carbon steel.

The power for driving the apron is applied on both sides, giving an even movement and making binding impossible. The rollers are attached to the under side of the slats instead of to the frame.

The vibrating rake is a most important feature, and is found only on Corn King and Cloverleaf spreaders. It levels the load and brings the manure squarely up to the cylinder—a thing which is absolutely essential to

INTERNATIONAL HARVESTER COMPANY OF AMERICA, Chicago, U. S. A.

(INCORPORATED)

it for its most efficient use. Agricola bespeaks for her a kind and fraternal reception wherever she goes.

Mulching young orchard trees has its benefits and its dangers. It is what the trees like, and what the enemies of the trees like. The field mice find the mulch a congenial harbor, and they find the bark of the trees acceptable food. The mulch should not be close to the tree, and a wire screen around the trunk is a good safeguard against mice and rabbits.

By the way, tramping the snow very firm around the body of trees turns the mice around that spot in their sub-snow travels in search of food. Nursery stock is generally protected by making a mound of solid earth around the trees late in the fall. This mound turns the mice aside in their explorations.

The farm institutes in this part of the state not only have corn lectures and corn scoring, but they will this winter have hog scoring as one of the exercises. An expert will score and explain. In some cases the hogs will be in a "show" near by, and in other cases a pig as near to the accepted type as possible to find will be tamed and scored on the stage before the audience, and the scorer catechised.

Rural schoolmams are scarce and the market is getting active and the price some higher. Never was good money better expended than when invested in the loving services of a sweet tempered, pleasant mannered, tactful rural teacher.

One of the gratifying signs this winter is the extent to which farm homes

are supplied with good and useful reading matter. There are many good agricultural papers, and many good magazines, and that these are so generously supported notwithstanding the flood of muck rake bidders for patronage is a sign of good mental and moral health.

A bushel of corn fed now to good shoats brings 50 per cent, or better, more than the corn will sell for in market. And yet we farmers frown at too big margins when the middleman makes them.

This is the time of year for debating societies, lecture courses, box socials and all kinds of talkfests to have their annual innings.

Home grown ham and home laid eggs make a dandy breakfast food, Battle Creek to the contrary notwithstanding. But it needs a well ventilated house and common sense toilet arrangements to make such a diet a steady comfort.

Onion eating makes the breath rank, and again it sweetens it. While the onion is doing its work it is offensive, but the results are pleasant.

Equality before the law means, not that all men stand on the same level through life, but that each have the chance to find his own level.

The national conscience is awake now—acutely so. So long as the world applauds nobleness the mass of its inhabitants will not go to the demnition bow-wow head foremost.

The saw filer has his place, but he who saws wood and keeps mum is in the class more generally referred to as "our best citizens."

How are your children progressing in school? They have a sacred right to robust bodies even if they have to keep them at the foot of the class to have them robust.

The man with a sore head thinks the public conscience is badly disordered.

Uncle Sam raises some forty-seven million hogs, quadruped kind, a year, and the Hawkeye state pockets the money from one-seventh of the whole.

Last winter a bill was introduced in the Iowa legislature authorizing physicians to mercifully end the life of hopeless incurables. If it comes up again why not make it a legalizing act to cover mistakes in diagnosis and treatment? Seriously, doctoring and farming have had too much of the blind interpretation of misunderstood symptoms and mysterious laws, natural and divine. But are not all natural laws divine laws, for that matter?

Buy remedies by wholesale and buy the right kind. A barrel of apples is one of the best remedies, good to take before, during and after each meal.

Is there in your home a woman who once said "yes" and has since questioned her own wisdom? Give her another

proper spreading. The teeth on the vibrating rake are held in place by coiled steel springs so they never break but adjust themselves to the size of the load.

And as a result of simple construction, the operation is simple. Any one who can drive a wagon can operate an I. H. C. spreader, for one lever does it all. There are ten feeds, ranging from ten to thirty loads per acre. The apron stops of its own accord when the load is all fed out. By reversing the lever it returns and again stops when back in position. No need to watch it at all.

These are some of the reasons why you should investigate I. H. C. Corn King and Cloverleaf spreaders before you buy. There are many other good points about them that are explained in our catalogues. There are two kinds—Cloverleaf, an Endless Apron machine, and Corn King, a Return Apron machine; each made in three sizes.

Call on the Local Agent or write for catalogue.

SHEEP.

Clover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growthy rams and ewes. Also 150 beautiful yearling ewes bred to 285 to 305 lbs, champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

Chandler Bros., Kellerton, Ia.

Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

NORTON FARM SHROPSHIRE

FOR 30 days special prices will be made on one or a carload of choice recorded ewes, bred, also Feb. ram lambs. Wish to make room for new importation.

D. M. NORTON, Sanborn, Iowa.

SHEEP.

20 REGISTERED Shropshire ewes, \$20 to \$25 each. W. C. Frazier, Atlantic, Cass Co., Iowa.

Registered Shropshire Rams and Ewes of the best breeding. Willard Miller, R. F. D. No. 2, Aulita, Iowa.

trial. Ask her what trees, shrubs and ornamental plants the homestead needs. She may give the right answer this time.

A WAGON EVERY SIX MINUTES.

The Moline Wagon Company, the largest exclusive wagon factory in America, has a record.

At Moline, Ill., the Moline Wagon Company turn out a completed high-grade Iron Clad Wagon every six minutes, and yet every wagon has been in the process of making from six to eight years.

This is a remarkable statement, but it is absolutely true, because the lumber used in the Moline Wagon—that is, best white oak and toughest hickory—which is used, is in the air-seasoning process several years. Every step in the immense factory is slow by reason of the great amount of adjusting and hand work required, but there are so many wagons going through the various processes at the same time that, as stated, a complete wagon is ready for shipment every six minutes.

To properly appreciate the importance of a wagon and every part of it, our readers should secure the book just issued by the Moline Wagon Company, explaining the various processes of handling the lumber, the materials and the factory work. By reason of the fact that the book is written by the master mechanic of the factory, it is an education in wagon construction and shows how to tell the difference between a thoroughly good wagon and a good-looking but thoroughly poor wagon.

There is a reason for the company making the Iron Clad Wagon with the iron-clad guarantee selling more wagons than any concern in the country manufacturing anything like equal quality. The book tells the reason and affords much interesting reading as well. Write for it today, and mention The Homestead.

THE A. A. BERRY SEED CATALOG.

The 1907 catalog of the A. A. Berry Seed Company, of Clarinda, Iowa, is now being distributed. This is a company that has enjoyed a substantial growth since its establishment, and we have no hesitancy in recommending it to all persons who have to purchase seed during the coming months. Clarinda is located in the heart of one of the best corn sections in the world and for that reason the A. A. Berry Seed Company is able to give its customers special bargains in something good along the line of corn. We do not have the time nor the space to tell the whole story, but the catalog referred to will do this and it will be sent free upon application. Address A. A. Berry Seed Company, Box BW, Clarinda, Iowa, and please mention this paper when writing.

Bushnell

A Tank It Pays to Buy

Don't confound the "Bushnell Pump Co.'s" tank with other tanks. The Bushnell is in a class by itself. Here are some of the reasons:

Big, thick staves that are made to fit from edge to edge all the way down. Machinery makes every joint perfect. Lumber especially selected for tank purposes, not cast-off pieces from furniture and other factories. Every Bushnell tank tongued and grooved. We're ready with the machinery to do it right. Other tank builders do it just occasionally "to meet Bushnell Pump Co. competition" doing it then as best they can. Strong, heavy steel hoops. We give them to you round or flat. Adjustable patent draw lugs; look at the picture and you'll see what we mean. You can always keep your tank hooped up snug and tight. Galvanized hoops when wanted. Tank lasts a lifetime.

We can give you any size you want—2 to 16 feet high, 4 to 16 feet in diameter. Capacity from 5 to 760 barrels.

Don't forget the long line of Bushnell Wood and Iron Pumps, Steel Tanks, Iron Pipe Fittings and general line of Steam and Well Supplies. Write for descriptive matter. If your dealer does not have our goods in stock, send us his name and address.

THE BUSHNELL PUMP COMPANY, Dept. C, Bushnell, Ill.

LARGEST PAIR OF STALLIONS IN THE U.S. WT 5060.

FRANK IAMS  
"TOPNOTCHERS."

Frank Iams' "top notchers" are the largest pair of four-year-old stallions in United States, weight 5,060 pounds. They are "kings." All the "Iowa boys" took off their hats to them. They are a "pair of peaches" worth going 2,000 miles to see. These "blackboys" won first prize and sweepstakes prizes in the Percheron and Belgian classes at Nebraska State Fair, 1906, and the Percheron stallion defeated the "champion prizewinner," Bibi, of France, at Iowa State Fair, 1906.

IMPORTED AND OWNED BY FRANK IAMS, ST. PAUL, NEBRASKA.

He buys, owns and sells more first-class stallions than any man in United States. He sells diamonds of this quality at \$1,000 and \$1,500. He has 160 "top notchers" that must be sold. Send for greatest horse catalog on earth.

HINTS, SUGGESTIONS, DEVICES  
AND CONDENSED LETTERS  
FROM CORRESPONDENTS.

Regarding the plan for a butchering derriek and gambrels for beef and pork, Mr. E. S. Stayton, of Cobs county, Ill., writes: "The material for same was picked up around the farm and cost, blacksmith work included, all told eighty cents. This outfit has gone the rounds of the neighborhood for ten years and is in good condition yet—in fact, if properly sheltered it will last the lifetime of the average man and greatly facilitate the work of butchering. The uprights are 2x4x12. The windlass is 4x4x4 with an iron band around either end and gudgeon pins 3x4x8 to fit in holes in outside uprights, two and one-half feet from lower ends. One foot from either end 1x3 mortises are cut from opposite sides to admit of pieces of hardwood 1x3x3 for turning windlass.

In boring holes for bolt at top of uprights use bit three-eighths inch larger than bolt to allow for spread at bottom. Have a hook with eye for bolt to pass through for hanging pulley. This hook should be of three-fourths-inch iron and eight inches long. The bolt should also be of the same length. The stretcher may be made of either chain or rods, twenty inches in length, and should have three-inch ring in center for fastening rope. The end links should be of 1½x4 inches to admit of a good, strong stretcher stick, and have good, roomy hooks in these links so they will readily hook over a beef hook. This stretcher is far superior to the ordinary stick used, as the load on one side may be removed with no chance of the other part getting on the ground. When the beef is raised high enough for removing entrails simply drop one of the turning sticks between the other turning stick and the rope and one upright and there it will stay. For hanging hogs with this outfit we have gambrels with an eye in the middle and hooks in the ends and hang one on either hook of the stretcher. With an extra stretcher with open eyes to hook in top ring four hogs may be nicely handled."

In answer to several requests for a device to transmit power from a windmill to a pump where the well is several hundred feet distant we give the following plan. The illustration shows two triangles, one of which is to be attached at the well and the other at the mill. Each

Where would you rather be?

In the North or East hugging a stove to keep warm, or living a free, comfortable, out-of-door life in the Southwest? The farmer in the Southwest is enjoying his winter. He hardly ever sees snow and "a freeze" is almost unknown to him. He is able to work out-of-doors all the year and it is not uncommon for him to raise two or three crops a year. Five or six cuttings of alfalfa is the expected thing and it seldom fails.

He does not know what it is to build expensive shelter for the protection of his stock in winter and as for long feeding periods he is spared that expense.

When you stop to think that he has all of these advantages, and besides has only paid a fifth or a tenth as much for his land as you paid for yours and can raise 30 bushels of wheat, 50 bushels of corn or 90 bushels of oats to the acre, don't you think he has all the best of you?

He has good markets and usually gets better prices for all he raises than you get. Schools and churches are good and convenient. The climate is healthful and pleasant and altogether the Southwestern farmer is prosperous and contented.

Why don't you move to the Southwest? You can own a big farm there for what a small one costs in your state. A few years hence, this low-priced farm will be a high-priced farm in a highly prosperous community.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines  
1413 La Salle Street Station, Chicago or 1413 Frisco Building, St. Louis.

triangle is supported firmly to a post or beam by a bolt which acts as a joist at the hole marked X. At the hole marked A the pump rod is attached, while the windmill rod is attached to the other triangle (at B) correspondingly. The two triangles then face each other as in illustration and are attached to each other

er by strong wire at the eyes in the upper and lower ends. The triangles are made of two-inch hard wood to be satisfactory and lasting. The principle in which the device works will be seen at a glance.

More and more farmers are coming to realize the conveniences of watering cows in the barn and in most of the dairy stables that are now being built this idea is carried out in various ways. We recently saw cows watered and fed in the same trough. It was of cement and had a round bottom. At the top the trough was about eighteen inches wide and in depth it was ten. When first made the water was turned into one end of the trough and the result was that the cows at the opposite end were compelled to wait ten or twenty minutes until the stream had passed by the cows nearer the faucet. To remedy this delay the water pipe was run along the side of the trough and tapped at every fourth cow. It required much less time to water in this way and the amount of water entering the trough could be better controlled so that there was not too much water left to soak into the grain.

There are various other plans of watering cows, for example, that in which there is a water trough in the bottom of the feed trough covered by trap doors which are opened for watering. In this case the troughs must always be swept clean every time the cows are watered or else the water becomes filled with chaff and dirt. The plan first mentioned works well and moreover the arrangement of trough and pipes is very simple.

Minks, weasels and such varmints, which are so destructive to poultry, can nearly always be trapped by using a box trap made about thirty-six inches long and about six or seven inches square, in

two compartments, one about twelve inches and the other twenty to twenty-four inches, with a division between made of small-mesh poultry wire, or woven by hand with baling wire, with no less than one-half inch meshes. The outer end of the smaller division should be of the same. Arrange a drop door in slides like the ordinary rabbit trap. Put a live chicken in the small division and set the trap near a coop which has been visited, or anywhere the animals have been seen, and they will be caught in a few nights.—(Exchange.)

The accompanying illustration shows a convenient form of feed rack for sheep. The farmer can make it with practically no expenditure of money, and it is very convenient where all available space must be utilized. The bottom and top bars are made of poles with one inch

BIG FARM PAPER  
A WHOLE YEAR FREE

We will send you our great farm paper absolutely free for a whole year if you will do us a small favor. Just send us names and addresses of five good farmers and enclose two-cent stamp. The Valley Farmer is a handsomely printed farm journal, established fifteen years, edited by the ablest agricultural writers of the country, published on its own \$20,000 rotary magazine press by the largest publishing house in the West, and read by over a quarter of a million people. Its circulation reaching every state in the Union. Address with stamp Valley Farmer, 675 Jackson street, Topeka, Kan.

saplings fitted into them. The bottom cross bar fits loosely into brackets on the wall, and the upper bar is fastened by a cord which passes through the building over a small pulley above the rack. A weight attached to the outside end of the rope will serve to keep the rack against the wall. When roughage is being put into these racks they may be lowered and pushed back against the wall again when filled. They hold the hay closely and are kept in place by the weight, which will prevent the hay

from being pulled out too freely and wasted by the sheep. It is always well to have these racks placed over the grain troughs so that any clover heads or leaves that fall from the racks will be caught in the troughs below instead of being tramped in the manure.—(Exchange.)

## OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

## MILKING MACHINES.

There is no line of farm machinery about which there is more conjecture than this question of milking machines. For nearly 100 years men have been struggling to solve the milking problem by having the work done by mechanical means.

The Kansas Agricultural College some time ago installed a milking machine and recently Professor Erf, head of the dairy department of that institution, has published a bulletin on that subject, giving the history of milking machines up to date and also relating their experience with one that has been installed at that institution. The conclusions drawn by Professor Erf are as follows:

1. A milking machine will milk cows as thoroughly as the average milker.
2. Some cows give more milk when milked with a machine than when milked by hand; others give less.
3. It is extremely necessary for the man in charge to fully understand how to operate a milking machine.
4. To reach the highest degree of success cows should be selected and bred to respond to machine milking. If this factor is taken into consideration machine milking will be equally as successful as the best hand milking.

The college has found that three milking machines would do the work of five milkers, though this does not take into account the time required to transfer the milkers from one cow to another, to attach the teat cups, to wash the machine and to take care of the engine. However, it is not so much in the matter of economy where sufficient help is obtainable that the milking machine is especially to be recommended; the chief claim that could be made for it is that it eliminates to some extent the difficult problem of hiring hand-milkers, making dairying more of a mechanical occupation than it has been in the past. It has been found as a result of the work up to date that in the case of some cows the machine will increase the milk yield, while in the case of others it will reduce it, and in this respect the machine does not differ widely from the average run of milkers. From a series of thirty-two tests it was found that the average cow milked by a machine was milked slightly cleaner than by the average hand milker. The manipulation of the udder was found to be more essential when the machine was used than in the case of hand work.

Machine milking is necessarily cleaner than hand-milking, and by actual test it has been found that there are less bacteria in the milk drawn by machine than in that milked by hand.

The machine installed at the Kansas station works on the principle of the vacuum, and this may be maintained by the use of tread power, gasoline or steam engine. The normal air pressure is fifteen pounds per square inch, and

in the case of the milking machine this is reduced to eight pounds. Rubber tubes connect the cow's teat with vacuum pipes and thereby reduce the pressure on the end of the teat. The strokes of the pump that produce the vacuum induce a pulsating motion. This motion, together with the atmospheric pressure on the outside of the udder, draws the milk into vessels provided for its reception.

The bulletin referred to is No. 140 and doubtless many of our readers, especially those who are interested in extensive dairying operations, would unquestionably be interested in its contents, and we therefore suggest that application be made to director of experiment station, Manhattan, Kan., for this bulletin.

## A NEW METHOD OF TREATING CALF SCOURS.

As recently pointed out by L. A. Klein, of the South Carolina station, one of the most common difficulties met with in raising calves on skim milk is the persistent form of diarrhea commonly known as calf scours. This disease is due to the action of various fermentative and putrefactive bacteria in milk. As is generally known, the undue growth of bacteria in milk may be largely prevented by the exercise of strict precautions from the time the milk is drawn from the cow until it is fed to the calf. The necessary precautions, however, involve more attention and labor than can always be expected from the average dairyman. The inevitable result of carelessness in handling milk is the development of large numbers of bacteria in it, and this in turn leads to calf scours, which always causes an unthrifty condition in the calf and may often produce death.

Proceeding on the basis of the results of investigations by Von Behring, the Maryland Experiment Station, and the bureau of animal industry of the department of agriculture, on the influence of formalin on disease germs and on digestion when administered in small amounts in milk, Doctor Klein treated twelve milk-fed calves affected with scours by adding formalin to the milk in the proportion of one part to 4,000 parts of milk. This dilution may be readily obtained by pouring 0.5 ounces of formalin into 15.5 ounces of water. From this stock solution one teaspoonful is added to each pint or pound of milk to be fed to the affected calf.

From the experiments just outlined it appeared that the results are practically the same, whether the formalin solution is placed in the milk just before feeding to the calf or immediately after the skim milk is received from the separator. Apparently, however, it was advisable to add the formalin to the milk immediately after separation. On the twelve calves treated in this way eleven recovered without any further treatment, seven of them on the second day, three on the third day, and one on the ninth day. If further experiments show that formalin causes no injury to calves, this method furnishes an effective and practical means of controlling calf scours.

## Sheltering Dairy Cows.

To the Editor of The Homestead:

In bad weather shelter for the dairy cow is as important as food. That this is not fully appreciated is shown by the too common practice of leaving cows stand, with arched back for hours behind the strawstack, the grove, or around the feed rack.

Dry cold does not hurt the cows as much as the wet and cold together. From a cow's back which is wet with rain, sleet or snow, a constant evaporation takes place. Snow and sleet is

Contains all the money-making points of dairying. Among the subjects treated you will find How to Feed, What to Feed, When to Feed, What Foods Produce Most Milk, How to Take Care of Milk-Producing Foods, How to Feed Silage, the Care of the Milch Cow, and many other profitable and practical suggestions that help swell the profits of the dairyman. With the book we will send additional information telling you how and why you can get the most out of you milk by using the

## Sharples Tubular Cream Separator

We guarantee that with a Tubular you can get 50 per cent more cream over the old pan method of skimming, and 6 per cent over any other cream separator made. Sharples Separators get all the cream and the Tubular is the easiest running, easiest cared for, and easiest kept clean. There is just one tiny piece in the bowl, the milk can is low and handy, the bearings are self oiling. Write for the "Business Dairying" at once stating number of cows you keep. Ask for booklet D.121

Mr. S. L. Boyer, Venetia, Pa., says "The Tubular makes me \$25.00 yearly."

The Sharples Separator Co.,  
Toronto, Can. WEST CHESTER, PA.

Chicago, Ill.

worse than rain, as they require melting as well as evaporation.

The heat used in this process is obtained from the animal's body. Domestic animals require their body temperature maintained at a point varying only a little from 100 degrees Fahrenheit. Thus the heat producing elements in the food like fat, sugar and starch are consumed for maintaining this temperature, just as coal in a stove is burned to warm a room.

When cows are comfortably stabled it takes 60 per cent of their capacity ration to maintain their body temperature and to furnish heat and motion. When left out in cold, rain, snow or sleet, it takes a good deal more. This is the main reason for the great decrease in milk flow from cows left out in bad weather.

Over \$4 a cow has been saved in forty-eight days by proper shelter.

Fred Rasmussen.

## Mrs. Spencer's Short-horn Sale.

The sale of Mrs. Flora V. Spencer, of Spring Green, Pa., was held on December 18th as advertised in The Homestead. Unfortunately the weather was bad and this cut down the attendance and no doubt affected prices. However, twenty-one females sold at an average of \$107.62, while four bulls brought an average of \$56.25, the twenty-five head averaging within sixty cents of the \$100 mark. Mr. J. K. Imes of Birmingham, N. Y., paid \$250 and \$175 for Jennie Clay, No. 14, and Kittle Clay of Spencer Place, Mr. A. A. Wilson, of Delaware, Ohio, paid \$150 for Fillipal 2d, while Walker Ice Cream Company, of Warren, Pa., bought

## A Cream Separator Without Cost

That is What We Offer You in the

## Iowa Dairy Separator

Repeated tests have demonstrated that the "IOWA" is the only Separator that takes out every particle of the cream. Therefore, given a certain amount of milk, for a specified length of time, and the additional amount of cream secured will pay for the machine.

Gold medals at World's Fair and Portland attest the superiority of the "IOWA" over all others.

Made in all sizes from 250 to 750 pounds. Your name and address on a postal card will bring you a handsomely illustrated booklet with full information, price list, etc. Write at once, for every day that finds you without an "IOWA" finds you losing money. Ask for catalog 25. Address,

The Iowa Dairy Separator Co.,  
Waterloo, Iowa.

Kittle Clay 2d of Spencer Place for \$150. Considering all things, the sale was a satisfactory one, both from the standpoint of buyer and seller.

## Don't Buy Until You Investigate!

We Ask Only the Chance to PROVE Our Claims.

YOU want the cream separator that will give you the best results, in profits and comfort.

It's mighty poor policy to buy until you are sure you are right.

That's why we urge you to make a thorough investigation of the Omega—to find out for yourself whether or not it is the separator you want.

We offer to prove to you that it is the better separator—that it does better work and gives less trouble than any other.

Surely it is worth your while to find out about it.

## We Want To Show You Why

—The Omega turns so easily;

—How it is the only separator with the bowl supported at both top and bottom;  
—How it delivers both milk and cream from the bottom of the bowl.  
—How the bowl drains itself:

## Just Try Omega An

—How you can stop the bowl instantly;  
—Why you can clean it and have it ready for work again in three minutes.  
—Why it lasts so long.  
—Why it needs so few repairs.

We ask you to take these statements as facts—which we want to prove to you. We believe a fair investigation will easily convince you that the Omega is, of all separators, the separator you want, because it will give you the best service.

## Do You Buy Kiln-Dried or MOLINE Wagons?

**T**AKE a long, slender piece of Hickory that has been air-seasoned from 3 to 5 years. Bring the two ends together—you can do it without breaking or cracking the stick. Then take a similar piece of kiln-dried Hickory and try it. **CRACK! You've broken it!**

This simple test tells why we store millions of feet of Hickory and White Oak in our vast drying sheds for 3 to 5 years before making it up into Moline Wagons.

It tells why we are willing to have many thousands of dollars tied up in this reserve stock for years, paying taxes, insurance and other costs, until it becomes thoroughly weather seasoned, with the wear of iron in it.

We have the largest stock of Hardwoods in the United States, yet today we're buying green timber right and left, for our 1911 output of Moline's.

If you know of any large tract of Oak or Hickory, we'll thank you for telling us. We want it.

### Air-Seasoning vs. Kiln-Drying

Lumber preserves itself in its own sap, if you give it a few years time, out in the open air. Just let nature alone—that's all. The resinous portion of the sap does the work. It fills and toughens the fibers—makes lumber live, resilient, with practically no limit to its life.

Kiln-drying drives out all the resinous sap—leaves the fibers porous, dead, the prey of quick decay. Kiln-dried lumber absorbs moisture into the empty fiber-pores. Paint can't prevent it! Hence, a Kiln-Dried Wagon will warp, crack, shrink or swell. Just as a poor horse soon "eats its head off," so a Kiln-Dried Wagon eats up money in repairs.

There are many more wagon facts you ought to have before buying your new wagon. Get the whole story in our FREE WAGON BOOK. Write for it NOW. We pay postage. The Dealer who is particular about the kind of wagon his name is painted on, sells the Moline, the Ironclad.

MOLINE WAGON CO., MOLINE, ILL.

## 1856-Sandwich-1906 Corn Shellers

The standard the world over for 50 years. Now in use in every corn growing section of this country.

The Sandwich is the result of improved facilities of manufacture, latest and best design, the best procurable material, superior workmanship, and ripest experience.

The result is that well known superiority which has made the Sandwich so justly famous.

We make them in all sizes and styles and capacities—mounted and down, belted and geared.

Farmers should insist on having their corn shelled with the Sandwich because it shells fast, saves time and the board of the "gang."

They shell clean and they clean the corn they shell clean.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

### LAW QUESTIONS CONSIDERED.

#### SURVIVING WIFE—DIVORCED WOMAN.

A Subscriber, Clarinda, Iowa.—A and B were husband and wife. They owned forty acres of land, the title being in the name of A, the husband. They deeded twenty acres of the land to their children and afterwards A deeded the other twenty acres to a third party, but B did not sign the last deed. Later on A and B were divorced. Can B hold her third interest in the twenty acres deeded to a third party by A?

Answer.—She cannot. The third interest you have in mind, is the distributive share which the law allows a widow, in lands owned by her husband during their married life. To have a right to this share, a woman must be the wife of the husband at the time of his death. A divorced woman has no such right.

#### MISREPRESENTATION.

A Subscriber, Marengo, Iowa.—I recently bought an Angus heifer at a combination sale. She was represented on the breeding list to be with calf by a fine Trojan bull. She had a spotted calf that looks like a Holstein, and cannot be recorded as Aberdeen. (1) Have I any remedy as against the seller? (2) What is the customary way of settling a matter of this kind?

Answer.—(1) It depends upon what use was made of the breeding list you speak of. If it was used at the sale as a representation of the quality and condition of the animals to be sold, and so brought to the notice of the bidders or prospective buyers, it amounted to a representation of the heifer you bought which if not true, entitles you to sue the seller, and recover a judgment for damages, which would be the difference between what the heifer is actually worth, and what she would have been worth, if the statement on the breeding list had been true. (2) There is no usual or customary way of settling such a matter, other than by a suit for damages. Of course it is better for both parties if they can compromise the difficulty between themselves without litigation.

#### ADVERSE POSSESSION—BOUNDARY.

A Subscriber, Maryville, Mo.—A owns land which is described in his deed by metes and bounds. B owns land just north of A's land and adjoining it which is described in his deed by metes and bounds. A partition fence supposed to be on the line has divided the lands for more than twenty years. This fence was recently rebuilt on the same place. Which owner built the original fence is not known. By a recent survey it was ascertained that the fence was several yards south of the true line between the tracts, thus taking a strip of A's land. (1) Can the fence be legally put upon the true line? (2) Who should bring the action? (3) Can A hold his grantor liable for the shortage?

Answer.—Actual, open, notorious and continuous possession of land under claim of ownership for ten years, constitutes such adverse possession in Missouri, as to confer ownership upon the possessor, and vest title in him. These parties having recognized the fence as the line for twenty years, would most likely be deemed by a court to fix the line there permanently. (2) Should a suit be brought at all, it should be in the name of A, the owner of the south tract. (3) If the fence cannot now be moved on account of lapse of time, A can hold his grantor liable for shortage, unless his claim is outlawed. You don't say when A's deed was made.

#### FENCE ENCROACHING ON ROAD.

A Subscriber, Paton, Iowa.—A rented a farm from B for a term of years. He was to build and keep in repair all fences at his landlord's expense. A public road runs along the east side of the farm. Last spring A built a new woven wire fence along the roadside instead of the old fence, which was out of repair. He set this new fence eighteen inches further east at the north end, and three feet further east at the south end, than where the old fence stood, supposing at the time that he was setting it on the true line between the farm and the road, as he set it exactly in line with the fence B has along the road, just south of him. B says A's fence is in the highway, and wants it moved back where the old fence stood, and he had the trustees view it, and they decided that it was in the highway. There is no corner stone at the corner from which the trustees could make an accurate measurement, and no survey has been made. (1) Can A be compelled to move the fence? (2) If a survey should be made, who would have to pay the costs?

Answer.—(1) It all depends upon whether the fence is actually in the highway or not. If it is, it will have to be moved, otherwise not. (2) If the boundary line has to be determined by proceedings in court, and a survey, the court

will decide who is to pay the costs and expenses of the proceeding. No one can tell beforehand, how the court would decide the matter.

#### SOLDIER'S DISCHARGE.

A Subscriber, Whiting, Iowa.—If I should buy a soldier's discharge could I enter a homestead of 160 acres on it, in South Dakota, the same as a soldier could, that is, without having to go on it?

Answer.—You could not. A soldier's discharge is not the subject of traffic, —purchase and sale. You get no rights whatever by having the soldier transfer his discharge to you.

#### PRIVATE ROAD—LINE FENCES.

A Subscriber, Calamus, Iowa.—A and B own adjoining farms and owned equally the partition fence between the farms. A sold a strip of his land one rod wide along the line and eighty rods long to C for a private road. (1) B fixed his half of the line fence between his land and the private road. Who must fix and keep up the other half of it? (2) Who must construct and keep up the line fence between A's land and the private road?

Answer.—(1) C. (2) A one-half of it, and C one-half of it.

#### STATUTE OF LIMITATIONS.

A Subscriber, Harrah, Okla.—Several children inherited land in Kentucky about thirty-two years ago. One of them did not receive his share or any part of it and died about two years after he became entitled to it. There was an administration of the estate. Can the children of the one who died without receiving his share now recover it by law, or is it outlawed?

Answer.—The statute of limitations in Kentucky provides that a suit to recover land must be brought within fifteen years after the right accrued, but minors may have three years' time after they become of age, within which to commence suit. The children of the person who failed to receive his share of the estate, must now be at least twenty-nine years old. So they are barred by the statute and cannot recover the land.

#### APPOINTED OFFICER'S TERM.

A Reader, Bethany, Mo.—When the township organization law was declared unconstitutional by the supreme court last spring, the governor appointed an assessor and a collector for our county. On November 6th last we elected a county collector for the next year. When will he take the office?

Answer.—The regular time for a collector elected by the people to take his office, is on the first Monday in March after his election, but in the case you mention, it might depend upon the terms of the appointment made by the governor; for instance, if the present incumbent was appointed until the next general election, or until his successor should qualify, it would entitle the newly elected collector to be inducted into office as soon as he should properly qualify, but if the appointment was for the unexpired term, that would mean until the first Monday in March. You have failed to state the terms of the appointment.

#### PERSONAL PROPERTY TAXES.

Mr. L. M. P., Mt. Vernon, Iowa.—A man in Iowa sold personal property after the first day of January, 1904. The property was assessed to him. (1) Is he required by law to pay the taxes? (2) Do the taxes assessed on said property constitute a lien on it? (3) If the man to whom said taxes were assessed, refuses to pay the same, can the officer levy on his other personal property, or real estate, for said taxes?

Answer.—(1) The man who sold the property is liable for the taxes assessed upon it while he was the owner of it. (2) The taxes do not constitute a lien on personal property, until such personal property is actually seized by distress warrant to enforce the payment of taxes, but if not paid when due they become a lien on all real estate owned by the person who is liable for the payment of such taxes. (3) The payment of such taxes can be enforced by the seizure of the man's other personal property, or by proceedings against the real estate owned by him.

#### TRESPASSING CATTLE—DAMAGES.

A Subscriber, Woodburn, Iowa.—(1) My neighbor's cattle broke through his part of the partition fence into my crop and did it considerable damage. Is it necessary for me to serve a written notice demanding damages before I sue him for the same? (2) If I shut up his cattle that trespass upon my land, how much am I allowed per head for my trouble, in addition to the damages? (3) I rented a piece of land as a field tenant or cropper, agreeing to give half the crop of corn in the crib as rent, and reserving the right to cut my half. When am I required to take my part out of the field, nothing being said about the time in the contract?

Answer.—(1) It is not absolutely necessary, but we would advise you to tell him about the damage done by his stock, and fix a reasonable amount, as your claim and request him to pay it before bringing suit. It might result in a settlement without litigation. (2) For each bull one dollar for taking up, and fifty cents per day for keep. For other cattle, the first two, fifty cents each, for taking up and for each additional

animal twenty-five cents; and for keeping twenty-five cents per day for each animal. (3) By December 1st.

#### TOWN AND TOWNSHIP.

A Subscriber, Perry, Iowa.—(1) Have the voters in an incorporated town the right to vote for township trustee and township clerk? (2) Can persons residing in an incorporated town hold the offices of township trustee and clerk?

Answer.—(1) They have. Where the boundaries of the city are the same as those of a civil township, the offices of trustee and township clerk are abolished by law and their duties are performed by the city clerk and council. (2) If duly elected and qualified, they can; the fact that they might reside within the town limits would not render them ineligible.

#### WIDOW'S PORTION.

A Subscriber, Iowa City, Iowa.—A and B are husband and wife, and have been for twelve years. They have had no children. The property consists of eighty acres of land and personal property valued at about \$12,000. It is all held in A's name, though B had some money at the time of the marriage. In case A should die first without making a will what portion of the property would B get by law?

Answer.—If A has no children or children's children by another wife, his widow B would get first what is called the widow's allowance out of his estate and then one-half of the balance. If A left children by another wife, B would only get one-third of his property in addition to her allowance.

#### HOG CHOLERA—DAMAGES.

A Subscriber, Rockwell City, Iowa.—I have a near neighbor who has lost nearly all of his hogs by cholera. His pigs wander around the vicinity at will. A few days ago some of them pushed my yard gate open and got into my yard and among my hogs. I got them out as soon as possible and took them home. Suppose my hogs should get cholera from such contact with his pigs, could I recover damages from him?

Answer.—You could recover damages in such a case. The law of Iowa provides that neither swine, sheep nor goats shall be permitted to run at large. Your neighbor's swine being unlawfully at large, renders him liable for whatever damage may be occasioned by their coming in contact with other hogs.

#### TITLE OF RECORD.

A Subscriber, Pratt, Kan.—A and B were husband and wife. After their marriage B's parents deeded land to her. One child was born to A and B. B died in 1899, and the child died in 1902. These are well-known facts. A made an affidavit of the death of his wife and child, and had it recorded, and then deeded the land to certain parties. Is the deed regular and does it convey a good title of record?

Answer.—The proceedings do not make a good chain of title on the records. We think it will be necessary for the party who holds the deed to bring an action in the district court, and have his title quieted by a decree, in order to obtain a good record title. Such a decree, when recorded, will show how title became vested in A and his right to transfer it.

#### TREES SHADING LAND.

Mr. Abel Choate, Madison County, Iowa.—I own the east half of a quarter section of land in this country. A widow owns the quarter section adjoining my land on the east. She has a dwelling and a grove on the northwest corner of her land. The grove is near my land, the west row of trees being tall maples within three feet of the line between our farms. They shade an acre or more of my land, so that nothing can be produced upon it. I have asked her several times to have the trees cut down, but get no satisfactory answer from her. What are my rights in the matter?

Answer.—You haven't much of any remedy. A person has a right to grow trees or anything else upon his own land. If the trees of the widow extend their roots into your ground, or their branches over it, you have the right to cut off said roots and branches at the line, but that is all.

#### CHILDREN SUPPORTING PARENTS.

A Subscriber, Fulda, Minn.—A parent is helpless and without means. He (or she) has children, who reside in different states, some of them in the state where the parent resides—Minnesota. (1) Does the law compel the children to support the parent? (2) Can the children be made to pay for keeping the parent in the past?

Answer.—(1) Section 1485, page 294, Revised laws of Minnesota provides that every poor person who is unable, for any reason, to earn a livelihood, shall be supported by his children, or other relatives, and that such children or other relatives having sufficient ability shall be called upon for such support, and if children or other relatives fail to furnish such support when directed by the board or council of the county, town, city or village in which the poor person lives, they shall forfeit and pay for the benefit of the poor \$15.00 per month, to be recovered in any court having jurisdiction. (2) We do not think that children could be made to pay for

past keeping, unless called upon before-hand by the proper authorities, to furnish such support. And children who reside outside of the state of Minnesota could not be reached by its laws.

#### LEGAL MARRIAGE.

A Subscriber, Blakesburg, Iowa.—Miss A was illegitimate born. Her mother married B. Miss A took her stepfather's name without any process of law and was married by that name. Is the marriage legal?

Answer.—The marriage is perfectly legal.

#### GUESSING AT FACTS.

Mr. James McGovern, Henry County, Illinois.—A leased forty acres of land from B for half the crop, and raised corn on the land. There was no express agreement that A should harvest B's half of the crop. Is he required by law to do it?

Answer.—The editor of this department is not able to give a legal opinion upon the above statement. Not enough facts or circumstances are given to form a basis for legal advice. Our guess is that A is required to harvest all the crop, and deliver half of it as rent to B on the ground.

#### ADVERSE POSSESSION—TITLE.

A Subscriber, London Mills, Ill.—A bought a tract of land in 1875 and got a warranty deed for it, but in after years it was discovered that the deed did not give a proper description of the land. The parties who made the deed are dead. A has had peaceable possession of the land and paid taxes on it ever since, about thirty years. Can A hold the land against all parties, regardless of the defective description in the deed?

Answer.—He can. A's title is now good by virtue of what is called "adverse possession." However, in order that the records might show the title and description correctly, it would be well for A to bring a proceeding in court to quiet his title.

#### HOMESTEAD LAW.

A Subscriber, Eddy, Okla.—I am an old soldier. I took up a homestead in Missouri twenty-five years ago, but abandoned it because it was so poor I could not make a living on it. Can I now take a homestead in New Mexico?

Answer.—By act of congress, passed June 5, 1900, it is provided that "Any person who, prior to the passage of this act, made entry under the homestead laws, but, from any cause, has lost or forfeited the same, shall be entitled to the benefits of the homestead laws, as though such former entry had not been made." You can therefore take a homestead again.

#### HUSBAND AND WIFE—IOWA.

A Subscriber, Hebron, Iowa.—A and B are husband and wife. They started in life with no property. They have worked equally hard and together earned all the property they now have, all of which is in the husband's name. Suppose the husband should die without a will, leaving no children, how would the property be disposed of according to law?

Answer.—The widow would get first what is called the widow's allowance, consisting of various articles of household furniture and other personal property, and provisions for a year, etc., and then one-half of the balance of the estate, the other half going to A's parents.

#### LEGACIES CHARGED ON LAND.

A Nebraska Subscriber.—A man in Iowa owned a farm of 160 acres. He had a son and two daughters. The son had been renting the farm from his father for a number of years. The father died last March leaving a will by which he devised the farm to his son, providing that the son should pay to each daughter \$3,000, and that title to the farm should not rest in the son till such payments were made. (1) Does the son have to pay rent to the daughters for 1906 or until the estate is settled? (2) Are the daughters entitled to legal interest on the amounts bequeathed to them until they are paid?

Answer.—(1) He does not, but he will have to pay interest on the sums bequeathed to them from the time of the settlement of the estate, or from the time when it is ascertained that the land is not required to be subjected to the payment of debts. This answers both questions.

#### DOWER IN ILLINOIS.

An Illinois Subscriber.—My father died thirty years ago, leaving my mother and several children. He owned 240 acres of land. Mother took eighty acres of the land as her dower. One of the children, a daughter, got married, and afterwards died leaving a husband, but no children. Will the husband be entitled to any share in the eighty-acre dower tract when mother dies?

Answer.—He will not. If the mother had died before the daughter, then the daughter would have come into possession of her interest in the eighty acres, but so long as the mother lived, the daughter could not come into possession, and she died without having come into possession and at her death had no interest in which her husband could be endowed. The supreme court of Illinois has decided that where one owns a reversionary interest in land in fee, a life estate in it being outstanding, and dies before the holder of the life estate, the surviving spouse is not entitled to dower.

## True Tools

You can't square up a block with a lop-sided plane—saw straight with a buckled saw or bore a clean hole with worn-out bit. To do a good job you must have good tools. That's the reason men who have used and studied tools a lifetime insist on having

## KEEN KUTTER

### QUALITY TOOLS

They show their excellence not only in actual use, but at first glance—the "hang," balance, finish and careful adjustment being apparent. ## DEFORMITIES CURED!

ALL PERSONS CRIPPLED OR DEFORMED, LAME OR PARALYZED, SHOULD INVESTIGATE AND SEE WHAT IS BEING ACCOMPLISHED AT THIS INSTITUTION FOR THESE CASES.

**CROOKED OR CLUB FEET** of any variety, and at any reasonable age, can be made straight, natural and useful. The methods used are mild; no cutting, no plaster paris, no severe or painful treatment of any kind, and the result is guaranteed.

**POLYDIPLOID DISEASE**, when treated in time at this institution, will result in no deformity; paralysis will always be prevented; the health and strength of the patient is at once improved; the growth not interfered with. Plaster paris is never used.

**SPINAL CURVATURE**, even in long standing cases can be perfectly corrected by the new and improved methods in use here; plaster paris, felt or leather jackets are never employed. Names of patients recently cured, after all ordinary methods and doctors had failed to afford relief, will be furnished on application.

**HIP DISEASE** can be cured without surgical operations or confining the patient to bed. Abscesses, shortening deformity and loss of motion can always be prevented, and, if already present, can be cured. The methods used here in the cure of Hip Disease in all its stages are radically different and more successful than those generally employed. Write for information.

**PARALYSIS and RESULTING DEFORMITIES.** For no class of afflictions has greater preparation for successful treatment been made. Deformities of the limbs, joints or feet, resulting from Paralysis, can always be corrected without surgical operations or severe treatment. Paralysis could never be neglected; children never outgrow it; it is not incurable.

**CROOKED AND DISEASED KNEES, HIPS, HANDS, LIMBS** and deformities resulting from Rheumatism are successfully treated without pain.

This is the only thoroughly equipped institution devoted to the cure and correction of deformities. Examination and consultation by mail or in person, free of all charge. References furnished on application. Pamphlets sent on request.

THE L. C. McLAIN ORTHOPEDIC SANITARIUM, 3100 PINE STREET, ST. LOUIS, MO.

BOYLES COLLEGE, 1804 HARNEY ST., OMAHA, NEB.

# VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

## SYMPTOMS AND TREATMENT.

### HOG CHOLERA.

I have lost thirty head of hogs. They commenced dying in June and the last died in October. Their ears would swell and be very feverish. Some an hour or so before dying would swell at the throat and almost all would break out with red spots on legs and belly. Their droppings would be dry and hard little balls, as from sheep. I bought twenty-one head the 20th of November and three have died the same way. Could you give me any remedy?

The red spots indicate hog cholera, which causes fever and at such times ears would likely be hot. To settle the matter a post mortem examination should be made and if it is cholera there will be found raised ulcers on lining membrane of the large intestines, especially in the first of these known as the caecum. All well hogs should at once be moved to new quarters on clean ground not formerly used by hogs and there disinfectants should be freely used in the pens, on the hogs and in their feed. Coal tar disinfectant is suitable for this purpose. There is no known cure for the disease, but some may recover if treated with disinfectants as advised and also are given rectal injections of same. Feed slop of milk, middlings and tankage with free addition in the slop at rate of one quart to the barrelful.

### FISTULA.

(1) I should like some advice as to how I can cure my six-year-old sorrel mare of fistula. I think the fistula was started by a collar bruise some four months ago. I had the ailment treated by a man who professed to be a specialist on doctoring fistula and the mare seemed to do better until the last few days. One side which has healed over feels quite gristly and hard and is getting larger. The other side is running a little yet. (2) I should also like a recipe to reduce swelling such as might be caused by collar on top of horse's neck.

After removal of hair and thorough cleansing of enlargement the knife should be used to freely open down to the very bottom of each pocket and pipe. After that flush out the cavities once daily with a large quantity of hot 2 per cent solution of permanganate of potash or coal tar disinfectant and then pack with oakum saturated with a mixture of equal parts turpentine and raw linseed oil. When the wound is healing nicely blister the enlargement repeatedly with cerate of cantharides. Success will depend upon

## Lump Jaw

The first remedy to cure Lump Jaw was

### Fleming's Lump Jaw Cure

and it remains today the standard treatment, with years of success back of it, known to be a cure and guaranteed to cure. Don't experiment with substitutes or imitations. Use it, no matter how old or bad the case or what else you may have tried—your money back if Fleming's Lump Jaw Cure ever fails. Our fair plan of selling, together with exhaustive information on Lump Jaw and its treatment, is given in Fleming's Vest-Pocket Veterinary Adviser.

The Man Who Stands Back of  
the "Knodig" Pitless Scale

# Let Me Send You a "Knodig"

## Pitless Scale on 30 Days'

## FREE TRIAL

No Money Down

No Notes to Sign

Nothing to Pay

## My Scale—the Knodig Pitless—is used by the U. S. Government, Which Proves its Quality.

You can't afford to buy one of those inaccurate, poorly constructed Pitless Scales, which will do poor work and last only a year or two, nor a high priced, old style Pit Scale which makes big repair bills and cannot be moved about on your place.

What you need is a KNODIG PITLESS, which costs you a little more at the start than the "cheap" scales sold by the mail-order houses, but is the best investment in the long run because it lasts a lifetime.

The "KNODIG" costs from \$30 to \$50 less than a Pit Scale, and is as good as any scale made at any price. It is the only scale backed by an unlimited iron-clad 10-year guarantee. I make the "KNODIG." I know just how good it is, and I can afford to stand back of it.

You positively can't afford to buy a scale until you have seen my big illustrated catalog showing the brand new models A and B "KNODIG" PITLESS with Protected Bearings. Ready for instant use when you want them.

No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "KNODIG" PROTECTED BEARINGS.

Fully covered by patents. Sold only direct from factory at lowest factory prices. Costs about half the price of a Pit Scale and has no expensive pit with rotting timbers, rusting parts and big repair bills.

Can be moved anywhere on your land, wherever the work happens to be. It is personal property. Should

H. C. Gumbel, Genl. Mgr. National Pitless Scale Company,  
2011 Wyandotte Street, Kansas City, Missouri.

you sell your farm, the "KNODIG," unlike the Pit Scale, does not go with the land. Absolutely accurate, because tested according to U. S. Standard of weights. The U. S. Government has selected the "KNODIG" for use in the Kansas City Post Office.

My plan saves you all the middlemen's profits. Deal direct with me. No Agents, Salesmen, Jobbers or Dealers stand between you and my factory.

Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer? Does it make the scale you buy any better? Does it add one single penny to its value? Then why not save the middleman's profits and keep them in your own pocket?

I am willing to PROVE that the "KNODIG" Pitless is the scale you need. I will send a set to you, or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer, on a month's free trial.

You have nothing to pay until you're satisfied. No deposit, no notes to sign, nothing to do but give the "KNODIG" a fair, honest trial at MY risk. If it doesn't please you, send it back, and I will pay freight BOTH ways. And I will also pay the expense of setting the "KNODIG" upon your premises.

Write to me personally for the new Knodig Pitless Scale Catalog. It contains over 40 fine half-tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover. The book is Free. You will want to see it. Write for it today, to

on the thoroughness of the operation. (2) For sores and swellings on top of neck use a mixture of two ounces of tincture of iodine and six ounces of extract of witch hazel applied with brush twice daily.

### BARREN MARE.

Will you, if possible, tell me why I cannot get my mare in foal? She is seven years old and about sixteen hands high, dark chestnut in color with white points, and well bred. She has foaled one mule colt at the age of five years. In July of that year she had a severe attack of distemper and in August following her udder became swollen and broke on each side and discharged matter for about three or four months, but I finally healed it with peroxid of hydrogen and it became about its normal size. Since then I have bred her several times and she will not get in foal and have used an impregnator. She seems to be in good health. I would be very thankful for any information you could give me.

We would consider it a good thing that the mare fails to conceive, for her udder is ruined by the formation of abscesses so that should she have another foal she would be unable to nurse it and the hand raising of a foal is by most farmers considered a nuisance. Apart from this it is quite possible that in time she will recover from the attack of distemper so that she would conceive if bred, and to hasten that time vaginal injection of the yeast mixture should be used. Understand plainly, however, that we strongly advise against the breeding of this mare.

### BLOODY MILK.

I have a four-year-old cow that was fresh last spring and has been giving milk ever since. About six weeks ago the milk from her right teat began to be streaked with blood and continued worse until about two weeks ago she gave what seemed to be pure blood. It gets better and then worse. Sometimes the blood is very clotted. Her udder does not seem swollen nor pain her. The only treatment I have given her is the use of turpentine as an application. Can you give me any information in regard to treatment to relieve the trouble. Would it be advisable to dispose of the cow?

Unless you sell the cow as a "canner" or prefer to fatten her off we would advise you to treat the case rather than dispose of her. It should be remembered, however, that in some instances bloody milk is a result of tuberculosis of the udder; hence, it always is well to test with tuberculin to determine the presence or absence of the disease. Sometimes a dram of dried sulphate of iron mixed in the feed night and morning will cure the trouble; in more obstinate cases mix two drams of dilute sulphuric acid in the drinking water twice daily and bathe the udder three times daily with cold water, then with a lotion com-

posed of two drams each of powdered alum and sulphuric acid in a pint of cold water.

### LAME COW.

I have a red cow four years old that cannot bend her left hind leg. She will pull it along for a few steps, then all of a sudden it will bend and she will walk all right for a few steps. Seems to bother most just after standing still. Has been that way since spring, but seems to be worse now. Cow is in good order and fresh about two weeks. What can I do for her or is there no cure?

The seat of the trouble is the stifle and we take it that the patella slips out of place at which time the leg will be stiff and on the patella snapping back into place the leg will act normal. In cows treatment is likely to prove unsatisfactory, but should consist in the application of blisters to the stifle joint. Procure a suitable ointment from your local veterinarian.

### SPLINTS.

I have a steel roan colt two years old weighing about 1,000 pounds. He has two lumps or bones on the inside of the fore legs below the knee. Please inform me the cause of this and how to remove same. They started to grow about four months ago.

The bony growths referred to are called "splints" and come from irritation and inflammation induced by strain or too much running and jumping and usually affect the legs of the colt that has an in-born predisposition to throwing out of bony growths or the one that has insufficient bone below the knees. Restrict exercise and after removing hair from parts blister one splint at a time with a mixture of one dram of biniodid of mercury in an ounce of lard. Do not wash blister off, but in three days apply lard and repeat the lard application daily for a week or so. Then blister the other splint. It may be necessary to blister several times.

### WEAK STIFLE JOINTS.

I have a bay colt coming three years old next spring. I keep him in the barn at night and turn him out during the day. Kept him in a single stall four feet wide. About two months ago on taking him out one morning he dragged one hind foot; then brought his leg forward with a quick, jerky move; then walked a step or two all right; then dragged and jerked again until he had gone a rod or two, then went all right. I then put him in a double stall nights for a week. He was all right during that time. I put him in the single stall again and next morning he acted again as stated above. I have kept him in double stall since and he has been all right until yesterday morning, when he dragged his left leg badly; could not put it forward at all. We pulled his leg forward a few times and he was soon able to go all right. This morning he was affected in his right leg, but in a mild form. He is in good flesh and has a good appetite. Can

## THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, kafir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

DEPT. B, IOWA CITY, IOWA.

## American Saw Mill Machinery.

Traction and Stationary Engines, Air Cooled Gasoline Engines, Separators, Shellers, Shredders, Hay Balers

We Repair Machinery of all Kinds.

CEDAR RAPIDS MACHINERY & SUPPLY CO.,  
307-9-11 3D AVE., CEDAR RAPIDS, IOWA.

you tell me what is the matter and give me a remedy?

From weakness of the muscles and ligaments of the stifle joint the patella (knee cap) slips out of place and hind leg is then thrust backward and remains in that position until patella snaps back into place. The colt in stall

so that he cannot lie down and blister the stifle with cerate of cantharides. In bad cases the foot of affected leg should be kept well under the body by running a rope from a hobble around fetlock to collar around neck, passing it between fore legs. The blister may have to be repeated several times.

#### WEAK STIFLE JOINT.

We have a colt that is one year old last spring and about two months ago we noticed that she had some trouble in trying to walk. She would be walking along all right and all at once she would stop and her left hind leg seemed to get stiff so she had no use of it at all. She would turn around and could not get that leg from the ground. We never did anything with it, as we have never heard of anything like it before and cannot see anything wrong just by looking at it when the colt is standing still. We would appreciate it very much if you could give us some light on the question.

See reply to question above.

#### LAME CALF.

I have a spring calf that is lame in its foot. It can hardly get around. It commenced getting so in August, when it ran with the cow, and was a fine, large calf. It eats well and seems healthy otherwise.

An examination will have to be made to determine the cause of lameness. It may be that a foreign body has lodged between toes or that skin of those parts has become sore from wading in filth. We are unable, however, to tell what is the matter, but will be glad to advise again after you have made the necessary examination.

#### SICK LAMBS.

I bought 120 sheep this spring and they did well until the last thirty days, when a few of the lambs began to get poor, so I penned them up and fed them oats. They did not care to eat anything, however, and after about ten days two of them died or starved to death. I had tried feeding them with a drench of flax seed and milk. At times they would seem to want to eat but couldn't. One I thought was partly blind. They did not cough nor sneeze. I cut one open but could not find anything wrong inside. Never had sheep before and am not acquainted with their diseases. Can you tell me what is the trouble?

There is nothing in your statement to enable one to judge confidently of the probable cause of death, as many different diseases lead to lack of appetite and death. It is most probable, however, that worms are causing the trouble, and if you find the lining membrane of the eyelids white, then you may conclude that worms are present.

## Just Ask for Our Special Price on this CHATHAM Fanning Mill

Our answer will be a genuine surprise to you. Why? Well, there will be a whole package of surprises, but the biggest ones are these.

First, the low price that we will quote you.

Second, the easy terms on which we will let you pay for the mill.

As a matter of fact, the Chatham Fanning Mill is a continual source of surprise to every man who buys it, for it does so many more things than we mention in our advertising and does them so well.

Now, this mill will actually clean, separate and grade (yes, sir, we said grade, and we mean it!) from 40 to 80 bushels per hour. Its capacity is wonderful, its ease of operation is remarkable, its all-around usefulness and its importance as a profit-maker makes its owner wonder how he ever got along at all without a Chatham.

The Chatham Fanning Mill will handle all kinds of grain and seed. It tackles any kind of a job.

The Chatham Fanning Mill is "death on weeds."

It will take huckhorn plantain out of clover—in fact, it will wipe out any kind of weed pest by giving you pure seed grain.

This mill is equipped with 17 screens and riddles. It has a patent haggling attachment which saves one man's time. It's got more special features than we have space even to name here. They're practical—every one of them!

Our idea, in building the Chatham, is to make it so complete and perfect that each mill sold will be a big advertisement for us and bring us more orders.

**THE MANSON CAMPBELL CO., Ltd.**

Box 513, Topeka, Kas.

515 Wesson Ave., Detroit, Mich.

We have 24 Branch Warehouses and make prompt shipments.

In other words, we let the mill sell itself. We will ship you a Chatham Fanning Mill on

### 30 Days' Free Trial Freight Prepaid

no matter where you live. You can have the use of it all that time, free, while you are making up your mind whether to buy it or not. If it doesn't do all we say it will, send it back at our expense.

We're not going to let you keep it if it doesn't do the work and do it right! Selling Fanning Mills on the plan we do—direct from our factory to the actual user—the very life of our business depends upon the satisfactory working of the mills we put out.

So we just leave the whole question for you to decide.

All we ask is that you try the Chatham. Let it prove itself. Let it show you what it can do—how it can quickly put its own cost back in your pocket and make a profit for you. The Chatham Fanning Mill isn't a luxury. It's a necessity! You need it right on your farm and you need it NOW!

### Chatham Book Free!

Send for it.

It tells of over 100 ways to increase farm profits. Tells how to stop the losses and make every cultivated acre on your farm yield crops in abundance. It is a regular Bureau of Free Information on Grain, Breeding, Planting and Seedling. It talks right out. Tells the very things every farmer wants to know, in a mighty sensible, interesting way. Get it. Read it. Profit by it.

It will be sent promptly, postage paid, if you just ask for it on a postal card. If you live west of the Mississippi, write our Topeka office; if east, write to Detroit.

## SKUNK Skins, HORSE HIDES and CATTLE HIDES

and all other kinds of RAW FURS bought for spot cash, 10 to 50% more money for you to ship Raw Furs and Hides to us than to sell at home. Write for Price List, Market Report, and about our **HUNTERS' & TRAPPERS' GUIDE A \$5000 BOOK** Best thing on the subject ever written. Illustrating all Fur Animals. 300 Pages, cloth bound. roots, if procurable. Three times daily give her two drams of salicylate of soda and half a dram of powdered nux vomica in thin gruel as a drench. We are taking it for granted that you know by testing with tuberculin that she is not tuberculous. That disease is to be suspected in all mysterious ailments of a cow.

#### FAIL TO BREED.

I have some full blooded Duroc Jersey sows, 1st of May farrow, that will weigh about 200 pounds. They have been fed on shorts, etc., with rape, until frozen. I wish to breed some of them and they have not come in heat. Is there anything I could feed them that would help?

Reduce feed and allow the sows to run out as much as possible. The feeding of charred corn on the cob is said by many breeders to have the desired effect in such cases.

#### RICKETS.

Please tell me what is the matter with my chickens and how to prevent the disease spreading among them. They limp around a few days and then die. They seem to eat pretty well when they are sick. We think it is a bone disease, as they get about twice the ordinary size and are full of small holes. We feed them mornings ground corn and bran with some chicken food in it, and put logwood in their drinking water. We give them shelled corn in the evenings. They are not too fat nor too poor, but are in good shape.

The chickens have not been getting sufficient bone-making material in their food. Corn is especially apt to induce rickets, in which condition the leg has an excess of organic matter and a deficiency of inorganic matter. For corn substitute wheat, oats, bran and ground bone. Also allow access to oyster shells and plaster. Make the chickens take plenty of exercise by sprinkling grain on the ground and covering with straw or other litter.

#### DYSENTERY.

We have a bunch of calves of twenty head and have lost two with a disease which we have never before heard of among cattle. It is a bloody dysentery. They scour and become weak, and toward the last they lie down and draw their limbs up close to body and roll their eyes, which look very glassy, and in about three or four days they die. We have opened them afterward and found the rectum all black for about two feet and the other intestines somewhat inflamed; also the stomach. We had them on a wheat field where quite a lot of oats had grown up after the wheat was sown. We had an oats straw stack in the field that they could run to. We also fed them some kafir corn that was sown and mowed. When we lost the first one we took them off the wheat and oats and about a month later we lost the other one. We were then feeding a little of the fourth out-

and the sheep should have gasoline in dose of one tablespoonful mixed in six ounces of milk. Give this dose from a bottle and be very careful not to choke the sheep, which should be set on its rump at time of drenching. Repeat in three days and again the following week. Feed well on oats and bran along with good mixed hay and bright corn fodder.

#### DISEASED BONE.

I have a black horse five years old which had a bad ulcerated tooth below. It broke and ran before it was pulled. It was pulled about a year ago by a veterinarian who said it would heal in less than a year. It is running quite freely. Can anything be done for it?

Employ a different veterinary dentist to examine into the condition present, as we think it quite probable that part of the diseased molar remains and it is quite certain that if the tooth has been removed there is still diseased bone and tissue present, and this will have to be removed before healing will take place. A good mixture for such fistulae is a 5 per cent solution of protargol injected twice daily.

#### SWOLLEN HOCK JOINT.

I have a bay mare coming five years old that has a swollen hind leg. The leg is swollen to the knee and has been so since about the 15th of September, but she has never gone lame on it. She strikes her hoof on her front one some in walking, and after becoming tired scrapes it some on the ground in trotting. Today I noticed a small sore under fetlock. I have blistered it twice with caustic balsam, but it seems to do no good. Could you give me any remedy?

Stop feeding rain and substitute hay, fodder, roots and bran. The latter food should be given carefully to prevent causing colic and should be wetted with scalding hot water and allowed to stand a couple of hours before using. See that she is well exercised every day. In food or drinking water every other day mix a dram of saltpeter until six doses have been taken. Clip hair from joint and rub well with mercurial ointment every other day. We fear, however, that it is somewhat late to expect satisfaction from any method of treatment.

#### LAME COW.

Can you tell me what is the matter with my cow? She came in about three months ago and was taken sick about one month ago. She was in good condition and gave good flow of milk. The first thing noticed she commenced to stand with her ankles cocked and in a few days she lay down most of the time and in about two weeks had to be helped up. She has had a good appetite all the time and has given a fair amount of milk, but last week she began to fall off on her milk. At the present time she can get up better, but her left leg is swollen and she stands with her hind feet about eight inches too far forward. When she gets up she does not stay up more than ten minutes at a time. The past week her breathing has been a little faster than normal.

We think it probable that the cow is affected with rheumatism and would advise you to place her in a roomy, dry box stall and there feed her nutritious, easily-digested food, including

### GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

ting of alfalfa and had them running in corn stalks. We gave the first one about one pint of raw linseed oil and the second one a good pint of castor oil, but they died anyway. We have another one now that has the same trouble. We gave him a quart of raw linseed oil and repeated it the next day. This one is still alive. Please tell us what the disease is and what we shall do for it.

Irritants in the food cause the indigestion and dysentery, and more care will have to be taken in the feeding. Kafir corn fodder sometimes is poisonous from presence of prussic acid and corn stalk fields often contain injurious matters which may cause death of cattle pastured there. Try to avoid all possible causes of indigestion and when a calf scours give in each pint or pound of milk, which should form the entire ration for a few days, one teaspoonful of the following mixture. Formaldehyde, half an ounce; freshly boiled cold water, fifteen and one-half ounces; mix. As improvement takes place also mix dried blood meal in the milk and gradually get the calves onto more solid food.

# Success

You go straight to success if you hatch and brood right. Get machines that have proven worthy, not once but thousands of times.

## Successful Incubators and Brooders

are record makers. Nearest nature's own way. Self-operating in all things. Many thousands at work giving perfect satisfaction year after year. Get on the safe side. ## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### A NEGLECTED SOURCE OF INCOME.

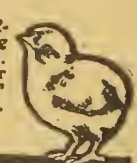

It would seem that the real value of feathers is unknown to the majority of poultry people. The old saying: "Many a little makes a mickle," is nowhere better exemplified than in the careful saving and sale of feathers. To illustrate this, we give the official quotations from South Water Street, Chicago, where probably poultry and poultry products are sold in greater quantities than anywhere else in the world. These are June quotations, and at certain seasons prices run higher, and seldom lower.

## Hatch Chickens by Steam with the EXCELSIOR INCUBATOR Or WOODEN HEN

Simple, perfect, self-regulating. Hatch every fertile egg. Lowest priced first-class hatching machine. GEO. H. STAHL, Quincy, Ill.

of feathers should go to waste annually, in the poultry yards of our land. There is good money in the intelligent saving and preparation of the commodity which should be gathered in by the rank and file of our poultry raisers.

### Recent Experiments in Feeding Ducks.

The feeding and management of poultry has been studied by a number of the stations. In most cases the work has been confined to chickens, although some noteworthy investigation has been conducted with geese. Quite recently three of the stations have reported experiments with ducks.

The Michigan Station studied the comparative growth made by thirty-nine young ducks and the same number of chickens on similar rations. The ducks were two weeks old at the beginning of the test and were fed middlings, corn, and bran, together with the necessary grit and green food (lettuce), and were given the run of a small yard with a grass patch. The chickens were fed bran and relatively more corn meal than the ducks, but had no middlings. They were also given lettuce and allowed the run of a grass plot. Both chickens and ducks were given skimmed milk in addition to the other food. At the beginning of the test the ducks weighed 13.25 pounds and the chickens 7.5 pounds. In five weeks the ducks were nearly ready for the early market and had gained 108.75 pounds. They had eaten 41.3 pounds of corn, 93.1 pounds of middlings, 43.4 pounds of bran, 59 pounds of lettuce and 88 pounds of skimmed milk. The total cost of a pound of gain was 1.9 cents. In the same period the chickens had gained 22.5 pounds and had consumed 52.2 pounds of corn, 25.9 pounds of bran, 46 pounds of lettuce, and 44.3 pounds of skimmed milk. The total cost of a pound of gain was 4.84 cents. In discussing the profit corn and bran are rated at \$14 and middlings at \$15 per ton, milk at 20 cents per hundred, and lettuce at 1 cent per pound. The ducks gained much more rapidly than the chickens and the gains were more economically made. The chickens were not large enough for market at the close of the test and the feeding was continued for some time before they were sold.

At the North Carolina Station eighteen Pekin ducks were fed for fifty-six days from the time they were hatched. At the beginning of the test the total food consisted of 4.4 ounces of corn meal and an equal amount of bran per head daily, while at the close of the test 6 pounds 10 ounces of meal, 4 pounds 3 ounces of bran, and 3 pounds 5 ounces of bone were fed daily. In addition to the grain an amount of fine grit equal to one-sixth of the weight of the grain, and chopped green clover equal to one-

When writing please mention this paper

fourth of the bulk of the ration were also fed. All the feed was mixed with water to a crumbly mass and fed in troughs. No water was allowed except for drinking purposes. In this test corn meal, cut bone and grit were each rated at 1 cent per pound and wheat bran at .9 cent per pound. Account was also taken of the value of the clover fed, the eggs set, and the food of hens carrying the ducks. The ducks weighed 2 ounces when hatched, and 4 pounds 15½ ounces at the close of the test. The cost of a pound of gain was 5.05 cents; that is, the ducks cost on an average 25 cents to fatten and were sold for 50 cents each.

Experiments at the New York State Station already noted in this series of bulletins showed that ducks did not thrive and make rapid growth unless they were fed a considerable amount of animal matter, the most rapid and economical gains being made when from 40 to 50 per cent of the protein of the ration was supplied in the form of animal matter.—(Department of Agriculture Bulletin.)

"Out of fifty chickens that had the roup bad, some blind, we never lost one after using Walker's Roup Remedy." Mary Ann Orfield, Lamoni, Iowa. For trial send twenty-five cents for fifty-cent package. Walker Remedy Company, Lamoni, Iowa.

### POINTERS.

—Mr. D. H. Leshar, of Robins, Iowa, has some fine large-boned Mammoth Bronze turkey toms and some Barred Plymouth Rocks on which he is quoting very liberal prices.

In his advertisement, which will be found on this page of The Homestead.

—Mr. W. O. Fritchman, of Muscatine, Iowa, breeder of Light Brahmas for the past twenty-five years, has an advertisement on this page of this issue.

—Mr. O. M. Healy, of Bedford, Iowa, has some big, strong, Silver Laced Wyandotte cockerels for sale as per advertisement on this page of The Homestead.

Mr. John A. Johnson, of Dayton, Iowa, is offering Silver Laced Wyandotte cockerels, scoring from 92½ to 92 points, for sale in his advertisement that appears on this page.

—Mr. Albert Haus, of Waucoma, Iowa, has stock for sale from his Upland Poultry farm of Light Brahmas, Rhode Island Reds and Rose Comb Brown Leghorns. His advertisement appears on this page.

—Mr. F. E. Wadsworth, of Alta, Iowa, is offering Barred Plymouth Rock cockerels for sale in his advertisement that appears on this page. He will also have eggs for sale this season. He solicits correspondence.

—Mrs. Charles Steddom, of Lacey, Iowa, is offering Buff Plymouth Rocks for sale, both hens and cockerels, scoring from 90 to 94½ points, in her advertisement that appears on this page of The Homestead. Mrs. Steddom will sell them at reasonable prices.

—"My pure-bred Silver Laced and White Wyandottes are in fine condition," writes Mrs. J. W. Bloxham, of Grundy Center, Iowa, in furnishing advertisement found on this page, "as are also my ducks and geese and I shall be pleased to fill orders for those wishing anything in my line, and shall do my best to please my patrons."

—Mr. O. J. Viland, of Slater, Iowa, has an especially good lot of Barred Plymouth Rock cockerels of the famous Eclipse strain which he is offering for sale at prices named in his advertisement found on this page. These cockerels were scored by Judge Todd, who pronounced them excellent breeding stock. Mr. Viland considers them the best he has ever raised.

—Mrs. Ida Hepp, of Marion, Iowa, is offering Barred Plymouth Rocks, and Buff Cochins for sale in her advertisement appearing on this page. She writes: "I am offering some very choice birds in Barred Rocks and Buff Cochins. The Barred Rocks go as high as 94 points. The judge that scored my stock said that they were as large and good as any he had seen this year."

—The advertisement of Mrs. L. C. Dennison, of Arbela, Mo., appears on this page of The Homestead. In furnishing copy she writes: "My Wyandottes are large, white, and healthy. They are sired by a twelve-pound cock. In Buff turkeys I have a fine flock of seventy-five, not one with white wing or tail feathers. They are large and very quiet, never roaming from the farm."

—Mrs. J. H. Richardson, of Bristow, Iowa, in furnishing copy for her advertisement appearing on this page, writes: "Our White Holland turkeys are exceptionally fine this season. By careful selection of breeding stock we have obtained larger bone and kept up the quality." Mrs. Richardson is also offering Pekin ducks for sale of the Rankin strain. Her prices will be reasonable.

—Mrs. R. Van Der Wert, of Lacey, Iowa, has pure-bred Barred Plymouth Rocks which she is offering for sale in her advertisement on this page. In furnishing copy Mrs. Van Der Wert says: "I have nothing but scored birds on my farm. They score from 88 to 92½, several of them as high as 90 points. I have nothing but Barred Plymouth Rocks of the pure Bradley and Latham strains."

—Mr. J. Q. Swallow, of Nodaway, Iowa, in furnishing copy for his advertisement found on this page writes: "The Light Brahmas that I am offering are first class. Judge Russell scored stock for us last year at the interstate show and gave me first on pen; this year at the Villisca show, Mr. Russell gave me first on cockerel scoring 92½ points; first on pullet scoring 92½ and first on pen. My stock was sired by a 92½ yearling cock. I have as good birds this season as I have ever raised and this is my thirtieth year in breeding Light Brahmas. I guarantee satisfaction."

—Mr. Guy W. O'Fall, of Prairie City, Iowa, is offering some extra good Mammoth Bronze turkeys from high-scoring stock. His advertisement is found on page — of this issue. His yearling tom weighs forty-five pounds and scores 96, and some of the young stock scored as high as 96½ by Mr. A. L. Pedrick. One of his customers, Mr. B. W. Brown, of Prairie City, writes Mr. O'Fall as follows: "I have been buying and shipping poultry for thirty-seven years, but want to say to you that the three hen turkeys you recently delivered to me are the largest and finest that I have ever handled. They weigh, respectively, twenty-five, twenty-six and one-half and twenty-seven and one-half pounds."

—Messrs. Strater Bros., of Monroe, Iowa, in furnishing copy for their advertisement that appears on this page of this issue, write: "We have as fine a lot of Barred Plymouth Rocks and Mammoth Bronze turkeys for sale as we ever raised. We made an exhibit at the Central Poultry Show at Monroe, Iowa, December 10th to 14th; showed seven turkeys winning seven ribbons with twenty in competition. On Barred Rocks we won first, second, fourth and fifth on cockerels; third and fourth on pullets; first on breeding pen, eleven pens competing. We also won special on best cockerels, three specials on best breeding pen and special on the greatest number scoring 90 and over, all breeds competing. We also had the greatest number of birds standard weight."

—Mr. M. V. Leeper, of Redfield, Iowa, whose new advertisement appears on this page, in furnishing copy for the same writes: "My cockerels are a prize-winning, uniform lot of birds this season. At the Lohrville (Iowa) Poultry Show November 27th to December 1st, Warnock, judge, I exhibited twelve birds, and in a class of 113 Barred Plymouth Rocks I won first on cockerel, 92; second on cockerel, 91½; third on cockerel, 91½; fourth on cockerel, 91, and fifth on cockerel, 91. First, second, third, and fourth on pullets, 92½, 92, 92 and 96½ points; hen 90½. First on pen, 184 1-16, almost a clean sweep, losing out on fifth pullet only in strong competition. All of these cockerels are now for sale, together with fifty others from same mating, also thirty fine Mammoth Bronze turkeys."

## OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 627, Kansas City, Mo.

## WITH THE EDITOR.

Sometimes it would be vastly better if a minister read a really good sermon by some one else instead of grinding out his own stuff. I have had this thought burned into my heart as I have sat listening to tedious, uninteresting sermons. It has taught me a lesson.

It has always seemed to me that the first editorial of the New Year should be of a special character, that it should set forth ideals and provoke to larger life. While I was casting about, deciding upon my New Year message to the Home I chanced upon an article by John Milton Scott entitled, "The Symbol of the Circle, Its Lyrics and Its Lessons," reprinted from the New York Magazine. As I read I said, "Here is my message, the very things I want to say said so tersely the thoughts cling like nails sent home with strong blows." It is not difficult to anticipate what followed. I promptly decided that extracts from the article should be presented to the Home. I ask for this article an unusually careful reading. It contains sentences which might well be blazoned on the walls of every home in the land. I would that some of its thoughts might be graven upon the tables of our hearts. To drink in its truths and resolve to make them the governing principles of our lives is to insure that 1907 shall be in very deed "A Happy New Year."

"The circle! Have you thought of it? The round apple?—and is there a fruit that grows which does not curve itself to the circular truth of the earth? The round tree? And does not every flower arrange its petals to the magic of a circle? The round earth, and in the sky the round moon and the round sun. The body of a man conforms to the earth's curvature. And the head which thinks, the heart which loves, are they not fashioned upon the sweep of the curve which is the prow of Beauty and her wake as she thrills across the waves of this world? From this sign manual of Beauty have the mountains escaped, or the seas? Are they not signed with her water-mark, which can not be denied except they be destroyed?"

"Search for the circle and see it everywhere. Is not everything just some modification of it? Is not the infinite variety of form in nature but the infinite modification of the idea of a circle? Some form of it everywhere! The clover nods it to you in pink, and the bee flying to the clover's bosom wings it to your studious eye in black and gold. Gather together all the leaves of the summer, and from every line and lineament of them they laugh the green truth of the circle into your eyes, which circle back to them again their smiling answer. The oak's heart is this, as the dimpled laughter of babes. It is in the bird and the bird's flight, and could you see the bird's song it were a replication of rivers and seas, or the circling waves of still waters when swallows dip into them for a drink. Will not the mathematicians tell you that to draw a perfectly straight line is an impossibility? Push on your straight line upon the earth's surface, and it will drop into a curve and come running again into itself. See if you can escape the curve. Search and see if it is not as impossible to escape it as it was impossible for the psalmist to escape God. Search yourself and see if it is not as impossible for you to run away from it as it is for you to run away from yourself. And the circling year, does it not always come running back into itself for renewal—laughing back into itself with the laughter of spring blossoms and bird songs?"

"And now some of this truth's practical meanings to us. Each thing that goes forth from us must return again into us. In what I send forth I determine what will return. In its quality I enrich myself or impoverish myself, I honor myself or degrade myself. I cover myself with shame or bring glory to shine about and upon me. I am my fate. I determine my destiny. I am my own devil, tormenting. I am my own God, blessing. If I send forth gentle thoughts, they will come back to me again, making me great. If I send forth thoughts of wrath, their lightning strokes will

**THE OLD RELIABLE**  
**..Anti-Friction Four Burr Mills..**  
Double the Capacity of other Mills.  
TWO HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.  
30,000 Bu. With One Set of Burrs.  
I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.  
Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog.

return to me, blighting my fairness. If I send forth love, it will shine far enough to shine upon me again with all the beautiful increase it has gathered from all the beautiful hearts through which it has passed. If I send forth truth, it will return again in such a great faith-keeping that no falsehood can defeat me. If I send forth deeds of kindness, they will return in a great laughing company which they have loved into their fellowship.

"As ye do unto others it will be done unto you. As ye do unto others ye are doing unto yourself. Do a mean thing, and in the griefed face of your friend or the fierce face of your foe is not its deepest register. Let the mirror reveal to you your own face, and through it look deep into your own soul and, beholding how ugly you have made yourself, shrink from the horror of meanness. When you have done a noble thing, not there in the happy face of a brother may you see its greatest glory. Cast your vision into your own depths, and lo! it is dawn, and the birds of your bliss are at their song, and your being's day greatness among its fellows fashioning your years.

"You are the center of your world. Into that center return the harvests you have sown on all the furrows of life. Nothing of our lives perishes, ceasing to be. Into us everything returns for renewal as the year into its spring. As we live we create ourselves. We are in the image and likeness of our years. Only can we become a beautiful self as we live a beautiful life. As we express we impress, bearing with us the indelible charm of all we have felt and thought and said and done through these multiplying years. We are the autumn of our years. Rounding and ripening into us come all our seasons, all our branches and vines. We are the soul of our years, resurrected and living mortally after they have ceased in dust.

"Oh, wonderful circle, which returns to me everything! Nothing lost. No one perished. No beloved of my soul absent. Each seed of my sowing laughing its autumn gold into my soul's great eyes. "But my evil, you say? The wrong

**WE ARE CUSTOM TANNERS** of the Famous Galloway cattle hides for Robes and Coats. We complete a coat from a 65-lb. beef hide for \$10. We tan, dress, deodorize, color or blend. Fox, Coon, Muskrat, Mink, Opossum, Squirrel, Martin, and manufacture into Muffs or Ladies' Furs.  
**W. W. WEAVER,**  
Reading, Michigan.

I have done? My untruths spoken and lived? My unkindnesses? My cruelties? My deeds of shame? Blessed circle still! . . . I can take my falsehood, come home again, and destroy it out of the universe with my truth. I can take my wickedness and overcome it with my righteousness until there is only the beauty of holiness. I can take my injustice and judge it with a righteous judgment until my skies clear of the fetid storm. I can right my wrongs. I can gentle out my unkindness. I can love out my cruelties. I can overcome all my evil with my good. I can forgive my sins in the sunshine of my holiness, when to look for them would be like searching for the dark with a candle. In my heavens will cease my hells, as discords are played out by great orchestras."

**HOME AND HOME MAKING.****LITTLE HELPS BY THE WAY.**

I hold this truth— whoever wins Man's highest stature here below Must grow, and never cease to grow—

For when growth ceases, death begins.  
—Alice Cary.

"Greatly begin! Though thou hast time  
But for a line, be that sublime.  
Not failure, but low aim is crime."

There are two kinds of people in the world  
—those who are always getting ready to do  
something, and those who go ahead and do  
it.

#### THOUGHTS ON HAPPINESS—TIMELY HINTS FOR 1907.

Perhaps this is as good a recipe for hap-  
piness as one needs:

"What does you do when you see Trouble  
comin'?"

"Well, suh, I meets him half way, sets  
down in de sand wid him, an' teaches him  
ter pick de banjo."

Few men are as happy as their neighbors  
think them, or as miserable as they believe  
themselves to be.

"I'd like to remark," said Uncle Hiram,  
"that this world would be a whole lot happier  
if people would buy grapes and jelly for the  
sick with the money they usually spend on  
flowers afterward."

#### OPTIMISM.

Get all the good there is today;  
Don't fret about tomorrow.  
There's trouble 'round us all the time,  
What need is there to borrow?  
The wise man gets what joy he can,  
And leaves the fool to his folly.  
He knows too much to waste his life  
In gloom and melancholy.

Look on the bright side every time,  
Don't waste your days repining.  
When any cloud looks dark and dull,  
Turn out the silver lining.  
Be wise! Be cheerful, bright and glad.  
Leave to the fool his folly,  
And let your motto be: "Cheer up!"  
Your rule of life: "Be jolly!"  
—Somerville Journal.

#### TASTEFUL DRESSING.

A woman's figure has two possibilities. It  
can be dressed to look its best, or it can be  
dressed to look its worst. Sometimes the  
slightest alteration in a toilet improves the  
effect immeasurably. For example, it is a  
common fault in dressing women who are  
stout and short to make their waists too  
long. If a woman is short her waist line  
should be kept where it will give the great-  
est possible length of line from the waist  
line to the bottom of her skirt. It is a mis-  
take to put a wide girdle on a short woman,  
and such girdle as there is on the dress  
should be of the same color as the skirt, and  
should reach up over the waist and not down  
over the skirt.—L'Art de la Mode.

#### ILL EFFECT OF SHABBILY DRESSED FEET.

Just the other evening a young woman  
called; she had a pretty face, her hair was  
becomingly arranged and she wore a beau-  
tiful costume of silk trimmed in dainty lace;  
she had a good figure, her dress fitted well,  
and as she walked across the room she made  
a very attractive appearance. But when she  
was seated the long skirts were drawn aside  
revealing a cheap, ill-fitted pair of shoes,  
slouched out of shape and scuffed from long  
wear. Somehow or other the attractiveness  
of the woman vanished.

A cheap shoe is poor economy. Better get  
a good shoe, good material and well made.  
It will wear far longer and will retain its  
shape, while a cheap shoe soon loses its  
shape and in a short time is not fit to be  
worn.

It is a good idea always to have two pairs  
of shoes and wear them alternately. This is

## Save Money

By being thoroughly  
informed on tele-  
phone construction.

You can learn all  
about telephones  
simply by sending us  
your name on a pos-  
tal card, or signing  
the attached cou-  
pon and mailing it  
to us. Will send you  
books that tell you  
how to organize a

rural party line, how telephones are  
made and how to put in the system.  
Also clearly illustrated that the man  
that knows nothing about telephones  
can understand.

#### Free Insurance.

We want you to see a copy of our  
free policy insuring telephones  
against damage by lightning. Also  
our bond guaranteeing best work-  
manship and material.

Remember that our business is  
making rural party line telephones.  
We have all the latest improvements.  
Let us put our experts right at your  
elbow to help you.

# I Am the Paint Man

2 Full Gallons Free to Try—6 Months Time to Pay

I Guarantee Freight Charges.

I AM the paint man.  
I have a new way  
of manufacturing  
and selling paints. It's  
unique—it's better. It  
revolutionized the paint  
business of this country  
last year.

Before my plan was  
invented paint was sold  
in two ways—either  
ready-mixed or the in-  
gredients were bought and mixed by the painter.

Ready-mixed paint settles on the shelves, form-  
ing a sediment at the bottom of the can. The  
chemical action in ready-mixed paint, when  
standing in oil, eats the life out of the oil. The  
oil is the very life of all paints.

Paint made by the painter cannot be properly  
made on account of lack of the heavy mixing  
machine.

My paint is unlike any other paint in the world.  
It is ready to use, but not ready-mixed.

My paint is made to order after each order is  
received, packed in hermetically sealed cans  
with the very day it is made stamped on each  
can by my factory inspector.

I ship my thick pigment, which is double  
strength, freshly ground, in separate cans, and  
in another can I ship the pure, old process  
Linseed Oil—the kind you used to buy years ago.  
Any child can stir them together.

I sell my paint direct from my factory to  
you pay no dealer or middleman profits.

#### My \$100.00 Cash Guarantee

I guarantee, under \$100 Cash Forfeit,  
that the paint I am offering you does  
not contain water, benzine, whiting, or  
barytes—and that my Oil is pure, old-  
fashioned linseed oil and contains ab-  
solutely no foreign substance whatever.

I guarantee the freight on six gallons or over.  
My paint is so good that I make this wonder-  
fully fair test offer:

When you receive your shipment of paint,  
you can use two full gallons—that will cover  
600 square feet of wall—two coats.

If, after you have used that much of my  
paint, you are not perfectly satisfied with it in

every detail, you can return the remainder of  
your order and the two gallons will not cost  
you one penny.

No other paint manufacturer ever made such  
a liberal offer.

It is because I manufacture the finest paint,  
put up in the best way, that I can make this  
offer.

I go even further. I sell all of my paint on  
six months' time, if desired.

This gives you an opportunity to paint your  
buildings when they need it, and pay for the  
paint at your convenience.

Back of my paint stands my Eight-  
Year officially signed, iron-clad  
Guarantee.

For further particulars regarding my plan  
of selling, and complete color card of all  
colors, send a postal to O. L. Chase, St. Louis,  
Mo. I will send my paint book—the most com-  
plete book of its kind ever published—absol-  
utely free. Also my instruction book entitled  
"This Little Book Tells How to Paint" and  
copy of my 8-year guarantee.

O. L. CHASE, The Paint Man.  
Dept. 27 St. Louis, Mo.

not only better for the shoes, but it is also  
restful to the feet.

#### LET YOUR LIGHT SHINE.

The wick, to begin with, should hang  
straight down in the oil. Then the oil will  
pass up more freely to the flame, and a  
better light will be obtained.

The wick should be cut with as thin an  
edge as possible. If it has a broad burning  
surface at the top the flame will be yellow  
instead of white.

The chimney should fit tight to the brass  
burner, so as not to let air in where air is  
not wanted.

The holes at the bottom of the burner  
should be kept open, so as to let plenty of  
air in where air is wanted.

The wick should not be turned so high  
that it will char or smoke.

An old chimney lets a better light through  
than a new one, and a shallow bowl lamp is  
better for poor grades of oil than a deep  
bowl lamp.

#### SOME PUBLIC SCHOOL "EXCUSES."

The following curious "excuses," it is said,  
were actually given to the teachers by pupils  
of an East Side public school in New York:  
Frank could not come for 3 wks because  
he had amonia & information of the vowels.  
If Louis is had please lick him till his eyes  
are blue. He is very stubborn. He has a gr.  
deal of mule in him. He takes after his  
father.

Please ex. Henry for not coming to school  
as he died from the car run over on Tues-  
day. By so doing you will greatly oblige his  
loving mother.

You must stop teach my Lizzie fisal tor-  
ture, she needs yet reading & figors mist sums  
more as that, if I want her to do jumpin I  
kin make her jump.

Please excuse my Paul for hein absent he  
is yet sick with dlpterry & der doctors dont  
tink he will discover to oblige his loving aunt  
Mrs. I am his mother's sister from  
her first husband.

#### AMONG OURSELVES.

"Happy New Year" to you all, friends.  
Perhaps I said it last week, but it is  
the sort of thing that bears repeating.  
And I would follow the wish with a  
toast. Here's

My love to all those that I love;  
My love to all those that love me;  
My love to all those that love those that I  
love,

And to those that love those that love me.  
These pretty lines, graven in black  
upon a brass plate, hang in the recep-  
tion hall of my home, just above a  
"House Blessing" which reads: "The  
beauty of the house is order, the bless-  
ing of the house is contentment, the  
glory of the house is hospitality, the  
crown of the house is godliness." As  
hostess in this great newspaper home  
I greet you with this toast and this  
blessing, both of which I would have  
blazoned on our threshold during all  
the days of the year upon which we  
have just entered. And so once again  
"Happy New Year."

Mrs. Anne C. Newbigging brings for  
our meeting today some lines she has  
written, which are rarely appropriate  
at this beginning time. She will read  
them for us:

O it was a beautiful dream I had,  
A dream where hope ran high;  
A dream where pleasure and duty met  
And raised their arch to the sky.  
A dream of home and a dream of love  
With roses and rue entwined;  
Such a dream as the poet dreams on earth,  
But few there are that find.

In my dream of dreams was a husband's  
form;  
And children bright and free,  
And the rose of bliss in a thousand tints  
Bloomed there on my household tree.  
And the winter storm and the storm of life  
Knocked often upon my door,  
But the portals changed with glad some song  
And left us snug as before.

Oft have I felt the composer's thrill—

#### OUR RED LETTER

## Combination Offer

AGAIN OPEN TO THE FARMERS  
OF THE MIDDLE WEST

FIVE SPLENDID PAPERS and MAGAZINES for \$1.25  
A YEAR. SEND US YOUR SUBSCRIPTION TODAY.

The Homestead has never made an offer to its subscribers which proved so  
widely and immediately popular as did our famous "Red Letter Combination"  
last season. Thousands upon thousands of farmers throughout the corn belt  
took advantage of it to supply their families with an abundance of whole-  
some, instructive and entertaining periodical literature, and we have been  
asked many times if the offer would again be open to renewals and new  
subscriptions. Although the profit on such an offer is necessarily small, we  
have decided to repeat the offer during the present season and have secured  
the consent of the other publishers interested to advertise it again for a lim-  
ited time, subject at any time to revocation without notice.

#### THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the  
heart of the corn belt and dealing with agricultural problems from the middle-  
western point of view; edited by farmers residing upon and operating their  
own farms; not a one-man paper, but the embodiment of the combined wis-  
dom and experience of a large staff of editors and contributors; with depart-  
ments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giv-  
ing an abundance of news, literature, poetry, humor, market reports, reading  
matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper,  
dealing with the problems of the day from an independent point of view. Lit-  
erary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the  
farm, readable and valuable from first page to last—brightening and broadening  
the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed  
on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for  
one year.

To secure this great bargain, clip and fill out the following coupon:

Date .....190..

Homestead Company, Des Moines, Iowa:  
Enclosed find \$1.25, for which please send the following five newspa-  
pers and magazines for one year to my address: Iowa Homestead,  
Chicago Weekly Inter Ocean, Kansas City Weekly Star, Farm Gazette  
and Homemaker, as per your special offer to Homestead readers.

Name .....

Postoffice .....

Rural Route ..... State .....

Have longed for the plaudit throng—  
But the joy of the singer returns to sleep  
When the heart has rendered its song.  
Not so in the beautiful dream I had,  
Where pleasure and duty met—  
For there, each day, developed the soul  
To eternal music set.

So this was a dream of home and love,  
Each blest by sweet content,  
And God was there and his angel host  
Their hallowed presence lent.  
Let the singer sing his blithesome song,  
And the poet touch his tome,  
But let me dream my beautiful dream  
Of duty, love and home.

Who would crave a larger world than  
one bounded by "duty, love and home"  
interpreted in the light of twentieth  
century thought? Surely, none of us.  
And is it not well that in these first  
days of the new year we should be  
so beautifully reminded of the privileges  
and the possibilities for happiness in-  
volved in this dream which may be ours  
also, since our poetess has cast the spell  
of her singing mantle about us?

Last week I wondered if some man-  
ly man would not have a word to say  
to our Illinois Bachelor and hoped very

much that it would not be left to the  
women to comment upon what he said.  
Today on behalf of men, a goodly com-  
pany, I have the pleasure of presenting  
Minnesota Nicholas:

I wonder if you will allow a comment on  
the article written by the young Illinois  
bachelor, which appeared in the Home De-  
partment of December 6th. He speaks of  
the reason for the downfall of girls and  
attributes it to the fact of their entering so-  
ciety too young. I agree with him in this in  
all except the term. I would suggest "turned  
loose" too young. But I take issue against  
him on what he says in conclusion. Had he  
said he would never go with a girl who asked  
for or offered a good night kiss, all well, but  
to say, "Allow me to give," is certainly self  
criminating. Is he then so privileged that  
his conduct cannot be questioned? When  
that "right girl" comes around and he puts  
her to the "good night kiss" test, how will he  
feel if she tells him that no gentleman would  
suggest such a thing and that he can look  
elsewhere for girl companionship. I know  
many young men who take pride in their  
self-esteemed ability to test and tell of the  
virtue of a girl and judging from their char-  
acter (and the kind of girls they finally  
marry) I have set it down as an improper  
course for a gentleman to follow, and I fear  
the young man in question has accepted a  
base principle from false teachers, although

he may be conscientious. Whenever I hear some of these young men boasting of their experience I ever say to myself, "If I were the young lady, you would never have my company again." I consider myself competent, and believe every intelligent man competent to tell the "right one" without stooping to the practices of the sons of ill fame. Whenever I fall in with a young lady and she gives indications of a desire to form that near attachment, I discourage it in as pleasant and frank a way as possible. I have had opportunities to work on the feelings of a number of girls, have a "high time" and perhaps obtain a number of kisses, but I consider it dishonorable to do so. On the other hand I can maintain their friendship and confidence and use my influence to cause them to abandon the thoughts and ways of a flirt—or the thought of marrying me. No! When it comes to good night kisses I am either stepping on forbidden ground or putting myself under obligations to make good by my hand, my heart, my love, my life, my all, for the impress I have made upon her affections. I claim the young man has no more right to suggest or encourage these liberties of the affections or the passions than the young lady; neither to grant them. I stand firm for her equal rights—aye, for her defense—and words are weak to express my contempt for the man who by word or deed causes her to become virtuously weaker or take one step downward. No, young man. When the "right one" comes around you will know her and that full well without exacting a number of kisses from a number of wrong ones. I believe your aim is right, but fear you have been taught by the wrong school in this particular.

Hurrah for Minnesota Nicholas! Would there were more men to champion one standard of manners and morals for the man and the woman; more men to reverence their own honor and purity while reverencing these attributes in woman. I wonder what sort of mother trained Minnesota Nicholas? I am curious to know. I hope he will come and tell us how he came to hold these views.

Our members are scattered everywhere and sometimes are here today and gone the next. Mrs. S. C. lived in Nebraska when last she spoke in meeting, and now she hails from—but she will tell you:

In our new home in the far Southwest where we have been over a year, the Home Department is still eagerly read and many times I think I will write, but so many daily cares prevent. At present I am much interested in the talks to young people. With the Editor and when our editress so emphatically expressed her opinion that it was the duty of a truly noble lover to protect the character and good name of his promised wife I wanted to sanction her words. Further, I wanted to say that we as mothers should strive to rear our sons to be strong of character, to be true gentlemen always, ready and willing to shield any woman, sweetheart or friend, to hold them up instead of striving to drag them down. If only the fathers, as well as the mothers, realized that it was their duty to strive to mold the character of their sons—to teach them to avoid the pitfalls of life which they are almost sure to fall into if left unguided! Why, oh, why, is not the same standard of purity required of our sons as of our daughters? Why will some of our fairest and noblest girls accept the attentions of young men who are known to be of doubtful character and then perhaps take them for life companions? A baby daughter a little over a year old was taken from me last summer, but I have left my two older children—the boy and the girl with golden curls. They are small yet, but oh, how I want to teach them as they grow older that character is worth more to them than beauty of face or form; that a good name should be chosen above everything else. Closely allied to the subject of which I have been speaking is another which I would like to see commented upon. A letter and the reply which was recently published in one of our weekly newspapers has caused me to do some thinking along this line. It was written by a young girl who seemed to believe that a married man of her acquaintance was too lover-like in his attentions to her and asked for advice as to what to do about it. The reply was as it should have been, only the writer expressed herself as though she thought that no one of good character would find themselves in that condition of mind, or in other words, that the "tender passion" was or should be under our own control. I have in mind a case where a man and woman both married, were irresistibly attracted towards each other and recognizing this fact mutually, although the world around them did not suspect, avoided each other and kept on in the straight path of duty, if anything more gentle and loving towards the companion and children that God had given them. Now, I do not think where two truly love each other that either would be thus attracted to someone else, but we all know that there are many mistakes made—often a man feels the need of a helpmate and marries one who may prove uncongenial, one to whom he cannot give his best love; or vice versa, a woman is left alone in the world with a child or two, perhaps, and homeless. She feels unable to keep them with her and build a home alone and some man offers her a good home and offers to care for her children as his own. She accepts, only to find that the heart must go with the hand to make the union what it ought to be; that it takes true love to sweeten and brighten life's daily routine. The question is this: If such as these do meet another and ere they are aware tender love chords are awakened, need we say that the character is at fault? Does not the true test of character come then?

Oddly enough among a little pile of letters waiting for attention with the Editor is one bearing upon a situation not distantly connected with the problem Mrs. S. C. propounds. The subject is one which—oh! the pity of it—owing to the state of affairs throughout the country, it is advisable we should discuss. Let us bring to the problem large hearts, tender charity, sound sense and dispassionate judgment.

"A Young Wife" has something for us which has a bearing upon a number of the domestic problems which are discussed here Among Ourselves from time to time:

I read upon the same topic in nearly every paper I take up and can't help wondering at some of my sisters' views of human life. Not that I think I am always in the right, but many times the women are in the wrong, I think. Happy, indeed, is he or she who has a wise mother. I believe in equal rights. In the United States woman has her rights in a higher degree than in any other country. Woman, pray to God earnestly to open your eyes to your opportunities. Can you not see your chance of molding the lives of men and boys around you? Of course times will come when we can't do as we wish. We must stop work to hold a horse for John; perhaps turn the grindstone or something else. John can't always help when we need it and we feel like crying out, "O why must women always give up to the men? Why do they have their way, while I must give up my way when they will it?" Have you ever felt that way? I have when I have been disappointed in some plans and had to change them to suit "John." But disappointments come to all and if we bear them with good grace and change our plans if need be the time will come when "John" will return the favor. I know some men are better to strangers than to their wives. To such wives I would ask, "Do you remember the first days of married life? Was it different then? Have you faithfully done your part?" Home is just what woman makes it. Mark every word in italics. Woman, start out right, then keep improving. Fix your hair as becomingly as you can every day. Look as happy as you can; dress as well and clean as you possibly can every day; keep yourself tidy, and never let "John" come in to dinner and see your eating room untidy. Count your many blessings. Is not your husband your lover? Dress, look, live for him. What do you think, sisters? Who is to blame for an unhappy home? What makes home unhappy?

A dear old grandmother once said to me: "If, without seeing her, I heard a woman say home is just what a woman makes it, I would know two things about her—that she was young and, if married, had a good husband." But this is forestalling discussion, which I should not, and no not, wish to do. Let us hear from others on this subject.

For several months past our circle meetings have been of unusual interest;

**SIMPSON  
EDDYSTONE  
PRINTS**

**Simpson-Eddystone  
Solid Blacks**

let us keep them alive and helpful, friends. I herewith pledge myself to do my part with hearty good will and earnest endeavor.

#### Dressmaking and Millinery—No. 550.

Sylvia Silverthorne, Muscatine, Iowa.  
[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]  
Among the ribbons that are in the lead for neckwear, helms, etc., are the Roman or cross-striped ribbons, and these are in brilliant

[5534 Blouse or Shirt Waist, 22 to 42 Bust.]

hues. With a plain or embroidered linen collar is worn such a tie of ribbon of several inches width, folded to be quite narrow about the base of the collar, the ends formed into a double bow and ends, these being in the full width of the ribbon. Worn with this is a belt of the same ribbon either tied or arranged in a "made" bow at the front. If one likes, the ribbon about the neck may be tied in a single knot and the long ends may drop to within a few inches of the belt. The flowered ribbons, as well as the plain colors, are used in the same way, but these have been mentioned in a recent number. These same neck arrangements with belt to match may be made of plaid or plain, or of striped silk.

The waist that has the chemisette effect continues to be among the most favored, and one of the simplest of these is illustrated in No. 5534. Such a design admits of variations and may be made up quite simply, or even more elaborately than suggested in the design. As pictured the chemisette, collar and sleeve trimming are of tucked and inserted muslin, but quite as pleasing will be the

[5512 Seven Gored Walking Skirt, 22 to 32 Waist.]

effect if lace edging is used instead. To make the chemisette of edging lace catch the scallops or points together and place on the lining so that they form the center and of the plain part of the lace will extend beneath the edges of the cut out part of the waist. For the collar let the edges of the lace join the chemisette and thus be about the lower part of the collar. For the cuffs let the lace edge turn from the wrist or use two widths of the lace and let the joining of the scallops be in the middle of the cuff.

## FREE! TREATMENT FOR MEN

### Cure Yourself At Home!

When afflicted with Nervous Debility, Weakened Vitality, Blood Poison, Skin Diseases, Prostate, Urethral, Kidney or Bladder Disorders, the uppermost thought is "where can I obtain a positive cure with the least inconvenience and at the least expense." Doctors charges for treatment of these troubles at their offices are very high. The cure usually uncertain.

### OUR HOME TREATMENT

places within your reach the best possible treatment at a moderate expense. Our 20 years practice and thorough knowledge of these diseases has enabled us to prepare and perfect a new method which can be successfully used at home. To prove the merit of our new method

**We Will Send You a Month's Treatment** especially prepared for your case and allow you to use it for fifteen days. If you are not better or the treatment at unsatisfactory return it to us and it will cost you nothing.

Write us today about your case even though you are discouraged with other treatments; let us

## Wouldn't You Like

to have us show you the wonderful opportunities existing in the South, and how you could improve your present condition?

### THE 'Seaboard Magazine'

Devoted to the agricultural and industrial development of the South, will point out the many advantages of a location in our mild climate, where life would be a greater pleasure as well as profit by reason of being able to carry on work throughout the entire year. Why battle against the elements? If you want a stock or grain farm, a fruit farm, truck farm, where lands are fertile and productive, in fact, anything, and want it in Virginia, the Carolinas, Georgia, Alabama or Florida, the magazine will assist you. Sent FREE on request, together with other handsomely illustrated literature descriptive of the South and its wonderful resources and progress.

Special low round-trip rates for homeseekers, prospectors and investors.

J. W. WHITE, General Industrial Agent,  
Portsmouth, Va.

Seaboard Air Line Railway, Dept. "S."

One may utilize scraps of lace or of edging embroidery in this way. In the design the edges of the waist are finished with silk braid, but any handing may be used. The arrangement of the tucks at the back is a feature of the season, as you will notice that they terminate at yoke depth as do those at the front. This gives a "bloused" effect to the back of the waist that is somewhat new. The waist may be used as a separate garment or as part of a costume, the skirt being of the same material. Pattern No. 5534 is cut in sizes for a 32, 34, 36, 38, 40 and 42 inch bust measure. Give size when ordering pattern.

No. 5512 pictures a neat skirt design in a seven-gored model. The pleats are arranged in groups of two each, these being stitched to a deep yoke depth below which they are allowed to flare. The foot trimming is arranged in a novel manner, but of course it is optional as to whether or not this design

## Cancer Cured No Knife, No Pain

People I have cured of cancer prove the astonishing results of my treatment. Peter Koenig, Galesburg, Ill., writes: "It is only a question of time—I must die." Doctors said "no hope." My new method was used and to-day Mr. Koenig's cancer of the throat is healed, and he is well. I have made wonderful cures without pain, operations, sticky balms, oils or plasters. My treatment is clean and wholesome. It gives instant relief from the smarting, itching and terrible burning pain, destroys the offensive odor and has cured cases given up by the family physician and specialists. If you have cancer or have a friend who has cancer, write me to-day. Full information, proofs and advice given without charge. Address: DR. RUPERT WELLS, 2165 Kador Bldg., St. Louis, Missouri.

**VETERINARY COURSE AT HOME.**  
\$1200 Year and upwards can be made taking our Veterinary Course at home during spare time; taught in simplest English; Diploma granted, positions obtained for successful students; cost within reach of all; satisfaction guaranteed; particulars free. Ontario Veterinary Correspondence School, London, Can.

**\$25 ON 5 TON** IS WHAT YOU CAN SAVE We make all kinds of scales. Also B. B. Pumps and Windmills. **BECKMAN BROS., DES MOINES, IOWA**

is followed out. Any mode of trimming liked may be substituted, or the skirt may be left plain, stitching forming its finish. Comparing this with the waist given herewith you will note that the lines are so similar as to render the two appropriate for combining in making a costume, but either may be used

without the other, and with any other design. Pattern No. 5512 is cut in sizes for a 22, 24, 26, 28, 30 and 32 inch waist measure. Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

First Quarter. Lesson I. Genesis I, 1-25. January 6, 1907.

### God the Creator.

When Michael Angelo overlaid the ceiling of the Sistine Chapel with frescoes that make its common plaster more precious than gold, he dipped his pencils into the first chapter of Genesis. Each successive panel matches its respective paragraph—the Separation of Light and Darkness; the Creation of the Sun and Moon; of Trees and Plants; of Adam; of Eve; and so on. The frescoes are indescribably majestic, but they fall short of the narrative which inspired them. That is unapproachable in literature or art. It is Divine.

If the immortal Florentine had drawn his inspiration from any other cosmogony than that of Moses, the Vatican ceiling would have been marred with the incongruous shapes of man's wild fancy and wilder fear. Dualism would have been there—a devil as powerful as God; or Polytheism—gods many and all in a wrangle, one pulling down what the other set up; or Pantheism—an eternal matter, insensate, yet evolving itself in various stages, the thing fashioned greater than that which made it; or such grotesque ideals of the universe as, for example, that of the Hindu with its pyramid of snake, turtle, and elephant, and triple disk.

Instead of all this we see on that lustrous roof the ineffable Jehovah in the form of a man, as the Bible itself must needs present Him to us—eternity upon His hoary brow, omniscience beaming in His eye, omnipotence in His outstretched arms, and infinite love in His whole mien. This majestic Father of the world is pictured as proceeding with the complacency of Infinity to hang His lanterns in the sky, to separate air, water, and land. Then He peoples each with creatures suitable to their respective spheres—their bodies cunningly adapted to ether, fluid, and terra firma respectively. For a seventh time the Almighty "Former of the Skies" spreads His hands in benediction over all His works, and in the seventh epoch there is cessation from creative activity.

This Mosaic account of creation is a miracle in words. Not to this present highly-cultured age, but back three thousand years, to the beginning of literature, must we look for the most satisfactory statement of the origin of things. There through the mists of human speculations, through rising and falling systems of philosophy, Genesis shines like a star ever ascendent. It is not attached to any system of geology, astronomy, or biology. So, as numbers of these have sunk in their turn, Genesis has never been submerged. The book may clash with an hypothesis, it never does with a fact. The narrative is elastic enough to take in all the modern discoveries of physical science, but presents a rim of steel to the vagaries of false science.

Whence came this phenomenal writing? From the genius of man? Then, why is not its equal found in the an-

cient literature of other nations apparently better situated to produce such a book than the petty and oft-captive Israel? Inspiration is the only adequate explanation of Genesis. The blessed intent of the book is seen by the most casual reader. It is a mirror to reflect the person and attributes of God; it answers, too, the question of the heart as to the origin of nature and of man. It deserves the alliteration, simple, sublime, sufficient.

### Analysis and Key.

1. Michael Angelo's debt to Genesis. Frescoes fall short of narrative. Genesis unapproached.
2. Other cosmogonies in contrast. Dualism, Polytheism, Pantheism.
3. Picture of God, the Creator. Eternity, omniscience, omnipotence. The Father of the World at His work. Seventh benediction.
4. Mosaic account: Miracle in words. Satisfactory statement of origin of things 3,000 years old.
5. Only to be accounted for by inspiration.

### The Teacher's Lantern.

The difficulty here is to know what not to teach. The paragraph is fairly packed with seed-thoughts. Selection is imperative. Matters of comparative unimportance, but which if once mooted might lead to time-wasting debate should be omitted.

The majesty of Mosaic account of creation may well be shown by using the crude heathen cosmogonies as a background. The orderly and glorious progress of creation should prompt the exclamation, "O Lord, how manifold are Thy works! in wisdom hast Thou made them all!"

God gave man a quit-claim deed to the world when He said, "Take it, dress and keep it."

Man's dominion over nature was never greater than at the present. He is wrestling her secrets and subduing her forces to his use.

The dignity of man's position in nature, the variety, delicacy, and strength of his senses and faculties make one exclaim, "O rich and varied man, thou palace of sight and sound."

Primary teachers have a fascinating task in discovering and banishing the crude and amusing notions about earth, air, sky, water, stars, etc., with which they find little minds packed. A taking object-lesson may be given by laying an orange on the table, and having an apple suspended with a cord revolve about the orange. Orange for sun; apple for earth. What makes night and day, the year and the seasons, may thus be illustrated. Earth may be described as a house, beautiful and comfortable, which God has built for His children—a cellar full of coal and other things we need. The carpet changes every season, so we shall not get tired looking at it—from green, sprinkled with flowers to

## Where Your Harrow Troubles End

### in the J. I. CASE DISC HARROW

See the arrows? They point out the two most important advantages ever placed in a disc harrow—the chilled ring bearings and the slicer

scrapers. These bearings have proven by test to be the most practical and economical for this use. They will, in a very short time, save the cost of the ordinary harrow, and they will save your team—save work—save trouble. Because they make light draft; last longer, do not wear flat, clog up or work loose. And they cost less.

And the slicer scrapers work right and clean perfectly. A slight movement of the foot does the work, cleaning all the discs from center to cutting edge. When at rest, the scrapers keep the center of the disc blades clean. While we consider these two advantages foremost, this disc harrow possesses other features worth mentioning: By an exceedingly simple device, the discs are made to stay in the ground no matter how hard it is. Again if the end of one section raises over an obstacle, the other remains at work and the companion section is not disturbed. We would like an opportunity to tell you more about this disc harrow, and if you are looking for the best, you want to know. Write for our free catalogue to-day, which fully describes the entire J. I. Case Line

### FREE—Farmer's Encyclopedia.

### WOODWORK PRICES REDUCED.

How Gordon, Van Tine & Co., of Davenport, Iowa, sell better materials at one-half retailers' prices. Here is an illustration how Gordon, Van Tine & Co., who operate the biggest woodwork, sash, door and general mill work factory in the country, cut prices in two for the customer. In the first place, they sell direct from their factory to the individual user, or contractor, or builder. To get an idea of the size of their equipment, you must know that they run the cars right into the shipping department. In fact, they can load twelve cars at a time in their shipping room. They load these twelve cars from both sides of the car at one time—sometimes as many as thirty men doing nothing but trucking carefully packed building material into outgoing cars. Compared with this system just look how sash, doors and woodwork is generally sold. Take for instance a four-paneled door of high quality: the dealer's price is \$2—the retailer pays his jobber \$1.15 for this door—the jobber pays the average maker eighty-seven cents for it. Gordon, Van Tine & Co. sell direct from their immense factory the same door for eighty cents. In other words, they sell a door of warranted quality fine white pine to the consumer for less than the jobber pays the average small maker for it. You save, therefore, the jobber's profit of twenty-eight cents and the retailer's profit of eighty-five cents, besides the difference between Gordon, Van Tine's low factory price and that of the average factory, a total difference of \$1.20. Now, this factory is located in Davenport, Iowa—almost the center of the United States, and shipments are made to every city in the union, safe delivery guaranteed. Every item in their immense free catalog is as great a bargain for the very same reason as the door just mentioned, and remember that better quality goods are not made or sold by anybody. That is why this concern can sell its immense output, the product of its own timber lands, its own logging camps, its own saw mills and its own factories direct to the consumer on orders

made up from the catalog and sent in by mail. If you are going to do any repair work or any building this spring, now is the time to get this catalog of low prices and modern styles. Mention this paper and you will get prompt attention and the best treatment. Address Gordon Van Tine & Co., Station B45, Davenport, Iowa.

### SURE HATCH IN NEW HOME AT FREMONT, NEBRASKA.

The Sure Hatch Company have moved from Clay Center, Neb., to Fremont, Neb. The Sure Hatch idea was "batched" in Clay Center and the little town was endeared to the company by nine years of success for which the incubator business offers no parallel. The company's business grew so much faster than the town itself that last year, with sales exceeding 26,000, the company were at times completely swamped because the one branch railroad could not handle their shipments fast enough, and the town could not furnish the number of skilled mechanics required. Hundreds of impatient customers canceled their orders for Sure Hatches because of delays in shipment. To have remained in Clay Center another year would have meant an enormous loss to the company.

The splendid shipping facilities of Fremont, Neb., which is a live town of 10,000 people, with four trunk line railroads, induced the Sure Hatch people to locate there.

Their immense new plant in Fremont, the largest and most up-to-date incubator factory in the world, is rapidly nearing completion. They now have all the skilled labor required and are in a position to ship incubators the very day orders are received. The 1907 Sure Hatch not only has all the valuable features of the 1906 machine, but a number of new improvements, such as the multiple lever regulator and the duplex bottom. The new Sure Hatch catalog and poultry book now being printed, fully explains these improvements. The book is larger, more fully illustrated and contains more practical information than ever before. It is worth more than many books that sell for \$1 to \$5, yet it is free. Better send a postal today to the Sure Hatch Incubator Company, Box 16, Fremont, Neb., or 16 East Washington St., Indianapolis, Ind. Simply say on it, "File my name for a free copy of your 1907 catalog and poultry book," and a copy will be sent as soon as the book comes from the printer. If you do not wish to wait for it, send for the 1906 catalog. Every poultry raiser ought to own the Sure Hatch book.

## Purinton Steam Feed Cooker

Quick and Economical.

Free Trial Offer.

Oldest and most successful feed cooker on the market. Gets up steam quickly.

Takes Little Fuel and is Absolutely Safe.

Use wood, cobs, coal or anything burnable.

Provided with supply tank for refilling while steam is up, and double jointed cooking pipe which can be put into barrels around boiler without unscrewing.

without signing of notes or other obligations, to be paid for if it proves satisfactory.

If we hadn't the utmost confidence in our boiler we couldn't afford to do this.

Made in various capacities to suit all requirements.

Send for catalogue today.

CRESCENT FURNACE & FOUNDRY CO., 304 Madison Street, Des Moines, Iowa.

## ADVERTISING NOTES.

Mr. W. S. Packard, one of the well-known and reliable real estate dealers of the city of Des Moines, is offering a special bargain in a 320-acre farm within seven miles of Aberdeen, S. D. His advertisement appears in this issue.

Three hundred and sixty acres of fine meadow land, forty miles from Minneapolis, two miles from railroad, on which 500 tons of hay can be cut, is offered for sale by Mr. Mose Zimmerman, of Midway Horse Market, St. Paul, Minn. See the advertisement on page 27.

One section of land located three and a quarter miles east of Arthur, N. D., is offered for sale by Mr. J. E. Fitzsimmons, of Paxton, Ill., in his advertisement that appears on page 27 of this issue. Further particulars in regard to the improvements can be learned from the advertisement.

Mr. Mose Zimmerman, Midway Horse Market, St. Paul, Minn., has 400 acres of fine land, located forty miles from Minneapolis, which he is offering for sale in his advertisement on this page of this issue. He is going to sell this valuable piece of land at a very low price in order to close up an estate.

Mr. F. F. Spangler, of Milo, Mo., has 560 acres of land located in Union county, Iowa, nearly all in meadow and pasture, which he is offering for sale in his advertisement that appears on page 27 of this issue. Mr. Spangler announces that he is bound to sell and if he cannot get his price he will take the buyer's price.

Have you seen on page 29 the advertisement of Mr. Jacob Holz, 1003 N. Sixteenth St., Omaha, Neb.? If you have bides, furs, or wool for sale it will be to your interest to secure prices from a wholesaler. Mr. Holz will gladly answer all inquiries and quote the highest market prices on all kinds of furs, hides, and wool.

A 400-acre farm located within four miles of the agricultural college, being considered one of the best stock and grain farms in central Iowa, is offered for sale by Messrs. Smith & Davis, of Ames, Iowa, in their advertisement that appears on page 27 of this issue of The Homestead. The improvements consist of one good set of buildings and the farm is principally tiled. The price at which it can be purchased and other information can be obtained from the advertisement.

On page 8 of this issue of The Homestead appears the advertisement of Still College of Osteopathy, Des Moines, Iowa. This splendid institution is one of the foremost of its kind and stands for the best of everything in life. Osteopathy offers a most desirable professional career and the present demand for osteopathic physicians is far greater than the supply and the future of the profession is most promising. Still College offers the best osteopathic clinics and has a most able osteopathic faculty. The clinic advantages of this institution are beyond comparison and the Still College clinics are the largest osteopathic clinics of the world. Students are attending the college from nearly all of the states of the union and there are over 300 patients now in the care of the institution. The obstetrical clinic is particularly large, as are the other clinics. The entire faculty and officers of the college are men of ability in their respective departments and of the highest moral character. The college is employing the highest salaried instructors of the country and is spending more money for instruction per pupil than any other in its line. There is no better profession than osteopathy and probably no other profession offers the opportunity that osteopathy now offers. There is no starvation period in this profession. All that a man or woman needs is to be a good osteopath and their success is assured. Still College of Osteopathy is recommended by all the leading citizens of Des Moines. Those wanting to prepare for the osteopathic profession would do well to give Still College a very careful consideration. Those desiring to investigate should write the college authorities, Still College of Osteopathy, 1422 Locust St., Des Moines, Iowa.

We are just in receipt of the 1907 catalog of the Omega Cream Separator Company, of Lansing, Mich., and its typographical arrangement and execution and its well-written description of the Omega separator has made such an impression on us that we feel constrained to call the especial attention of our readers to it. The "Golden Rule" guarantee of this company has impressed every one who has read it, and it seems that the "Golden Rule" policy sticks out in everything that they do. Because all of us like to examine and read a well-written and finely-printed catalog, they have exerted themselves to give us what we wish in this respect. But behind all of this there is a deeper significance and anyone who reads the catalog is impressed with the fact that the Omega Separator Company are exerting their best efforts in the production of a high-grade separator. This impression is again given by their continual invitation for rigid investigation of the separator itself. All the manufacturers seem to desire is that the prospective buyer give the Omega an honest trial. In the catalog they print reproductions of letters from two prominent hanks of Lansing and if he has a doubt as to the liability of the concern, he is thus assured that they are

able and glad to do all that they say they will do. They also print a letter from the Michigan Agricultural College which is very commendatory. A good many of our readers have been using the Omega separator and speak of it in the highest terms and we would suggest that any who are contemplating the purchase of a machine, write for this new catalog. A cream separator is a machine which should be chosen with discriminating care, and the frank and open manner in which the makers of the Omega ask for your careful investigation is in itself evidence that their separator will not disappoint. There are undoubtedly, a number of good separators on the market and it is for each to choose the one he thinks will give him the best results, but there are none who make a more liberal offer than the concern above referred to. See advertisement on page 15.

## A VALUABLE BOOK FREE.

Mr. H. C. Phelps, president of the Ohio Carriage Manufacturing Company, Station 31, Cincinnati, Ohio, who is the originator of the famous free-trial plan of selling vehicles from factory to consumer, has just published a remarkable book giving the factory secrets of buggy making. He has sent out over 150,000 of these valuable books to interested people and will gladly send you one free if you are interested to learn how buggies are made. Write Mr. Phelps for one of his famous books today, on a postal card, and you will get it free by return mail. Write him at the above address. See advertisement on page 17.

## FREE SUBSCRIPTION TO THE LARGE ILLUSTRATED PAPER FOR DAIRYMEN—THE SEPARATOR NEWS.

A big paper, handsomely illustrated in colors, entirely devoted to the success, prosperity and protection of separator users and intending separator purchasers. Every issue brimful of special illustrations and information—what might be called inside facts—that will help you to decide whether a cream separator will pay you, how large a separator you should have and how to care for a cream separator so as to get the most out of it. Articles regarding you against the "patent can" fraud and against the mistakes of buying a too cheap or a too complicated separator. Articles telling what state experiment stations say of cream separators. Articles comparing different kinds of cream separators. In fact, a whole paper devoted to cream separator news. Would you like to receive every future issue—without a cent of expense to you? Then write the publishers, The Sharples Separator Company, of West Chester, Pa., asking them to put your name on their mailing list. But don't forget to mention that you saw this offer in The Homestead.

## A PICTURE OF DAN PATCH.

Dan Patch is the most notable horse alive today. He paced a mile in 1906 in one minute and fifty-five seconds, and there are those who believe that this record will never be equaled by another horse. He is owned by the International Stock Food Company, of Minneapolis, and during the last few months this company have prepared a finely-colored lithograph of this noted horse, which will be furnished to all readers upon one condition, namely, that you state where you read this offer, and secondly, how much stock you own. On page 48 of this issue will be found a full-page advertisement, including an illustration of the renowned Poland China hog, Keep Ahead. You will there find the story, also, of how this hog grew from being the runt of the litter to be worth \$4,000. The Homestead desires every one of its readers to have one of these beautiful lithographs of Dan Patch, and as it will only take an instant to write on a postal card that you saw the advertisement in The Homestead and that you own so much live stock, you had better do this at once. Address your card or letter to the International Stock Food Company, Minneapolis, Minn.

## PLANT GREGORY'S SEEDS.

They are honest seeds, safe and sure, and sold at a reasonable price. Year after year, for over half a century, thousands of practical gardeners and planters, both in the United States and Canada, have been planting Gregory's seeds, and they have done so because they know that these seeds have all been thoroughly tested, and that the three warrants under which Gregory's seeds are sold cover all seed risks. Just think of it! Over 2,000 tests of the vitality of both vegetable and flower seeds are made every season, and thousands of dollars' worth of seed are thrown away, though most of it is better than hox seed will average. Messrs. Gregory & Son have produced many new varieties of vegetables, of one introducing more than all other dealers combined. They distribute free among their customers tubers of the famous Eldorado potato which sold in England three years ago for over \$1,000 dollars a pound. All growers of vegetables and fruits should secure a copy of Gregory's new catalog for 1907. It is rich in practical instruction. Write today, so that you will be sure of getting a copy. Address Messrs. J. H. Gregory & Son, Marblehead, Mass.

## THE CHATHAM FANNING MILL.

On page 19 of this issue will be found the advertisement of the Chatham Fanning Mill. This mill needs no introduction to our readers, because there is not a community in the entire central West but where can be found some of the Chatham mills. This mill is sold now on such terms as make it possible for every man who grows grain to own one. The mill is equipped with seventeen screens and riddles and has a patent haggling attachment which saves one man's time. It will be sent to any responsible party on a thirty days' trial, free, and the freight will be prepaid. If it does not do all that is claimed for it by the company it may be sent back at the company's expense. This mill is sold direct from the manufacturers and therefore saves the profits of all middlemen. It is not necessary for us to dwell on the great advantage of using a fanning mill for the purpose of grading small grain. However, it is a demonstrated fact that has been proven by a number of the stations that such grain as oats, wheat and barley may be kept from "running out" by grading. Indeed, it may be so improved that its yield will increase from year to year. The Chatham book contains much information on the breeding, planting and seeding of crops, and it will be sent free upon application to the Manson-Campbell Company, 513 Wesson Ave., De-

## What's the Steer's Limit

You want to make the most of yours, in pounds, quality and price. Keep him in condition—bowels open, appetite strong, digestion good. The best and surest and quickest way to get your feeders up to their limit is to use

## PRUSSIAN STOCK TONIC

It's not an expenso but the wisest investment you can make. More pounds and better prices. The cost is not a tenth part of the extra returns. Cheapest on account of small feeds.

Dealers sell it. If not with yours, write us. We'll send prepaid, at same price. Tell us what stock you own and receive our Stock Raiser's Hand Book Free.

Prussian Remedy Co.,  
St. Paul, Minn.

troit, Mich., or Box 513, Topeka, Kan. Please mention this paper when you write.

## A DANDY FARM.

One of the best farms advertised in this issue appears on page 27. It is for sale by the Inland Security Company, of Kansas City, Mo., who state that it is the best proposition for the money that they have had on their books for twenty-five years. This statement coming from a reliable firm like the above, prospective buyers should lose no time in learning the particulars at an early date, owing to the fact that this offer is only good until February 7th. The farm is located close to Kansas City, at which place is the best live stock market in the world. Buyers looking for a fine farm will find in the one offered, which comprises 343 acres, an ideal one. The land will be divided in small tracts if desired. When writing, mention this paper.

## "GRINDERS THAT GRIND."

The Martin Manufacturing Company of St. Louis Park, Minneapolis, Minn., make "grinders that grind" and do it right, too. Every part of each grinder, for they make five different sizes, contains the "know how." Mr. Martin has had scores of years of experience in grinder construction and those who buy his grinders will profit by this. They are original in construction and design and have been subjected to the tests of the most critical. Mr. Martin will send you one on thirty days' approval if you write him and mention The Homestead. He has put out a very neat descriptive catalog which he will mail you free of charge, which gives in detail the points of superiority, price, etc. Address at once the Martin Manufacturing Company, St. Louis Park, Minneapolis, Minn.

## A GREAT SEED CATALOG.

The finest seed catalog that has reached our table for many years is that just issued by that well-known firm, the Ratekin Seed House, of Shenandoah, Iowa. This new catalog was re-written during the past season right in the fields and plots where all their seeds are grown and tested and is practical in every sense and is chock full of just such information as the farmer, gardener and truck grower want to know. In short it is well gotten up, very complete in every department, and to be appreciated is to see and have a copy of it; in fact, no up-to-date farmer, gardener or truck grower can afford to be without it when it is so easy to obtain a copy of it. A postal card will bring it to your door. It is a book that is large, finely illustrated and there is scarcely a field, farm, vegetable or flower seed that is not mentioned, described and its climate, soil and needs fully given. The Ratekin Seed House make it a habit and rule to make good every statement they make, and when you buy your seeds from them you take no risk. You are to be judge and jury, and if everything is not found as represented or fully satisfactory they can be immediately returned and your money will be cheerfully refunded. Their address is Ratekin's Seed House, Shenandoah, Iowa, and if you would know more of the crops you grow you should send at once for a copy of this great seed book. See their seed advertisement on page 11 of this paper and write them today.

## LOSS FROM POORLY MADE SEED BEDS.

One cannot read accounts of the intensive cultivation of the soil now being carried on in certain quarters without being impressed with the waste in present methods of farming in general. If we compare the harvest of the fields with the product of the gardens and small tracts the lesson comes home with great force. Some little extra labor is bestowed upon the small tracts, but not so much after all. It is largely a question of methods and proper implements. With right methods and right tools, but little greater outlay in the form of labor, the small tract is made to yield two, three or a half dozen times as much as the field. Much of the apparent loss from the fields is due directly and primarily to the failure to give the grain and grass a proper seed bed. The man who gave the best years of his life to the perfecting of a harrow that would remedy this and form a seed bed as near ideal as was possible, did not live in vain. Who shall estimate the good Mr. Duane H. Nash and his Acme harrow have done for agriculture? For this Acme harrow comes nearer solving the problem and enabling the farmer to plant his seed in a character of soil where it is sure to start, and start quickly, and have an uninterrupted, strong growth than anything of harrow kind ever perfected. It was named by the inventor, "harrow, pulverizer, clod crusher and leveler." It is all of these. It differs materially in build from the old-fashioned spike-tooth harrow of our fathers; it differs more in its effects. But a single drop from a very few acres gives back its cost. Most farmers appreciate the need of a good seed bed. Not every farmer knows how to secure it. Nor

## Lands and Homes for Sale.

## Wheat, Timber, R. R. &amp; Gov. Land

No firm in the west can show you the bargains in any of the above lands. This is not all. We make a specialty of Panhandle, Texas and Southern Lands, of which we own and control 300,000 acres. Our prices will surprise you. Write for our descriptive circular, prices and rates in our special car which goes the first and third Tuesday of each month. Agents wanted.

## WESTERN LAND COMPANY, 530 Good Block, Des Moines, Iowa

**BARGAIN.** 400 ACRES of fine land, 40 miles from Minneapolis, only one-half mile from railroad, good soil, well fenced, 200 acres under cultivation. In order to close up an estate, this valuable piece of land must be sold. The first offer of \$20.00 per acre takes it. Part time given if desired. Address, Mose Zimmerman, Midway Horse Market, St. Paul, Minn.

is every farmer familiar with the good being done, the increased yields being secured by this Nash Acme Harrow. Those who are not and are sufficiently interested in increased returns from their lands to do so will be well repaid if they will look up the Nash advertisement on page 14 of this issue and write to him for his little book entitled, "A Perfect Seed Bed." A copy will be sent on request if you mention The Homestead.

## CREAM EXTRACTORS FREE.

To introduce their cream extractors, the People's Supply Company, Dept. 150, Kansas City, Mo., is offering to give one of their machines free in each neighborhood with the understanding that the owner will show it to his neighbors, which the makers think sufficient to induce those who need a separator to buy their machine.

## A FINE CALENDAR FREE.

The International Harvester Company, of Chicago, have prepared an unusually attractive calendar for 1907. This calendar is sufficiently attractive to be an adornment to any home. Local agents for the International Harvester Company have been sent a supply of these calendars and any of our readers who will call will be given one free.

## MORE SEED CORN TALK.

The importance of using good seed corn is an old story. Nevertheless it is one that sounds good to all industrious corn growers. In this connection we are very much pleased to refer our readers to the advertisement of J. B. Armstrong & Sons, of Shenandoah, Iowa, on page 11. These gentlemen have made a specialty of this line of work. They are prepared to grow the corn right; they know how to handle it right and, moreover, to sell right. These are certainly three essentials of good seed corn dealers. On your request a very complete catalog will be mailed describing not only some of the best breeds of corn, but other farm seeds as well. Here is a seed firm that you should have on your list, and we are certain that a trial order will please you, indeed. When writing them, kindly mention The Homestead.

## MAIL ORDER NURSERY.

A nursery, doing business exclusively by mail, enabling the farmer to buy his nursery stock direct from the grower, is what was established in the city of Des Moines when J. A. Callison and his associates acquired the business of the old Iowa Nursery Company, under which name they will still continue their mail order business. Mr. H. P. Holmes is president, Charles S. Worth, vice-president, and D. H. Kooker, treasurer. Of the new company, all business men of known reputation and standing in Des Moines. Mr. Callison continues as secretary of the new company, and associated with him will be Mr. Ellis T. Pierce in charge of the office, and S. W. Wilson as superintendent of the nursery, both men of experience in their particular lines. Mr. Pierce was, for a number of years, president of the Iowa Seed Company, of Des Moines, while Mr. Wilson has devoted his entire life to growing and propagating nursery stock, having been located in that business for twenty-three years at Atlantic, Iowa, and has an enviable reputation as a horticulturist. This organization has been effected especially to carry on a mail order nursery business and will employ no agents, dealing direct with customers through the mails. They have grouped a number of popular articles together at a bargain price, an advertisement of which appears in this issue. If this grouping does not meet your need, write them for their price list and catalog, which gives the details of their mammoth stock, also many interesting facts concerning tree planting, and the caring for nursery stock in general. Send them a card at once before the best choice of the stock is gone. Mention this paper and address them—Iowa Nursery Company, Box 162, East Des Moines.

# LANDS AND HOMES FOR SALE

## THE BEST DEAL YET

offered to the actual HOMESSEEKER is that given by The Duluth and Iron Range Railroad Company in placing on the market its agricultural lands in MEADOWLANDS SETTLEMENT, St. Louis county, Minn. The terms to actual settlers beat any monthly payment plan offered. We want settlers, not speculators. Write for map and full information to Land Commissioner D. & I. R. R. Co., 525 Wolvin Bldg., Duluth, Minn.

## CHOICE VIRGINIA FARMS

From 25 to 2,000 acres with buildings, timber fruit, good water etc. \$3 per acre and up. Lands level, with enough slope for natural drainage. Annual yield per acre—more than the cost of the land. Many men from the level western country settling here. Prices advancing steadily. Good opportunities for general farming, stock raising, dairy, poultry etc. Unsurpassed climate, fertile soil, fine markets and near to churches and schools. Excellent rail and water transportation. Sell your high priced land and buy cheap but equally productive land in a climate where you can enjoy life. Landed investments are sure to prove profitable here.

Write Today for our Real Estate Herald containing full account of the advantages of Southside Virginia and descriptions of desirable farms.

PLYLE & CO., Inc., Petersburg, Va.

## I WILL MAKE YOU PROSPEROUS.

If you are honest and ambitious write me today. No matter where you live or what your occupation, I will teach you the Real Estate business by mail, appoint you Special Representative of my Company in your town; start you in a profitable business of your own, and help you make big money at once. Unusual opportunity for men without capital to become independent for life. Valuable book and full particulars free. Write today. Address nearest office.

EDWIN L. MARDEN, Pres't., Nat'l Co-operative Realty Co., 529 Athens Building, CHICAGO, 539 Maryland Building, Washington, D. C.

## FOR SALE---800 ACRES.

300 ACRES in cultivation, 500 acres in grass; fine water, tanks, hydrants, windmill, etc.; good feed lots, orchard, large 8-room house, tenant house; two large barns, three large cribs, implement house, granary and other buildings; 10 miles from Emporia, close to good little town. Price \$35.00 per acre. Write for our list.

WILLIS & CO., Agents, Emporia, Kansas.

## LET ME SELL YOUR FARM, HOME OR BUSINESS

No matter where located, for cash, in less than 90 days. I have hundreds of buyers and keep in touch with them through 1,500 agents. The man who will buy your place is on my list—do you want to meet him? Send description and price of your property quick. Address 412 Brace Bldg. A. EDGAR DAVIS, Lincoln, Neb.

740 ACRES, Chautauqua County, Kansas. This is a fine grain and stock farm. Is all good, rich, productive land. About 400 acres in cultivation, including 30-acre orchard; balance is in excellent pasture. Can all be cultivated. Good improvements. Railroad station adjoining the farm. Good prospects for oil. Will sell on favorable terms or will take good small farm or other property in part payment. BOX 151, INDEPENDENCE, IOWA

HERE IS A SNAP. 380 ACRES of fine meadow land, 40 miles from Minneapolis, 2 miles from railroad, all fenced; 500 tons of hay can be cut on it. This land must be sold at once to close up an estate. \$20.00 an acre buys it. If you want this act at once. Part time given, if desired. Address, Mose Zimmerman, Midway Horse Market, St. Paul, Minn.

## FARM BARGAIN.

560 ACRES in Union Co., Iowa, nearly all in meadow and pasture. Am bound to sell. If I can't get my price, I'll take yours. Write for full particulars.

S. S. SPANGLER, - Milan, Mo.

## LAND ADVERTISING.

FOR additional advertisements of farms, farms, etc., see department of CLASSIFIED ADVERTISING elsewhere in this paper. It will pay you, if looking for bargains, to look over the advertisements to be found there.

## IMPROVED FARMS

Wild lands, general merchandise stocks, hardware stocks, and city property for sale and exchange. Write me. Fremont S. Gibson, Agent, Mason City, Iowa.

FARM For Rent—One section, 3 1/2 ml. east of Arthur, N.D., Cass Co., Red River Valley; new house, 14-room barn, cap. 24 tons hay, 2,000 bu. grain, flowing well; 24 a. pasture and meadow; 40 a. free corn ground, 400 a. plowed land; well ditched, school 1/2 ml. Grain rent, seed fur. J. E. Fitzsimmons, Paxton, Ill.

TO EXCHANGE: TWO registered draft and one head registered Polled Angus cattle. Will exchange, separate or together for land or city property. Address, Box 148, Independence, Iowa.

## CHOICE FARM CLOSE TO KANSAS CITY

Are you thinking of buying a farm? If you are, will any old place suit you so the soil is good? We can get you rich, deep, alluvial soil at \$1 per acre, but it is down in a malarial, mosquito infested district of Mexico, 100 miles from a railroad. But if you care something about healthfulness, neighborhood and market, we can offer you until February 7th the best proposition we have had on our books in twenty-five years. It comprises 343 acres of nearly level land, not an acre of waste, with about \$7,000 worth of buildings, lying right against a beautiful city of 4,000 population, and only seventeen miles from Kansas City Stock Yards. Transportation, two steam lines and an electric. Will sell part or all, at an extremely low figure considering character of soil, location, neighborhood and market facilities. It will afford a luxurious farm home, and is just the place for a man of brains who knows how to take advantage of having one of the world's greatest markets right under his nose. Let us tell you more about this. (Will pay commission to agent effecting sale.)

**INLAND SECURITY COMPANY,**  
Water Works Building,  
**KANSAS CITY, MISSOURI.**

## THIS WINTER

will probably cause you to decide that you will look up a location where you can be sure of a better climate.

## THE BIG BEND COUNTRY OF EASTERN WASHINGTON

offers you the place possessing this advantage, as well as many others. Wonderfully productive soil for grain, fruit and vegetables. Freedom from destructive wind and electrical storms. Arrange to come and see this country as soon as possible. Land prices are bound to advance. Railroad fare refunded to purchasers. Write at once for illustrated pamphlet.

**THE BIG BEND LAND CO.,**  
Dept. 1 **WILBUR, WASH.**

## 400 Acre Farm For Sale!!

within four miles of Agricultural College at Ames, Iowa. One of the best stock and grain farms in Central Iowa. One very good set of improvements; farm principally tiled, always producing a good crop. Owners unable to handle it on account of other business. Farm is within two miles of a small town. Good market. Price \$85.00 per acre. No land adjoining this farm can be bought for less than \$100.00 to \$110.00 per acre.

## FIELD NOTES.

Mr. N. P. Halgren, of Vinton, Iowa, announces a Short-horn sale to take place on June 19th, at which time he will sell about fifty head.

On March 6th Messrs. W. R. Wilson, F. E. Merrill and others announce that they will hold a public sale of Percheron horses, the same to take place at Arispe, Iowa.

Mr. J. Lefebure, of Fairfax, Iowa, will hold a public sale of Short-horn cattle and Chester White bred sows February 21st. See his new advertisement on page 34 of this issue.

Mr. S. J. Miller, of Kirksville, Mo., importer and breeder of Percherons, can save any who come to his barns from \$500 to \$1,000 on a stallion and sell them as good a horse as was imported this season. Mr. Miller has

two home-bred stallions in his barns that will be found extra good and by many would be preferred to an imported stallion. See page 38 for Mr. Miller's advertisement.

Mr. Hughes Atkinson, of Mt. Sterling, Ky., proprietor of the Kentucky herd of Hampshire swine, writes: "We are out of hogs, having turned down answers for twenty-five gilts this week."

Col. Harry W. Graham, of Chillicothe, Mo., president of the American Auction School, writes that their winter term of the school, from Ohio, Illinois, Iowa, Nebraska, Kansas, and Missouri.

A public sale of Short-horn cattle and Chester White bred sows is to take place on February 21st at Fairfax, Iowa. They are the property of Mr. J. Lefebure, whose advertisement appears on page 34.

Mr. J. O. Walton, of Belle Plaine, Iowa, is making prices on Barred Plymouth Rock cockerels, Pekin ducks, Toulouse geese and fox terrier dogs in his advertisement that appears on page 21 of The Homestead.

Mr. B. R. Burt, breeder of Chester White swine, Coggon, Iowa, reports that he is all sold out of boars, but that he has a few choice gilts at moderate prices. See his advertisement on page 34 of this issue.

Mrs. A. Kitson, of Audubon, Iowa, has Mammoth Bronze turkeys of both sexes and Black Langshan cockerels, both scored and unscored, as per advertisement found on page 21. She also has Pekin drakes for sale.

Seven splendid young Aberdeen Angus bulls are offered for sale by Mr. Frank B. Paup, of Kirkman, Iowa. There are some good herd headers among these, and he is pricing them very low. Write him if you want an Angus bull.

Messrs. Hunter & Smith, of Beatrice, Neb., are headquarters of Jersey cattle that win at the leading state fairs, as well as the pail and the churn. Write them if hunting a young bull or a few heifers for a foundation herd.

February 12th is named by Messrs. John M. Morrison & Son, of College View, Neb., as a date on which to sell forty-five Duroc Jersey sows, bred to what they consider the greatest living Duroc Jersey boar, Kan't be Beat 10239.

Mr. L. Maasdam, of Pella, Iowa, has a Percheron stallion for sale. He is imported and is coming eleven years old next spring. He is a sure breeder and weighs about a ton. The advertisement will be found on page 38 of this issue.

Mr. Robert Holm, of Paton, Iowa, can supply Homestead readers with Single Comb White Leghorn cockerels as per advertisement on page 21. He also has a few Barred Plymouth Rocks to dispose of. He will have eggs for sale in season.

In the new advertisement of Mr. Frank Warway, of Mt. Pleasant, Iowa, that appears on page 36 of this issue is offering choice Duroc Jersey gilts bred to Sambo 52791, a grandson of Tip Top Notcher, the \$5,000 boar, for sale at reasonable prices.

Mr. S. J. Philson, of Harlan, Iowa, breeder of Chester White swine, writes: "I am well pleased with the results of my advertisement in The Homestead. I have a few good boars left and a fine lot of bred gilts safe in pig." Mr. Philson's advertisement appears on page 34.

Mr. William M. Mercer, proprietor of the Maple Lawn Farm, and breeder of pure-bred Jersey cattle and Chester White hogs at Aurora, Ill., has something to say in his advertisement on page 34 of this issue that will be of interest to those of our readers who are looking for Chester White pigs. Mr. Mercer announces that his spring gilts were all sold by October 15th, but that he has some extra large August and September pigs on hand. He also makes the announcement that he is still receiving orders for spring

Imp. Roan Archer, the principal herd bull used in Village Creek herd of Short-horns, owned by Mr. W. H. Schafer, of Keensburg, Ill. See field notes.

pigs which he is unable to supply. He requests readers to place their orders now for his next spring's crop.

The Iowa State College, of Ames, Iowa, has for sale some good young Short-horn, Red Polled and Holstein bulls, also choicebred gilts of the following breeds: Chester White, Poland China, Duroc Jersey, Berkshire, Yorkshire and Tamworth. The advertisement appears on page 34.

Mr. J. C. Hoag, breeder of Poland China, in remitting for advertising already done, writes: "I have had good success in selling the pigs I have advertised, but I still have seven very good ones left which I will close out at right prices if taken immediately." Mr. Hoag's advertisement appears on page 36 of this issue.

Mr. W. A. Elliott, of Pocahontas, Iowa, is offering for sale or exchange the roan Short-horn bull, Merry Chamer 214876. His sire was Imp. Merry Hampton and dam, Chamer's Sister. He will be sold or exchanged for a dark red bull of equal quality. Merry Chamer is three years old. See advertisement on page 31.

Mr. S. O. West, of Berwick, Iowa, is advertising some Mammoth Bronze turkeys in this issue. Mr. West has been selecting his foundation stock with great care for years, and he has now some extra good young gobblers and hens for sale. His old bird weighs forty pounds in moderate flesh, and the young ones give every appearance of equaling in scale their dad. For further information address Mr. S. O. West, Berwick, Iowa.

Mr. William Malcolm, of Bigelow, Minn., reports that he is all sold out of Duroc Jersey boars. He writes: "I will have forty gilts of April farrow for sale and they will be bred to three first-class boars. These gilts are mostly sired by Gale 35169, sweepstakes boar at the Hamline show last fall. A few of them are sired by Pericles and C. W. Prince, by Crimson Wonder I Am." Mr. Malcolm's advertisement appears on page 36.

Mr. Claud Huffman, whose public sale of Duroc Jersey swine will take place at Scranton, Iowa, on January 29th, writes: "The sows are coming along fine, and will be bred to the great Proud Orion, Manly King and Only a Wonder, a son of Crimson Wonder I Am. The catalogs will be out about the 15th of January and I wish that all Homestead readers would send for one and watch for the advertisement which will appear in its columns in due time."

Choice Barred Plymouth Rock cockerels of Bradley and Thompson strains are offered for sale by Mrs. J. A. Campbell, Route No. 5, of Manning, Iowa, in her advertisement on page 21. In furnishing copy Mrs. Campbell writes: "Our stock are all in good condition. Have bred Barred Plymouth Rocks for the past twenty-three years, always trying to improve the flock. They are fine, large fellows with narrow, deep barrings. Mammoth Bronze turkeys are large and well marked. My Pekin ducks are also large."

The advertisement of Mr. C. M. Snyder, of Corydon, Iowa, appears on page 21 of The Homestead. He is offering Mammoth Bronze turkeys from high-scoring stock for sale. Mr. Snyder writes: "We have 150 fine Mammoth Bronze turkeys that are large of bone, well marked, weighing as high as twenty-eight pounds. One tom we recently sold scored 96½ points at the Humeston poultry show, December 4th. His score would have been somewhat higher had it not been that he had some broken wing feathers."

Jas. T. Dollison, of Sac City, Iowa, breeder of Duroc Jerseys and Short-horns, writes: "I have a few good Duroc Jersey boars, yet, for sale, and they are in nice condition. I have sold a boar to every man that came to my place to buy. They are large, growthy, heavy-boned fellows. I am breeding a bunch of very fine gilts to sell, to Fairview Wonder 44051, a son of Brighton Wonder and to Geo. W. 48363, a son of Tip Top Notcher, both very fine hogs. I have one yearling Short-horn bull for sale, a very nice one, and a few females for sale of the good kind at right prices."

"Money in Broilers and Squabs" is the title of a book in which the noted poultryman, Mr. Michael K. Boyer, brings this subject up to date. There are other topics also dealt with in this work of 150 pages. For instance, there are some special chapters on turkey and guinea broilers, also green ducklings and geese for market are topics that are discussed in detail. Mr. Boyer succeeds in this work in giving not only his own life-long experience, but also the experience of many practical men. The book sells for fifty cents and may be obtained by writing The Homestead, Des Moines, Iowa.

On February 8th at Red Oak, Iowa, Mr. Thomas H. Isaac will sell a draft of forty head of Duroc Jersey brood sows, and it will be one of the best offerings that he has ever made at public sale. Mr. Isaac has some of the best blood known to the breed, and his reputation as a breeder ranks among the best in the state. He is one of the breeders that has an ideal in view, and breeds accordingly. He is a stickler for a large bone, and wants it in his sows, and must have it in the boars he uses at the head of his herd. At his last fall sale he sold sixty head, fifty of which were boars, at an average of \$27.50, and it was one of the very best sales of the season. The breeders believe and rely on what Mr. Isaac says, and his neighbors swear by him, and when he makes a sale they are all there and they are not stingy in their bidding. If Mr. Isaac has made a reputation for one thing more than another it is for square dealing, and whenever he puts up an offering it goes for what the buyers are willing to pay. He will sell on February 8th an offering of Duroc Jersey sows that every

breeder and farmer can well afford to buy. We will have more to say about his offering in later issues of The Homestead.

Mr. W. E. Roby, of Truro, Madison county, Iowa, has chosen this number of The Homestead to announce an offering of Duroc Jersey gilts. These gilts, as will be seen by the advertisement on page 31, are of choice breeding and are especially strong representatives of the Crimson Wonder blood. Mr. Roby will be glad to see you at his farm or answer inquiries if you cannot visit him.

Mr. M. A. McWilliams, of Wall Lake, Iowa, writes: "I am all sold out of Duroc Jersey boars and have nothing to offer at present. My boar trade has been the best I have ever had. I am well pleased with the results from my advertising in The Homestead. We will have a bred sow sale February 22d, at which time we will offer the best lot of gilts that ever was raised at Sunny-Side Farm. These gilts are sired by Orion J., a litter brother of Arion and other good sires. They will be bred to a grandson of Duroc Challenger, also a son of Milbank and other good boars."

We desire to call the attention of our readers to something new in the line of a sanitary hen nest. This nest is designed to make the raising of chickens more sure, profitable and easy. No doubt it is just what a great many poultry raisers are looking for, and we would suggest that they accordingly write to the Haviland Manufacturing Company, Davenport, Iowa, and ask for their free book. It contains some very desirable information. It also sets forth the many advantages of this sanitary nest. On page 20 will be found their advertisement, which we kindly ask our readers to refer to.

Choicely-bred Poland China sows, yearlings and spring gilts can be secured from Mr. W. G. Griffith, of McNabb, Ill., whose new advertisement appears on page 31 of this issue. Mr. Griffith has been breeding Poland China hogs for a number of years and has sold many readers of this paper good breeding stock and can please the most discriminating buyers. He is also offering a number of White Plymouth Rock cockerels and pullets for sale. They are all from high-scoring stock and many of them are show birds. If in need of breeding stock write Mr. Griffith at once, kindly mentioning The Homestead as per the announcement in this issue.

Messrs. Fagan, Browning & McCabe, of Hersman, Ill., is the name of an old firm remodeled. Mr. John Hess having disposed of his interests in the firm and retiring from the business. A very good trade has been enjoyed by Messrs. Fagan, Browning & McCabe, many first-class Tip Top Notcher pigs having been sent out during the past few weeks. A nicely made pig by this noted sire was recently shipped to Mr. W. Al Jones, of Old Mission Farm, Jervis, Ore., who was much pleased with the pig. Although the express to such a distant point was high the pig arrived at his destination in good order. These gentlemen state that in the future as in the past nothing but choice pigs will be sent out from their herds. They realize that those who write them want

## LAND AND LIVE STOCK ADVERTISERS DELIGHTED

BETTER RETURNS FROM THE HOMESTEAD THAN FROM ALL OTHER ADVERTISING MEDIUMS COMBINED.

Mr. Henry Dorr, breeder of registered Poland China swine and Short-horn cattle at Remsen, Iowa, writes as follows: "Please discontinue my advertisement, as I am entirely sold out of boar pigs. My sows are doing finely. Accept my sincere thanks for the good work The Homestead has always done for me."

Mr. Wm. Lampmann, of Omaha, Neb., land and immigration agent of the Oregon Short Line Railroad Company, who has recently advertised the Idaho Irrigated Lands quite extensively in The Homestead, writes as follows: "I wish to say that The Homestead has been the best advertising medium for my business that I have ever tried, and I have tried many. Some papers bring plenty of answers, but they come from an undesirable class of people and rarely result in sales. My announcements in The Homestead have always paid me well."

good stock and under no circumstances do these parties wish to disappoint them. If in need of some nicely-bred sows, write them at once as per advertisement on page 31.

Mr. W. F. Hemmerling, of Dike, Iowa, writes in regard to the Model herd of Chester Whites: "Everything doing fine, the gilts I am offering for sale are making rapid growth and I consider them a lot better than equal. They are nearly all bred to that Peerless hog, Modeler 13235, to be shipped when safe in pig. They won't last long at the rate orders and inquiries are coming in. I have just received my annual catalog from the press, giving a fair idea of what the Model herd contains. It is free for the asking. Be friendly drop a postal for it today and mention The Homestead." Mr. Hemmerling's advertisement will be found on page 34 of this issue.

Messrs. A. M. Avery & Sons, Mason City, Iowa, breeders of Duroc Jersey swine, write: "We are having splendid demand for our boars and feel that we have shipped out many that will do our customers a lot of good. We still have a nice lot of desirable boars that should find ready sale, as we are pricing them well worth the money. Our gilts are coming along nicely and we can place about thirty at private treaty, besides our contribution to our bred sow sale with Mr. George Purdy, February 22d. Parties desiring Short-horn bulls of the beef and milk strain will do well to look after those we are offering." Messrs. Avery's advertisement appears on page 36 of this issue.

Mr. T. W. Peterson, of Hatfield, Mo. (formerly of the firm of Messrs. Peterson Bros., of Lorimer, Iowa), has again started a herd of Short-horns down in the state where they show people. He recently purchased twenty head of choice young heifers, mostly out of imported and Scotch-topped Young Phyllis, Rose of Sharon and Young Mary cows. Most of these are sired by a son of Imp. Baron Cruickshank and Stakeholder, a double grandson of Imp. Cupbearer. To top these off he purchased an extra fine Scotch bull, a son of Imp. Crescent Knight and out of Imp. Clara 59th, both bred by Mr. Marr. Five of the dams are also bred by Mr. Marr. The sire of this bull sold for \$1,250 and the dam for \$1,200 in Canada, and the sire of Imp. Crescent Knight, Bampton Glory—sold for \$10,000 to Argentine breeders. With this foundation, Mr. Peterson will be able to build up another good

# GRADE YOUR GRAIN FOR BIGGER CROPS

Actual results prove that graded grain yields from 5 to 15 bushels more per acre. It is more proof against rust and smut, of better quality and brings higher prices. No farmer should be without the

## LITTLE STAR COMBINED CORN SORTER, GRAIN GRADER AND GRASS SEED CLEANER

It has 7 riddles, 4 double wire screens, making double the screen surface for its size of any other machine of its kind. It does the work of three machines but sells for the price of one. It cleans, separates and grades any kind of seed or mixture of any 4 similar seeds all at the same time. Does perfectly all seed work for a 160 acre farm. Pays for itself annually on every 20 acres. Price freight paid, \$19.95. Order today.

Short-horn herd in his new home in Missouri, and we wish him all kinds of success. He is a young man that deserves every measure of prosperity, and we hope he will get all that is coming to him.

We announce in our date claim column this week a public sale of Poland China swine and Short-horn cattle which will take place at Belmond, Iowa. These animals are the property of Mr. T. A. Davenport. In furnishing the date, he writes: "I will sell thirty-five nice gilts, all by Superior Sunshine 92455 and bred to Pike Timber Perfection 117031, and Pike Timber Modeler 115909. Pike Timber Perfection is a yearling son of Proud Start Sister 204520 and Jewel Perfection 81342. Pike Timber Meddler is also a yearling and is out of Proud Perfection 204628 and was got by the great boar, Meddler 99999. Besides these thirty-five gilts I will sell fifteen aged tried brood sows, principally bred to Superior Sunshine 92455; then if my bulls are not all sold before the sale, I will sell them also."

Mr. F. A. Edwards, proprietor of the Bluffview herd of Short-horns at Webster City, Iowa, writes under recent date as follows: "Cattle at Bluffview are coming through the winter in nice shape; there is not a day but what they go to the pasture, the same as they did in summer. The blue grass along the river on the bottom pasture is fine. We aim to keep the cattle out in the open as much as possible. Have had thirty calves this fall and never lost one. By the way, the calves from Secret Viscount are just

## DES MOINES-TANNING CO.

sale. He is a dark red, deep, blocky animal and a sure breeder. I will make a surprisingly low price on this fellow to buyers and I also have some good cows and heifers, all red. I will sell my entire herd, as I cannot do justice to both cattle and hogs. I have fifty Rose Comb Brown Leghorns for sale at \$1 each or six for \$5."

**EVERYTHING IN THE POULTRY LINE.**  
On page 21 will be found an advertisement that every poultry breeder or beginner should be interested in. The illustrated book, "Profitable Poultry" tells all about poultry from A to Z. It starts you on the right road. This book is published by a noted poultry farm where everything in the line of fowls, eggs, incubators, etc., are kept and sold. Write to Berry's Poultry Farm, Clarinda, Iowa, and be convinced of this offer.

### WHAT'S A STEER'S LIMIT?

A very important question is asked by the Prussian Remedy Company of St. Paul, Minn., in their advertisement that appears on page 26 of this issue. Of course every reader of The Homestead who has steers on feed is desirous of making the most pounds. One of the best ways to get your feeders up to their limit is to use Prussian Stock Tonic. If your dealer does not keep it on hand send to the Prussian Remedy Company, St. Paul, Minn. Price for a twenty-five-pound pail will be found stated in their advertisement on page 26.

### A PLEASSED CUSTOMER.

Messrs. Thomas & Hogsett, the well-known Duroc breeders, of Golden, Ill., recently shipped a son of Tip Top Notcher to Mr. Robt. Hall, of New Albany, Kan. On receipt of the pig, which cost Mr. Hall \$1 per pound, he wrote Messrs. Thomas & Hogsett as follows: "The pig arrived in good condition and I am very well pleased. He is the largest-boned pig I have ever seen of his age." This firm always please and their descriptions can be depended upon. If in need of a good fall boar write these gentlemen at once, kindly mentioning The Homestead.

### THE HOMESTEAD DID THE WORK.

A recent letter to our representative who travels in eastern Iowa, from Messrs. G. P. Tyrrell & Son, of Oxford Junction, Iowa, breeders of Duroc Jersey and Poland China swine, says: "Our boars are all sold through our advertisement in The Homestead. We will have some gilts for sale that are hummers. These gilts are being bred by the best boars we ever owned. We are keeping our Duroc Jersey boar, Eureka, and breeding him to the Rosewood sows. Tell your readers that if they want something choice in the way of Duroc Jersey gilts to get their orders in early."

### WERNSMAN SELLS DUROCS JANUARY 19TH.

One of the good Duroc Jersey bred sow sales to be held early in January is that of Mr. Jake Wernsman, of Cedar Bluffs, Neb. On a recent visit to this herd we found everything coming along fine. Mr. Wernsman seems to think that he has a good lot of useful sows to offer and after a careful inspection of the herd we are convinced that it is no joke. In this herd can be found as good a lot of the useful kind of brood sows as you will seldom see anywhere. His offering will consist of ten two-year-old sows, fifteen yearlings and about twenty good spring gilts, the tops of this year's crop of pigs. Most of the yearling and two-year-old sows will be bred to that grand old sire, Chitwood, the sire of Junior Jim, first-prize yearling hog at the Nebraska State Fair in 1905. This hog has been a wonderful breeder, having produced some of the best stuff in this herd. Nutwood by Chitwood is proving a good sire and some of the very best yearlings

My name is on only good  
lamp-chimneys and is a guide  
to lamp-chimney satisfaction.  
Let me send you my Index.  
It is free.

Address, MACBETH, Pittsburgh.

will be bred to him. Young Surprise by Surprise is the sire of some of the good things in this offering and some of the best sows will be bred to him. Mr. Wernsman purchased a young boar, Col. W. by Col. Perfection, from the B. C. Martz herd at Polk City, Iowa, that is one of the most promising pigs sold this year. He carries a nice style in head and ear, is well filled in the fore-quarters and around the heart, has a strong back and smooth side lines, with even width, a strong, heavy bone of good quality and gives promise of developing into an unusually strong individual at maturity if properly grown. Mr. Wernsman is using this pig on several of the good gilts to be included in the sale. Remember the date, January 19th, and arrange to attend this sale.

#### MOATS & SON'S PERCHERON HORSE SALE.

On January 26th, Messrs. M. S. Moats & Son, of Randolph, Neb., will make a public sale of registered and high grade Percheron horses and mares. Nearly all of these have been bred by this well-known firm, and are largely sired by McMahon, one of the best horses ever used in northern Nebraska. There will be yearlings, two and three-year-olds and a few older horses. There will be some splendid grade horses, fit to go anywhere, and will make excellent horses for express companies or farmers. Buyers of high-class Percheron grade horses and mares cannot afford to miss the Moats sale. Write the above firm about their offering and if you want a good team or some heavy drafters it will certainly pay you to attend their sale.

G. W. FINK, OF MARYVILLE, MO., TO DISPERSE HIS HERD OF ABERDEEN ANGUS.

Aberdeen Angus breeders throughout the corn belt of America who are on the lookout for choice animals to add to their herds or the man who is thinking of starting a herd will be given a most excellent opportunity to secure as good as the breed affords at the dispersion sale of Mr. G. W. Fink, of Maryville, Mo., on Monday, February 4th. Mr. Fink has always been a very discriminating buyer, selecting his foundation stuff with care, securing good bulls for herd bulls and above all has grown his stock well. The young things that go in the sale will show that Mr. Fink has made few mistakes in his breeding operations. The herd consists of about forty head and must be sold, as Mr. Fink has rented his farm and gives possession March 1st. In future issues more will be said of the offering, but a card now asking that your name be put on the list for a catalog will insure your getting one early. Mr. Hal T. Hooker, of Maryville, Mo., will manage the sale for Mr. Fink and inquiries can be addressed to him or to Mr. G. W. Fink, at Maryville, Mo.

#### HUDSON'S DUROC JERSEY SOW SALE.

On January 17th, at Lohrville, Iowa, Mr. W. H. Hudson, will make his first annual public sale of Duroc Jersey brood sows. In this sale will be thirty-five head of fall yearlings, and matured sows, and an especially choice lot of spring gilts. We feel that we cannot say too much about the latter, and Mr. Hudson is to be complimented on being able to put into this sale as good a lot as he will offer the boys on this occasion. While a young breeder he has had the foresight to secure the blood of the very best hogs known to the breed, and as blood invariably asserts itself it will be found in the offering that he will have in this sale. He is selling five fall yearling sows and five matured brood sows, the rest all being spring gilts. These will be bred to Ohio Chief Primrose, a son of the great Ohio Chief and out of a granddaughter of the noted sweepstakes sow, Nebraska Belle; Jim's Junior, a son of the noted prize-winning boar, Junior Jim, and Re-Echo, a son of the Iowa and Nebraska State Fair winner, Critic's Echo. Here is certainly a combination of blood lines that will appeal to all lovers of the Duroc Jersey. One of the very best brood sows that he will offer is Lady Belle, a long, deep-bodied sow, with an extra good back and ham, is particularly strong on her feet and she is bred to his Ohio Chief boar. Marshal H. is another good matured sow and she is a granddaughter of the noted boar, Tolstoy, the sire of Crimson Wonder, and she will be bred to the same hog. He also catalogs two granddaughters of old Orion in this sale. The gilts are sired by Orion's Ideal, a son of Orion; Young Advance, a son of Proud Advance; Wonder I Am, a grandson of the sweepstakes boar, Crimson Wonder I Am, and Chief Perfection. These gilts are especially nice in head and ear, and there is not an off one in the entire bunch. Their color is invariably on the cherry red order, and they have the spring of rib and depth of ham. Those breeders who are want-

ing a few good things to add to their herd will find them in this sale. Write Mr. Hudson for catalog and make a study of the blood lines in his offering, and you will then conclude that you should attend this sale. Kindly mention The Homestead when writing. See page 36.

#### SHORT-HORN BULLS FOR SALE.

Mr. N. P. Halgren, of Vinton, Iowa, proprietor of the Evergreen Stock Farm, is offering a number of Short-horn bulls for sale in his advertisement that appears on page 31 of this issue. The offering includes his Cruickshank herd bull, Prince Royal 175494, got by Imp. Prince Oderic, and nine young bulls sired by him. They are all dark red and range in age from one to two years old. He asks Homestead readers to come and see them. His prices will be low, quality of stock considered.

#### COLLICOTT'S DUROC JERSEY SALE.

On January 16th, Mr. S. G. Collicott, of Lake City, Iowa, will make his first annual sale of Duroc Jersey brood sows, and he is offering forty head that will pass the most critical inspection. It is seldom that a new breeder puts in as good an offering as Mr. Collicott will sell in this sale. There will be thirty head of yearling and matured brood sows and ten choice spring gilts. These will be bred to S. G.'s Crimson Improver 50101, a son of the noted Iowa State Fair sweepstakes boar, Crimson Wonder I Am, and also to Waveland Ohio Chief 50133, a son of the noted World's Fair boar, Ohio Chief. The sows are a splendid lot of producers, tracing to such noted sires as Higgins' Model, Orion, Belle's Chief, Tip Top Notcher and Leather Stockings II. The gilts are a most uniform lot, are in nice condition, and bred to the boars mentioned above will certainly be worthy the attention of breeders and farmers who want good Duroc Jersey sows. Mr. Collicott extends a special invitation to breeders to attend his sale and he hopes to show them a hunch of sows that they can well afford to buy. Write him for a copy of his catalog and kindly mention The Homestead.

#### HEADQUARTERS FOR PERCHERON, BELGIAN, ENGLISH SHIRES, FRENCH AND GERMAN COACH STALLIONS.

On this page of this issue will be found the new announcement of Messrs. Champlin Bros., of Clinton, Iowa, of their plan for selling stallions. Their new importation of sixty-five head landed in August. These young stallions range in age from two to five years. They also have a small number of very superior Belgian mares for sale, these mares being in foal. These gentlemen make the most liberal contracts, selling on an entirely new plan, and grant insurance or protection for two years from the date of the sale on every horse purchased of them under this new plan. Their new and commodious barns, located near the street car line, between Clinton and Lyons, Iowa, only seven minutes' ride from the depot or hotels, affords them one of the best locations for transacting business of this nature, of any importers in the country. Homestead readers will do well to correspond with them at once and learn something more of this new plan of selling horses. The watchword at the Champlin Bros. barn is "More size, quality, style, finish, action and better breeding than can be found elsewhere for the same money."

#### C. E. OLSON SELLS DUROCS JANUARY 18TH.

Mr. C. E. Olson, of Colon, Neb., will hold his annual brood sow sale at his farm, two and one-half miles east of town, on January 18th, at which time he will sell forty head of the best animals in his herd. Five of them are aged sows, ten good yearlings and the balance spring gilts. Most of the younger stuff in the sale are daughters of Gold Dust Jim 2d, a son of the old show boar, Gold Dust Jim, first-prize hog at the Iowa State Fair in 1904. Others are sired by Governor, a son of Crimson Wonder, and will be bred to such boars as Colon's Model by Van's Hero, and Improver III, a grandson of Improver II. This sale is the second day of this circuit and can be easily reached from the Hammer sale the day before, as parties wishing to attend the circuit will be conveyed free of charge from the Hammer sale to Greenwood in plenty of time to reach Colon. Mr. Olson will offer nothing but the very best he has, and the breeding is of the most noted blood of the breed, representing the blood of Higgins' Model, Red Chief, I Am Crimson Wonder, Gold Dust Jim and several other great boars of show-yard fame. Catalogs explaining everything will be ready about the first of the year and one can be had by addressing Mr. C. E. Olson, of Colon, Neb. Get a catalog and arrange to attend these sales.

#### CASTLE & SON'S DUROC AUCTION.

Readers of The Homestead are cordially invited to attend the annual bred sow sale of Messrs. E. M. Castle & Son, of Joy, Ill., which will be held on Friday, January 18th, the day following the sale of Messrs. McNeill Bros., of Bowen, Ill. Forty head have been selected for this sale. This lot is divided as follows: Twelve aged and yearling sows and twenty-eight gilts. It is hardly necessary to describe at length the quality and breeding of the offering other than to state that this lot is made up of strictly tops of over 300 head. Messrs. Castle have been liberal purchasers from the best herds. The advertisement on page 31 contains the list of blood lines represented and the sires in use in the herd. The blood of Tip Top Notcher, Kruger, Major R., Royal Plummer, American Royal, Proud Advance, DeSoto's Model, Stoner's Improver and other noted sires is found in the offering. Seldom, indeed, is such a variety of good breeding found in a bred sow sale. The principal herd boar in use is Perfection Chief 34729. This boar, just two years old, is one of the best sires in use in the middle West. Individually he will please the most discriminating judge. He has a nicely-dished face, nicely-tipped ears well placed, wide between the eyes, extra good back and loin, with well-sprung rib, deep, wide, full hams and stands on extra good feet and legs. He has a creditable list of winnings to his credit as follows: First prize yearling boar, 1905, and first-prize aged boar, 1906, Wisconsin State Fair; second-prize yearling boar, 1905, second-prize aged boar, 1906, Minnesota State Fair; third-prize yearling and headed third-prize young herd, 1905, Iowa State Fair. Fifteen sows are bred to this boar

## SCOTCH AND SCOTCH TOPPED SHORT-HORNS

ROCK VALLEY, IOWA, JANUARY 14, 1907.

REPRESENTED BY

42 33 Females, 9 Bulls, 7 Head Scotch Cows and Heifers, 4 Scotch Bulls. 42

I have selected some of the best things in my herd for this sale. The Scotch tribes are represented by Victoria, Mysie, Matchless, Narcissus, Generosity and Honey Flower families, while the Scotch-topped sorts are among the best I have ever sold. A great many of these will be safe in calf or will have calf at foot to my splendid Scotch bull, Valley Sovereign, and Morning Joy. I am selling a splendid lot of bulls, four of which are straight Scotch and one of these is by the great bull, Ceremonious Archer. Write for catalog at once. Please mention The Homestead when writing for catalog. Address,

### EXPANSION-GRAND LOOK Bred Brood Sow Sale

BY  
H. C. DAWSON'S SONS,  
At Fairbury, Neb.,  
Saturday Afternoon, Jan. 12, 1907.

THE BIG, MOTHERLY, BIG BONED, BIG LITTER KIND.

A DRAFT from the Expansion show herds that won at Nebraska, Kansas and Missouri Interstate, 1906. Sows bred to Expansion, the original big hog of the west, and to Grand Look, the 17 times first and Sweepstakes boar of the west, 1906, and to Hutch, 1st 2-year old, Kansas and Interstate. We offer here the cream of our individuals, show sows, sweepstakes sow ribbon eaters of 1906, sired and bred to the biggest boars in the west and from the Original Big Boned Herd of Nebraska. It's easy to talk of 1000 lbs. and it's hard to produce them. Expansion boars weigh out. Expansion See's certified weight is 1,125 lbs. and he won in aged class, Nebraska, 1906; Hutch 82287 weighed 1,020; What's Ex. and Pan Jr. close to 900 lbs., and also won. If you want this kind, "The General Utility and Big Kind," come or send us a bid. "No Hot Air!" We will deliver this kind in the sale ring at your price, the best we can sell either public or private this season. Send bids to auctioneers or newspaper representatives. For catalogs address,

H C. DAWSON'S SONS, - ENDICOTT, NEB.

## COLLICOTT'S DUROC JERSEY SOW SALE

To Be Sold at His Waveland Stock Farm

LAKE CITY, IOWA, JANUARY 16, 1907.

30 Yearling and Matured Sows and 10 Very Choice Gilts.

THE blood of Old Higgins' model, Belle's Chief (the World's Fair boar), Tip Top Notcher, Leather Stockings I and Adjuster is behind this entire bunch. These are bred to S. G.'s Crimson Improver 50101, a son of Crimson Wonder I Am and Waveland Ohio Chief.

S. G. COLLICOTT, - LAKE CITY, IOWA.

Col. F. F. Luther, Auct.

and should prove valuable additions to any herd. Those present sale day will have an opportunity of seeing this boar. Other sows are bred to Sue's Tip Top Notcher, a creditable son of the World's Fair champion, Tip Top Notcher. This young boar gives promise of making something extra good, and crossed with such sows as Messrs. Castle have included in this sale will be worthy of attention of discriminating breeders. Several

gilts are bred to Prince Paul, a son of Champion Paul, he by Oom Paul. This boar is one of Messrs. Castle's raising and is an extra good one and should prove a very good sire. Individually he is of the show-yard type. A select lot of gilts are bred to Prairie Advance, a son of the noted Proud Advance. We again wish to urge our readers to be present at this, one of the early brood sow sales of 1907. Sale will be held in town of

# Prairie Farm Durocs at Auction

## At Joy, Illinois, Friday, January 18, 1907

**40** Head of choicely bred Duroc sows. 12 aged and yearling sows **40**  
several of which have raised fall litters of show yard merit. 28 gilts

We have selected the tops of over 300 head for this offering and have drawn upon some of the very best herds of the breed for our foundation stock. The blood of Tip Top Notcher, Kruger, Major R., Royal Plummer, American Royal, Proud Advance and other famous sires is found in this offering. Many of the offering are sired by the state fair prize winner, DeSoto's Model. Sows are bred to Perfection Chief 34729, first-prize yearling 1905 and first-prize aged boar 1906, Wisconsin State Fair; second-prize yearling, Minnesota State Fair, 1905; second-prize aged boar, Minnesota State Fair, 1906; third-prize yearling, Iowa State Fair, 1905, and headed third-prize young herd, 1905, Iowa State Fair.

A LIMITED NUMBER OF SOWS ARE BRED TO THIS NOTED BOAR.  
Other sows are bred to Sue's Tip Top Notcher 53955 by Tip Top Notcher; Prairie Advance 53957 by Proud Advance; Prairie Paul by Champion Paul; Dreamland Major 53959 by Major R., a World's Fair winner. Individuality combined with the richest blood lines the breed affords makes this one of the most desirable offerings of the year. Write for catalog at once.

## E. M. Castle & Son, R. 3, Joy, Ill.

Send bids to D. M. Pierce, representing this paper in care of Messrs. Castle. Cols. Reppert & Keil, Aucts.

Perfection Chief 34729, first-prize yearling 1905 and first-prize aged boar, 1906, Wisconsin State Fair; second-prize yearling, 1905, and second-prize aged boar, Minnesota State Fair, 1906; third-prize yearling boar and headed third-prize young herd, Iowa State Fair, 1905.

Joy in comfortable pavilion and all breeders and farmers present will be well cared for. Joy is located on the Keithsburg and Galva branch of the Burlington railroad and connections can be made immediately after the sale with trains in all directions out of Burlington. Write for catalog at once, as per advertisement on this page, kindly mentioning The Homestead. Bids sent to Mr. D. M. Pierce will be properly handled.

### E. H. KNICKERBOCKER'S BELGIANS.

Mr. E. H. Knickerbocker, of Fairfax, Iowa, who has been engaged in handling Belgian stallions for a number of years, has recently landed twenty-one head of that famous old Flemish stock that has perhaps done more for the draft breeds than all others, and now offers them to the public. In the lot are sixteen stallions from two to five years old, of the choicest colors, blacks and bays predominating, with a few of the old original roans. Mr. Knickerbocker imported five mares for his own use, but we are of the opinion that a handsome span might be secured by some appreciative buyer who is willing to pay a good round sum. However, we would not give it out as a positive fact that any of these mares are for sale. Fairfax is but seven miles from Cedar Rapids, and on two lines of railway. Note the new advertisement on page 38.

### LORTON'S DUROCS.

Mr. I. J. Lorton, of Union City, Ind., proprietor of the Clover Blossom herd of Duroc Jerseys, writes as follows in regard to his herd: "Herd in best of shape and trade fair. Among my recent sales is a fine I. J.'s Chief gilt to Mr. H. G. Kessler, of Cassopolis, Mich.; a Col. Perfection boar to Mr. D. H. Jordan, Palestine, Ill.; another Col. Perfection pig to Mr. John C. Deubner, Glenview, Ohio; and I. J.'s Chief boar to Dr. C. B. Pendleton, Middleton, Ind., at satisfactory prices and all well pleased. We have recently added a young boar by Decatur King 14069, he by Echo King 8671 out of Decatur Queen 1st 27012, dam by Ed's Col. 8035. He is a growthy, heavy-boned boar, has fancy head and ear, a very fine coat and color. We are using him on our I. J.'s Chief 45797 gilts and a few others. I. J.'s Chief is doing fine service and is as spry as a pig. We are now offering as fine and growthy a lot of gilts as you will find anywhere. Size 225 to 300 pounds. These gilts are mostly sired by Col. Perfection 16135 (a) 45751 (n), and are bred and will be sold for March and April litters."

### McKEEVER'S LARGE-BONED POLANDS.

A herd of Poland China hogs that would attract the attention of all lovers of the large type of Poland Chinas is that of Messrs. McKeever & Sons, at Hubbell, Neb. It is quite a treat to visit a herd of this kind, as it shows a great work and study on the part of the proprietors in building a herd of hogs to such size and easy feeding qualities. It will be remembered that this is the firm that recently purchased a one-third interest in the great yearling boar, Grand Look 38305, first-prize hog at the Nebraska State Fair in 1906, and sweepstakes at Kansas State Fair, also first and sweepstakes at St. Joe. He was sired by King Look 24459 and having for his dam Valley Girl by Ideal Black U. S. 2d, and a better hog can rarely be found anywhere. This is also the home of Expansion See 37198, which is without doubt the largest Poland China boar doing service today. This great hog is a son of old Expansion and weighed 1,125 pounds in show shape at the Nebraska State Fair in 1906. There will be several daughters of this great hog in their coming brood sow sale, which will be held at Hubbell, Neb., on January 31st, and they are as smooth a lot of sows as we have had the pleasure of looking at in a year. Some of these sows will be bred to Grand Look, which ought to be a wonderfully good cross. Mr. McKeever has a great combination of prize-winning blood and we can recommend them to anyone wishing a Poland China sow of the large type. Write them and mention The Homestead.

### A GREAT SEED BOOK.

Ferry's great 1907 seed book is now ready for distribution. This is the book that every farmer wants and waits for. It makes no difference what other catalogs are received, farmers are not satisfied until they get Ferry's, because it contains better and fuller information. Ferry's seed annual, in fact, is really more than a catalog. It differs from the usual seed catalog inasmuch as it really helps each farmer or gardener to choose intelligently the varieties best suited to his particular needs. The wise selection of varieties results in bigger, better paying crops. The experience gained in fifty years of successful seed growing is thus at your command. For freshness, purity and reliability Ferry's seeds are in a class by themselves.

They are known all over the land, and farmers everywhere have confidence in the name of Ferry, and know for a certainty that their seeds can be relied upon. They know that every package has behind it the reputation of a house whose business standards are the highest in the trade. Just drop a postal to Messrs. D. M. Ferry & Co., Detroit, Mich., and they will send you a copy of their 1907 seed annual. It is absolutely free.

### HIGH-CLASS HEREFORDS IN THE SOUTH OMAHA AUCTION.

Friends and admirers of the best type of the present day Herefords should keep in mind the auction to be held under the management of Mr. W. C. McGavock, of Springfield, Ill., at South Omaha, Neb., on January 19th. Mr. N. J. Hiltbrand, of Lostant, Ill., is sending to this auction some of the thickest-fleshed, most symmetrical animals of the breed, and they also possess the bone and scale so much desired by western breeders of this breed. They are got by such noted sires as Beau Donald 23d, Phil Armour, Actor, Imp. Albany, and they include imported as well as American-bred animals. Mr. H. K. Philson, of Harlan, Iowa, consigns grandsons and daughters of Peerless Wilton 26th, Weston Stamp 16th, Imp. Improver and other noted bulls. The females in this consignment nearly all have calves at foot and they are a very profitable and useful kind for purchasers to invest in. Mr. W. J. Pellett, of Atlantic, Iowa, and Hugh Whiteford, of Guilford, Mo., are also among the consignors. Manager McGavock will be glad to mail catalog to all interested and we insist that western breeders, ranchmen and farmers turn out on this occasion.

### BREEDERS' COMBINATION HORSE SALE.

On Wednesday, Thursday and Friday of next week, January 9th, 10th and 11th, the annual breeders' combination sale of registered horses will be held in the large coliseum at Bloomington, Ill. Under the direction and management of Messrs. C. W. Hurt, of Arcwsmith, Ill., and D. Augustin, of Carlock, Ill., these annual sales have been very successful events, and the horses cataloged for the forthcoming sale are as good a lot as have gone under the hammer in recent years. Bloomington is centrally located, thus affording splendid shipping facilities. On Wednesday and Thursday, 140 head of registered Percherons, French draft, Shires, Clydesdale horses, mares and stallions will be sold at public auction, and on Friday sixty head of registered trotters, grade draft, coach, all-purpose and saddle horses, stallions, mares and geldings will be offered. The catalogs are now ready and will be sent to all who write. The readers of this paper should plan to be present at this important sale, especially if they are in the market for a good stallion or some extra good mares. The list of consignors includes the names of some of the best known and most successful breeders of the middle West who are putting in nothing but good stock. Write for catalog today, and plan to be present at this important sale next week. Please mention this paper when writing.

### McNEIL BROS.' NOTED BROOD SOW SALE.

We wish to call the attention of our readers to one of the most noted brood sow sales of 1907, that of Messrs. McNeil Bros., of Bowen, Ill. Those familiar with Duroc history have noted that for the past few years Messrs. McNeil have been among the leaders in placing the Duroc at the top of the ladder. The writer, Mr. D. M. Pierce, representing The Homestead, has been familiar with this well-known herd for some years past. The very best boars which could be found for sale have found ready attention at the hands of these enterprising gentlemen. Notably so, the herd boar, Hanley. He was secured at public auction at \$310 and Messrs. McNeil have on more than one occasion refused \$2,000 for this noted show and breeding boar. His sire, None Such, was a noted prize winner. His dam, Bright Star II, by Echo King by Sensation, was a producer of show-yard winners. Hanley has proven a valuable sire and his get are of the kind sought after by the most discriminating buyers. Twenty-five head go into the sale bred to this noted sire. This fall Messrs. McNeil Bros. were in need of a boar to cross on the produce of Hanley. After visiting the leading state fairs and carefully inspecting the boars on exhibition they decided to purchase a son of the World's Fair winner, Tip Top Notcher. This boar, Helen's Tip Top Notcher, was purchased in the record-breaking sale of Messrs. Fagan, Browning & McCabe. He brought \$1,000, the highest price ever paid for a Duroc boar at public auction. The dam of Helen's Tip Top Notcher was Helen Blazes, the sow which produced the \$1,000 sow, Helen Blazes III., the highest-priced sow up until the time she

### TOO LATE TO CLASSIFY.

### POOLED DURHAM CATTLE.

### DOUBLE STANDARD

## Polled Durham Short-Horns

HERD headed by Secret Knight, he by the \$1,000 Idle Knight X1374-169582. A few young bulls and heifers of this famous Polled breed for sale at reasonable prices. Farm five miles from town. We won 50 prizes at the Iowa, Nebraska and Kansas State Fairs this fall, including 21 firsts and 10 sweepstakes.

SHAYER & DEUKER,

Kalona and Wellman, Iowa.

## One Yearling Polled Durham Bull

FOR SALE—Richly bred and sired by a noted prize winner. He will be priced right and is right in every way. Address,

J. J. WILLIAMS & SON, Grand View, Iowa

was sold, and the \$1,910 litter, the highest-priced litter ever sold at auction. Such breeding and individuality as this boar possesses are indeed rare. He stood third in his class at Springfield this year and there were many present who favored him for a higher place. Twenty-two head have been bred to this noted boar, many of them Hanley gilts. One of the fundamental principles of breeding is the fact that "like produces like or the likeness of some ancestor." The ancestry found in both the pedigrees of Hanley and Helen's Tip Top Notcher have given to the Duroc breed some of the greatest individuals and breeders that history records. What, then, can be expected of this cross? How many sales contain the blood of champions such as does that of Messrs. McNeil Bros.? We have from time to time called attention to some of the individuals to be found in their herd. The recent sales have been well patronized by these gentlemen, many of the tops going to them. The offering to which the public is invited to inspect and secure at their own price is made up of fifty head, divided as follows: Thirty tried brood sows, many of them the best the herd affords; twenty spring and fall gilts. The guarantee is one of the strongest ever made and those who know the McNeil boys realize that they do not make any statement which they do not stand back of. Two sows in the sale are bred to Buddy K. IV., champion boar Illinois State Fair, 1905, and second-prize aged boar same fair, 1906; one bred to Ambition, the prize-winning boar at Illinois State Fair in 1905 and 1906. The get of Hanley, Proud Advance, Tip Top Notcher, Buddy K. IV., Mayor Jr., Gold Cloud, The Great Conqueror, Cantine Boy, Corrector, Manley Orion, Indiana, A Top Notcher, Big I Am, Iowa King and other noted sires make up this offering. The writer has inspected every offering made by this firm and is free to pronounce this one the best ever made. The brood sow sale of January, 1906, made the highest average up to that time ever secured in Illinois, yet there were many hargains. So it is with the public sales held by Messrs. McNeil. Plan to be present at Bowen, Ill., on January 17th. You will be royally treated by this firm and the offering of Durocs will bring forth admiration from the most discriminating breeders. The catalog is one of the most artistic and complete productions of recent years, the pedigree of each sow being given in full through five generations. It is worthy of a place in the home of every Duroc breeder in America. Write for one at once, kindly mentioning The Homestead. In our next issue full particulars regarding this offering will be given. Watch for it. Bids sent

## 80 STALLIONS

THE BEST IMPORTED STALLIONS

ONE THOUSAND DOLLARS each. Home bred registered draft stallions \$250 to \$750 at my stable door. Address,

A. LATIMER WILSON, CRESTON, IOWA

to Mr. D. M. Pierce, representing The Homestead, in care of Messrs. McNeil, will be properly handled. Plan to be present at Bowen, Ill., on January 17, 1907.

### Last Call for the Rogers Combination South Omaha Sale January 9th.

We wish to call the attention for the last time of all lovers of good Hereford cattle to the combination sale to be held at South Omaha, Neb., on January 9th. The offering is composed of nothing but tops and from the most noted herds in Nebraska and Iowa. Parties wishing to get some good, useful Herefords should be found in the sale ring on the above date. It will be a chance of a lifetime to those interested in this breed of cattle to secure the very best that seven great herds can produce. When we take into consideration the quality shown in this offering and the men that are contributing these cattle we feel justified in encouraging breeders and farmers who are looking for choice animals to attend the sale. Every breeder contributing to this sale is putting in nothing but the cream of his herd and a limited number, some of them being show animals that have won laurels in the best shows of the West. Messrs. Roger Bros., of McCook, Neb., are offering for a special attraction the five-year-old cow, Queen 4th by Anxiety Monarch, and she is safe in calf to Beau Donald 28th. She was good enough to win first in the Nebraska state special as a two-year-old. They are also offering two Monarch of Shadeland heifers that are extra good and are safe in calf to the great Beau Donald 28th. The great heifer, Maggie Wilton, will also be sold, and we consider her one of the great heifers of the breed. She is a daughter of old Anxiety Wilton and safe in calf to Beau Donald 28th. As a special attraction in Messrs. Roger Bros.' bull offering we wish to call the attention of those looking for a good yearling to Beau of Shadeland 25th, a son of Beau Donald 28th, that bids fair to make as good a bull as his sire. On the dam's side he traces to Garfield, the champion bull of England. He is a full brother to Shadeland's Maid 25th that won five blue ribbons in five leading shows and was a member of their undefeated show herd. Jury of Shadeland 34th, a two-year-old son of Jury will also be sold, and we recommend him good enough to go to any good herd. Mr. Z. T. Kinsell, of Mt. Airy, Iowa, consigns ten head of good ones, of which eight are bulls, mostly the get of Advancer, although one of them is a son of Anxiety Elmo 3d by St. Elmo of Shadeland by Garfield, the champion bull of England. His dam was Henrietta, a daughter of old Lord Wilton. The two females are a pair of fine two-year-old heifers by Advancer by March On, and are safe in calf to the great sweepstakes bull, McKinley. Mr. Emil Hoffmeyer offers four head of good, strong bulls of the type that most breeders are looking for at this time. They are low-down, blocky fellows from the very best families and should demand the attention of breeders. Messrs. Woods, Bancroft & Heinz, of Bancroft, Neb., offer five cows of the good, useful Hereford type, including the great five-year-old cow, Lohella by a son of Ancient Briton, dam by a son of Lord Wilton. This is a grand breeding cow and has a fine heifer calf at foot. They also include the three-year-old cow, Percy, by Ancellmo, a grandson of Beau Brummel. Three of this consignment are two-year-olds of the very best families and are all in calf to Gay Donald by Beau Donald 7th by Beau Donald. Messrs. Allen Bros., of Cambridge, Neb., consign ten head from their well-known herd, of which five are yearling bulls sired by Grove Brummel by Beau Brummel. They are all good, strong bulls of the best of breeding and are growthy, big-boned fellows of the useful type. The cows are extra good and are daughters of such bulls as Hardy and Anderson, tracing to the very best families of the breed. The E. J. Elliott offering from Sutherland, Iowa, consists of five females and three bulls, including the great two-year-old bull, Allright II. E., a bull that Mr. Elliott considers one of the best he has ever raised. He is bred very much the same as the champion bull at the International show this year. One of the best cows is by Anxiety Wilton by Anxiety Wilton 3d, dam by Lord Wilton. The other three females are daughters of the great Allright. Mr. W. W. Wheeler, of Harlan, Iowa, consigns three heifers and two bulls from his well-known herd that he considers the best he has ever raised. The great bull, Gay Wilton 5th by the 2,500-pound Gay Wilton, he by old Anxiety Monarch, is the only bull Mr. Wheeler has ever had that weighed over 100 pounds per month. His dam was Imp. Lady Horace 2d, a 1,900-pound cow in her every-day clothes. If you are looking for something big and from large ancestry look this fellow up. Mr. Wheeler also offers the three-year-old bull, Prosper by Perfection Yet by Perfection. This bull is considered a great prospect for a herd bull. Mr. Wheeler's cow offering is a richly-bred one and are extra good individuals, all safe in calf to good bulls. We consider this offering as choice a lot of cattle as will be sold anywhere in the West this fall. Catalogs are now ready and can be had by addressing Mr. W. N. Rogers, of McCook, Neb.

### Combination Short-horn Sale at Grinnell, Iowa.

Attention is called on this page to the prominent Short-horn sale that will be held on the fair grounds at Grinnell, Ia., January 16th, under the efficient management of Messrs. G. A. Bonewell and James Duffus. On this occasion these gentlemen will sell a select bunch of Scotch and Scotch-topped Short-horns from their own herds, as well as a goodly number from the herds of Mr. D. C. Siegel, Z. B. Zirbel, and John Nicholes. We shall not enter into detail in this article concerning the individuality of any of the cattle, other than to say that the offering is a very desirable one and includes the dispersion of Mr. Zirbel's entire herd. The make-up of the offering is as follows: Mr. Siegel, twenty head; Mr. Zirbel, nineteen head; Mr. Bonewell, eleven; Mr. Duffus, three; John Nicholes, six, and Mr. Carpenter, one. There will be three choice herd bulls sold. The one belonging to Mr. Bonewell is Victor Royal 21653. He is a straight Scotch bull and belongs to the Cruickshank Aurora family; was sired by Royal Rosewood. This was the pick of fifteen young bulls raised by Messrs. H. S. Thompson's Sons in 1903. He was sweepstakes at the county fair for the last two years, winning over all breeds. He is a dark red bull and all of his get are red. A more uniform lot of calves can scarcely be found. Mr. Siegel sells his herd bull, Royal Victor 198131. He

also was bred by Messrs. Thompson's Sons and is a Cruickshank Brawith Bud. There is no better breeding in the herd book than is contained in this most excellent bull. Certainly someone will secure a bargain in this fellow. Mr. Zirbel's herd bull is Melba's Victorious 206611. This bull was bred by Mr. A. L. Stutzman, of New Sharon, Iowa. His dam is the noted cow, Imp. Melba, while his sire was a choicely-bred Cruickshank bull called Victorious that was bred by the honorable John Dryden, of Canada. This is a very long-bodied animal, with good head and is a sure breeder. He is also red, and is unquestionably the best bull ever owned by Mr. Zirbel. In a future issue we shall dwell at some length on the number of good young bulls that are offered as well as the number of Scotch females consigned to this sale. The cattle owned by Mr. Siegel are considered a very select lot, both in condition and individual merit. There will be sixty head in this offering and included will be a goodly number of calves that sell with their dam. Each and every consignor to this sale is a thoroughly honorable and upright breeder, otherwise Messrs. Bonewell & Duffus would not have consented to their contributing to the sale. Certainly this will be a grand opportunity for anyone in need of a car load lot of desirable females that will likely go at bargain prices. The catalogs are now ready to mail and can be had by addressing G. A. Bonewell, Grinnell, Iowa, or James Duffus, Malcom, Iowa. A few sample pedigrees appear in this issue of The Homestead on this page, which will serve to show the character of the Scotch cattle consigned to this sale. Col. George P. Bellows will do the selling, assisted in the ring by Mr. J. L. McIlraith.

### Voge's Duroc Jersey Sale.

On January 19th Mr. August Voge, of Portsmouth, Iowa, will sell a draft of forty head of Duroc Jersey sows and gilts from his well-known Hillhurst herd. When Mr. Voge makes a sale he never puts in the culls, and his January brood sow sale is going to be one of the good ones of the season. At the head of the herd is Kruger Lad 17179, the boar that won four first prizes at the Iowa State Fair in 1906. Many of the best sows will be bred to Kruger Lad, and they are worth the time and the money of any of our best breeders, and the man who is looking for the very best should not fail to be on hand sale day. He is selling forty head, among which will be eighteen fall yearlings and matured sows, and twenty-two spring gilts. There will be three good gilts in the sale sired by the World's Fair sweepstakes boar, Tip Top Notcher, and eight gilts sired by Crimson Wonder I Am 2d, the third-prize yearling boar at Des Moines in 1906. This boar is also owned by Mr. Voge and he will be bred to some of the sows in the sale. He also sells one good gilt sired by the \$5,000 boar, Junior Jim, and she will be bred to Crimson Wonder I Am 2d. But the best of all, and one of the best gilts that will be sold this year, and we except no herd, is a March gilt sired by Lafollette, and she is bred to Kruger's Lad. Lafollette is a son of Belle's Chief, the third-prize boar at the World's Fair, and his dam is Bishop's Choice, also the dam of Cole's Duroc, first-prize yearling boar at Nebraska State Fair in 1903, and Larchwood, second-prize yearling boar at the same show. This sow is a "peach" if we are permitted to use the expression. She is excellent in head and ear, a good hack, well-sprung rib, good ham and stands on good feet. She is one of the really very

# THREE DAYS' AUCTION OF HIGH CLASS SHORT-HORNS, ABERDEEN-ANGUS and HEREFORDS

AT SOUTH OMAHA, NEB., THURSDAY, FRIDAY AND SATURDAY, JANUARY 17, 18, 19, 1907.

Fifty head of Scotch and Scotch-topped Short-horns, including high-class herd headers and straight Scotch animals of both sexes, and being the best all-round offering of Short-horns that I have ever cataloged. They will be sold on January 17th and are consigned by Hadley & Leech, Cedar Rapids, Neb.; S. E. Prather Co., Sherman, Ill.; H. G. Bowers, Elmwood, Ill.; John Sippel, Casey, Iowa; W. W. Griffith, Anawan, Iowa; W. L. Tiller & Son, Pawnee City, Neb. Sixty Aberdeen Angus constituting the most superior offering of the breed that I have ever offered at South Omaha, including representatives of the most fashionable families, will be auctioned on January 18th. They are consigned by W. D. Reynolds, Villisca, Iowa; C. B. Gray, Corwith, Iowa; Barr & Lonecker, Dexter, Iowa; N. G. Daughmer & Son, Douglas, Ill.; Martin H. Knudson, Farmingdale, Ill., and B. H. Keck, Cornland, Ill. Thirty Herefords representing the substance and thickness for which the breed is famed, will be auctioned on January 19th. They are consigned by H. K. Philson, Harlan, Iowa; Hugh Whiteford, Guilford, Mo.; N. J. Hildabrand, Lostant, Ill., and W. J. Pellett, Atlantic, Iowa.

choice gilts that will be sold this year, and bred to the great Kruger Lad. She certainly should be one of the much-sought-after gilts of the year. The Crimson Wonder I Am gilts are also very good, and his entire offering is uniform and deserves the attention of our best breeders. If you want

a sow bred to Kruger Lad or Crimson Wonder I Am 2d, it will pay you to attend the Voge sale. Every attention will be shown the visitors who are at the sale. His catalog is about ready and he will be pleased to send you one if you only mention Iowa Homestead when writing.

# ABERDEEN-ANGUS

## 48 HEAD CHOICE CATTLE 48

In Fine Big Sale Pavilion, Waterloo, Ia.  
**Wednesday, Jan. 16, '07**

DRAFT FROM THE QUIETDALE HERD

**THE OFFERING CONSISTS OF  
 36 COWS AND 12 BULLS**

Trojan Ericas, Blackbirds, Prides, Queen Mothers, Coquettes, Heather Blooms, Alicias, and other popular tribes. They are descended from the best herds of Scotland, England and America, and represent all the noted families of the breed.

Bred sows that carry the blood of Gold Dust Jim, Improver II, 2d Surprise, Red Chief I Am, Glendale Critic. Remember our guarantee. Dice & Garber, Beaver Crossing, Neb.

## Fashion Improver Jr. at Head of Herd.

I HAVE several choice spring male pigs that will be priced to sell. I sell at private sale and these must go. Sired by Fashion Improver, winner at Nebraska State Fair, '05. Will make good price on young gilts as well. Write today. **F. A. Kruse, Waco, Neb.**

GROWTHY DUROC fall males got by Neb. Wonder, he by Crim. son Wonder are now ready to ship. Write me. **WM. SUTTER, Liberty, Neb.**

**I. J. LORTON, Union City, Ind.,** proprietor of the I. Clover Blossom Herd of Durocs. I. J.'s Chief 12445 (A) 45747 (N) 1st in class at Indiana state fair, '05, at head of herd. Spring pigs of either sex of the large, growthy, smooth type, for sale. Orders for bred gilts booked. All stock guaranteed as represented. **I. J. Lorton, R. R. 35, Union City, Indiana.**

## GOLDEN HERD DUROC JERSEYS

WE are now offering a few very good boars mostly of April farrow of the kind that pleases, also a few open mature sows, one a noted prize winner. Farmers' prices on boars. **Root Bros., (Swine Specialists), Lanke Park, Ia.**

ATHELRED 28069 for sale. The best pig ever sired by Tip Top Notcher. He was 4th prize boar at Nebraska as well as siring 3d prize sow at same show in 1905. "The best Tip Top Notcher pig ever saw," T. J. Harding. "He should have borne blue ribbon," S. R. McKelvie, Twentieth Century Farmer. Price \$1,000. **A. Wilson, Bethany, Neb.**

## State Road Herd Duroc Jerseys

A NUMBER of choice boars of March and April farrow; the growthy, prolific kind, weighing 200 lbs. or better. Also a fall yearling that is extra good. **R. D. 1 JOS. SKINNER & SON, BEDFORD, IA.**

THE Grendell Herd of Durocs contains the blood of the most popular families. **F. H. Herring, Kulona, Iowa. Shipping point Iowa City.**

## HORSES.

## FRANK IAMs

"Special Train" arrived August 14, 1906, carrying 120 "Peaches and Cream" Stallions. They are "Iams' kind," the "Best ever." Winners and "Sons of winners." \$1,000 and \$1,500 buys Imported "Topnotchers" of Iams. Watch "Iams' Smoke." He has his "Selling Clothes" on daily. No buyers with money or bankable notes get away from Iams. He buys, owns and sells more first-class draft and coach stallions than any man in U. S. "Whoa Bill"—Buy a stallion this fall—"Save \$200" and get choice of Iams' barns filled to the roof with

## 168 STALLIONS 168

Dad Iams' "Horse Show" at Iowa state fair, was "the talk" of "people and press." Everybody and cousins were admiring Iams' "Peaches and Cream" stallions. They said Iams "has the goods"—Better than he advertises. Iams Percheron stallion "Trallala" defeated the 1906 "Bibi" Percheron champion winner of France at Iowa state fair.

Mamma—Iams always has the best horses at Nebraska state fair. Iams' 2, 3 and 4-year-old Percheron and Belgian stallions won every first prize (bar one) and sweepstakes prize in both breeds (over all) and many second and third prizes. Iams' "Black Boys" are "Hot Stuff" for competitors; and Iams saves buyers all commissions and middlemen's profits. Iams is not in the "Stallion Trust."

## \$1,000 SAVED AT IAMs \$1,000

Ikey, what a rich graft these "slick stallion salesmen" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "Topnotchers" so good, big and cheap that they do not need to be peddled to be sold. Mr. Buyer, see Iams' stallions yourself. Take no "gold brick stallion salesmen's word." Iams has "the goods" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Xmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! buy a stallion of Iams. His \$1,200 stallions are much better than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from breeders, pays no buyers, salesmen or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a better stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by slick salesmen, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eyeopener and greatest horse catalog on earth. References: St. Paul State bank and Citizens National bank.

ST. PAUL, NEBRASKA.

## THE Lafayette Stock Farm

Lafayette, Ind.

Largest importers in America of Oldenburg German Coach, Percheron and Belgian stallions and this no man can dispute. Our importation of 1906 arrived November 15th. We have won more blue ribbons in 1906 than all other importers combined.

At the great Illinois State Fair at Springfield we won, out of fourteen shows, twelve blue ribbons in the Percheron, Belgian and German Coach classes. We won the championship offered for the five best Percheron stallions owned by one firm and also the same championship offered for the best five Belgian stallions. We won the championship for best Belgian stallion and second, third and fourth in that class. At all other fairs we have done as well and we can show buyers more good, serviceable draft and coach stallions than ever before.

Our exhibition in 1906 at the great International surprised the hundreds of thousands of visitors that attended. We can and do sell our stallions as low as they can be sold at any place in America.

## DEPARTMENTS

SEDALIA, MO. NASHVILLE, TENN. SAN JOSE, CAL.

## TAYLOR &amp; JONES,

IMPORTERS AND BREEDERS OF  
PERCHERON, SHIRE, HACKNEY AND  
BELGIAN STALLIONS.

We are selling our Stallions direct from our barns and are selling better horses at from \$700 to \$1,400 than any firm in America. We have a few sensational show horses that will come a little higher. Special prices to dealers wishing to buy from 3 to 15 stallions.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

We are located on main line of the Chicago & Alton R'y., 12 miles north of Springfield, Illinois, also on new Interurban railroad that is now running cars every hour between Lincoln and Springfield, connecting with lines from St. Louis, Edwardsville, Carlinville and Decatur. Handsome illustrated catalog free. Address,

TAYLOR &amp; JONES,

BOX 68.

## HORSES.

HIS MAJESTY KING EDWARD VII. and LORD ROTHSCHILD'S Exhibit of Stallions were purchased by us at the International, Chicago, 1906-

## ROBERT BURGESS & SON,

Prizes won in this year, demonstrating to the public the SUPERIOR QUALITY of our STUD.

Champion Percheron stallion at the Kansas State Fair, champion Belgian stallion at the Kansas State Fair, champion Shire stallion at the Illinois State Fair, champion Shire stallion at the American Royal, Kansas City, Mo., champion American-bred Percheron stallion at the American Royal, first best five Percheron stallions at the Kansas State Fair, first best five Belgian stallions at the Kansas State Fair, first best five Shire stallions at the Illinois State Fair, second best five Belgian stallions at the Illinois State Fair, first best five Shire stallions at the American Royal, Kansas City, second best five Belgian stallions at the American Royal, Kansas City, second best five Percheron stallions at the American Royal, Kansas City, first, third and fifth Shire stallion four years old and over, first Shire stallion three years old, first Shire stallion two years old, first Shire stallion one year old, champion Shire stallion any age, gold medal best imported Shire stallion any age, best group five Shire stallions any age, fifth Belgian stallion four years old and over, first Belgian stallion three years old, fifth Belgian stallion two years old, second Percheron stallion one year old, second Percheron two animals from same dam bred by exhibitor, third Hackney stallion four years old and over, third Hackney stallion three years old.

Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper who is assisting in placing the stallion in your neighborhood, who usually is one of your own neighbors (the most influential man) whose influence is obtained by a large commission, paid to him by the seller in placing the stallion. The long-time notes from three to five years have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. WE KNOW WE CAN SAVE YOU AT LEAST 50 PER CENT. IF YOU HAVE TO HAVE A COMPANY TO HAVE A HORSE IN YOUR NEIGHBORHOOD, FORM YOUR OWN COMPANY and come to the barns. BE CONVINCED THAT YOU CAN SAVE from \$1,000 to \$1,500, which has to be paid to this influential neighbor or neighbors.

**Good American Bred Stallions, \$800 to \$1,000. First-class imported Stallions, \$1,200 to \$1,600. Choicest Stallions a Little Higher.**

We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from—SHIRES, PERCHERONS, BELGIANS and HACKNEYS. Come to Wenona and deal with Bob Burgess, who has been in the business over thirty-two years—longer than any one man in the stallion trade—and we guarantee to make every deal satisfactory to you. Get your guaranty and insurance direct from headquarters. Visit our barns and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and has the quality of stock that will suit the people, is perfectly good for the guaranties and will sell to you more good horse quality for less money than any one. Come to the barns and get the most reasonable terms that can be offered.

WENONA, ILLINOIS.

WICHITA, KANSAS.

## OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only world-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconceived effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition. The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgians. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftsart O. V. Oltmanns, resides in the German Coach Horse district, and is ever on the lookout for the finest and best old country produce. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANN'S BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

## PETER HOPLEY & SON

LEWIS, IOWA

Percherons, Shires, Suffolks, Belgians and German Coachers.

The best of these great breeds always to be found and our prices are the lowest. If you are in need of a Stallion of the above breeds or contemplate buying, write us. BARN AT FARM.

A FEW CHOICE SUFFOLK FILLIES FOR SALE.

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

KEEP AHEAD 93333  
1ST IN CLASS AND SWEEPSTAKES AT MO'S STATE FAIR 1905

# THE \$4000. HOG

## AT 9 MONTHS THIS HOG WAS THE RUNT OF THE LITTER.

### WHAT MADE THE CHANGE?

# INTERNATIONAL STOCK FOOD

 **3 FEEDS FOR ONE CENT.** 

**REPORT FROM A LEADING HOG BREEDER.**

INTERNATIONAL STOCK FOOD CO.,  
Minneapolis, Minn.

THAYER, ILLINOIS, OCTOBER 15, 1906.

Dear Sirs:—I express to you today a sketch of Keep Ahead 93333 (the greatest living son of Keep On 61015.) Keep Ahead won first in class and sweep stakes at the Missouri State Fair, 1905, in the best show of the year. He was 16 months old, weighed 600 pounds and ate "International Stock Food" every day. I bought him when a pig weighing 150 pounds. At nine months old he was the runt of the litter. It was in Ohio that I bought him and the very best Poland China breeders and judges laughed at me in the same sale. These same fellows bought other pigs at big prices and they never amounted to anything. This hog is without doubt one of the greatest living hogs. His sons and daughters are sale toppers. His first gilt sold at auction at about 12 months old. She was fed "International Stock Food" regularly and topped Cotta & Mathis & Wares' sale at \$305. Keep Ahead can not be bought for \$4,000.00. He is now owned by Hausen, Black & Gafey, Holbrook, Iowa, and Cotta & Mathis, Farmington, Ill. I am fitting a great lot of grandsons and daughters for next year's shows by the aid of "International Stock Food" and I expect to win. I showed and won at the late Illinois State Fair. The Great Hulda's Darkness without doubt is the greatest sow shown at this fair for years. I never feed anything for the fairs but regular feeding stuffs with "International Stock Food" mixed in. I will send Keep Ahead's sketch now and one of Hulda's Darkness later. Please return the sketch.

Hoping always to have the same success with International Stock Food, I am,

Yours respectfully,

J. WALTER GARVEY, Breeder of Poland China Hogs.

## A BIG MONEY MAKER FOR EVERY HOG BREEDER.

"International Stock Food" is prepared from pure medicinal Roots, Herbs, Seeds and Barks and is fed in small amounts as an addition to the regular grain feed. It Purifies the Blood, Cures and Prevents Disease, Tones up and Permanently Strengthens the Entire System and greatly Aids Digestion and Assimilation so that each animal obtains more nutrition from all grain eaten. It is absolutely harmless for any use or even if taken into the human system. Sold by over One Hundred and Twenty-five Thousand Dealers on a "Spot Cash Guarantee" to give you paying results or your money promptly refunded. We do not compete with cheap and inferior preparations. We guarantee high-class medicinal quality and over Two Million Farmers and Stockmen have thousands of similar unsolicited testimonials on file in our office. TEST IT FOR YOUR PIGS, SHOATS, HOGS, FATTENING CATTLE, COWS, CALVES, HORSES, MARES, COLTS, SHEEP AND LAMBS ENTIRELY AT OUR RISK. COULD YOU ASK ANY FAIRER OFFER? M. W. Savage guarantees that Dan Patch has eaten "International Stock Food" for over four years. During this time he has broken fourteen world records and his marvelous physical condition has astonished the entire horse world. "International Stock Food" will make your Hogs and other Stock take premiums, or it will prepare and fatten stock for market in 30 to 60 days less time and save grain. Always The Cheapest To Use, And Paying Results Guaranteed.

VOL. LII. NO. 2.

DES MOINES, IOWA, JANUARY 10, 1907.

WHOLE NO. 2582

#### LICE AND WORMS IN HOGS.

The following communication has been received from one of our subscribers, Mr. A. W. Mally, of Polk county, Iowa:

Having been a reader of your paper for some time and gathering much valuable information from it, I concluded to contribute a little to the help of my farmer friends who are having trouble with worms and lice among their hogs.

For worms in hogs I find the following recipe very valuable: Santonin, one ounce; ground flax, one and one-half pounds; common soda, one and one-half pounds. Mix thoroughly and feed one pound to thirty hogs averaging about eighty pounds. To larger ones give one and one-half pounds to thirty. Do not give any grain or slop of any kind for twelve hours before feeding medicine and twelve hours after feeding medicine give a good feed of oil meal slop. Mix the medicine in a slop of shorts and treat every five days until three doses are given. The object in feeding three feeds is where large droves are fed at a time some will not get enough and if fed three feeds right in rotation some are apt to get too much. I usually divide my hogs in lots of ten or fifteen to get best results.

I also see one subscriber who is having trouble with lice on his hogs, so will give my remedy. Some four years ago when I tried to rid my yards of lice I sprayed my hog sheds and hogs with a coal tar preparation (creolin), but found that this was not enough. I therefore put in a dipping tank and now dip my hogs once a month both winter and summer, and find that I am not bothered with lice and have lost no hogs from disease.

In the summer I aim to get a rather cool day, as hogs are handled better, and in the winter I get as warm a day as possible so the hogs will not take cold. I also warm the dip used in winter.

I do not spray my hog sheds as I used to, as the hogs go in after dipping and the drippings off the hogs thoroughly disinfect the sleeping quarters. I cover up the dip remaining in the tank and save for the next time.

We are pleased, indeed, to pass this information along for the benefit of our readers. We have always been a little afraid to spray or dip hogs in cold weather, but if they are turned right back into their quarters, so as not to stand around in a draft it is quite possible that they may pass through the ordeal without any injury whatever. The plan here given for destroying worms has been tried so thoroughly by Mr. Mally, as indicated by his success as a hog raiser, that we have no hesitation in endorsing it.

It will not be long now until seed corn testing will be the order of the day. Some will place their seed between wet cloths, while others will use the soil method. All things considered, the latter is preferable, because it furnishes conditions that are more nearly natural. Corn that will come up through three inches of soil when the temperature is no higher than 60 or 65 may be considered strong enough enough to plant. It should do more than germinate, blades showing a healthy, green appearance.

## At the 100,000 Mark.

Announcements in the daily press that The Homestead has reached the 100,000 mark in circulation have brought the publisher a shower of congratulations from representative men of all parts of the country. It would be impossible to acknowledge personally all the gracious and courteous things that have been said; and we take this method of saying to one and all that their kindness, thoughtfulness and generosity are deeply appreciated. The fact that The Homestead had attained to this new dignity did not become public until the last days of the old year; and the responses of our friends began to arrive on New Year's day. One of the first to come was the following cordial note from that splendid representative of scientific agriculture, Prof. Charles F. Curtiss, dean of the agricultural department of Iowa State College, director of the experiment station there, and recognized as one of the foremost authorities in his line in the United States:

Iowa State College of Agriculture and Mechanic Arts, Division of Agriculture, Ames, Iowa, Jan. 1, 1907. Dear Mr. Pierce:—I wish to extend to you my hearty congratulation on the One Hundred Thousand mark being reached by The Homestead. I not only congratulate you personally, but it is also a matter of gratification to the agricultural interests of the state that such a standing has been attained by The Homestead. With best wishes for a happy and prosperous new year, I am, Very truly yours, C. F. Curtiss.

The same mail brought this message from a prominent banking house:

Office of Exchange Bank, (Amos Steckel &

Son) Bloomfield, Iowa, Jan. 1, 1907. The Homestead Company, Des Moines, Iowa. Gentlemen:—We understand that The Homestead has reached the 100,000 point. We are glad to learn of your success and offer congratulations.

Very truly yours, W. J. Steckel, Cashier.

Hardly had this been opened when the following hearty greeting arrived from one of Iowa's great business houses which has made its name a household word with Homestead readers:

Office of the Iowa Seed Company, Des Moines, Iowa, Jan. 1, 1907. Dear Mr. Pierce:—Having recently noticed in one of our daily papers that The Homestead has reached the One Hundred Thousand level, I desire to most heartily congratulate you on attaining this great circulation, which, I believe, is unprecedented among weekly agricultural papers. According to the usual way of figuring, five readers to each copy, this means half a million readers. We have been advertising in The Homestead thirty out of the fifty-two years it has been published, and have therefore seen its growth from a circulation of about four or five thousand to the present immense number, and think we can appreciate the energy and persistent work which have brought this result. We know from past experience that your readers are buyers and that they have a great deal of faith in The Homestead. Hoping that your paper will have the still greater success it justly deserves, I remain,

Very truly yours, Chas. N. Page, Manager Iowa Seed Co.

Iowa being nearest, was first to be heard; but equally generous was the deluge of congratulations from neighboring states. They are still coming from every point of the compass—all couched in the friendliest terms; but space forbids further quotations. Good friends, many, many thanks!

#### DETECTING LOW VITALITY IN SEED CORN.

A Missouri subscriber sends us the following communication:

I was at a corn show some time ago and was startled by the fact that the judge discarded so large a percentage of the seed on exhibition on the ground that it would not grow. Dozens of men brought their corn to this contest in the full belief that they were bringing the best they had, being confident above all things their corn was sound. When the judge went after it with his knife he found that fully half of it was absolutely worthless for seed. Now I should like to know if it is possible for any man to actually detect lack of germination qualities in a kernel of corn. It looks to me that if it were possible for every man to become an expert as this judge appeared to be, it would not be necessary to test corn in the future, but simply to examine it. I wish you would tell me how to examine my corn so that I will know without testing it whether it will grow or not.

Our best authorities on seed corn are sometimes fooled when it comes to the question of determining the germinating qualities of a sample of corn. Generally speaking, however, seed corn hangs out two or three signs that will indicate whether it is good or not.

In the first place, if you take a kernel or two from an ear and the tip of the kernel remains on the cob you may rest assured that such corn, if it is mature, has not been kept under ideal conditions. In the second place, if when a kernel is withdrawn from the ear it brings with it a small amount of the cob, this also indicates that the corn is not in the very best condition for seed. Generally speaking, the adherence of a small particle of the cob to the kernel indicates that the corn has not matured perfectly. Then there is the matter of color as applied to germ. The germ itself, when examined from outside the kernel as well as when it is cut across, should have a bright appearance and should never be soapy. Of course it goes without saying that a kernel should be well filled out, or, in other words, "plump," in order that maturity is indicated to the greatest possible extent. Now, these are indications that even the amateur ought to detect. If you will take corn that has been picked early in the fall, just as soon as it has become nicely dented and has been hung up in well ventilated quarters where each ear is by itself you will find that the kernels from such ears detach themselves from the cob without taking any part of it and without leaving any part of the kernel attached. There are, we must acknowledge, certain conditions of dryness that sometimes will fool an expert when it comes to the matter of telling whether corn is vital or not. When the corn is much dryer than the cob

An interesting feature of the recent International Live Stock Exposition, the exhibit of Messrs. Oltmanns Bros., of Watseka, Ill. A number of German Coach horses were shown by this leading firm and the above illustration shows two of their prize-winning stallions, as shown mounted by Soldiers of Germany in full uniform. Messrs. Oltmanns are among America's leading importers of German Coach, Percheron and Belgian stallions. See advertisement on page 39.

the tip may be left on the cob and yet the vitality might still be in the kernel; but at this time of year corn should be in such condition that in the removal of kernels there should be no breaking or adhesion of cob particles to the tip of the kernel.

But of course the final determination is to actually make a test of each ear and the season is possibly a little early to take up this subject. We know of so many of our wisest men on this subject that have been misled by the appearance of corn that we unhesitatingly recommend the testing of all seed used.

#### ABERDEEN ANGUS BREEDERS OF NEBRASKA TO ORGANIZE.

The Homestead is in receipt of a communication from Christian & Lang, of York, Neb., in which it is proposed that a state organization composed of Aberdeen Angus breeders be effected at Lincoln, on January 17th. Our readers are aware of the fact that a large number of meetings will be held at the agricultural college, Lincoln, Neb., during the week beginning January 13th, so that the time will be convenient for the bringing together of a large number of Aberdeen Angus breeders.

It is suggested by Messrs. Christian & Lang that in order to have a clear understanding of the time the hour 2 p. m. on January 17th be selected, the meeting place being in some of the buildings at the agricultural college, Lincoln.

Railroads have made a rate of one fare plus fifty cents from points in Nebraska to Lincoln and return. It is hoped that of the 150 breeders, ranchmen and farmers that are handling Aberdeen Angus cattle in Nebraska a large representation will be present on the date mentioned so that a healthy state organization may be started. This great breed of beef cattle is winning its way into favor rapidly, but much more could be accomplished if affairs in Nebraska were organized.

The Homestead makes a direct appeal to all doddly breeders to see to it that this is a representative meeting. Each can do something by passing along the word to his fellow breeder, to the end that all shall be informed of the purpose of the meeting and the time it is held. The date, as said before, is 2 p. m., January 17th.

#### Should the Small Breeder Exhibit at Live Stock Shows?

To the Editor of The Homestead:

By "small breeder" is meant the man who is starting in the handling of pure-bred stock, or who has but a small herd of pure-breds. To such men the question suggested above has often presented itself, and there are many who are even now hesitating over the decision, with next fall's shows in mind.

There are several reasons for deciding to show—reasons which should encourage beginners to try their fortune at their county and state fair.

The most important is the educational one. Many a man attends the state fair, to remark that he has better animals at home than those shown; and he believes that he speaks the truth. His judgment is untrained, and the only way in which he can gain knowledge for himself, is by exhibiting his stock. Many a man has a champion at home, that did not land in the prize list when the show was reached. Our great live stock shows are educational institutions, and none secures more knowledge from the same than the exhibitor who failed to secure the ribbon coveted. He studies his own animal in contrast with the others, and analyzes its defects as he could in no other manner. It may be that he has been using a sire of fair individuality, that yet lacks in breed character and type; or it may be that the animal has some decided defect which has escaped the owner's attention until contrast with other animals brings it out in glaring light. The writer has but recently had an illustration of this, where a beginner was using a sire that he fully believed to be excellent. Measured by other bulls of approved type, his weaknesses revealed themselves to even the owner, and an immediate change to a better sire is assured.

The value of show yard training is emphasized by all experienced breeders. One of the leaders among present day Short-horn breeders told the writer that his first real start came from his first show at a district fair. The deadly parallel revealed to him the fact that he had begun with inferior cattle. He went home, quietly and unobtrusively sold all his pure-bred stock, and began anew

The Homestead has reached the long-coveted landmark of 100,000 cash-paying circulation. Over 100,000 farmers, representing a reading population of half a million, are now regular readers of The Homestead, giving it a power for good unequalled by any other weekly agricultural paper in the world, and a place in its own field far beyond competition. Not only is its cash-paying circulation fully 60,000 greater than that of any other agricultural weekly in Des Moines, but it has over 20,000 more cash-paying subscribers in the state of Iowa alone, than any other Des Moines agricultural weekly has in all the states of the Union put together! The Homestead distributes no sample copies except in response to actual requests, and, as it is well known throughout its territory, these requests are very few indeed. At all events, not a single sample copy is included in our circulation statement of over 100,000 bona fide cash-paying subscriptions. We are in the agreeable position of being able to prove our statements by actual postoffice receipts for money paid for postage, by white paper bills and by personal inspection and counting of our subscription lists by advertisers as well as by the cash receipts shown on our books. In such a showing of postoffice receipts, The Homestead enjoys great advantage from the fact that the postal regulations require that sample copies and regular circulation be itemized separately, furnishing proof that The Homestead stands practically alone in its local field in sending out no sample copies.

The 100,000 mark was reached several weeks before the publisher expected it. The rush of new subscriptions in December was far beyond precedent and is still continuing at a rate never equaled in The Homestead's history. Our daily mail is overwhelming in quantity, calling for constant additions to our large force of subscription clerks. The people of Iowa, Illinois, Nebraska and surrounding states seem to be hungry for The Homestead and eager to receive the gospel of good farming. Their letters teem with expressions of friendship and appreciation for The Homestead—evidences of a feeling which would conquer the stoniest heart.

It has always been the policy of The Homestead to give both the subscriber and the advertiser more than the worth of their money. For several weeks past our circulation has been quoted at "over 85,000," but we have refrained from stating just how far the figure of 85,000 was exceeded. The circulation went up to 88,000, then to 90,000, then, by rapid

with the right sort—starting with few, but good ones.

The second main reason for showing, is the advertising. All exhibitors receive notice in the official catalogs, and in the agricultural papers which report the shows. Animals that land in the prize list usually receive special mention, and this is the best of advertising. Aside from the printer's ink secured at low cost, the acquaintanceships formed and the opportunity of inspecting stock afforded to visitors and prospective buyers, never fails to be an asset of tangible value when the year's results are reckoned up. The best of all advertising is that secured by showing winners, plus some newspaper advertising, judiciously placed.

There are other reasons also—the enlargement of one's horizon, the inspiration which comes from association with strong men of ripe experience, and the improvement of the breeder himself—the gain in self control, and in courtesy and tactfulness in business relations. All are of value, materially and otherwise. The small breeder—beginner or otherwise—can well afford to start in an humble way to exhibit stock at the county and state shows. The cost need not be great, as it is well to start with but one or two animals. The experience gained will permit of success on a more extensive scale.

Healthy strife promotes strength. Progress comes from the contests of men who dare compete. Wayne Dinsmore.

leaps to 93,000, 95,000, and 98,000; but still our advertising representatives were under instructions only to guarantee "over 85,000," giving the advertiser the benefit of a handsome excess over what he paid for or expected. When the 100,000 point was reached a short time ago, it was decided to let the world know that The Homestead's hosts had at last carried the heights and that the goal of its friends' ambition for it—100,000 cash-paying circulation—had actually been reached. A banquet at the Savery hotel in Des Moines by members of our editorial, circulation and advertising staffs celebrated the new victory.

"Victory follows victory with James M. Pierce's unrivaled group of farm papers," said one of the Des Moines dailies in reporting the banquet and jubilee. "The announcement is now authoritatively made that the Iowa Homestead, the leading agricultural weekly not only of Iowa, but of the world, has reached the 100,000 mark in circulation, which fact its management stands ready to prove by postoffice receipts, white paper bills and submission of subscription lists to the inspection of persons interested."

One of the most remarkable demonstrations of the power of advertising recorded in the history of agricultural journalism is vouched for by The Homestead's traveling representative in Oklahoma. Mr. A. J. Waldo, the well-known real estate man of Oklahoma City, Oklahoma, recently inserted a fourteen-line advertisement for four weeks in The Homestead. Over 2,000 letters were received by Mr. Waldo in answer to this small advertisement; and one morning when he reached his office he found seven men from the north looking for land bargains, every one of whom had come in answer to that one little advertisement. Our representative might have been incredulous as to the number of the letters if he had not been shown the letters themselves in confirmation of this miracle of modern agricultural advertising.

Mr. George H. Ilten, of Cedar Rapids, Iowa, inserted a four-line poultry advertisement in The Homestead of December 20th and 27th. On the 28th, one day after the second insertion appeared, he wrote beseeching the publisher to stop the advertisement. "My advertisement in The Homestead has cleared me all out of the birds of that price which I advertised," he wrote; and doubtless he has since had that not uncommon experience of Homestead advertisers, being obliged to refuse orders, return money and explain that it was all due to the

efficacy of The Homestead's advertising columns.

A Christmas-day letter from that popular and reliable firm, Messrs. G. P. Tyrrell & Son, proprietors of the Jones County Herd of Registered Short-horn Cattle and Duroc Jersey Swine, Oxford Junction, Iowa, to a Homestead representative announces a tremendous demand for the firm's pure-bred animals resulting from a Homestead advertisement. "The advertisement in The Homestead sold all the pigs," says the letter. "We are sold out of males. Will advise your office what change to make in our advertisement; will probably sell a few gilts." Other mediums used sold a few animals, but the large bulk of the demand was from The Homestead's 100,000 subscribers—a gratifying evidence of the potency of advertising when it appeals to vast numbers of prosperous farmers.

We trust that our readers, in ordering The Homestead for 1907, will not forget that our "Red Letter" combination is still open to them—The Homestead, The Chicago Weekly Inter-Ocean, The Kansas City Weekly Star, The Farm Gazette and The Homemaker, all for \$1.25 a year. We are receiving an immense number of orders for the five papers and it is always a pleasure to fill them, for the reason that we know it means so much for the happiness, instruction and prosperity of a farmer's family to have always on hand a supply of good reading matter.

The Homestead's department of classified advertising is bringing fine returns to those who use it. For five cents a word your advertisement is inserted, by special arrangement, in The Homestead, with 100,000 circulation, The Farmer and Stockman of Kansas City, Mo., with 56,000 circulation, and The Wisconsin Farmer of Madison, Wis., with 34,000 circulation, a grand total of over 190,000 circulation covering the states of Iowa, Illinois, Nebraska, Wisconsin, Minnesota, South Dakota, Missouri, Kansas and Oklahoma. No single insertion is made for less than \$1.20; and, as we keep no books for this department, cash must accompany the order. Each number, initial letter and abbreviation, including the address, counts as one word. No display type or illustration is admitted in our classified department, the plan being to produce uniformity of appearance and give every advertiser an equal chance. In order to insure insertion, copy of the advertisement should reach us on the preceding Saturday or earlier.

#### The Date of Farrowing Question.

To the Editor of The Homestead:

In several recent editions of this paper I see a question in regard to the proper farrowing time for fall and spring pigs that is being discussed by numerous readers. As this is an important subject and one that is interesting to myself as well as others, I will give my experience.

In the fall of 1905 I had two litters of pigs farrowed October 4th and 7th (Duroc Jerseys) and bought another bunch of Poland China stock that was two weeks older than mine. This, made me a bunch of twenty-five, which I put all together. I had no pasture for them so I cooked slop (made of ground barley) nearly all winter, and in addition gave them a generous feed of shelled corn.

I kept them until they were about six months old and had fattened them before they had made their growth, so I disposed of them for some one else to finish and started with another bunch of thirty, farrowed about October 15, 1906. These are now doing nicely, but they have the run of rye and alfalfa pasture and once a day I give a bucket of slop made of four quarts of shorts, four gallons of skim milk and enough hot dish water to warm the mixture. At night I simply mix the slop with the well water, and I hope to bring them through

the winter in a more thrifty and growing condition.

I have been breeding sows now since December 8th, which will bring the pigs from March 31st on, and this I consider late enough for spring pigs, for the earlier pigs are the ones you can get on the market without feeding so far into the winter, which is a good point to consider. I think that a hog raiser who has a good, warm hog-house should start his pigs the last of February and September for two litters a year.

Marion county, Kan. T. S. Curd.

#### Winter Wire Stretching.

To the Editor of The Homestead:

I desire to offer a little criticism to a communication which recently appeared in your paper on this subject. It was signed "Subscriber," and I think it contained erroneous teaching. "Subscriber" must live in a country where the climate acts the very opposite from what it does in ours. I have always observed, and it is a well-known fact, that heat expands steel and cold contracts it, so that if you stretch wire in the winter, instead of pulling the corner post out next summer, the chances are that it will be too slack. It is not my thought to prolong unduly a discussion because there is only one side to this question, and, as said before, "Subscriber" is wrong when he states that heat contracts and cold expands it. A Nebraskan.

## Farm Furrows

Turned by a Practical Farmer.

The frost strikes deep in well drained soil.

Pardon us for asking such a commonplace question, but how are your New Year's resolutions?

If the phrases "how lovely" and "how sweet" were extracted from the vocabulary of some girls there would be mighty little left.

Isn't it peculiar that some men will drive all the way to town and back for a close shave, at what is often more properly called a butcher than a barber shop?

Did you ever try writing a Furrow? If you never did, try it and send the result of your effort to the Furrows man. If it needs harrowing we'll give it a "double stroke" if necessary.

The best resolution one can make for the new year is that you will be less grouchy or less irritable than you were last year. It is much easier to grow in grouchiness than it is to grow in grace.

A bulletin from the department of agriculture discusses the injurious effect of cottonseed meal when fed to hogs. According to this bulletin hogs die with "a severe hemorrhagic gastro-enteritis, congestion of the liver with parenchymatous degeneration, edema of the lungs, cloudy swelling of the kidneys, and oftentimes a well-marked dropsical effusion of the pectoral and peritoneal cavities, and occasionally in the pericardial sac." It is little wonder that they died.

About the best investment that we could imagine any grain grower making just now is to buy a good fanning mill. Don't compromise with light and dirty oat kernels in the seed oats. Make the seed oats clean and as free from mustard and other foul stuff as any fanning mill can make them. You can stand a little strenuous exercise these days, so put on enough wind to blow over everything but the very best and heavy grains.

It is a mighty good policy to always have some floating capital on hand. Many men have gone bankrupt in their business operations just because they didn't have a little cash on hand to help them out of a pinch. There is no reason why the farmer, as well as any other business man, shouldn't be thus prepared to tide over a period when receipts run low. There is nothing that makes us more uneasy than to see our reserve fund running low. Plan to have something coming in every month.

The other day we took the boys out to the eight bee hives in an out-of-way corner of the orchard and came back with our hands full of the finest honey we ever saw. In a way, we had forgotten all about those few hives during the summer, except when some of us got stung. However, we will very likely think of them often in the next few months to come when we will have the finest kind of honey on the table every day. We often wonder why more farmers do not keep bees. They require a little attention during the swarming

# Why we make 50,000 miles of fence every month.

Every year since wire fence came into use, we have made and sold more wire fence than all other fence-makers combined. With the largest output at all times during the remarkable growth of the wire fence industry, we always "bid highest" for fence brains.

These master minds of steel-wire-making have never stopped working on wire-fence improvements.

And we make 50,000 miles of fence every month—enough to go twice around the world—because the discerning American farmer demands that much

## AMERICAN FENCE

That's over 80% of all the wire fence sold, which means that four out of five farmers demand American Fence.

Now, four out of five American farmers are not *wrong* on this fence question.

They know that whenever they need fence, they can always be sure that American Fence is the best fence ever produced up to that hour and minute.

Recent improvements in galvanizing make American Fence longer lived, make it cost you less per rod per year's wear, though the price remains the same.

**NOTE**—I want to send you the combination key-ring, shown in the corner, with our compliments, as a continual reminder of American Fence. We register your name and number on our books, and return keys, without cost, if found and sent us.

Spokes nailed to the hub. If they work loose, your money back. Don't buy wheels nor wagon until you read our book. It may save you many dollars and it's free.

**ELECTRIC WHEEL CO.,**  
Box 43 Quinoy, Ills.

season, but that is repaid over and over again by the fine supply of honey that may be secured in the fall of the year.

The day will never dawn when there will be no such thing as "fashion" in pedigree. It is generally founded on the wisdom of intermingling the right kind of blood lines, but too often it goes to seed.

If there were as much study put into the pedigree of the animal "man" as there is in the case of lower animals, the race would improve faster. Of course it is the other fellow that keeps it from improving and not us.

We used to put down our sausage in the old-fashioned way, that is, by working the sausage meat into little pats, frying them out and packing them away in lard. That is an everlastingly slow way now in comparison to our present plan. Now we simply pack the meat in sound earthen jars and bake it in the oven for five hours. The heat must, of course, be moderate, as it is much better to bake it slowly. After taking

from the oven we weight the meat down so as to let the grease cover it. When wanted for the table just slice out and heat.

Every solitary toy that I got my eyes on at holiday time was different from those in vogue when I was a boy. Still, I don't believe the youngsters are a bit better satisfied with what they have than we were with what we had fifty years ago.

"Keeping the Fences Tight" would make a good text for a sermon to many farm congregations. If there is anything that is aggravating it is to chase after stock that has broken through fences. Such a thing is sure to happen when you are the least prepared for it.

Many a person carries on his business year after year without realizing the advantage there is in advertising. If you have a few pure-bred chickens, hogs, cattle, horses, corn or anything else produced on the farm that is in demand, you would be surprised how it would increase your market and your profits to

advertise in a paper like The Homestead.

In scriptural times the Wise Men lived in the East, but that's not true today. Farmers of the West are wiser in their day and generation than those in the East—they know enough not to deplete the fertility supply in their soils.

Moldy corn fodder may be eaten by stock if they don't have anything else to satisfy their appetites. Nevertheless that does not mean that such fodder is as good as bright fodder. If you have several ricks of good, bright fodder on hand you can feel that you are blessed a great deal more than some of your neighbors.

## THE MATTER OF THRIFT IN FARM ANIMALS.

There are a number of what might be called open secrets in the business of producing live stock at a profit. If any man will take the time to examine the methods of one who has made a conspicuous success of any kind of live stock, he will find that the methods of feeding are such as to contribute in the greatest possible degree to the "thrift" of animals under his charge. Of course all men endeavor to keep their animals thrifty and healthy, but all do not employ methods that accomplish this end.

A prominent swine breeder recently said that the feed and care of a sow during the two months previous to farrowing were of more importance to her litter than the care during the first two months after. He expressed the belief, based on long experience, that the secret of raising strong, healthy pigs was found in having the sows gaining at the time they are bred and running them along so that they are making a little gain every day until the time of farrowing. Of course this does not mean simply a gain in fat, but a gain in flesh, contributed to by the feeding of flesh-forming constituents. In the case of a sow there are a great many kinds of food that will answer the purpose well, but on general principles it may be said that a variety is always advisable. The small grains are better adapted to the needs of a brood sow than corn, though of course a little corn can be fed daily during the winter. The point is that the brood animal must be built up so that she is not only in an ideal state of health, but also that she be made to carry a considerable degree of good, firm flesh.

The same identical doctrine applies to cows. If one will take a cow that has been milking heavily all summer and fall and turn her out in the stalk field and give her no special attention during the winter, such a cow cannot give her calf the kind of a start that it needs in order to make the right kind of growth. If you want your beef calves to weigh 800 or 900 pounds at twelve month old they must be given the right kind of a start before they are born, and the feeding of the cow has much to do with this start.

As is the case of sows, corn is not enough for the cow. She need not be fed heavily, but two or three pounds of bran and the same quantity of oats daily, together with a little corn, will contribute much to her "thrift," and this in turn will lead to results commonly attributed to luck.

There is no better way to keep abortion out of the herd than to handle the cows in such a way that they are gaining in flesh between the time they are dried up and the freshening date. Of course this will not prevent loss in case of herd contamination, but under ordinary circumstances there will be very little trouble

if each individual in the herd is cared for in the manner described. Every sensible herdsman knows by the character of the coat of the animals he is feeding whether they are thrifty or not. They may of course be loaded with fat and yet be unthrifty. Indeed, it is not uncommon to find cows of any of the beef breeds fairly loaded down with fat and at the same time their hair will be starey and their skin harsh.

If a man has stock that is worth raising on high-priced land it should not be considered too much trouble to occasionally give the cows, mares or sows a good warm feed during the winter, and this mixed with a little bran and oil meal in case any of them get out of condition. A mixture of this kind fed two or three times a week will sometimes do wonders in bringing animals into condition. Oats or barley make an excellent boiled ration, each being palatable and each contributing much more than corn to the building up of the flesh constituents of the body. Then, it means a change which generally sharpens the appetite, and this in itself is often most desirable.

To those of our readers who have had a little bad luck in the past at farrowing time in the spring we would offer one word of advice. From this time on cut down the corn ration; feed the cows such grain as oats or barley and so much the better if a little small wheat or rye is obtainable. It is not necessary that the grain be ground, though if it is ground and fed in the form of a warm slop at least once a day, so much the better. In addition to these grains, feed about 5 per cent of oil meal or tankage daily. In other words, for every hundred pounds of the grain used use five pounds of either one of these by-products. Keep the sows gaining, but never feed them all they will eat. If they have access to plenty of water, and especially if ashes or coal slack and salt are available, the chances are twenty to one that there will not be a single sow in the herd that will have any difficulty at farrowing time, they will not be cross and they will not eat their pigs. Of course it goes without saying that the sows, especially during fine weather, should be shut away from their sleeping quarters during a greater part of the day, thus compelling them to take exercise.

## EXHIBITING LIVE STOCK AT SHOWS.

Elsewhere in this issue will be found a contribution from Wayne Dinsmore, of the Iowa Experiment Station, who writes under the topic "Should the Small Breeder Exhibit at Live Stock Shows?" Mr. Dinsmore makes out a good case in favor of the practice of showing.

Of course there are two sides to the question, as we have successful men conducting extensive breeding operations who have never made a practice of showing, and, on the other hand, most of our present-day showmen have made a success of their business.

It is doubtful if any one experience will do so much to sharpen a man's judgment as to take his own stock out and stand it beside the other fellow's. It will show you quicker than anything else whether the type you are working on is right or not. Then, of course, there is the matter of fitting, and it must be borne in mind that at our best shows no man can expect to win with animals that are not well fitted. This does not mean that they must be carried so far as to ruin them for breeding purposes, but it simply means that they must be built up in fat and in flesh so as to appeal to the eye of the visitor and the judge to the greatest possible advantage. No man need expect to start in and win from the word "go," and there is no better place to start showing than one's county fair. There is plenty of time later to take part in state fairs, interstate fairs, national and international expositions.

## Short-horns in 1906.

The year 1906 has been one of steady progress in the breeding of pure-bred Short-horn cattle. It has not been attended by any speculative excitement or boom, but seems to be based upon a steady, solid basis of legitimate profit. Both the years 1905 and 1906 have been marked by an unusual increase in the number of new breeders entering the ranks and starting herds. Along with the wonderful change going on in the Northwest, where its immense valleys are being converted into great stock farms, and the open range for breeding cattle more or less given up, the increase

## IT IS OUR IDEA

in placing this advertisement to interest farmers in buying Drain Tile during the winter months, so that they can be hauled while roads are smooth and hard, and while it is possible to drive onto wet fields and string the tile along proposed lines of drainage.

By buying now you can avoid any delays in shipping and avoid handling tile when farm work is pressing you next spring. If tile is on the ground they can be put in as soon as the frost is out of the ground, thus giving you a much longer time to work the land before seeding.

### OUR DRAIN TILE ARE HARD BURNED

and can safely be exposed in this way to snow and ice, as they are not damaged in any way by weather conditions.

We have a large stock of all sizes, so that we can ship promptly and select grades carefully. We offer special terms on winter shipments and solicit your correspondence. Our book, "Hints on Tile Drainage," will be gladly mailed you free of charge.

## CANCER OF THE BREAST CURED

How  
Mrs. Ollie Phillips'  
Life was Saved

ST. CHARLES, IOWA, Nov. 15, '06.

DR. L. T. LEACH,  
Indianapolis, Ind.  
Dear Doctor: I am glad to write you that I am cured of the terrible cancer of the breast. When I first applied to you for treatment I was too weak to walk without assistance. You ought to see me now. I can step around as well as anyone. People look at me with wonder, and I never fail to give you the credit for it. Words cannot express my heartfelt thanks to you.

Yours gratefully,  
OLLIE M. PHILLIPS.

CANCEROL has proved its merit in the treatment of cancer. It is not in an experimental stage. Records of undisputed cures of cancer in nearly every part of the body are contained in Dr. Leach's new 100 page book. This book also tells the cause of cancer and instructs in the care of the patient; tells what to do in case of bleeding, pain, odor, etc. A valuable guide in the treatment of any case. A copy of this valuable

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

## LAW QUESTIONS CONSIDERED.

## HUSBAND AND WIFE—KANSAS.

A Subscriber, Mediapolis, Iowa.—A man owning property in Kansas died there, leaving a widow, but no children. What portion of his property is the widow entitled to under the laws of Kansas?

Answer.—The widow is entitled to the whole estate.

## OBSTRUCTING STREETS.

Mrs. C. H. Tower, Corning, Iowa.—A is a widow living in her own house in town. B keeps a livery stable directly across the street from A's house. He runs carriages on A's side of the street up to her sidewalk and along the entire length of her lot, so close together that one cannot get from the road to the sidewalk. A requested B to not do this, as it spoiled her chances to sell the property. B informed the mayor of her complaint and the mayor ordered A into the house, saying that the streets belonged to the town, and she had no rights in the matter. She is a worthy woman and has not the means to prosecute the case. What can she do?

Answer.—If she has no means to prosecute a law suit she can have no remedy at law unless some friend comes to her assistance in the matter. There is a remedy. The livery man is guilty

of obstructing the streets, but to enforce a remedy Mrs. A will have to engage a lawyer to commence proceedings. Maybe some ambitious young attorney would be willing to help the poor woman out without a fee.

## RAILROAD FENCES—RUSSIAN THISTLES.

A Subscriber, Decatur, Iowa.—(1) Are railroad companies in Iowa required by law to fence their rights of way with a woven wire hog-tight fence? (2) What distance between posts does the law require in a railroad fence? (3) Are such companies required to mow or cut the grass and weeds on their rights of way?

Answer.—(1 and 2) They are not. They are required to construct fences consisting of five wires securely fastened to posts not more than twenty feet apart, the top wire to be fifty-four inches high; or five boards securely nailed to posts not more than eight feet apart, fifty-four inches high, or any other fence which is deemed to be equivalent to one of these by the fence viewers. (3) They are not. They are required to prevent the growth of Russian thistles upon their rights-of-way, depot grounds and other places controlled by them.

## BREACH OF CONTRACT.

An Iowa Subscriber.—Last March I hired a man to work for me on a farm for \$250. He began to work on the 29th of March, and continued until the 3d day of July at noon. I then gave him \$25 and allowed him to go to a neighboring town for a Fourth of July celebration. He was to return to work on the 5th day of July, but he did not return at all, and I was put to large expense in getting help in his place. I paid him \$41 in all. He claims to have received only \$35 and wants \$30 more, and has put his claim therefor in the hands of lawyers to collect. What rights have I in the matter?

Answer.—The man can recover from you what his work was actually worth, deducting therefrom two items, viz.: First, the \$41 you have paid him, and second, the amount of damage you have sustained on account of his not keeping his contract. If these two items amount to more than the actual value of his work he can recover nothing.

## INHERITANCE IN WISCONSIN.

A Subscriber, Calamus, Wis.—A husband and wife live in Colorado. They have no children. The wife owns land in Wisconsin. (1) In case the wife should die without a will what portion of her Wisconsin property would her husband get? (2) Suppose they had children, what portion would the husband get? (3) If a woman has a deed of property and by marrying changes her name, must the name in the deed be changed to correspond?

Answer.—(1) The husband would be entitled to all of the Wisconsin land. (2) In case the wife should die, leaving children, the surviving husband would be entitled to the use of all land in Wisconsin belonging to the wife so long as he should live. At his death the land would go to the children. (3) No. When she conveys it she will do so in the name she then claims, reciting in the deed her former name, marriage, etc.

## WORKING ON HOLIDAYS.

A Subscriber, Stockton, Ill.—If a man is hired by the month in this state to work on a farm, and nothing is said between parties concerning holidays, would he be required under his contract to work on such days, and if he did not do so would he have to make up for time lost?

Answer.—The law designating certain days as legal holidays has no application whatever to the relations between employer and employe, nor to any contract between them concerning labor. It applies to the presentment of bills, notes and checks for acceptance, payment, protest, etc., and to legal process, but not to labor, so that unless there be a custom or usage concerning such days so general and well understood throughout the community or farming district as to be implied as part of a labor contract, a man hired to work by the month must put in all of the working days, including holidays, and he cannot recover extra pay for working on such days, and if he omits to work on such days he must make up the time.

## JUDGMENT—NOTICE—DEEDS.

A Subscriber, Maxwell, Iowa.—(1) A gave a judgment note to C and C obtained judgment thereon. In order to keep the judgment alive C sued on it and served a personal notice on A. Suppose C has to sue a second time, must he have A served with notice again? (2) How long does a judgment hold before being outlawed? (3) Is a warranty deed acknowledged before a notary public good in any part of the state where it is executed? (4) How long does a deed of real estate remain good if not placed on record? (5) Is it a crime to give two separate deeds for the same piece of land?

Answer.—(1) He must have A served with notice of the suit. (2) Twenty years. (3) It is. (4) As between the parties—that is, the grantor and the grantee—it is good forever and a day, but as against third parties—for instance, subsequent purchasers for value without notice or incumbancers without notice—it is not good. (5) If the second deed was given with intent to

## WHY IT IS EASY

## ON THE HORSES

TO tell our customers why the Litchfield Spreader is easy on the horses is in one way easy for us to do and in another very hard.

It is an easy matter to enumerate dozens of valuable features of the Litchfield Spreader, most of them being exclusive with this machine. It is sometimes very hard, however, to get our readers to thoroughly understand that our advertisements are at least intended by us to be "all wool" and absolutely "full width." Owing to the rather unscrupulous statements made by many advertisers in this "modern" age, we don't always get credit for the "square deal" that we are trying to give in our advertising, just the same as we are giving in our sales.

The Litchfield Spreader is easy on the horses because the horses have been taken into consideration in designing this Modern Machine. The Litchfield Spreader uses the pole to which the horses are attached for pulling and guiding the machine. We have not, in order to save cost of construction, braced our front axle on the horses' necks. Please take particular note of this: We brace our front axle to the machine. This is done by bracing the bolster to the front of the frame, and the axle back to the center of the frame. This makes a perfectly rigid and exceedingly strong hitch. The pole swivels freely up and down with no load on the horses more than would be with an ordinary farm wagon. Compare this with other machines and think of your horses.

Our machine has six-inch, round-edge tires on the traction wheels, which will stay on top of soft ground where the old-fashioned four-inch, square-edged tires will sink many inches deep into the soil. This means a great saving in draft, and is of vital importance.

Please note the stocky, short, compact build of the Litchfield Spreader and compare it with those long, narrow machines where the load is many feet farther from the horses than on our machine. This means many pounds saving in draft.

Our adjustable two or three-horse hitch is, without doubt, one of the finest equalizing features that was ever put behind horses. It is theoretically and practically, absolutely perfect. There is no twisting of your horses or side swinging of the tongue with this kind of a hitch like you get with any of the so-called "equalizers" as furnished with all center pole vehicles for three-horse work.

We don't want your business if we can't get it on the merits of the Litchfield Spreader alone. Come and see us or write us and let us have a chance to talk with you. (To be continued.)

**\$4.00 to \$8.00  
Per Acre**

**That's What a Good Spreader  
Will Do if Used as it Should Be**

Write Us and  
Let Us Tell You  
How.

**There Are Several Kinds of  
Spreaders**

**All The Best ?**

**No Spreader is best, or even good, unless  
it has:—**

- An Oak Pole—not pine
- Oak Sills and frame—not pine or maple
- Wrought Iron Truss and Stay-ropes to keep the frame square
- Hickory Double-trees—not rock elm
- Malleable Fifth Wheel—not cast iron
- Double Oak Bolsters
- Wide Front Axle so wheels will track
- Front Axle set under the front end of the body so the load is equally balanced on front and rear axles
- Gear Wheels and Sprockets keyed on—not pinned on or fastened with set-screw only
- Heavy Wheels with big spokes—not light wheels with 1 1/2 or 2-in. spokes
- An Endless Apron—not a half apron
- A Hood and End Gate to keep the manure away from the beater while loading

**The Great Western Endless Apron Spreader  
has all of the above good features.**

**It is Made for the Man  
Who Wants the Best.**

There is no other "just as good" or nearly as good. Ask your dealer about the

**Great Western**

Don't let him sell you a substitute, that he says "is just as good."

The Great Western will cost you just a little more than any other, but for every dollar extra that it costs, you will get \$5.00 more in value. The difference in cost will be more than made up in repairs alone in a short time. Besides this, you will always have a machine that will be ready to do business. It won't be laid up for repairs just at the time that you want to use it.

We issue a book that will tell you when, how and where to spread manure; how to make from \$4.00 to \$8.00 more per acre from your farm than ever before. Write just these words on a postal card or in a letter. "Send me your book, Practical Experience with Barnyard Manures, and catalog No. 4538."

They will be mailed to you Free. Do it now before you haul your manure or prepare for another crop. Write us at any address below.

defraud somebody it would be a crime which in Iowa renders the person liable to be sent to the penitentiary for not more than three years, or fined not more than \$1,000 or imprisoned in county jail not longer than one year.

## HUSBAND AND WIFE—DESCENT.

A Subscriber, Hedrick, Iowa.—A husband and wife live in Iowa and own land which was bought with money of the husband, and the title is in his name. They have no children. Each one of them has brothers and sisters. If the husband should die first, who would be entitled to the land?

Answer.—The widow would get one-half of it, and the other half would go to the deceased husband's brothers and sisters, providing his parents are dead.

## DEED WITH RESTRICTIONS.

A Subscriber, Guilford, Kan.—A wished to start a town in Kansas in which no liquor could ever be sold. He set up a store on his farm and divided the farm into lots and sold them, giving deeds which were in the ordinary form, conveying fee simple title, except the habendum clause, which contained these words, viz.: "To have and to hold the same forever, for residence purposes and farming only." (1) B bought one of the lots. Can he put up a store building on it and sell goods? (2) A is dead. His heirs are of age and are willing that B should carry on a store on his lot. Can he obtain such a right from them?

Answers.—(1) He cannot. (2) If no one but B bought lots in the tract, then the heirs of A can grant B the right to put up a store building on his lot and sell goods there, but if others beside B have bought lots in the tract upon the same terms, then all owning property in the tract will have to grant B the right before he can use his lot for any other purpose than those limited in his deed. Grant of the right to him would have to be signed and acknowledged by the parties and recorded just like a deed.

## All Knowledge Summarized in One Great Work.

One of the great writers of France has said that "history teaches everything, even the future," and a more recent American writer has declared that to study history "is to familiarize ourselves with the whole realm of literature, science, art, philosophy, conquest, exploration, romance and human biography."

This being true, a complete history of the world from the remotest antiquity to the present day would be a summary of all knowledge; and to master such a work would be, in a real sense, a liberal education.

Unfortunately, however, most of the

The "Yellow Fellow" line Farm and Threshing Machinery.

great historical works of the past have dealt with a brief epoch of periods, so that many years of reading, covering numerous large separate works, were once necessary to give one a complete mastery of the world's history as a whole.

"Ridpath's History of the World" has supplied this long-felt want. This great work, charming as a delightful novel, yet historically accurate, embraces all history from the earliest days down to the present. All the fabled greatness of Egypt, Assyria, Babylonia; the more recent, but still remote wonders of Greece, Rome and Carthage; the marvels of medieval and modern times are unfolded with the skill of a master hand. Our own country, its colonization, its heroic revolution, its enthralling history as a republic, the growth of its possessions down even to the acquisition of Panama, its struggles over slavery, the tariff and other problems—all this is told, and in its true relation to all other events. The work—it embraces nine handsome volumes—is in every sense of the word complete. It is complete as a history and also as a review of science, art, literature, politics, war and peace. To follow Dr. Ridpath through its luminous pages is to acquire that eminent scholar's broad grasp of human progress in all its aspects.

The Homestead heartily commends this splendid work to its readers. We wish that it might have a place on every farmer's book shelves. It will prove a mine of instruction to any family wise and fortunate enough to secure it. It is published by the Western Newspaper Association, No. 204 Dearborn Street, Chicago, Ill., who make interesting announcements respecting it on the last page of this issue.

## HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

It is the aim of this department to publish hints that are in keeping with the season. In some cases this is not always practicable, for the simple reason that many devices and handy conveniences cannot be made on a farm on the spur of a moment. Many farmers have well equipped work shops in which they can work during the slack winter months making gates, hayracks, crates, etc., for the working season. We expect to run many such in these columns from now on, and would suggest that you clip or note any idea that appeals to you as being of value and send them in. There is nothing like being forehanded on the farm. That is our experience at least. We want nothing that is impractical to appear in these columns. We want our readers to feel that they can depend on the quality of material that appears here as being high grade. If you have in use any handy device or time or labor saving idea, send it in and we will give it our best attention in the hope that it will be a help to some one of our many good readers.

Mr. J. W. A., of Altus, Okla., writes in regard to a rope halter as follows: "I have seen several plans for making rope halters in your paper, but have never seen the true Texas halter described. Tie one end of a lasso around the horse's neck, throwing the other end on the ground, while with your right hand throw a half hitch in the rope far

enough from the horse's neck to easily place it over his nose. At the same time hold enough loop in your hand to pass it twice through the half hitch, having the half hitch twice as large as is necessary to pass over the nose. Now, have enough to pass over the ears for a head stall. After it is put on the horse, catch hold of the back part of the loop that goes around the nose and draw it back tight. Even if you have six inches, so much the better. Take a couple of half hitches on it with the rope and you have a halter as good as you could desire. It may require some study to master the art of making this kind of a halter. However, when once you know how it will be of great value to you. The halter can be taken off and hung up as any halter."

Those who have pulled many staples, especially out of hard wood, will undoubtedly appreciate the device offered by Mr. H. E. Hauschen, of Palo Alto county, Iowa. It is simply a strong piece of steel in the shape of a file. The point is inserted under the staple and with a little prying the obstinate piece of steel can be removed. If the staple puller is properly tempered by the blacksmith it will stand any amount of strain and last indefinitely, besides it costs one-fifth the price of a patent staple puller. Another idea offered is a swill mixer, which is nothing more nor less than a garden hoe. Those who use the common stiek or paddle will find this idea quite an improvement over the old way.

In response to many inquiries of the past season regarding a breeding crate we print a cut of one which has been in use on the farm of Mr. B. P. Whittington, Dallas county, Iowa. Simplicity and efficiency are the two main points of this crate as will be noted. The front

doubted; however, a trial will convince most that such is not the case.

Those who find difficulty in driving hogs from pen to pen or in alleyways will find a very good idea in a suggestion sent in by Mr. J. M. A., of Leland, Iowa. A bottomless crate is placed over

A BREEDING CRATE.

end of some may be made by a sliding door on the crate or formed by placing the end against a door of one of the pens which is opened to let the sow pass out. A small movable platform is made to fit in the bed of the crate at the rear, while the length of the box is adjusted by placing the cross rod in different holes. When to be used the platform and rod is removed and replaced after the animal has entered. At first glance the efficiency of the crate may be

the porker which confines his roaming, and with one man at each end of the crate the movements of the hog can be easily guided. Another plan which is still more simple is to use a bushel basket, following the animal closely so that whenever he turns to go your way you can hold the basket in a position that he will run right into it, and the inevitable result is that he will stop as quick as his head is stuck in the basket. Often by pushing on the basket the ani-

Peter Sterling 63535, considered the greatest breeding boar ever sired by Chief Tecumseh 3d. His sons have always commanded the highest prices, and were sought after by the very best breeders. He will be sold in the closing out sale of Thos. F. Miller, Fullerton, Neb., January 25th, together with a grand lot of his daughters, some of which have never been offered for sale before. Peter Sterling is the greatest living son of Chief Tecumseh 3d today, and he should go to some good herd.

# IOWA STOCK FOOD

## FREE!

To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing.

Zealand, Iowa, July 13, 1906.

Gentlemen:—

I purchased some of the Iowa Worm Powder last February and I don't think I ever made a better investment. The Iowa Worm Powder can be depended upon. I had some of it left that I fed to my spring pigs and it surely done the business.

I gave your Mr. Deal an order today for some more of the Worm Powder, as I want it on hand. An occasional feed of it keeps the worms from accumulating in my pigs. Feeding to prevent sickness heats curing after pigs are sick. Most of the pig losses are due to worms and the Iowa Worm Powder is sure death to worms.

Truly yours,

Alex. Norman.

Address Department A.

mal can be backed a considerable distance to the exact place where he is intended to go. If you have never tried this plan, just get out your bushel basket next time you have a hog to drive and see what little trouble you will experience in accomplishing your work.

## Stock Food Recommended by an Eminent Authority.

Professor Thomas Shaw has this to say in reference to stock foods: "They will always be found useful when properly made. The time will never come when intelligent feeders will cease to use them. The necessity for using them and the advantage therefrom will become greater as foods become increasingly dear. Whether it will be profitable to feed them will depend upon the necessity for using them and on their cost. My special desire, however, is to show that they have a place in the economy of intelligent feeding. The question of price must be fought out between buyer and seller."

With this endorsement from one of the foremost authorities on feeding in the country, it would seem that the value of feeding tonics, etc., is unquestionable; therefore, the only problem is at what price such foods cease to become profitable.

In Bulletin No. 106 issued by the Hatch Experiment Station they recommend the use of certain medicinal tonics to be given in one tablespoonful doses once a day for ten days, then omit for three days, then give ten days more. They estimate the cost of the tonics they recommend at twenty cents per pound.

Dr. Hess Stock Food, formulated by Dr. Hess, a regular graduate of medicine and also veterinary surgery, contains the best tonics known to science, together with the salts of iron which are the greatest known blood and tissue builders, the nitrates of sodium and potassium which assist in eliminating the poisonous waste material from the system, and laxatives which regulate the bowels.

This preparation is manufactured by Dr. Hess & Clark, Ashland, Ohio, and is sold on a written guarantee at five cents per pound in 100 pounds sacks, smaller quantities at a slight advance. At this price can anyone question the economy of feeding such a compound? It costs less than a penny a day to feed this preparation to a horse, cow or steer, and but three cents per month for the average hog. Consider how little additional increase in weight or milk is necessary to cover the cost of this preparation.

J. F. Dotzman, Clinton Stock Farm, Centralia, Ill., says: "I am feeding Dr. Hess Stock Food to my horses—three stallions: Hal-Gordon, pacer brother to Star Pointer; George Geisler, trotter, out of the best blood lineage in existence; Andrew Jackson, trotting bred coach horse, son of George Geisler, above. All three stallions in public service, stud. Also two work horses."

"I bought Dr. Hess Stock Food at Berger's Drug Store at Carlyle. I had never used any stock food before, but reading in Coleman's Rural World of Dr. Hess' professional knowledge, I purchased a sack of Dr. Hess Stock Food and fed it to five horses, and am almost surprised at its good results. Will keep it always on hand."

On page 5 we print a very fresh and readable "all wool and a yard wide" statement concerning the Spreader proposition as it is beginning to appeal to our best class of farmers.

WE WILL sell you a home in the city, or a farm in Cowley or adjoining counties, at exactly the list price furnished by owner. Franks, Page & Harris, Winfield, Kansas.

## The Week in Kansas.

The change to a different year brought different weather. Instead of the "Italian skies" spoken of in our last, the change has been to a semi-resemblance of a London fog. The days have been dark, cloudy, misty and dismal, the nights likewise. It seems to have come by way of payment for the allusion to an Italian sky. We'll fall by the wayside no more.

In all, just enough moisture has fallen to make the roads slippery and the feed lots and yards nasty. It has been enough to stop heavy load hauling on the roads, except as one is disposed to put on four

horses, and go anyway, cutting ruts that future travel will have to smooth down in the hard way. Again we say there should be some law that would have a tendency to keep heavy loaded wagons off the road when the grades are in a condition to be cut into ruts.

Cattle feeders are getting close run on corn, and to get more is proving a matter of price raising with some. We have heard of thirty-six and one-half cents being paid, but are not prepared to stand for the truth of the report. Thirty-five cents, however, is the standard price with the feeders in all parts of this section.

The "car famine" continues as it has

for weeks. Hundreds of tons of baled hay is near the railroads awaiting cars; but without the cars, it had as well be 10,000 miles from market, instead of less than 100. Many are now predicting a slump in prices as soon as lively shipping commences, but there is little chance in sight of lively shipping commencing, as cars to haul hay will be furnished in great numbers the last of all.

The ending of the old year and the beginning of another is the usual time for taking an inventory of the property on hand. Kansas starts the new year in much better shape than ever before. With a good general crop, on top of sev-

eral good crops, the people are becoming comfortably well fixed, and no longer are compelled to sell at low prices in order to get needed money. We of Kansas can truthfully say that this is prosperity.

There is promise of something better in the way of weather this evening. This afternoon the clouds lifted in the West, and now the sky has about cleared. While this is the season for winter, this finds us wishing for good weather. We do not figure, here in Kansas, that we have got to have so much winter weather, so look upon the good weather as so much gained.

Henry Hatch.  
Coffey Co., Kan., Jan. 2, 1907.

## Do Your Own Thinking

Just because someone tells you that some other Separator is as good as the "IOWA" is no reason why you should believe it. Letting other people do your thinking is too expensive. You cannot afford such luxuries. Investigate for yourself. Use your brains for your own benefit—they were given you for that purpose. If you do this you will discover that there is just one machine which takes out all the cream, and that is the "IOWA." The dairyman is fully entitled to all the profit there is, even to the last cent. He gets it only by using an

## OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### Profitable Dairying.

To the Editor of The Homestead:

Like every other great industry, progressive dairying is fast demonstrating the fact that only those who familiarize themselves with each detail pertaining to their vocation succeed. It is often the dairy farmer's unwillingness to face his own errors that stand between him and success. He does not like to give old customs for new, but prefers to trudge along in the same old track rather than take the trouble to familiarize himself with new methods and apply them in his business. Often we see a farmer who realizes from sixty to seventy dollars a year from each cow in his herd, while his neighbor receives but little more than half that amount. The conditions of soil and climate are practically the same in both cases, yet one farmer becomes richer, while the other grows poorer. You may wonder why this is, but the reason is easy enough to understand. One exercises a wider range of knowledge in the management and is determined to have the best that study and experience can give, the other is content to take whatever comes so long as he does not have to think for it. Dairying has been and is bringing many benefits to the American farmer. It is enriching his soil, rendering it more productive and thereby adding to the money value of his farm. It is a plain fact that the basis of improved dairying is selection of cows. Every farmer who is engaged in or expects to be engaged in dairying must remember that no matter how well fortified he may be against the difficulties with which the dairy farmer must contend, if his cows are of an inferior grade much of his labor is thrown away. It would be a great advantage to a community if the farmers could come together and decide on some breed that would be adapted to their needs, then co-operate in the purchase of pure-bred sires for breeding their herds.

The old practice of having cows freshen in the spring and go dry in the fall must give way to better methods. It has been proven that the best way of having more milk is by having a cow freshen in the fall, rather than any other time in the year. A cow naturally begins to fall off in flow when six to seven months in lactation. So a cow coming in in the fall or early winter reaches this condition when pastures are fresh and the feed good. This counteracts the natural tendency, and through June and July she will hold her own with the cow fresh in the spring. The fall fresh cow is ready to begin to dry off as she reaches the dry weather, short pasture and flies of August and September. The cow fresh in the spring reaches this period at the same time that nature tends to diminish the flow. It is almost impossible to keep up her flow, and if the flow of milk is diminished for three or four weeks it cannot be fully restored until she is again fresh. Most farmers have more time to care for their cows during the winter months, and are by this method enabled to hire a man for twelve months in the year instead of eight or nine.

To succeed in this system the farmer must have a supply of succulent feed, either roots or silage, and I will say right here that in regions where alfalfa can be grown it is one of the most economical of dairy foods. Its yield is three to six tons to the acre, and where favorable conditions exist I have seen it yield seven and eight tons to the acre. Oats and peas combined also make a profitable crop, and the importance of corn silage as a feed for dairy cows cannot be over-estimated. Considering that corn is the staple crop grown in the dairy district of the central West, it is the best and most economical feed for either fat or milk production.

Wm. Sorensen.

Howard county, Neb.

### A Word for the Hand Separator.

To the Editor of The Homestead:

In a recent issue of your paper Professor McKay, of Iowa, takes the dairy farmer of hand separator ideas to task for the cause of deterioration of the butter quality in the Hawkeye state. The quality of our butter is no poorer today than it was a few years ago.

# STRENGTH

**DURABILITY**

**SIMPLICITY**

no other separator so strongly built, or so simple in construction.

## Sharples Tubular Cream Separators

get all the cream, have low supply can, are easy to run, easy to clean, because there is only one little piece in the bowl to cleanse after each running, and the machine oils itself. It combines Utility, Simplicity and Durability. A glance at the pie-plate construction of most separators will give you a fair idea of what we mean by "simple construction" and "strength." For full information about the Sharples Tubular write for booklet E. 121

Mr. R. Carpenter, Davenport, Wash., says "Having used a Sharples Cream Separator over sixteen years can say it is just fine."

**THE SHARPLES SEPARATOR CO.**  
Toronto, Can. WEST CHESTER, PA. Chicago, Ill.

## THE DAIRY QUEEN

THE CREAM SEPARATOR THAT SUITS ALL.

The Dairy Queen is as near perfection as can be reached in cream separators. It fills every requirement, its low and large supply can, its simple and easy bowl to clean, its light running and close skimming is just what you have been wanting. It never gets out of order, it's always ready to skim, and leaves the cream in perfect condition.

### You Can Try It Before You Buy.

The Dairy Queen is sold on guarantee and free trial. We have all confidence and know it is right or we could not offer them this way. We only want a chance to prove this to you, that the Dairy Queen is the most convenient, easiest to operate and most durable separator on the market. Ask your dealer about it or send for free catalog.

Address, E. R. Bailey, Clarinda, Iowa, or  
**DAIRY QUEEN MFG. CO., FLORA, IND.**

Buttermakers today know more about the work than they did a few years back. All have either taken a short course at some dairy school or served as apprentice under a competent butter maker, and some of these have had the benefit of both. Why should they not be competent to do the work assigned them?

Every creamery or its directors should give the maker the right to reject all milk and cream that will not make a first-class product. There are some people who see in the farm separator a bugaboo. To the farm separator they lay all the ills of the dairy product—butter. Now, how long will it be before the wise and learned men will say that the "gammel ost" of our ancestors are losing ground on account of the farm separator! Well, just listen!

The writer has used a separator the last four years and has just words of praise to say in its behalf. Once or twice a day the milk is separated while it still retains the animal heat, the skimmed milk fed to calves and small pigs and the cream delivered to the factory every day—not once or twice a week, but every day. And such is the product of the factory that the butter-maker was one of those who captured a medal at the St. Louis Exposition. He got it because of the quality of the goods.

The little farm separator has come to stay, but its coming will have its perplexities the same as the factory separator had in its introduction. The writer was the first secretary of the local creamery and with the board the question arose as to whether it should be a gathered cream or milk factory, and milk won. It was a new thing; some had never delivered whole milk before; our patrons needed instruction in taking care of the milk and were encouraged to bring it every day. Some thought this was superfluous and now we have some who take the same stand

## The "DEAN" Ear Corn Slicer

Any Farmer or Cattle Raiser should appreciate the advantage of slicing or chopping ear corn for stock. The health of all animals requires it. Feeder today know that grain should be mixed with "roughness." The cob is the best mixture for calves and steers. "The Dean" Slicer soon saves its price in cob feed alone. Also saves time. Chops ears in 1/2 to 2 1/2 inch slices and cuts from 30 to 40 bushels an hour. Calves thrive on the small slicing. It's so easily geared that even a boy can run it or any power can be attached. Elevator attachment to bin or wagon. Prices and terms very reasonable. Write today, for your stock's sake.

**Enterprise Wind Mill Co., 24 Main St., Sandwich, Ill.**

when we change from whole milk to hand separator cream. They do not think it necessary to deliver the cream every day; they think cream is cream and ought to have the same pay, as all goes into the same vat. The result one can imagine.

Give the farm separator its proper care and you will have a staunch friend; instead of hauling 500 pounds to the factory, you only take seventy-five more or less. Your skimmed milk is of perfectly good quality and the calves will prove it by being sleek and fine; lousy, healthy fellows that it will be a pride to show. Gust Reyerson. Marshall County, Iowa.

### A Few Facts About Butter-Making.

To the Editor of The Homestead:

There are two kinds of butter, good butter and poor butter. The former is made out of good cream and the latter out of poor cream. Now, good cream can only result when it is kept in a cool place until you begin ripening it for churning. In cold weather if your cream does not ripen as it should, add a small amount of buttermilk from your last

**WANTED** A thoroughly practical farmer capable of taking charge of 500 acre stock and grain farm. Must thoroughly understand hog raising and cattle feeding. Address with references Box 302, Marshalltown, Iowa.

churning. Cream should not be more than three days old and no fresh cream should be added later than twenty-four hours before churning.

No amount of doctoring will make good butter out of a poor cream. You may salt it and do what you please but nothing in the world will bring back that sweet desirable flavor. A good butter-maker knows when the lid is taken off the churn whether the butter will be good or not, because the smell of the cream is an accurate index to the character of the product that will come from it.

It goes without saying that in order to make good butter cleanliness should characterize the work at every step. The churn should be sweet smelling before it is used, and of course in order to keep it in this condition it should be thoroughly washed immediately after it is used and the lid should not be put on until it is aired and dried.

The churn should be stopped when butter is in granular form, and the butter-milk should be drawn off and cold water added to wash out all the butter-milk. It is much easier to do the washing when the butter is in this condition than when it is a solid chunk. Indeed, it is impossible to work out butter-milk from a big ball of butter without injuring the grain.

It requires about a cupful of salt for every five pounds of butter, though of course the market determines this to some extent. You will find that salt tends to keep butter in good condition. Butter in the natural state without salt is practically tasteless, or it has what one would define as a flat, sweet taste. The addition of salt brings out the delicate butter flavor.

Never put good butter in an ice box or in a cupboard with other victuals, for it takes on flavors very readily and will soon be off in taste. I regret exceedingly that our grocerymen are obliged to pay practically the same price for poor as they do for good butter. It would seem to be practicable to pay the per-

son who makes good butter a reasonable price for it and, on the other hand, give a lower price for a product of lower grade. This would educate producers more quickly than anything else that I can think of. Indeed, until the day arrives when those who take pains to comply with the correct principles of good butter-making can be paid for their skill we cannot expect a high-class product. M. Peters.

Polk County, Iowa.

#### CORN-AND-COB MEAL FOR DAIRY COWS.

An experiment at the New Jersey Station conducted for the purpose of comparing the feeding value of corn-and-cob meal with corn fed in the ear to dairy cows gave results favorable to the grinding of the corn. One cow fed for a period of twelve days on corn-and-cob meal and then twelve days on ear corn gave 45.2 pounds of milk more during the time she was fed the corn-and-cob meal. In this instance 144 pounds of corn-and-cob meal gave an increase of forty-five pounds of milk over the same amount of ear corn. At one cent and a half a pound this makes a difference in the value of the ration of sixty-seven and a half cents. Carrying the matter one step further, we would find that on this basis the feeding value of one ton of corn-and-cob meal would be \$9.38 more than one ton of ear corn. Valuing the feeds at one cent per pound, the difference would be \$6.25 on a ton.

These results are quite striking and yet it needs no experiment to teach dairymen that it pays to grind grain, especially corn, and we have found that seventy pounds of corn-and-cob meal is equal in its feeding value to seventy pounds of pure corn meal. Not that the cob furnishes much nutriment, but it seems to act as a devisor in such a way as to increase the digestibility of grain. A mixture composed of equal parts corn-and-cob meal, ground oats and bran, if fed sensibly to a good dairy cow, will bring her to her maximum flow. The quantity to be fed depends a good deal on the cow, but this is a matter that can be left to the judgment of any sensible man.

**PILES CURED IN 6 TO 14 DAYS.**  
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

Another short story this issue. on page 5, is quite interesting and should be read. Look up the Litchfield advertisement.

The Des Moines Tanning Company, of Des Moines, Iowa, have made a business of tanning hides and manufacturing them into fur coats, robes, rugs, etc., for a number of years. Their business has increased quite rapidly, which is the best evidence that they are doing good work. They have been advertising patrons of ours for several years, and have done a good deal of business with our readers. The view given herewith is from a photograph, which brings out nicely their specialty, fur coats. Their special advertisement appears on page 20 and they ask Homestead readers who have hides of any kind they wish made into robes, to send a postal card request for their booklet. They are well equipped for doing work promptly and well and will take pleasure in taking good care of any work that our readers may send them.

## FREE! My Book About Curing DEAFNESS AND EYE DISEASES AT HOME

I have published a new 128 page book which tells of a method by which people who are willing to devote fifteen minutes of their time each day for a month or two, following my instructions, can cure themselves without leaving home or visiting a doctor. of Deafness, Head Noises, Catarrh of the Nose, Throat and Head; Catarracts of the eyes, Granulated lids, Sore eyes, Pterygiums, Films, Wild Hairs, Eye Strains or any weakness or disease of the eye, ear, nose or throat. This book gives the causes and symptoms of each disease. It tells you not only how to cure these diseases, but how to prevent blindness and deafness.

I want to place one of these books in every home in the United States. Write me a letter or a postal card and tell me your disease and you will receive this grand book and my opinion free of charge, and learn how people from every state in the United States are restoring their sight and hearing at home by this new method.

I want no money for this neither does it place you under any obligations to me whatever. I simply desire to show and prove to you how easy it is to get perfect sight and hearing by my method. Write to me today. Address

Blainville, Illinois

## LIFELONG CURES BY A TRUE SPECIALIST

J. BOYD, M. D.

Dr. Boyd's Pelvic methods are your greatest hope for a complete cure, if you are afflicted with either BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, HYDROCELE, NERVOUS DECLINE, PILES, FISTULA or any affection of the Kidneys, Bladder and Prostate. You are wasting money and endangering your health in treating with ordinary specialists. My systems of treatment have established their reliability by permanently curing cases that had been unsuccessfully treated by dozens of other physicians.

A SAFE CURE is what I will give you beyond doubt if your case is curable; if not, I will not accept your money and promise to do anything for you. The best reference I could give as to professional reliability is the many cured, satisfied patients I dismiss, and proves that my Pelvic Methods cure when others fail to even benefit.

Guarantee to Refund Money—No Chance to Lose if You Do Not Get Value Received.—My patients receive a written agreement that I shall return what they pay me for services if they do not receive a complete, permanent and satisfactory cure, and my guarantees are secured by a deposit of \$500 in the Century Savings Bank of Des Moines, Iowa. Consultation Free, Confidential and Invited, both at my office and by correspondence. My charges are reasonable and I make terms that enable my patients to conveniently pay me. Do not treat elsewhere until you have investigated my methods and terms. Office hours during week, 9 a. m. to 8 p. m. Sundays, 10 to 1. Address or call on

**FINE, LARGE MAMMOTH BRONZE TURKEYS** and Rouen Ducks. J. H. Howarth, Moulton, Iowa.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### TESTING FEEDING METHODS.

When Uncle Sam turns his attention to the poultry business, you may be sure there will be something doing. The old gentleman has been a good while getting interested in this branch of his great industries, but when he once is fully awake, look out for results.

In proof of this growing interest, a novel experiment station is being established at St. Denis, Maryland. There is to be an attempt to establish or rather develop a breed of non-setting, continuously laying hens. This hustling age has gotten ahead of nature, and the old-fashioned processes of broody hens are quite too slow for present day demands. The incubator is supplanting Biddy, who cannot hatch out chicks fast enough to meet the demand, or supply sufficient eggs if allowed to follow her natural instincts. So far, no breed of hen has been made to understand that laying eggs is the only work required of her, and that she cannot be excused from continuous duty along this line.

In many directions man's ingenuity has been able to beat Nature on her own ground, and the St. Denis Experiment Station is to see what can be done in this difficult field. Foods which are claimed to stimulate the laying instinct will be fed, and a number of different pens will be treated in as many different ways to attain this end, if possible. Seventy-five Plymouth Rocks have already been installed for the experiment. These will be divided into separate colonies with varying rations and methods of feeding. Some will be fed at stated intervals, while others will be provided with self-feeding hoppers. Dry feeding, wet mash, mixed grains, both cracked and whole will be tried. Broody hens will be subjected to processes of discipline to eradicate the sitting instinct, and those who refuse to fall in line will be cast out of the pens.

Trap-nests will be used to indicate the best layers, and only the eggs from these hens will be hatched in the incubators. In this way both heredity and artificial selection will aid in establishing the desired traits of non-sitting and constant laying. It will take several years and a number of generations to establish such a breed, but when once established, it will be of immense value to the poultry fraternity.

### USING THE WILD TURKEY.

New England, and Rhode Island in particular, has long been known as the great turkey region. Large crops of this king among American birds were raised here in years not long past, but disease has almost killed the industry, and the most of the turkeys are now raised in the middle West. The loss is a serious one, and scientific minds having the poultry interests of that section in charge, have been studying the problem in search of a solution. The "black-head" disease has proven a great obstacle, and the result has been almost fatal to the turkey industry. Prof. H. J. Wheeler, director of the Rhode Island Experiment Station, recommends the crossing of the wild turkey upon the domestic species. The claim is made that the result is a bird able to resist the dreaded "black-head" disease, to increase egg-laying capacity, and to produce a fowl better suited to the holiday market.

The great question is where to obtain the wild turkey. A hundred years ago a wild turkey could be bought for six cents. Now, the price has soared, until five dollars would scarcely buy a large specimen. In New England the wild bird is entirely extinct. We must look further west to find them, and even now, in spite of the government's effort to protect them, many are annually killed by "pot-hunters," so that there is serious danger that unless radical protection can be given, they will be entirely extinct in a few years.

It has been a query in many minds why the wild turkeys are able to rear so large a percentage of their young. No less an authority than the great Audubon asserts that the wild poult is really as tender and delicate as those of the domesticated species, and equally

sensitive to wet weather. But the wild mothers are wise in their generation, and in wet seasons feed their babies on the buds of a spice bush which has much the same effect upon them as quinine has upon the human family. This is certainly interesting, if true. If this plant can be identified, it would give opportunity for some valuable experimenting.

#### POINTERS.

—Messrs. Sandquist Bros., of Oakland, Neb., have some nice Black Langshan cockerels which they are offering for sale in their advertisement on this page.

—Mr. H. D. Rhine, of New Sharon, Iowa, has some Buff Plymouth Rocks and Black Langshan cockerels for sale, and in his advertisement on this page he is quoting prices on same.

—Mr. L. T. Shepard, proprietor of the Hillcrest Stock and Poultry Farm, of Manning, Iowa, has some pure-bred Black Langshan cockerels for sale. See his advertisement on this page.

—Mr. Joseph Kappes, Jr., of Ashton, Iowa, is offering cockerels, hens and pullets of the Single and Rose Comb White Leghorn and Black Langshan varieties for sale in his advertisement that appears on this page of The Homestead.

—Mr. E. E. Condit, of Newton, Iowa, has been a breeder of Light Brahma chickens exclusively for sixteen years. He now has some fine large cockerels for sale that are grand in shape and style. His advertisement appears on this page.

—Mr. Adam Kolb, of Thornton, Iowa, has some Mammoth Bronze turkeys for sale, the toms of which weigh from twenty-five pounds up. He also has White Plymouth Rock cockerels on which he is quoting prices in his advertisement on this page. He writes: "My Mammoth Bronze turkeys are of a very large strain and are nicely shaped and well marked. My White Plymouth Rock cockerels are strong, healthy birds and are pure white."

—In furnishing copy for her advertisement found on this page of The Homestead, Mrs. F. R. McLaughlin, of Manning, Iowa, writes: "I am able to offer my customers better

stock than ever before. My cockerels are fine, large, vigorous birds, all from high-scoring stock. I have a nice lot of cockerels scoring from 90 to 94 points, as well as a number of extra good unscored ones. I will spare only a limited number of hens and pullets. My Pekin ducks are extra large and I have both sexes for sale. I have been an exclusive breeder of Silver Laced Wyandottes for seventeen years and am able to furnish good birds at reasonable prices."

—Mrs. O. J. Early, of Bristow, Iowa, is offering for sale, scored and unscored hens, pullets and cockerels of the Fisher strain of White Plymouth Rocks in her advertisement that appears on this page of The Homestead. She will have eggs for sale in season.

—Mr. W. S. Russell, of Ottumwa, Iowa, is a well-known breeder of Barred Plymouth Rocks. In his advertisement that appears on this page he is quoting prices on cockerels. If wanting first-class stock the reader should write Mr. Russell at once in order to get the pick of his flock.

—The International Stock Food Company, of Minneapolis, Minn., have an advertisement of their Jewel incubator on page 15 of The Homestead. It will be to the interest of every breeder of poultry to read this advertisement, as the International Stock Food Company are making a very liberal offer.

—Mrs. F. H. Long, of Manning, Iowa, has an advertisement on this page in which she is offering Silver Laced Wyandotte cockerels for sale. In writing in regard to her stock she says: "My White Wyandotte cockerels are from birds scoring as high as 93 points and are large, well marked and have rose combs that are very low and well shaped."

—On this page of The Homestead appears the advertisement of Mr. A. C. Norris, of Grinnell, Iowa. In furnishing copy for the advertisement Mr. Norris writes: "My Barred Plymouth Rocks are better than ever this year. Mr. F. H. Shellabarger scored them December 3d and pronounced them very good. At the Montezuma, Iowa, Poultry Show, December 4th to 7th, I took first on cockerel 92½ and first on pullet 92½."

—We call attention to the advertisement of Mr. F. W. Mack, of Spencer, Iowa, who is offering Mammoth Bronze and White Holland turkeys, Barred and White Plymouth Rocks, Silver Laced and White Wyandottes, Rose and Single Comb Brown and White Leghorns, Light Brahmas, Buff Cochins, Houdans, Black Langshans, Black-tailed Japanese and White Cochins Bantams and geese for sale. His advertisement appears on this page.

—Mrs. Sarah F. McKeen, of Sac City, Iowa, in furnishing copy for her advertisement that appears on this page of The Homestead, writes: "I have some extra fine Black Langshan cockerels for sale. Last season's pen was headed by a 94½ point cockerel, weighing nine and one-half pounds. The cockerels that I am offering for sale have had the range of the farm. I breed Black Langshans exclusively. I will sell at the following prices: \$1.50 to \$2 for single birds; in lots of three, \$3 and \$5."

—We take pleasure this week in calling the attention of our readers to the new advertisement of Mr. Chas. Stuart, of Altoona, Iowa, which appears on this page of The Homestead. Mr. Stuart is offering prize-winning Mammoth Bronze turkeys scoring 95%

## HATCH ALL Incubators Will Hatch Your Eggs

It beats the hen every time in any climate. No experience needed, because its regulator never fails to control the heat. One hatch of early chicks will pay for both incubator and brooder. Freight prepaid. Guaranteed to work.

### OUR HOT WATER, EASY TO CLEAN, BROODER

Is just the thing for the farmer's wife. It stays right out in the cold back yard and keeps warm, too. As easy to clean as the top of your table. That is why it saves and raises the chicks.

Don't buy anybody's machine until you have read our new catalog. It is full of pictures and poultry talk and free to you. The finest thing out. Write now.

HEBRON INCUBATOR CO., HEBRON, NEB.

## MAKE GOOD MONEY IN POULTRY BUSINESS

Others are doing it. You can too with our big illustrated valuable book "Profitable Poultry." It tells how to breed, hatch, feed, grow and market—to make lots of money. When writing to advertisers please mention this paper.

### Indispensable To a Successful Farmer.

A perfect grain-cleaning, grading and separating machine is acknowledged by all successful farmers to be indispensable.

It has been proven by experiments in different parts of the country that the yield can be increased fully 20 per cent by sowing only the best of plump, healthy seed. The farmer also realizes a better price for cleaned grain, and there are hundreds of ways for a high-grade fanning mill to make money for the farmer who is looking for the greatest returns for his time and labor.

The illustration shown here represents the New Superior Fanning Mill, which is manufactured by the J. L. Owens Company, of Minneapolis, Minn., who, by the way, are the largest manufacturers of grain-cleaning machinery in the world.

The advantage claimed for the New Superior over the ordinary fanning mill, aside from the general construction, is the system employed in handling the grain, there being three distinct operations, each one of which can be regulated independently of the others, thereby giving this mill a far greater range of usefulness, and enable it to do much more perfect work than by any other system.

They have issued a little book entitled "How to Increase Your Profits," which contains a great deal of valuable information on grain raising, and gives a full description of this new, and really wonderful, machine.

Any of our readers who are interested in learning how to raise larger crops, which will sell at higher prices, should write at once to J. L. Owens Company, 614 Superior St., S.-E., Minneapolis, Minn., for this book. They send it free upon request.

## GREGORY'S SEEDS

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### Farm Groves.

Our populated western prairies would be very desolate indeed were it not for the groves that were planted by the pioneers who took that well-known advice and moved West, broke up the virgin soil, built a rude board shanty to live in and a stable banked up with straw and thatched with slough hay. All these early settlers had come from a forest region where wood was plentiful for all demands.

They set out mostly quickly-growing varieties, such as willow, cottonwood, soft maple and boxelder; also some black walnut, butternut, white ash and elm. Some groves were set entirely to Lombardy poplars, which were very good-looking when young, but the drought in the summer of 1894 wiped them all out. The wood of the Lombardy poplar is of very little value. In the past ten or twelve years the planting of farm groves has been entirely neglected for the reason that seventy-five and one hundred dollars an acre is too valuable to plant to timber from which the returns will not be realized for many years. But, nevertheless, a certain number of acres of each farm should be planted with trees. Let us say a forty-acre farm might have a grove of three acres; and an eighty-acre farm, five acres; a 120-acre farm, seven acres, and a 160-acre farm, nine or twelve acres. A farm grove should contain all those kinds of trees that will do well in that locality and planting close together will produce straight trees. For example, alternate a row of black walnut with a row of cottonwood and when the latter begins to crowd, cut them down and make them into firewood. There are a few black walnut groves in my neighborhood that were planted twenty-five to thirty years ago and the trunks two feet from the ground are ten to fourteen inches in diameter, although this variety grows faster in low or bottom lands than on uplands. The birches are another valuable addition to any grove. Their glistening white bark makes them very conspicuous.

A grove should have forest conditions; by this is meant that the leaves falling should remain and form a leaf mold which will act as a fertilizer, and hold moisture during severe winter weather. To accomplish this to a certain extent, low growing trees and shrubbery may be planted among the trees and near the outside, some evergreens, such as red cedars or the white spruce. These will break the force of the high winds and leave at least part of the leaves upon the ground. I would not think a grove was complete unless a few climbers were planted among the trees. The wild grape vine and the ampelopsis are quite well for this purpose; first, because it is the first to feed the birds with the grapes it may produce; and, second, it is a beautiful sight in fall when its leaves turn crimson. In speaking of the color of the leaves in autumn, the hard maple is one of the grandest of them all, but I find that very few are planted in the farm groves. The reason for this must be that the plants are not as easy to get as the soft maple.

To sum up the different varieties that may be grown with success on our prairie soil, I will mention the black walnut, butternut, white ash, elm, basswood or linden, shellbark hickory, bur oak, boxelder, wild black cherry, white birch, inclusive of the European and cut-leaved varieties, also the catalpa, cottonwood and willow. The cottonwood is not so much of a nuisance in the country as it is in the city, by reason of the cotton it scatters all over. I will also say that the mulberry is a good tree to plant. It is more of a bushy growth than a tree, but the fruit is well liked by the birds and thus your cherries will not be molested. The uses of farm groves are numerous; they add to the beauty of the landscape, by breaking the monotony of the prairie, furnishing wood for various uses and for fuel so we need not be dependent upon the coal trust. They shelter our premises from the cold northern blasts during winter and in summer when the thermometer is playing about the 100 degree mark, we linger in their cooling shade with a feeling of thankfulness to Him who in His

mercy gives us all good things.—(L. W. Hoffman, in Iowa Horticultural Report.)

At the meeting of the directors of the Short-horn Breeders' Association at Kansas City, last week appropriations for Hamline and Kansas City shows were made the same as last year, action on the International going over to another meeting.

### AWFUL ITCHING ON SCALP

Hair Finally Had to be Cut to Save Any—Scalp Now in Good Condition—Cured by Cuticura.

"I used the Cuticura Soap and Ointment for a diseased scalp, dandruff, and constant falling of hair. Finally I had to cut my hair to save any at all. Just at that time I read about the Cuticura Remedies. Once every week I shampooed my hair with the Cuticura Soap, and I used the Ointment twice a week. In two months' time my hair was long enough to do up in French twist. That is now five years ago and I have a lovely head of hair. The length is six inches below my waist line, my scalp is in very good condition, and no more dandruff or itching of the scalp. I used other remedies that were recommended to me as good, but with no results. Mrs. W. F. Griess, Clay Center, Neb., Oct. 23, 1905."

A GREAT ADVERTISING PROPOSITION—HOW A CHICAGO FIRM IS GIVING AWAY THOUSANDS OF DOLLARS' WORTH OF PREMIUMS DAILY.

\$1.50 FOR 100 SQUARE FEET STEEL ROOFING

Over a Million Square Feet at One-Third Reduction. Buy Your Roofing and Building Covering Direct from Us. We Save You Big Money

Our Steel Roofing is cheapest in price of all steel roofings. It is the most economical in the long run. It is the most durable. It withstands the elements better than any other kind. It is superior in every respect. Stronger, lasts longer, does not become soft in hot weather. Does not crack, dry or rot. Withstands winter storms. Does not soak up. Drains your roof perfectly. Makes it fire proof, lightning proof, water proof. Much cheaper than shingles. Lasts three times as long. Away ahead of slate. Does not break or crack. No tar or patented compounds. It is the ideal roof covering. Prepared roofings are expensive and not satisfactory. Steel roofing does not taint rain water. Makes your building cooler in summer and warmer in winter. Thousands of squares sold every month. Farmers everywhere using it for covering houses, barns, outbuildings of all kinds, storm sheds, poultry houses, hog sheds, etc. Just the thing for elevator siding, stores, churches and buildings of every sort. Easily laid. No special tools required. Hammer and nails, that's all. Absolutely new, fresh from our factory. All ready to put on when received. Can be laid over old roofs.

DAY BY DAY

Agricola

Some of my neighbors are buying gramophones, phonographs, graphophones, or whatever they may be called. They do this to please the children. Making home pleasant, making it the pleasantest place on earth, converting the isolated farm house into a concert hall by the investment of money in an instrument which will reproduce music of the best kind and as sung or played by masters of their art does not call for any argument in its favor.

And yet Agricola has none of this music at home. The family is musical and makes its own music, and chautauqua and lecture courses are patronized where the good performers can be heard. Yet there are some musicians who have performed for graphophone reproduction who never visit the West, and it is a rare treat to listen to their rendition of high grade music, and so I rejoice when I see a gramophone going into a farm home.

I habitually like things first hand—like to hear noted lecturers, noted musicians, politicians and statesmen, and agricultural professors, and I like to read original writings written for a special purpose and found in a special publication. I like to read the special departments of this journal, but have no time for plated agricultural matter, or syndicate sermons. They scatter too much and hit practically nothing.

What value, esteemed reader, would

Mrs. Miller

Makes a Fortune

Started a Few Years Ago with No Capital, and Now Employs Nearly One Hundred Clerks and Stenographers.

Until a few years ago Mrs. Cora B. Miller lived in a manner similar to that of thousands of other very poor women of the average small town and village. She now resides in her own palatial brown-stone residence, and is considered one of the most successful business women in the United States. Several years ago Mrs. Miller learned of a mild and simple preparation that cured herself and several friends of female weakness and piles. She was besieged by so many women needing the treatment that she decided to furnish it to those who might call for it. She started with only a few dollars capital, and the remedy, possessing true and wonderful merit, producing many cures when doctors and other remedies failed, the demand grew so rapidly she was several times compelled to seek larger quarters. She now occupies one of the city's largest office buildings, which she owns, and almost one hundred clerks and stenographers are required to assist in this great business.

Million Women Use It. More than a million women have used Mrs. Miller's Remedy, and no matter where you live, she can refer you to ladies in your own locality who can and will tell any sufferer that this marvelous remedy really cures women. Despite the fact that Mrs. Miller's business is very extensive, she is always willing to give aid and advice to every suffering woman who writes to her. She is a generous, good woman and has decided to give away to women who have never used her medicine \$10,000.00 worth absolutely FREE. Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 3365, Kokomo, Ind., and receive by mail (free of charge in plain wrapper) a 50-cent box of her marvelous medicine; also her valuable book, which every woman should have. Remember, this offer will not last long, for thousands and thousands of women who are suffering will take advantage of this generous means of getting cured. So if you are ailing do not suffer another day, but send your name and address to Mrs. Miller for the book and medicine before the \$10,000.00 worth is all gone.

you put on this paper if it were but a reprint and contained nothing original? Well, this is what a gramophone is—a reproduction, but when we can not have the original performance, the reproduction is our welcome recourse.

And yet few of us really originate. We reproduce, with an individuality in our reproduction. A new variety of plant or animal is originated and the type established, and then we go to work to reproduce it. Take our breeds of cattle, chickens, horses, swine, apples, grapes—yes, and our beautiful flowers. We reproduce and with delight.

But we do not reproduce literally. Our law is "Like produces like," but strictly speaking, it doesn't. If it did there would be no possibility of improvement. All would be dead uniformity. Like produces like—with a variation. This last part makes farming interesting and gives it a constant charm. We fix an ideal in our mind, select the specimen nearest to it which we can find, then reproduce it and watch the variation, selecting that which is nearer still to our ideal, and so we improve the product.

But what is improvement? That depends upon our aim. Do we wish our cows better for the dairy? Or do we wish them beefier? We can not face two ways and progress. We must look towards our ideal with constancy if we would approach it, and this generally takes us away from what some one else sets up as an ideal.

Some people admire hogs, and the number who enjoy looking at them this winter is unusually large. They are high in price and this well nigh throws a halo over the animal despised by Jews and Dowieites. There is a subconscious liking for what brings us profit. We may like some things which we ought to dislike.

Many young farmers and farmers' sons take the short winter agricultural course at the agricultural colleges. It helps them. They have a different look in their countenances. Intelligence shines out—it illuminates the pastures. They are better farmers and better neighbors ever after.

Each county now in Iowa has the opportunity to send some one free of tuition, the college making this offer through the county farmers' institute. It may be decided who gets the prize by a stock-judging contest, or a sweepstakes premium in a corn contest, or some other way wherein capability is manifest. This is a new thing which is good as well as new.

Bulletin No. 141 of the Wisconsin station says that the reason why farmers largely fail as raisers of good draft horses is that they are poor feeders of draft colts. The man who breeds draft stock and fails to develop it into a good draft stock is fooling away his time and missing good money.

And this applies the same to all other stock, and to all plants grown on the farm. Planting good seed and failing in the cultivation is fooling away time and opportunity, and missing good money.

It is easy to persuade yourself that one color of corn is better than another, but to prove it to your neighbor is a harder proposition.

I tried the experiment station method of saving seed corn last fall—tying it together in strings of ten ears and hanging it to rafters. I like it very much better than I had anticipated.

It is the loafer who concocts most of the schemes which will not work.

When an agent approaches you remember what agents have done to other people.

Graded schools are better for children

\$1.50 Per Square

is price for 100 square feet of our No. 16 grade Flat Semi-hardened Steel Roofing. Each sheet 24 inches wide and 24 inches long. Corrugated roofing like illustration, sheets 22 inches wide and 24 inches long, \$1.75. At 25 cents per square additional we will furnish sheets 6 and 8 feet long. We are headquarters for metal roofing, selling more direct to farmers than all others combined. We have built up an enormous business on steel roofing and siding because we have given prompt and correct service. Thousands of our steel roofs in constant use for years all over the country. Absolutely the longest lived and most practical roof covering made. Inexpensive. Sold in quantities to suit. We can fill your order promptly. Satisfaction guaranteed or money refunded. Dealers get from \$2.25 to \$3.00 per square. Factories add their profits. So do jobbers. You pay all. Save this per cent. Order direct from us. Send us estimate of material of any kind needed in the construction or improvement of your buildings. We can surely help you economize. We make shipments promptly and carefully. No shipments delayed from our end. We have the largest farmers' trade on roofing, siding and building materials in America. We quote lowest prices on roofing, siding eave troughs, down spoutings, etc. SHREWD BUYERS SEND US YOUR ORDERS.

Brick Siding, \$2.00

Just the right thing for stores, houses, churches, barns, hotels, etc. Why not fit up your old building by covering it with bright, fresh brick siding? Easily put on. Made of semi-hardened steel. Looks like brick. No special tools required. Prevents decay. Decreases fire liability. Improves appearance of premises. Adaptable for buildings of all kinds. We sell immense quantities. Gives thorough satisfaction. Comes in sheets 24x58 inches. Has all good points of steel roofing. Remember, you buy direct from our own mill. We are headquarters for brick siding.

Metal Ceilings, \$2.00

Fine steel beaded ceiling, \$2.00 per 100 square feet. Ideal ceiling for stores, offices, kitchens, restaurants, etc. No falling plaster. Always neat and attractive. Economical and lasting. Furnished ready to put up. No special tools required. Comes in sheets 24 inches by six and eight feet long. Also used for siding.

We Pay the Freight

to all points east of Colo., except Okla., Texas and Ind. Ter. To these points we pay the freight at 150 per square additional. To all points west of Kansas, we pay the freight at 500 per square additional. Satisfaction guaranteed or money refunded. We will send roofing, siding, ceiling, etc. to anyone answering this ad and mentioning this paper, O. O. D., with privilege of examination, if you will send us 25% of the amount of your order in cash; balance to be paid after material reaches your station. If not found as represented you do not have to take the shipment, and your deposit will be cheerfully refunded.

than mixed schools, and the same holds true with pigs, although "schools" is not the word to use. But big and little in one bunch means "petering out" for the small ones.

The seedless apple and the vineless potato are still good things to let alone. And so is the five-minute churn.

Among the many misfits in life two of the saddest are a deep man with a shallow education and a shallow man with a deep education.

Dried currants, such as are sold in our stores, are not grown in this country, neither are they currants, but small seedless raisins from Greece.

When Agricola was a small boy petroleum was not used as an illuminant, but was sold in the drug stores as medicine, under the name of Seneca Oil. The price was about one dollar a pint. If buttermilk were as expensive we should probably use it as a medicine.

Why cotton seed will kill hogs and alfalfa pasture is sometimes fatal to horses and mules, and in each case is limited in its bad effects to those animals, is a puzzle to the learned and the unlearned.

One kind of bran is too coarse for pigs, and since it is the only kind in market, give them middlings instead and the bran to something else.

The city penny-a-liners still mourn about the poor, tired farmers' wives who wear themselves out making butter. Well, there is a sure cure for that difficulty. It is the local creamery. It has been many years since farm woman in this part of the modern Eden have churned butter, even for the family table. Here and there some retired farmer with one or two cows milks them to keep from dying with ennui

DITTO'S

Latest Double Cut, Triple-Geared Ball-Bearing Feed Grinders

On Ten Days Trial—No Money In Advance.

If it does not grind at least 20% more ear-corn or other grain than any other two horse sweep mill made, send it back at my expense. Don't miss this offer. Ball-bearing throughout. Only 10 ft. sweep. Light draft. Grinding rings never touch each other—they last for years. Both grinders revolve, self-cleaning. Ask for New Catalogue.

G. M. Ditto, Box 12 Joliet, Ill.

and his wife churns the cream. The stores all keep creamery butter, with only an occasional dairy print for the few who wish to buy something cheaper. By the way, how small a pound of butter looks when it costs more than "thirty cents."

The Agricola homestead has something to which we "point with pride!" It is a drove of turkeys. They are large, fat, strong-boned, white in color, and whoever beats them must be a top-notch. They were started right and have kept themselves thrifty and steadily growing. One of the reasons for this is the fact that the parents were strong, healthy and fully matured.

There is another drove to which Agricola also points with pride. The same words and the same terms describe this except that instead of being a drove of white turkeys it is a drove of white hogs. Immature breeding stock means that the young will be "born short" in every thing, but susceptibility to disease.

When writing to advertisers please mention this paper.

## Before You Buy

Your Next Lot of Stock Food, do these Two Things:

- 1st—Examine several different kinds—smell them and taste them;
- 2nd—Read carefully the feeding directions and figure out how long a dollar's worth of each kind will last. You will find that

**Standard Stock Food**

looks better, smells better, tastes better and is better than any other, because it is richer, purer and more concentrated.

You will also find that because it is so much better, you need use but a very little of it at each feeding, so that a dollar's worth of it lasts longer, goes farther and does more good than a dollar's worth of any other. Not only the best, but also costs you the least. Sold on our square-deal, money-back guaranty.

### Go to Your Dealer

and ask him to supply you. If he cannot, do not take a substitute but send to us direct.

We will ship immediately and protect you with our square-deal, money-back guaranty.

### Free to You.

Our big book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy it equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

## VETERINARY MATTERS.

**PROFESSIONAL** Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### WOUND SCARS.

I have a five-year-old black mare which I sweeneyed this fall and in doctoring her I blistered her very badly, so badly that it took the hair off, together with the first layer of skin, where she was blistered. What can I do to restore the hair? Will it ever grow again?

We fear that the hair will not grow again, but the only chance will be to keep the skin soft with daily applications of a little lanolin. It is the corrosive sublimate and such irritants in nostrums commonly used for blistering purposes that causes the trouble.

#### DESTROYING WORMS.

Please tell me when turpentine and venetian red is given to hogs to expel worms how much to give to a bunch of 100, average weight being 150 pounds? How often should this be given and should it be followed by a purgative?

We know nothing about venetian red for worms but turpentine is an excellent remedy and is given at the rate of one teaspoonful for each eighty pounds live weight three mornings in succession being mixed in the slop. It may be repeated the following week and need not be followed by a purgative although many prefer to use one and usually employ calomel or epsom salts for the purpose.

#### IMMUNE HOGS.

(1) Would male and female hogs that have had the hog cholera make good breeders and would their pigs be immune from cholera? (2) A great many western cattle have been shipped into our neighborhood and have polluted our country with pink eye. It seems to be worse among calves. It runs them down in flesh and leaves many of them blind. Is there a preventive or cure for it?

(1) Hogs recovered from cholera are themselves immune against the disease and therefore make good breeding stock when fully recovered but their progeny will not be immune to the disease. (2) The eye disease is contagious so that affected animals should be isolated. Treat by washing eyes with a saturated solution of boric acid; then puff between lids a mixture of equal parts finely powdered calomel and boric acid. The solution mentioned also is excellent as a preventive and may be applied with advantage to the eyes of all exposed cattle two or three times a week while danger lasts.

#### FISTULA.

Will you kindly advise me on the following? I have a valuable two-year-old sorrel mare colt that had the distemper one year ago and it came to head on the cheek at the point of the jaw and broke. It has left a pipe there and has failed to heal up. A scale forms over it, then will drop off in a few days and fresh matter ooze out slightly. It has been so for eleven months. The mare is very hearty and fat and looks well. She runs in the pasture with an old mare. She is large for her age, weighs 1,300. She had the distemper once before when a sucking colt and came near dying. She is in foal now. She seems to feel well, but is uneasy. She often rubs her tail and hind parts against trees and posts. She is continually licking salt and a great drinker. Have never given her treatment of any kind.

There is a fistula present possibly involving the salivary gland or duct or connecting with a diseased molar tooth. It is less probable that it simply connects with a simple pus secreting sac. Try effects of injecting twice daily a little of a 5 per cent solution of protargol, which is expensive but wonder-

**Bone Spavin**

No matter how old the blemish, how lame the horse, or how many doctors have tried and failed, use

**Fleming's Spavin and Ringbone Paste**

Use it under our guarantee—your money refunded if it doesn't make the horse go sound. Most cases cured by a single 45-minute application—occasionally two required. Cures Bone Spavin, Ringbone and Sidebone, new and old cases alike. Write for detailed information and a free copy of

**Fleming's Vest-Pocket Veterinary Adviser**

Ninety-six pages, durably bound, indexed and illustrated. Covers over one hundred veterinary subjects. Read this book before you treat any kind of lameness in horses.

210 Union Stock Yards, Chicago, Ill.

## You Can Buy and Lay ROOFING

**Gordon, VanTine** Flintcoated Fireproof Rubber

### 50% BELOW DEALERS' PRICES

We'll sell you, if you want roofing, better roofing than you can buy anywhere else—Flintcoated, Fireproof Rubber Roofing. Sell you direct at half what your local dealer will charge you for ordinary roofing—half what shingles will cost you, for we ship right from our factory to you. Send you a Free Roof Book on our roofing, telling why it's

**Rustproof and Practically Fireproof** if you'll only send us a postal. Send you a sample so you can test it—try to tear it—pound it—smell it to see that there's no tar in it to burn or melt—try it with hot coals—try it with acid—try it any way to satisfy yourself.

**All You Need is a Hammer** to put it on your house, barn or outhouse. We send you with every order all the nails, metal caps and cement you need to put it on. Also 8 sq. ft. for laps. And it's the easiest roofing to put on made today. It will keep your buildings dry, warm and substantial in appearance. Won't rust out like steel roofing. This isn't an ordinary roofing. We make it from a special process material with such heavy machinery that when it's finished there's absolutely no "wear-out" to it. We tell you in our Roof Book all about the process—the pressure it gets—the flintcoating—the acidproof soaking—the weatherproofing that we give it. It makes 25 per cent saving on insurance. It's sold only direct to the man who uses it, so you save 50 per cent, which on other roofing goes into your local dealer's, the jobber's and the wholesaler's profits. You'll see from what we tell you in our

**Free Roofing Book** to use our roofing. We guarantee safe, prompt delivery everywhere in the United States. We save you 50 per cent, freight included. We ship to you from Kansas City, Minneapolis, Chicago or Davenport. This saves on freight. Write or send catalog request only to Davenport and let us save you—dollar for dollar—HALF.

Write today.

**GORDON, VAN TINE & CO.** Largest Mill in America Station C41 DAVENPORT, IOWA  
Grand Catalog of Factory Prices on Sash, Doors, Building Material and Woodwork sent free also.

**PRICE Per Square 108 sq. feet**

1-Ply.....	\$1.41 per Roll
2-Ply.....	1.96 per Roll
3-Ply.....	2.29 per Roll

fully effective in such case. If it does not succeed have a veterinarian operate. The other symptoms come from indigestion and probably have been caused by overfeeding and lack of exercise. Cut grain ration in half, leave corn out of it and let her live an outdoor life or do light work every day.

#### CHOREA.

I have a bay colt two years and eight months of age. When it walks or trots it springs up and down on each leg, or in its body where the legs join. It has been this way a little over a year. Can I do anything for it?

As well as we can judge from your description of the case the colt has chorea (St. Vitus' dance) which is incurable.

#### SWELLING.

A few weeks ago I purchased an eight-year-old mare at a public auction, which had a wire cut of about two months' standing on inside of hind pastern joint. This cut had been neglected, but by proper treatment I have the wound healing nicely. The joint is about twice its normal size and is not decreasing. Is there any treatment that will reduce swelling?

We would advise you to clip hair from swollen joint and blister thoroughly with cerate of cantharides and repeat if necessary in two or three weeks. This treatment also will assist in healing of wound.

#### FISTULA.

I have a black mare twelve years old that I fear has fistula. There is quite a large swelling on the withers a very little to one side. It seems feverish as though there might be pus. Mare has been nursing a colt (not weaned) and is in rather poor flesh. Have only seen the swelling a few days. Any information would be gratefully received.

Clip hair from enlargement and blister every ten days with a mixture of one dram of biniodid of mercury and two ounces of cerate of cantharides. This will either disperse the swelling if pus has not formed or bring it to a head so that it may be freely opened and treated as we have advised elsewhere under head of "fistula."

#### WASTED MUSCLES.

I purchased a mare which was hip sweeneyed last spring. Sweeney has filled fairly well. Can I do anything to help it fill? Mare is young, blocky and an easy keeper. Sweeney does not seem to make her leg stiff nor bother her in any way. She seems to turn or hack as easily as any horse. She is bred. Will it interfere with foaling?

The condition probably is due to an injury which has knocked off a portion of the point of hip and in that case the matter should be left to nature and should not interfere with foaling. If on the other hand it is caused by a fall fracturing the shaft of the ileum of pelvis or if it followed a difficult foaling it may seriously interfere with the next foaling. On general principles, however, we would consider the condition unimportant and advise leaving it alone.

#### LAMENESS.

(1) What can I do for my year and a half-old bay mule? He is stifled on both hind legs. He has been jumping fences of all heights. He has had it for four months. It is worse in the morning. (2) What can I do for my eleven-year-old bay mare which has been sweeneyed on the shoulder for six months. I used one bottle of liniment, but it did no good.

(1) Mule colt will have to be kept tied up and the stifle joints blistered one after the other with cerate of cantharides to strengthen parts. You should first be sure that the stifle is the seat of the trouble. (2) Clip hair from shoulder and blister repeatedly at intervals

**BOWSHER**

(Sold with or without elevator)

**CRUSH** ear corn (with or without shucks) and **GRIND** all kinds of small grain. Use Conical Shape Grinders. Different from all others.

### LIGHTEST RUNNING.

Ready to Operate. 7 Sizes—2 to 25 h. p. One size for wind-wheel use.

Also make Sweep Grinders, both Geared and Plain.

**E. N. P. Bowshe Co.**  
South Bend, Ind.

of three weeks using cerate of cantharides, two ounces; biniodid of mercury, one dram; mix. Mare should have as much exercise as possible and be well fed on oats when blister has each time been washed off.

#### PROUD FLESH.

I should like to have advice what to do for a barb wire cut that has formed proud flesh. What must I use, to remove the proud flesh?

You should have told us the location of the wound and given a detailed description of condition present. Proud flesh may indicate that the wound has become infected by a fungus (botryomycosis) in which case an operation might succeed if the wound is not in a dangerous place, but we cannot prescribe intelligently under the circumstances. A suitable lotion for the checking of such growths is made by mixing together half an ounce of chlorid of zinc, two drams of hydrochloric acid and two ounces of sulphate of zinc in a pint of water. Apply two or three times daily. Tie horse so he cannot bite part.

**SPECIAL OPEN PREMIUMS TO BE OFFERED AT THE FARMERS' CORN AND STOCK JUDGING INSTITUTE TO BE HELD AT TIPTON, IOWA, ON JANUARY 14TH, 15TH AND 16TH.**

Grand Champion Sweepstakes—\$40 corn belt sweepstakes, two-horse mill by Spartan Manufacturing Company, of Galesburg, Ill.

Class D, Yellow Corn—First premium, \$25, recorded Duroc Jersey gilt by J. J. Spear, Stanwood, Iowa; second premium, \$5, six bottles Vasey's Star Anti-Cholera by Anti-Cholera Company, U. S. Yards, Chicago, Ill.; third premium, \$2.75, twenty-five-pound pail Acme Hog Relish by Acme Food Company, Chicago, Ill.

Class E, White Corn—First premium, \$15, fourteen-inch double-board plow by Hapgood Plow Company, Alton, Ill.; second premium, \$8, 100 pounds bog and cattle powder and four pounds Dead Shot Worm killer by the Farmers' Hog & Cattle Powder Co., Shenandoah, Iowa; third premium, \$2.75, five gallons Dipoline by Marshall Oil Company, Marshalltown, Iowa; fourth premium, \$2.75, twenty-five-pound pail Acme Cattle Relish, Chicago, Ill.

Class F, Early Corn, Any Color—Special by Alexander, Ward & Conover Commission Co., U. S. Yards, Chicago, Ill.; premiums of \$25 divided as follows: \$10, \$7, \$5, \$2 and \$1.

Entries must be for ten ears of corn. Send to Chas. Swartzlander, Tipton, Iowa. Freight or express prepaid. Entries close January 16th at 10 o'clock a. m.

No entrance fee is charged, but all exhibits are to be sold at auction to pay expenses of the institute. Mail bids will be respected.

The Homestead and The Homemaker \$1.25 per year.

## Land Renting From Renters' Standpoint

The Homestead has recently published two comprehensive articles on renting land, giving the landlord's side of it. At this time we present for the benefit of our readers some views from the other side of the question.

The articles written by Mr. Rhinehart and Mr. Allen are interesting from a landlord's view, and I will give my views from the tenant's standpoint.

There can be no fixed rule in renting land, as this is a world of many men of many minds, which applies to landlord and tenant alike. I have tried most every way of renting land except the partnership plan which Mr. Rhinehart and Mr. Allen suggest, and I have found cash rent to be the most satisfactory to both parties. There is less liable to be friction between landlord and tenant.

There is not much to be said of the cash rent plan and that is why I like it. You make out a contract at so much per acre or so much for a given number of acres; stipulate when payments must be made; make some provision as to what the tenant shall do to keep the place in repair; what the landlord shall do in furnishing any necessities for keeping the farm in good shape; hauling out manure, etc. If the landlord is dishonest he has nothing to say as long as the tenant farms the place in a farm-like manner and pays his rent notes when due and takes care of buildings, etc.

On the other hand, if the tenant is dishonest there are stipulations and articles in contract that the landlord can enforce to compel him to do the right thing. For these reasons we think cash rent is the most satisfactory. There is less chance for litigation, and only one boss. There is no other way that you could rent land and have as little to do with one another as on the cash basis, for you are generally many miles apart, and the farther the better.

The sentence in Mr. Rhinehart's article, "I would emphasize the importance of the landlord assuming control in case of difficulty," etc., is where the difficulty would commence, and on this point I refused to take a large stock farm from a man on equal shares because he said he would have entire control of the business part, do all the buying and selling and I do all the work and have nothing to say as to time to sell or buy, etc. He was a lawyer and lived in town, and no doubt had better business ability than I did, but I thought I knew as much about buying and selling as he did.

Now, if the landlord that Mr. Rhinehart speaks about wants to keep his stock and rent his farm he had better hire a man to run his place for him at a monthly cash wage or take some man

that has good business ability, honest and some stock and money of his own and let him farm it as Mr. Rhinehart suggests. As stated above, there is no fixed rule to go by. An honest landlord might get a dishonest tenant; a dishonest landlord might get an honest tenant, but if your articles of agreement are drawn right there is less chance for litigation and hard feelings on the cash rent plan than any other that I can think of.

U. S. Cornwell,  
Washington County, Neb.

I was very much interested in the articles written by Mr. Allen and Mr. Rhinehart regarding renting lands. I am a tenant and live in southwestern Iowa, Page county, one of the best sections in all the world for diversified farming. I have always lived on the farm except the time I spent in college. For the past seven years I have been renting land and farming for myself, paying cash rent, which is about the only way one can rent in this section from \$4 to \$10 per acre.

For seven years I have lived on this same farm of good land and myself and landlord have never had a word of discord. Last year the landlord sold the farm for \$100 per acre, so I had to look around for another place. However, before I had looked very much and to avoid moving I rented the same farm again from the other landlord, giving \$1,050 cash and was to plant seventy-five acres of corn and sow six acres of spring wheat. This was all the crop I was to have except five acres of potatoes. With this high rent I have made a little money. No one will doubt that I paid too much rent, but I had bought wire and fenced the place mostly hog-tight at my own expense and I am raising thoroughbred hogs and had a nice lot of last fall pigs coming on, so in view of all this I took the place at \$1,050.

The landlord was to furnish all material, staples and nails to keep up the place and I was to do the work free. However, he has not furnished a nail and about three pounds of staples is the sum total. I have needed much more but I could not get him to do a thing this fall, so I would not rent from him at any price next year.

I will give a full list of money taken in for various products which I sold from the farm, and I have enough left to run me next year:

8,000 bu. corn at 30 cents.....	\$ 900
(1,000 bu. left)	
500 bu. corn at 32 cents.....	160
78 head of hogs.....	1,200
(75 head left)	
Horses and colts.....	425
(5 head left)	
400 bu. potatoes at 60 cents.....	240
(75 bu. left)	
6 head of cattle.....	180
Total.....	\$2,005

Expenses for hired help.....	\$ 175
Bought 200 bu. corn.....	90
Rent of farm.....	1,050
Total.....	\$1,225

This left me \$780 for my own labor, which I consider very good. However, everything was favorable this year and next year paying the same rent might ruin a fellow. It has always appealed to me that a renter who can take charge of 160 acres and run it successfully for six or seven years could take a larger farm on shares and make money for both parties. I believe if a man has great interest in what he does, is a good worker, knows how to prepare a seed bed for various crops and plants good seed that he will make money whether he rents for cash or on the share basis.

A Renter.  
Page County, Iowa.

I have been a reader of your paper for a number of years and have often been tempted to write on the land renting question, and now that it is up for discussion I shall avail myself of this opportunity to say a few words. I have read very carefully the two articles from the pens of Mr. Rhinehart and Mr. Allen and have great respect for their ideas. However, I think Mr. Allen has too many irons in the fire to go in on the partnership plan at all, as he says he

has the care and management of seventy farms and that many renters. He says that it is almost impossible to find a man as capable of running a large farm as the landlord himself. It all depends on how much the landlord knows about farming.

I am a renter but not on the partnership plan, and my landlord knows nothing about farming. He has his money invested in land just to keep it. There are a great many farms owned by men who don't know the first thing about farming. The general rule here in regard to partnership farming is, first, the landlord furnishes the farm free of all rents, with the truck patch, chickens, milk and butter for home use; the tenant performs all labor connected with the farm, and each party owns half the stock of all kinds. The proceeds of the farm are equally divided.

Mr. Allen has his tenants furnish the horse power and they must be all mares, each mare to raise a colt and he pays half the service fee and gets a half interest in the colts. That is as bad as Mr. Rhinehart wanting pay for half of his pasture. Besides, you are wanting to eat your pie and keep it, too. You cannot expect mares to perform all kinds of heavy farm work and raise good colts. The farm tools are now most all riding and it takes a little more power. I don't like to see a good mare worked down to skin and bones and the colt a little worse. If you want good colts take care of your mares. I am a great lover of the mule as a beast of burden, but I guess I am getting away from my subject a little.

It is true in renting on the half and half basis that the tenant has a chance to beat the landlord if he has nothing to start with, but my observation has been that these are the kind of men wanted. Then the landlord owns most everything and can close out the deal any time. Mr. Allen is very fair in renting for grain rent; that is the prevailing rent here—two-fifths of all grain delivered to market and cash for meadow and pasture of course. There are a great many who rent for cash, high at that, take everything off and put nothing back, but it seems to me there could be no better paying proposition than the half and half plan, keeping enough stock to eat all the grain and return the manure to the land. I am not looking for a farm of 400 acres with only 100 acres of farm land and seventy-five cows to milk; that is just sixty more than I am used to, and it would make anyone rheumatic to milk that many.

Hamilton county, Ia. Subscriber.

The reading of the article of B. F. Allen on the renting problem set me to thinking over the past, and I will try and give your readers a bit of our experience. In 1878 a dry goods merchant, with plenty of money and a human heart, traded for an 800-acre farm in Keokuk county, Iowa. What to do with this farm was a mystery, though

FREE TO YOU

## Do You Wear Lace?

Then Read This Book.

IT IS FREE.

One copy sent absolutely free to each reader of this publication.

This beautiful book is by Alice Leslie Hancock, the well-known authority on lace making. It contains a history of the lace-making art from its beginning to the present day, and is handsomely illustrated in colors, showing rare and costly laces of almost every description; in fact, is a thing of beauty from cover to cover.

It Tells You How You Can Make

Your Own Lace.

at almost no cost to yourself, beautiful fabrics which would cost many dollars per yard if you had to purchase them.

It Tells You How to Make Money by

Making Lace For Sale.

Something you can do in the privacy of your own home; it tells you about thousands of American women who are doing this work now with profit to themselves; it tells you where to find a cash market for your laces and many other things you wish to know; in fact, it is a valuable book and contains information on almost every page which is worth money to you.

Do you want a copy? If so, send us a postal at once; remember, one copy will be sent you absolutely free for the asking. Send for it today. Address,

## SEPARATOR FREE

1975 FOR A TWO MONTHS' TRIAL WE WILL GLADLY SEND YOU A CREAM SEPARATOR; you can use it sixty days, and if you are not sure you have received the best separator in the world, the trial won't cost you one cent. Write for our new Cream Separator Catalogue and learn of THIS GREAT OFFER.

\$19.75 full 1907 model Dundee Cream Separator, the equal of any machine sold by anyone else up to \$40.00. Our Improved Economy Cream Separator, slightly higher in price than our Dundee separator, and we guarantee our Economy to have greater capacity, to skim closer, skim colder milk, run easier and not get out of order; wear longer than any other machine in the market. We guarantee it 20 years, take care of it for you from the day you receive it, and will always furnish you any needed repair or part in the years to come, promptly and on a few day's notice.

PRICES NOW GREATLY REDUCED. OUR CREAM SEPARATOR OFFERS are more liberal, more wonderful than ever before, greatly improved models, prices lower than last season. If you have more than one cow, write us a letter or a postal and say, "Send me your New Cream Separator Catalogue and all your new offers," and our great 1907 cream separator proposition will go to you by return mail, free and postpaid. We have two big cream separator factories and can sell you a machine on a two months' free trial, on manufacturing cost basis, much less than dealers and agents pay (all these profits you save) at a lower price than you ever thought possible. If you buy from us you get our free Profit Sharing Certificates and can exchange them for your choice of any number of most valuable articles, which we give our customers free. Write for catalogue today. Address, SEARS ROEBUCK & CO., CHICAGO

there was a man with two boys, three girls and the best companion in the world who had a 120-acre farm not all paid for living near, and he told this merchant that if he had known of his large farm he would have rented it. The merchant was anxious to rent to the man and suggested they go and look at the place, which they did. It was run down and in very bad shape. The man did not want to rent it and said he

would not farm the place if he got all he raised, but suggested that the owner make a stock farm of it. Well, he rented the place, standing the expense of moving the tenant on the farm, paid for all the work done outside of the crop, and loaned him money to start with. The renter had good teams and he got two-thirds of the crop, one-half of the stock and fed his own teams and furnished everything. This did not suit either party so they made a sale and sold everything except the renter's teams.

Then they went in on equal shares, each one paying the same in buying and an equal division was made of all the sales. The renter fed his teams out of the feed. They raised all they could and bought a good deal. The outlay and profit were divided equally. The owner paid for all new improvements, and for hauling out the manure; the renter kept up the farm and in three years had 500 acres in grass and fifteen miles or the best of fencing, two good barns, house and outbuildings. The renter kept all the poultry he wanted, had all the milk and all the ground they wished for a truck patch. Each one paid his own taxes. There were 200 acres not broken and the owner paid the renter for putting it in fall grain, harvesting and thrashing. There were no binders then and the work had to be done by hand. There were about 3,000 bushels at \$1 per bushel and the ground in shape for crops.

This will show what doing right will do. At the end of seven and one-half years the owner sold the farm at a good price. The last sale they had amounted to over \$5,000. The renter had \$6,000 and a lot of good horses and the ground that had the small corn stalks on. Each tried to do right by the other.

E. C. Webb.

Mahaska county, Iowa.

#### ECHOES FROM A KANSAS FARM.

The best thing about the change of the year was this, the pure food law went into effect on January 1st.

The Kansas wheat grower, who has several hundred bushels in his granary, does not believe that discovering that rubber can be made of wheat will bring the price up with a bound.

To much prosperity is as bad as not enough. Taking the majority into consideration, there is no more contentment now than twenty years ago. As far as being satisfied is concerned, we as a people, are as nearly well satisfied now as we ever will be. There will always be something to kick about, because there will always be about so many kickers.

Most of the co-operative societies, in fact practically all, are founded for money making purposes, and those who found them expect to make the money. The cloth they wear is the garb of the farmer, and they talk long and loud of "love" for the farmer; underneath is their scheme to make "easy" money, and their "love" quickly turns to gall when the farmers refuse to "join the great movement."

Something was said in this column a short time ago about cement tanks. Since then we have had letters from several who have used tanks made of cement and concrete. All claim they are all right in every way. One has such a tank he has used for the past three years. Excepting to say that it has given entire satisfaction, he adds that it should be made just where wanted, as it is too heavy to move easily. We imagine it would take a team of horses to pull one from place to place.

Perhaps, as some say, paint adds nothing to the lasting qualities of a building, but it certainly adds enough to the appearance to make it pay. The trouble is to find the time to do the work. It can be hired done, of course, but a great many of the self-styled painters can do no better work than a farmer can, himself.

## DON'T BUY GASOLINE ENGINES

alcohol engine, superior to any one-cylinder engine; revolutionizing power. Its weight and bulk are half that of single cylinder engines, with greater durability. Costs Less to Buy—Less to Run. Quickly, easily started. Vibration practically overcome. Cheaply mounted on any wagon. It is a combination portable, stationary, or traction engine. SEND FOR CATALOGUE. THE TEMPLE PUMP CO., Mfrs., Meagher and 15th Sts., Chicago. THIS IS OUR FIFTY-THIRD YEAR.

and charge professional wages. A neighbor paid \$60 for getting his house painted. It looks no better than other houses painted by their owners, at a cost of doing the work at odd times.

It is indeed surprising how the trade of the country is going to the mail order houses. While at our station the other day, when the local freight came in, four-fifths of the freight bills were for goods billed direct to the farmers. All sorts of goods were in the cars, sewing machines, groceries, small tools, boxed goods and stuff in bales. Most all were billed to our best farmers and business men, men who know enough to know when they are cheated and when they are not, and not, as a local paper says, to men who don't know enough to know when they are cheated.

In later years the poultry seems to have been onto the strike racket. Anyway, they all stop laying about the same time, and it is easy to tell when this time is by the advance in egg prices. It is also easy to tell when Biddy is getting back to work again, as the price of eggs commence to go downward. Just now our hens show signs of commencing to break the strike, but a spell of winter will shut them off. Everyone has told the same story for the past two months—only three or four eggs a day from 100 to 150 hens.

A good many of the nice orchards now

BERMAN BROS., 325 First Street South, Minneapolis, Minnesota.

#### IN THE GREAT SOUTHWEST.

Report comes from Platte county, Kan., that there has not been a single ear for grain shipment obtainable for thirty days, and the outlook is that there will not be for thirty days more. In one town the three elevators are bulging with grain and the corn is now piled in long rows along the railroad track. The matter has been called to the attention of the interstate commerce commission.

An exceedingly successful series of conventions was held at the agricultural college, Manhattan, Kan., last week. A new association was organized known as the Kansas Draft Horse Breeders' Association. The principal live stock associations of the state held their meetings and all were well attended. In the corn contest some of the prize corn sold

## STEREOSCOPES

#### FOR NAMES OF FARMERS

The Farm Magazine Co. wants names of farmers likely to be interested in their big, handsomely illustrated farm paper. For 5 names they will allow our readers 25c and a stereoscopic outfit. The subscription price is 50c. Send 5 names and addresses of farmers and 25c. The publishers will enter you as a subscriber fully paid for 1 year. They will mail you FREE a boys' and girls' stereoscope and 30 views. Address, FARM MAGAZINE CO., BOX 107 OMAHA, NEB.

Emporia, Kan., to San Angelo, Texas, a distance of 711 miles. The meeting resulted in a subscription being taken to the value of \$370,000.

Mr. Jas. F. Getty, state senator from Wyandotte county, Kan., is now at work on a bill to amend the state grain inspection law. If his bill becomes a law it will change the classification of public elevators so that the classification will stand the tests in the courts.

The biennial report of the Oklahoma superintendent of education has recently been filed with Governor Frantz. It shows that there are 3,687 teachers employed, at an average salary of \$54 and \$46.88, respectively, for men and women in first grade; second grade, men \$42.80, women \$39.48; third grade, men \$38.15 and women \$35.14. There were 137 schools built during the year at a cost of \$150,000.

The attendance at the short course for farmers at the Kansas Agricultural College has been unusually large. Over 1,000 stockmen and farmers gathered in enthusiastic meetings.

Appropriations were made for state fairs on a different basis. Last year they duplicated amounts given by state fairs on Short-horns, from \$500 to \$1,000, half in the open and half in the state competition. This year the plan is to eliminate duplication on state exhibits. They will duplicate the first \$500 won by Short-horns and from \$500 to \$1,000 will give 50 per cent, all in the open classes.

The state fair appropriations are made conditional upon associations adopting for Short-horn classes the classifications furnished by the American Short-horn Breeders' Association, which are to be practically uniform.

It was practically decided to change the form of the entries in the herd books after volume seventy, abbreviating pedigrees enough to get a good many more entries on a page than at present.

#### Osage Hedge Posts.

To the Editor of The Homestead:

Will some reader of this paper please give his experience in raising osage hedge posts? The fence post question is one of vital importance to Illinois farmers, especially since the native timber is almost exhausted and since farm labor has become so high as to make it unprofitable to be resetting posts every few years.

The osage is the best lasting post and, barring its tendency to check when staples are used, has no bad quality worth considering. I have a piece of virgin bottom soil partly surrounded by a creek, which should make an ideal location for a grove. Now, how shall I proceed? Are there different varieties of osage? Where can I obtain plants? How many plants are required per acre, how close should the rows be, etc.?

Fulton county, Ill. B. S. Diehl.

The Homestead and The Homemaker \$1.25 per year.

Helen's Tip Top Notcher, one of the principal herd boars in use in the Maple Grove herd of Duroc Jerseys owned by Messrs. McNeil Bros., of Bowen, Ill. This boar was third-prize pig at the Illinois State Fair, 1906, and many favored him for a higher place. He comes from royal ancestry, his sire being Tip Top Notcher, and his dam Helen Blazes, the dam of the highest-priced sow ever sold at public auction up to the time she was sold, and the highest-priced litter ever sold at auction. Helen's Tip Top Notcher is the highest-priced boar ever sold at public auction, having brought \$1,000 in the record-breaking fall sale of Messrs. Fagan, Browning & McCabe. Several of the females in Messrs. McNeil Bros.' herd are bred to this boar. See advertisement on page 28 and field notes elsewhere in this issue.

here would not have existed had it not been for the traveling fruit tree agent, yet, whenever a man wishes fruit trees it is better to either go in person or send direct to some good nursery. The trouble with ordering through an agent is, he delivers all in a bunch, and usually so late in the spring that the tree-planting time has almost passed. We do not understand why all nurseries are so late with their spring deliveries. Even when the agent tells you they will deliver at such a time, they are always too late for best results.

Sometimes ridging corn is the thing, and sometimes it isn't. A neighbor tells of another neighbor coming into his field to show off the working of a disk cultivator just bought. It was when corn was being laid by, and the disk was set to ridge the row up high. Four rows were ridged, and, when husking these rows, our neighbor tells us the corn was noticeably better than where not ridged, alongside. Just what is best depends altogether on the season, and we cannot tell much about the season until it's all over. Sometimes farming is guess work.

as high as \$16 for ten ears. Mr. W. R. Hildreth won first prize and sweepstakes on yellow corn.

A wreck on the Chicago, Rock Island & Pacific near Volland, Kan., resulted in the death of thirty persons and the injury of fifty-five. Most of the dead were Mexican laborers. The blame for the accident is placed on a nineteen-year-old telegraph operator who failed to carry out the dispatcher's orders.

Work was begun on the construction of the Kansas City, Excelsior Springs & St. Joseph Electric Railway Company's bridge across the Missouri river at Kansas City, Mo. The bridge will cost nearly \$2,000,000.

Four hundred and fifty business men of Kansas City and tributary territory banqueted at the Midland Hotel last week in response to an invitation sent by Mr. A. E. Stillwell, president of the Kansas City, Mexico & Orient railroad. Following the banquet the progress and condition of this road was discussed by Mr. Stillwell and others. He told his guests that one and one-half million dollars were needed to complete the road from

### How to Operate an Incubator.

The person who runs an incubator must be clean and careful; he must be at home with his machine at the same hour every morning and the same hour every evening; he must learn the peculiarities of his incubator and carefully follow instructions. For such a person the operation of the ordinary hatching machine will be simple and easy enough. With each shipment the manufacturer sends out a book or card of directions. Read this carefully before attempting to set up the machine. Put the parts together in exact accordance with these directions. Count the parts and inspect them carefully; then put them together; see that the machine stands level; that the doors open and shut easily; that the regulator is in working order.

About this time comes the question, Where shall we set this machine? This matter of location is very important. It has much to do with success in hatching. First, it must have some permanency. It must be placed where it will not be disturbed, away from jars and vibrations, out of all drafts or where the breeze cannot strike it, and where the opening and closing of doors and windows will not affect it. The room occupied must be large enough and have a level floor. One needs room to work about an incubator. It should have a clear space around it, especially in front, and at the lamp end of the machine there should be plenty of room. The apartment should not be damp or dark. A clean, dry, light cellar is excellent for this purpose. Any dry, clean room will do, but, as before stated, drafts or currents of air over or around the machine are very detrimental. There should be no stove or other source of artificial heat in the room occupied by an incubator. The entire room should be clean and free from dust.

Common sense and circumstances will dictate the location of the machine but the above suggestions will be found worth considering. One thing is certain, if the incubator is not afforded proper quarters it can hardly be expected to give good results. The room decided upon, the machine set up, its parts adjusted, and its level taken, it is now in order to clean, trim and fill the lamp. The wick should be dry-trimmed with a pair of sharp shears before it is inserted in the burner. Then after being passed up and down the tube a few times it should be trimmed again and its corners slightly nicked or rounded. Now is the time to prove whether the burner is in perfect order and that the wick works freely and easily. The wick should now be moistened in kerosene and drawn back to its proper position for lighting. All dust and moisture should be wiped from the burner. Especially important is it that the start be made with a clean tube and sieve. The lamp should be filled within one-fourth of an inch of the top, and then after the burner is attached to the lamp the whole should be cleaned with a dry, clean cloth. The chimney also should be carefully cleaned with a dry cloth. It should be free from dirt, dust or grease. If the chimney is not kept perfectly clean the lamp will smoke, and a smoky lamp means a poor hatch. Dry cleaning cloths should be set apart for this purpose. All these details looked after, the lamp can be lighted and placed in position if the machine is a hot-air machine; but if it is a hot-water machine the lamp must not be lighted until the tank is filled with water in accordance with the instructions that accompany the machine. Study the structure of your lamp and exercise great care in putting it together as well as cleaning and filling it the first time. Familiarity gained and habits formed will be of value to the operator in the future management. Accuracy and thoroughness are important.—(Department of Agriculture Bulletin.)

### ADDITIONAL FIELD NOTES.

#### McGAVOCK'S HEREFORD AUCTION AT SOUTH OMAHA.

The three-days' auction to be held by Sale Manager McGavock closes at South Omaha on Saturday, January 19th, with a choice offering of Herefords. Mr. N. J. Hiltabrand, of Lostant, Ill., consigns a very thick-fleshed uniform offering. The four-year-old cow Imp. English Lady was got by the noted sire, John Bull, a bull that combines the blood

of Anxiety, Lord Wilton and The Grove 3d. She affords a splendid opportunity to secure one of the best representatives of English herds. The American-bred females of Mr. Hiltabrand's consignment are sired by Actor, a son of Anxiety 3d; Phil Armour, and his son, Climax; Sailor, a son of Acrobat; Chester, a son of Imp. Chesterfield, and Albany, one of the highest-priced and most celebrated prize-winners imported to America. The young bull, Beau Albany was got by Beau Donald 23d, a son of the famous Beau Donald, and was out of a cow by the famous Albany. He is recommended as a herd header, and the four-year-old stock bull, Climax, by Phil Armour, Mr. Hiltabrand also catalogs. The females of the offering have calves at foot by Climax and are bred to Beau Perfect 231323. Mr. H. K. Philson, Harlan, Iowa, consigns five cows and heifers and two bulls. They are sired by Gentry Briton 17th, a grandson of Imp. Ancient Briton; Gentry Wilton 11th, a grandson of Peerless Wilton; Dick, a grandson of Imp. Weston Stamp; Kruger, a son of Imp. Improver, and Captain Ray, a grandson of Corrector. Mr. Hugh Whiteford, of Guilford, Mo., consigns some good entries that were bred by Mr. N. Kirtley, of Savannah, Mo., and represent the blood of the Anxieties, Archbalds and The Grove 3d. Mr. W. J. Pellet, of Atlantic, Iowa, consigns a cow that is by Grove Royal, a bull that has the distinction of being a grandson of the two noted sons of The Grove 3d, Imp. Cassio and Imp. Hesiod. Catalog can be obtained by addressing Mr. W. C. McGavock, Springfield, Ill.

#### LAST CALL FOR THE OLSEN DUROC SALE.

It is with this issue that we make the last mention of the bred sow sale to be held at Colon, Neb., January 18th, by Mr. C. E. Olsen. On this date at his farm, two and one-half miles east of town, Mr. Olsen will offer what he considers the best lot of brood sows he has ever put up at public auction. He is selecting only the very tops of his herd to put into this offering and his intention is to make it the best, individually, of any previous offering he has ever made. The consignment includes five aged sows, ten good yearlings and twenty-five spring gilts, the tops of this year's large crop of pigs. The aged sows are all tried and proven breeders and are some of Mr. Olsen's choicest breeding stock. Most of the yearling sows and gilts are daughters of Governor, a son of Crimson Wonder and Gold Dust Jim II. by Gold Dust Jim, also Crown Prince by Duroc Challenger. Look over the breeding of these sires and you will find that it is of the most noted prize-winning strains. Many of these sows will be bred to Colon's Model, a son of Van's Perfection, one of the greatest prize-winning boars of the breed, having been fitted and shown three years in succession and came away with the ribbons each time. Several of the sows will be bred to Improver III., a son of the great Improver II. that won first and sweepstakes at three state fairs in one fall. When we carefully look over the breeding of these sows and also the boars they are bred to, we find a great many of the most noted prize-winning sires are very prominent in the pedigrees, and we consider it a good place to pick up some good, useful stuff. Colon is on the branch of the Northwestern between Lincoln and Fremont and can be easily reached from either way on day of sale. Preparations will be made at Colon to entertain those coming from the Hammer sale on the 17th, so you can practically attend all three sales at one expense. Catalogs are now ready and will be mailed to anyone for the asking. Mail bids may be sent to Col. T. C. Callahan or to Mr. Ray Page, representing The Homestead, and they will be properly cared for.

#### LAST CALL FOR THE HAMMER DUROC SALE.

We wish to call the attention of our many readers for the last time to the Duroc Jersey bred sow sale to be held by Mr. John Hammer, January 17th, at his farm near Ashland, Neb. He is offering a very choice lot of sows, among them being daughters of the great Ohio Chief. Much has been said in the past two years about the progress Mr. Hammer has made in the Duroc Jersey business and much more will have to be said in the future if the public is kept posted as the progress is made. Few breeders from as small a beginning have made as rapid strides as has Mr. Hammer in the breeding of Duroc Jersey hogs. Hard, persistent work, along with the knowledge of what constitutes a good animal, have won out for Mr. Hammer. His herd represents the best blood lines known to the breed and the sows in the offering are extra good. They are a very growthy, big-boned, broad-backed lot of sows, right in their prime, and it would be hard to find a more useful-looking lot of sows than are in this offering. The aged and yearling sows, of which there will be in the neighborhood of fifteen, are bred to Happy Hollow Chief 46277, a son of Crimson Wonder that was considered by those who looked him over one of the most promising young hogs shown at the state fair last fall. He has proven a good breeder, as you will see when you look over his get on sale day. Mr. Hammer is also using a son of Ohio Chief that is a very promising-looking hog, and one from which much may be expected if properly developed. Top Notch 52725, a grandson of Tip Top Notcher, is being used to some advantage in this herd and we consider the combination of blood lines that Mr. Hammer is putting into his herd are extra good. Catalogs are now ready and can be had by addressing Mr. John Hammer, of Greenwood, Neb. Parties wishing to attend sale will find free hotel accommodations at leading hotels in Ashland and Greenwood, Neb., and free conveyance to and from the farm. Write for catalog and arrange to attend the sale. Mail bids may be sent to the auctioneer, Col. T. C. Callahan, or Mr. Ray Page, representing The Homestead, in care of Mr. Hammer.

#### CUTLER'S DUROC SALE.

Mr. N. B. Cutler, of Carthage, Ill., proprietor of the Bonny Mede herd of Duroc Jerseys, has selected thirty-five head of richly-bred sows from his good herd for

### OUR RED LETTER

# Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

**FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.**

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

**THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.**

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

his annual brood sow sale which will be held on Friday, January 25th. Mr. Cutler has been a prominent and successful showman at the leading state fairs throughout the country, and his recent winnings at the 1906 Illinois State Fair are still fresh in the minds of our readers. Mr. Cutler has selected eighteen aged sows and yearlings and seventeen good gilts from his herd for this occasion. They are bred to such noted boars as Wonder Boy, first-prize boar pig at the Illinois State Fair, 1906, and headed

first-prize litter at the same show, and to Peter the Great, a son of the noted show and breeding boar, Big I Am. The offering is the best ever made from this herd and breeders will not be disappointed on sale day. Further particulars regarding this good offering will appear in these columns next week. In the meantime write for catalog as per the announcement on page 31 of this issue.

#### THE RED OAK SHORT-HORN SALE.

On January 21st, at Red Oak, Iowa, will be held a combination Short-horn sale under the management of Mr. Jno. M. Bixler, of Corning, Iowa. Those contributing cattle to the sale are Messrs. Jno. M. Bixler, S. A. Bixler, C. E. Shoemaker, Geo. Mahr and Hardin Bros., all of Corning, Iowa, and G. A. Robinson and O. L. Luklighter, of Pres-

cott, Iowa. They are offering forty head, among which are about sixteen young bulls. These cattle will be used at the short course meeting at Red Oak, Iowa, the week preceding the sale. Mr. John Bixler will sell nine head. He will offer three young bulls, one of which is a straight Scotch bull, and all of them will be sired by his well-known breeding bull, Diamond Rex, a son of Imp Cock Robin. He will sell a six-year-old Scotch cow with heifer calf at foot by Diamond Rex, and she is a good proposition to go into any herd. This cow is the dam of the heifer that sold to Messrs. Andrews Bros., of Melbourn, Iowa, and she in turn is the dam of the bull calf that they were offered \$1,000 for. He also puts in a good Scotch heifer and several good Scotch-topped females. The three bulls that he sells are good, especially the Scotch bull. He also sells a spotted bull that would make a great steer bull. Mr. S. A. Bixler sells four head one of which is Lady Stamford 3d, a daughter of Diamond Rex, and she is one of the best heifer propositions in the sale. She is a nice roan in color, a most excellent individual and she is good enough to go into any herd. Mr. C. E. Shoemaker will sell three yearling bulls. One of these is a son of Imp. Bapton Admiral and out of Cinderella by the show bull, Banker's Victor. This is a straight Scotch bull of the Cruickshank Secret family. Royal Sharon is a splendid young red bull. His sire was The Professor, a Scotch bull used at the head of one of Kentucky's best herds, and his dam is a daughter of the Agricultural College bull, Scotland's Crown. This young bull is very good in his lines and was a winner of first prize at both the Corning and the Massena fairs last fall. Mr. Shoemaker also sells a yearling son of the Scotch bull, Double Lavender, and he is a good young bull. Messrs. Hardin Bros., of Corning, Iowa, will sell three young bulls and one three-year-old cow. She will be bred to Colonel Dalmeny, a pure Scotch bull. One of the bulls will be sired by Good Enough, a straight Nonpareil bull, and the others are sired by Newton, a son of the noted sire, Hillsdale Commander. Mr. G. A. Robinson, of Prescott, Iowa, sells seven head, five of which are cows and heifers and two bulls. The heifers are sired by Riverside Victoria Prince 2d, a Victoria-bred bull. He sells one yearling and one two-year-old bull, both sired by Baron Knight, a half brother to the Norton-bred show bull, Baron Victor. Mr. O. L. Luklighter, of Prescott, Iowa, has drawn on some of the good things in his herd for this sale and he sells four head. Mr. George Mahr will sell eight head, all of which are females. These are all sired by Norton-bred bulls and are safe in calf to his present Scotch bull. There are a number of good Scotch cattle in the sale and these are fit to be purchased by the best breeders we have. The plainer-bred cattle are almost without an exception sired by Scotch bulls, and some have several of the very best crosses on top. They are a splendid lot of individuals and the man who wants Short-horns will not make a mistake in attending this sale. The bulls are a sappy lot and anyone who wants a bull will find them in this sale. Write Mr. Jno. M. Bixler, Corning, Iowa, for catalog, and please mention The Homestead.

You cannot be well unless your stomach and bowels are right.

The thing to right them is

At your druggist's.

## ADVERTISING NOTES.

A thoroughly practical farmer, capable of taking care of a 5-10-acre stock and grain farm, is offered a good position in an advertisement on page 8 of this issue, the address of which is Box 302, Marshalltown, Iowa. For a good, industrious, reliable and sober man this will be a lasting position if he fills the requirements.

One of the greatest problems which continually confronts railways employing officials is how to secure a sufficient number of competent men to handle their ever increasing business. On account of the unusually heavy business just at this time as well as on account of the many miles of new road just now being completed, this problem is more difficult of solution now than ever before. Some time ago the National Railway Training Association, which is directed by railway officials, was organized to prepare men for the positions of firemen and brakemen in order to meet the demand for men in the operating department. This association is now the largest institution of its kind in the United States, having schools in both Omaha and Kansas City, the largest railway centers of the middle West, and does a national business. Their training is thorough and their course is kept revised and up to date by a high official of one of the largest railway systems of the country who knows exactly what men have to know in order to satisfactorily perform their work. Anyone who is considering entering the railway service should consider the advantages of joining an association which has a national reputation, which is located in large railway centers, which is so intimately associated with large railway systems and whose course is kept up to date by an official who oversees the hiring of a large number of men. Never was there a better time than right now to take up this line of work, and it will pay anyone who is interested in securing a position on the railroad to write the National Railway Training Association at either Kansas City or Omaha and they will explain the opportunities and show you what they are doing and have done for a large number of young men all over the country. Ask for their free book on railroading No. 5.

## JUST THE THING FOR SPRAINS AND BRUISES.

"Evarts P. O., Medicine Valley, Alta., Canada, Feb. 3, 1904. The Lawrence-Williams Co., Cleveland, O.: I used your Gombault's Caustic Balsam on a mare that injured her hind leg so badly that she was unable to rise. I followed your directions and in three days she was on her feet again and is now as strong as ever. I think it is just the thing for sprains and bruises, as it goes direct to the spot. Chas. Leigh." Read the advertisement on page 4 of this issue.

## EXTRA! THRASHING MACHINE NEWS.

Now is a good time for thrasher men to look over their outfit and decide on what new equipment they will need for the ensuing year. Time hangs heavy now. The latest in thrashing machinery is out. A little study of what is on the market will be of decided advantage to the thrasher man when it comes time to buy. The Avery Manufacturing Company, Peoria, Ill., has something decidedly new in an undermounted thrasher engine. It is an innovation that purchasers and users of thrashing outfits have been looking forward to for some time. You can't afford to be behind the times if you are to make good returns for the coming season. Just send to this company for catalog T and kindly turn to page 6, where further announcement is made by the firm.

## GET DAVIS' PRICE.

It will pay every cow owner to write for price, also for a catalog showing the 1907 Davis Cream Separator, manufactured by the Davis Cream Separator Company, 541 North Clinton St., Chicago. Their 1907 model has been improved so that it easily gets the last drop of cream and will skim just as heavy cream as you want to secure the highest prices from creamery companies or may be adjusted to skim a medium or thin cream if desired. The 1907 Davis is the result of twenty years' thought, all worked out by the nine Davis brothers, the manufacturers. You may buy one of these machines direct from their factory at wholesale prices. If you write them today, addressing as above, mentioning The Homestead, you will receive their money-saving catalog No. 118, free postpaid.

## SAVE THE PIGS AND LAMBS.

It matters not how good care has been given the herd or flock, there is always some difficulty at farrowing and lambing time. This is the natural consequence of much of the artificial methods that are practiced in present day stock raising. Now is the time to secure a good forceps for this work. If you have one on hand it is much more likely that you will meet with less loss than if the nearest instrument of this kind was five miles away. It would be impossible to estimate the number of times you can save the cost of a good forceps, so the price, even though most reasonable, should have no consideration. This instrument, besides markers and similar tools, we would advise you to buy of the W. I. Short Manufacturing Company, of Quincy, Ill. Their advertisement appears on page 23 and we will consider it a special favor if you mention The Homestead when writing this firm for orders.

## MAKE TRAINMEN BY MAIL.

One of the latest developments of the correspondence school idea is that now prac-

## DR. QUINN'S VIGORAL TABLETS

## DR. QUINN MEDICAL INSTITUTE,

515 Main Street, (Suite 300)

Kansas City, - Missouri.

ticed very successfully in giving technical instruction in the operation of railway trains through mail lessons. Correspondence schools have been established with such complete courses in railway training that a young man, though absolutely ignorant of railways and train operation, can fit himself easily and rapidly for positions as brakemen and firemen, with the assurance of rapid advancement. There's a world of difference between this modern system of teaching a youth, through easy mail lessons, the fundamentals of railway work, and the old-time way of learning it through hard knocks in the yards. One of the pioneers in this line is the National Railway Training School, of Minneapolis. It has fitted a vast number of young men for railway work, and its president says that the demand from the railways is greater than he can fill. The training given by this school is thorough and effective and the cost to the student is very small.

## IN THE HEART OF COLORADO.

In the heart of sunny Colorado lies perhaps some of the finest farming land in the world. It has everything to its advantage—location, climate and soil. Having a good rich soil and a smooth surface, it is perfectly adapted to tillage, especially since the discovery of Professor Campbell's system of dry farming. This system is nothing more nor less than constant cultivation which preserves a dust mulch, thus preventing evaporation. However, if irrigated land is desired some of this may be found in this region. This land is located in the vicinity of the famous potato and sugar beet growing section near Greeley, Colorado. It is right in the heart of a beautiful country. Now is the time to buy, for land ranges in price from \$7.50 to \$12.50 per acre. If you should take a notion to visit this country you will be shown the finest kind of accommodations. For map and full information regarding this country write to Mr. J. S. Grable, of Greeley, Colo. On page 19 will be found more in regard to this famous land proposition. Kindly mention The Homestead in any correspondence which you have with this firm.

## SOME GOOD TILE IDEAS.

Our readers will find some very good ideas regarding the buying of drain tile in an announcement on page 4 made by the Des Moines Brick & Tile Co., of East Des Moines, Iowa. There is no one rule on the farm that results in so much good as that of being forehanded. There is a busy season on the farm. There is also always a slack season, when a great deal of work can be done that will relieve the strenuousness of the busy season. Our moral is to buy and haul your tile now, while the roads are good. At the same time you can distribute the tile over the proposed drain and when spring comes, be ready to dig your ditch and lay your tile without delay. This tile company makes a specialty of burning their tile to the right degree of hardness. Thus they can safely be exposed to the elements. Furthermore, they will last longer in the ground, and by buying tile of a first-class firm you will avoid getting many damaged, cracked and otherwise inferior tiles. A little book is issued by this company called "Hints on Tile Drainage." They will be glad to mail this to you on request. When writing them kindly mention The Homestead.

## THE MIDLAND TWO-ROW CULTIVATOR.

There is this to say about the Midland Two-Row Cultivator, that it is used almost exclusively on the largest farm in the corn belt—the one owned by Mr. David Rankin, of Tarkio, Mo. Mr. Rankin grows thousands of acres of corn annually and finds that he affects an immense saving in labor by using the Midland cultivator. For a time there was a little feeling against this kind of cultivator, on the ground that it would tear out too much corn. However, with the scarcity of help it has become almost a necessity to use the two-row, and coincidental with this has come marked improve-

## Order Now for Future Delivery The Only Way to be Sure of Getting a Detroit Tongueless Disc Harrow When You Want It

This is to notify farmers everywhere that we are now accepting orders on our Celebrated Detroit Tongueless Disc Harrow for future delivery. And that this is the only way we guarantee to make shipment of Harrows at the time they are wanted.

Let us quote you a price on this Harrow.

We give extra dating on advance orders.

The Detroit TONGUELESS Disc Harrow is the most valuable improvement of the age

American Harrow Co., 1443 Hastings St., Detroit, Mich.

sold like wild fire everywhere last year—its first year on the market. So much so that we were returning orders every day, unable to supply enough machines.

Indications are that we will have even a bigger trade this year, and that we will have to refuse many orders in the rush of the season.

But—to all who send us advance orders we guarantee to make shipment at time requested, until further notice.

in an agricultural implement.

Front truck takes the weight of frame and controls movement of harrow. Double levers make easy handling.

Doing away with the Tongue does away with all side draft—all neck weight—all crowding of team in short turns. Saves horses and turns quicker on the corner. Ball bearings take the end thrust.

Other specifications and points of superiority fully explained in our free catalog.

Write us a postal to-day and get full information in regard to this wonderful new Harrow. Address

American Harrow Co., 1443 Hastings St., Detroit, Mich.

ments in construction. The Midland may be operated by an intelligent boy and with three horses he can do the work of two men and four horses. A booklet has recently been issued on this cultivator. It contains, among many others, ten articles written by experts. These articles are in themselves of great value, and we insist that our readers send for the booklet to the Midland Manufacturing Company, of Tarkio, Mo. It will only be a matter of a few years until all single-row cultivators will be left in the implement sheds or in the fence corners, their place being taken by the two-row. When that day comes you will find the Midland scattered here and there throughout the entire corn raising area of the central West. This is because of its advanced position now in the esteem of corn raisers and because of the determination on the part of the company manufacturing it to keep it to the front. We repeat again that the book on the Midland cultivator will be sent free on application. Address Midland Manufacturing Company, 102 Main St., Tarkio, Mo., and please mention The Homestead when writing.

## CONDIMENTAL STOCK FOODS.

It is probably a fact that the amount of condimental stock foods used at present is ten times as great as it was ten years ago. Where one farmer used stock food then, probably twenty did not; while today the majority of them make more or less use of the best brands. The reason for this seems easy to understand. Conditions have changed; land and feed have become higher in price, and the live stock markets are more discriminating and require a better condition of animals, so that there is not only the need for looking more carefully to a saving of the waste, but there is also the need of quicker

and better results. The stock food of real merit helps the farmer along those lines. It is not a medicine to be given to sick animals because they usually need something more powerful and positive in its effect to cure. It is intended rather as something to make the ration more palatable so that the animal may eat with a better relish and thus be able to digest its regular ration more thoroughly. Its tonic properties have the effect of toning the organs of digestion and stimulating the circulation so that the process of assimilation, the utilizing of the nutriment in the feed after it has been digested is made more nearly complete. An animal will thrive, grow or fatten better on a ration that is made palatable and "tasty" than it will on a ration equally nutritious but less palatable. The stock food manufacturer knows this—at least the good one does—and no one realizes it better than the consistent user of his product. It is in making the ration taste better rather than in making it richer, and it is in furnishing the much-needed tonic to the digestive organs rather than a medicine to cure their diseases when they are well that enables stock food to make animals thrive. A condiment tonic is what the Standard Stock Food Company, of Omaha, Neb., call their stock food, and it would seem to describe the ideal stock food well. A condiment to appeal to the taste of the animal and increase the flow of the digestive fluids so that the process of digestion may be increased, and a tonic to keep the organs of digestion toned up to their best work. They publish an interesting book on the feeding and care of stock, called the "Standard Feeder," which we have arranged to have them send to any readers of this paper who will write them giving the information called for in the advertisement found on page 15 of this issue.

The above is an exact illustration of Crimson Jim, the hog that now heads the herd of Peek & Putman, Tecumseh, Neb. Most of the best sows in their January 23d brood sow sale are bred to this great hog.

# LANDS AND HOMES FOR SALE

## A Fortune in Cuban Acres

This sounds, and is unusual, but it's a fact. A ten-acre farm in Cuba will produce more than one hundred and sixty acres in the north, because the growing season is continuous. Cuba out-classes Southern California in producing fruits and vegetables, often growing from three to five crops a year—and it's nearer eastern markets. Gen. Leonard Wood, ex-Governor General of Cuba, says: "If I were called upon at this time to designate a place where a young man of America could find the greatest opportunity, I would name the Island of Cuba."

The Turiguan Land Co. have a clear and absolute title to the finest plantation on the island. The location is particularly favorable for both rail and water transportation. They are offering small tracts of land for sale at a price which makes it easy for a man of small means to own a profitable farm in Cuba. Write for booklet, etc.

TURIGUANO LAND CO., Majestic Bldg., Chicago.

## We Have Nodaway County Farms FOR SALE.

RANGING in price from \$50 to \$100 per acre. We also have South Dakota, Kansas and Indian Territory land for sale. Can give better bargains than any firm in Northwest Missouri. Write us for list and prices.

There has been a change in dates of the live stock show and convention to be held this month at Denver, Colo. The Western Stock Show will be held January 21st to 26th, inclusive. The American National Live Stock Association will hold their annual convention January 22d to 23d, and the American Wool Growers will meet at Salt Lake City, January 17th to 19th.

There is one sentence that has lived for years on account of its tremendous incoherence. In this sentence every word, every single word, is ungrammatical. The sentence was spoken by a little girl in a sheep pasture. Looking at the flocks she said to the shepherd:

"Is them sheeps youm?"

This sentence holds the record in its class.

"Did you notice with what lofty airs that homely Miss Uppmann carried herself?"

"Yes. It was what you might call 'plain sailing'."

## 10,000 Acres of Land for Sale

In the vicinity of the famous potato and sugar beet growing section near Greeley, Colorado. No finer land in the world. Good soil, smooth surface, a new railroad surveyed into the very heart of this beautiful land. Perfectly adapted to farming, through the plan of Prof. Campbell's scientific agriculture. Under the survey of new ditches, if farming by irrigation is preferred. Prices \$7.50 to \$12.50 per acre. Shown by automobile from Greeley, Colorado. Railroad fare refunded to purchasers. Map and full information sent on application. Address:

J. S. Grable, Greeley, Colo.,

## OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 627, Kansas City, Mo.

### AMONG OURSELVES.

Now that the holiday rush is over and life has become normal again it is a good idea to form plans for making the most of the winter whose evenings are full of possibilities in the way of study and social life. I hope that we shall have letters discussing social life one of these times. Today it is about study we are to hear, systematic study as pursued by Chautauquans. "A Chautauquan," friends:

I want to tell you just a little about Chautauqua work. I have been a member a year, am starting on my second year. A few of us busy housewives started a circle. There are ten of us. We meet with our leader every week, from 2 until 4 o'clock. Some of us live in town, some in the country. I live in the country, but missed only one meeting last year. I am not strong, but I do all the work for a family of six, and two of the children are boys, fourteen and sixteen years of age. This work I find such a change. It is a rest, and something to look forward to. As for study—well, it is not easy for people who have been out of school a long time and have forgotten how to memorize anything or to concentrate their mind, but we pick up a little every time and at the end of the year we are surprised to find how much it has helped. This year the course is the English one, consisting of four books: "What is Shakespeare," "English Government," "Literary Leaders of Modern England," "Rational Living" and "The Chautauquan," a monthly magazine, with a membership book. The price is \$5 for a set. We club together; two ladies pay an additional fifty cents and get two membership books and take the outfit together, making it cost us each \$2.75. I wish you could all enjoy it as we do. I did not tell what we do at our meetings. Well, we are assigned lessons in the books and once or twice a month out of the magazine. Then when we go we have roll call and answer with quotations. Then for our lessons the leader asks the questions. We answer from the book, or better still, if we can remember without reading.

We are obliged to "A Chautauquan" for talking to us about her club. It is little homely bits of personal experience with club life which tell in a circle like this. When busy home women, who have always looked upon club life as a luxury for the idle, or at least for women of few cares, hear from others who do all their own work and not only find time for a study club, but find it like oil on the home machinery—there is a chance that they will begin to wonder if it might be possible for them to taste the pleasure. Do let us have other little talks along this line. I wish that every club woman in this circle could feel that she owes it to her sister-woman to tell what club life has done for her.

Mrs. Massey is turning over in her mind a problem which has been occupying my mind latterly. I have wanted to ask the question she propounds:

Where are our book talks lately? Haven't we had time to read this summer or have we not had room for them in our department? I haven't had much time to read the last year; have read only two books, "White Wings" and "White Heather," by Black, and while they are rather hard to become interested in, yet they are worth reading for the description of Scottish scenery and some phases of Scottish life. You would all become fond of the laird in "White Wings," and admire the character of the heroine in "White Heather." I wish to recommend the "Five Little Pepper" series to those who are looking for books for the children. For good, wholesome reading for children of all ages they can hardly be surpassed.

"Where are our book talks lately?" I echo Mrs. Massey's question. It must not be supposed for a moment that we are not reading; it is only that we have not thought of writing. Next week I shall talk about a little book which has interested me lately. I hope that others will follow the example set by Mrs. Massey and myself.

Have we ever had a visitor from Utah? I think not. I labor under the impression that Hartwig Jensen is the first to greet us from Mormon land:

Have you room for a Utah woman? My home is in a small town in the Sevier valley about 200 miles south of Salt Lake City. When we went to school many years ago we were taught to call this the great Rocky Mountain Highland, and were told that its valleys are higher than tops of the Appalachian mountains. Certainly, the air here is clear and bracing, and rain is not usual. Our farms are irrigated, so are not large. From ten to fifty acres are plenty when the water supply can be regulated. Farming here, as elsewhere, is not pay, for with from three to five cuttings of alfalfa, oats and wheat to tend and thrash, sugar beets to gather, and fruit—of which we raise all kinds of berries, apples, peaches, plums, pears and prunes—we are kept from having many idle minutes. I measured a pear yes-

## YOU FURNISH THE HIDE

We'll do the rest

We are tanners of Horse, Cattle and other Hides and manufacture same into coats, robes, rugs, etc. Hides shaved down and tanned by our process are light, even in thickness, pliable and are moth proof. We are tanners and manufacturers, not merely agents. We own and operate one of the largest and best equipped tanneries in the middle-west and guarantee the high quality of our work.

All about trapping, kinds of Traps, Decoys, Trappers' Secrets. Price \$1.50. To Hide and Fur Shippers \$1.00.

**ANDERSON BROS.,** Dept. 19 Minneapolis, Minn.

terday which was 12x13 inches around and weighed over a pound. Our summers are not hot, so this is not a corn country. The nights are generally cool, and our tent houses for summer use become more plentiful every year as the fresh air finds more followers. But perhaps if you wish I may come again, so need not tell everything on my first visit.

There are numbers of things we would like to hear about Utah. We surely want Hartwig Jensen to pay us another visit.

When Cousin Hardmaster last addressed our circle he stirred up angry feelings among the women, but I do not think he should be denied the privilege of the floor for all that, so I venture to ask a hearing for him again:

At this time while so much care is bestowed on the training of a young woman's fancy, many a promising young man is permitted, for want of a word of caution, to meet his fate, deceived by the charm of a meek exterior. For example, one of my relatives married a woman who it seemed might answer to the name of Sweet Humility. None of us dreamed he would have trouble. Soon after his marriage to her, Cousin Bill, no doubt with a grunt of satisfaction, turned the key on his wife's last will and testament. By its provision he became the prospective owner of eighty acres of good corn land which had been left to her by her father. He also entered upon active duty as present owner, for the reason that he and his wife were one, and he was that one. Bill was a Hardmaster, but he ruled without opposition, and all went nicely until the trouble began over their daughter, Ann. She was a queer child; too quiet as a baby and later, never happy without a book. She used to go about her work with a strained look on her homely face, such as Joan of Arc may have worn when listening to the voices that called her from Domremy. Bill believed in children as an investment. His other children very properly hated school and set to work, eager little bundles of securities to pay their enormous indebtedness to pa. Ann's time was spent in making useless calculations on the margin of Bill's weekly newspaper and sometimes at night after he had gone to bed, he could hear her plaintive voice declaiming: "If X plus A minus A equals B minus A, X equals B minus A." Then Bill would roar in his big, hearty fashion: "Shet up thar and go to sleep." Ann's mother stood right in with her. At last, one day when Bill had been thinking it over, he came to the house, determined to put a stop to the ruin of Ann. His wife was sewing and Ann was drawing circles and bisecting angles on a piece of wrapping paper. They looked up, frightened when Bill strode into the room. He looked straight at Ann and when he spoke his words fell hard and close cropped. Bill was a plain man and had no need to wrap his meaning in verbal foliage. "Go out and carry hay and straw to the cows," he said. Ann quickly left the room and Bill was about to follow, but suddenly found himself confronted by his wife. Bill said she flew at him like a wildcat. (Any attempt on her part to maintain a separate existence was designated by Bill as flying at him like a wildcat.) Anyway, there she stood. "There is no need for Ann to carry hay and straw," she said. Then the battle was on. Of course she couldn't have done one thing with Bill, but for one move that stood her in hand, and she was wise enough to make use of it. The outcome was that Bill was made to send the girl to high school and then to college. It pinched hard, but his wife answered every roar with, "If Ann wants to carry all her eggs in one basket, I'll see that her basket is a good one, and whenever you're tired taking care of the land pa gave me, I'll stop asking you for money." So Bill had to pay to save the land for himself; eighty acres of good corn land. Now watch the result. One day, not long ago, I said to Cousin Bill: "Bill, now that girl of yours is making good money teaching high school, I suppose she'll pay you back the money you handed out for her education." "She ain't paid a cent," said Bill, "nor she won't." But there again Bill's wife is to blame.

Cousin Hardmaster is a little enig-

matical. I wonder if we catch his point? Perhaps someone will talk about this speech of his.

Both maids and matrons are eagerly waiting for a chance to reply to the illi-

nois Bachelor who addressed us in December. Suppose we take them turn about: A maid, a matron, a maid, a matron, beginning with A-Backwoods Girl and Mrs. Als and ending with An Iowa Girl and Donna Juanita:

May I come in? I am a young stranger, but I have become so interested in the letter that I would like to say a word. You can't imagine how much I enjoy the letters and the one I enjoyed the most was by an Illinois man. It sounds just like I have always imagined a big brother would talk (one of the things I have mourned over is that I was not the lucky girl with a big brother) and I wish that there were more boys in the world like him and that more of them would write to the Home. I don't think there would be so many girls led astray if there were more like him. Oh, girls, just remember that if a boy has any respect for you he will treat you so, and if he treats you otherwise never look at him again. As Shakespeare says:

"Good name in men and women, dear my Lord,  
Is the immediate jewel of their souls;  
Who steals my purse, steals trash;  
'Tis something, nothing;  
'Twas mine, 'tis his and has been slave to thousands;  
But he that filches from me my good name  
Robs me of that which neither enriches him,  
And makes me poor indeed."

Don't think me an "old maid," for I'm not out of my teens yet.—A Backwoods Girl.

I have been a silent member of Among Ourselves, but I cannot remain so any longer. So much has been said on the subject of fallen girls, why not have a few words to wayward men? Do girls not have the same right to expect purity in man as he has in woman? I do love to see sweet, pure girls and I love to see a man admire them, providing he is worthy of them. Man expects so much; what has he to give in return for all this purity? That Illinois Bachelor, does he not think those tempted lips are just as good as those that tempted them? I think this side of the subject has just as much room for discussion as the other, for if we had more pure young men we would have fewer fallen girls. Our state penitentiary is full of men serving out a life sentence for crimes less criminal to me than that of ruining a young girl.—Mrs. Als.

Why is it we have so many articles written about "our girls who go wrong?" What about our boys? Does it never occur to our readers that for every girl who "goes wrong," some mother's son has fallen? The girl receives too much of the blame. The sin is as great in one as the other. I do not like the idea of ever laying it to their "youth and innocence." No girl who has reached the years of accountability is innocent unless mentally deficient. It is true, however, that much of our so-called innocence is ignorance. I am a young woman twenty-two years of age. Like our friend, "A Bachelor," from Illinois, I have never married because "the right one has never come around." We should be glad to hear from him again, as one who speaks from experience. I like his ideas. I believe if there were more men like him there would be a less number of "bachelor girls" among our sex. I must say, however, that I always make it a rule never to allow a young man who wants to kiss me good night to call on me.—An Iowa Girl.

I do not wish to hold the floor all the time, but I would just like to answer that manly letter written by that man from Illinois. He says, "I make it a rule never to

go with a girl who will allow me to give her a good night kiss." He is just airing that contemptible old idea that man has cuddled and mollicoddled in his heart and brain since the days of old Adam—the idea that it is right for man to be just as depraved and degraded as he can and enjoy himself until he wishes to get married, and then demand a good and true woman for his wife. Now I hope all the very nice girls in his neighborhood will give him a wide berth, and when he wishes to get married let him choose one from among those he has kissed and kissed and kissed, for by his own confession he has been weighed on the scales and found wanting. For we wives demand just as pure lips from our husbands as a husband has a right to demand from his wife. And pray, why not? In place of giving him credit for his very manly letter, to me he looks just like thirty cents.—Donna Juanita.

In introducing an Illinois Bachelor I commended him for what was commendable in his stand and kept silence regarding the remark which has been justly criticised by some of the friends. There were two reasons for doing as I did. You may discover one of them. Next week we shall hear a young Kansan tell about customs in his neighborhood.

#### HOME AND HOME MAKING.

##### LITTLE HELPS BY THE WAY.

In brief, acquit thee bravely; play the man; Look not on pleasures as they come, but go; Defer not the least virtue; life's poor span Make not an ill by trifling in thy woe. If thou do ill, the joy fades, not the pains; If well, the pain doth fade, the joy remains.—George Herbert.

I found something within me that would not be sweet and patient and kind. I did what I could to keep it down, but it was there. I besought Jesus to do something for me, and when I gave him my will he came into my heart, and took out all that would not be patient, and then he shut the door.—George Fox.

He who is content to walk, instead of run, on his allotted path through life, although he may not so rapidly attain the goal, has the advantage of not being out of breath on his arrival.—Maryatt.

#### FOR THE GIRLS.

Here are some of the things a young girl should learn to do. Many a girl who ought to be a help to her mother around home is an added care because of her careless habits. She should never slam a door, but should shut it softly after her. She should keep her own room in perfect order, and all her garments should be hung up when not in use. She should rise early and at a regular time. She should learn to bake bread and should practice making it, lest she forget. She should keep all her buttons sewed on and the buttons of her little brothers and sisters, also. "She should know where everything is and be able to find it in the dark if necessary. She should comb her hair neatly before breakfast and wear a collar to the morning meal. Never, never should she go with her shoes unbuttoned. She should never mumble her words, but should speak clearly, so that everybody could understand. She should not fidget nor move about uneasily, disturbing others. She should always say her prayers.

#### CHILDISH PRATTLE.

One day Gladys was sent to the store with her friend, Hazel, to buy three lemons. "Do you suppose you can remember them?" asked her mother. "I don't know," said Gladys. "If Hazel can remember one, I can remember two."

A little girl, while reading, came to the word "stop." She could not remember how to pronounce it, and the teacher, wishing to impress the word more forcibly upon the child's mind than by merely telling it to her, said:

"If you were walking along the road and would come to a creek which you could not cross, what would you do?"

"I'd cry," promptly responded the little one.

#### CLEAN CISTERN WATER.

A cistern may be made both frost and vermin proof. Let the beams that support the floor be bedded in the wall or shoulder of the cistern, and covered with lime or cement mortar, leaving a smooth surface all around for the first floor. Cover this with a second floor raised eight or ten inches on a frame of 2x10 joists. Pack the earth closely against this frame and let the top floor extend a few inches beyond the frame all around. To get rid of the sediment which gathers at the bottom of every cistern is easily accomplished by carrying the overflow pipe to the bottom of the cistern, thereby forming a current which disturbs the sediment and carries it into the overflow. The pump, or draw pipe, should have a fine wire strainer at the end and should rest upon a support near the bottom, at least two feet high. A piece of one-fourth-inch mesh of galvanized wire gauze bent into a pipe a foot in diameter and covered with thick flannel cloth doubled makes an excellent filter.

#### THE UBIQUITOUS POTATO.

Someone has said "the test of the clever cook is in the way she handles her potatoes." What housewives did without the potato before that omnipresent article of diet came into common use is a source of wonder to the modern housewife. "Bread, meat and potatoes," "Potatoes, bread and meat," "Meat, potatoes and bread," is the way many weary housekeepers express the menu for the three meals of the day in discouraged accents, forgetting the "infinite variety" of which these three articles in combination are capable.

A few general hints as to the proper way to cook potatoes will not be amiss. About three-fourths of the substance of a potato is water and almost the entire remainder (21 per cent) is pure starch. There is not a particle of fat in the tuber and that is why butter or cream always improves them. Each potato is a little chemical study in itself. Under the microscope it shows as

### Simpson-Eddystone Prints

These are questions to ask in making a dress: Will it hold its color? Will it wear well? Will it pay for the time spent in making?

Simpson-Eddystone Prints are standard for quality, fast color, and long wear. Some designs with a new silk finish. Ask your dealer for Simpson-Eddystone Prints. Three generations of Simpsons have made Simpson Prints.

The Eddystone Mfg. Co. (Sole Makers) Philadelphia.

## The Rue Washer Washes.

THE Rue Washer is the only machine that forces air through the clothes. It is the only machine that employs the same scientific principle used on the old time washboard. It is made of the best quality galvanized iron; it will not dry up and fall to pieces; it will last a life time; it weighs only 50 pounds; it will not tear the clothes; it does the work, better, easier, quicker than any other machine in the market. Every machine is sold under the positive guarantee of the manufacturer. Ask your dealer for it. If he hasn't it write us. We will send it on trial. The price is only \$3 at your R. R. station.

Rue Mfg. Co., Mapleton, Minn.

### FARMERS, IT WILL PAY YOU

to use our FARMER'S FORGE OUTFIT on your farm in doing blacksmithing and repairing. We have high endorsements for the thousands of Farmer's Forges sold direct to farmers within the past ten years in every state and Canada. Our Forges have hearths 24x26 inches, 11 1/4 inch blowers, run easy, and have all the first class qualities of high-priced forges.

**WE POSITIVELY GUARANTEE** our Farmer's Forges to be as large, as durable, do as much work and equal in every way any \$10.00 forge on the market, and as represented or money refunded.

**SPECIAL WINTER OFFER** until March 31, 1907 we offer 1 Farmer's Forge complete \$3.50 or one Farmer's Forge, one anvil and vice combined, and one pair of tongs, all for \$5.25. Ten carloads on hand. Orders shipped promptly. This offer may not appear again. Write to-day. Send stamp for catalogue No. 23 and testimonials.

C. A. S. FORGE WORKS, Saranac, Mich.

a mass of little bags filled with starch grains. The little bags are made of fine skin and as the water becomes hot the starch grains swell and burst the little skin bag. When all the bags are broken the potato is done. The potatoes in the pot should be of about the same size so that all may be done at the same time, else the smaller ones will be cooked to pieces before the larger ones become soft. If large and small potatoes cannot be separated before paring, cut larger ones in halves or quarters.—Ruth Arbogast.

#### Dressmaking and Millinery—No. 551.

Sylvia Silverthorne, Muscatine, Iowa. [All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.] There's a "shortage" in the wardrobe that is not equipped with one or more tasteful wrappers, as well as with a supply of house

[5446—House Gown, 32 to 42 bust.]

jackets intended for home wear, whether for semi-dress or for wear when one is busy with household duties. In giving designs for these, and for the muslin garments that will be "sandwiched" from time to

may be spared for these now that our "best dresses," coats, etc., have been given due consideration.

From among a number of wrapper designs I have selected No. 5446, and I think a glance at the illustration will tell you why. It is simple, graceful, attractive, all in one. Adapted in its outlines to the serviceable materials for every-day wear, or to

[5378—Lingerie Breakfast Jacket, 32 to 42 bust.]

the daintiest fabrics for afternoons and evenings at home. As pictured there is nothing superfluous about it, as even the flounce, being an applied one may be omitted, and yet there is room for any of the usual "adornments" if one cares to add anything in the

way of elaboration. As illustrated the gown is of ring dotted chaille, a material suited to any ordinary wear, and as said before, one may be had at this season at a figure much below its usual price. Then there are calicoes, percales, chambrays, and in the warmer materials—the fleeced fabrics, many of them printed in special wrapper designs. We are so familiar with the list I need not extend it, I think. The gown is made with fronts, backs and under-arm gores. There is a revival in favor of the Watteau effect, and this will be noted in this design. The square neck is a pretty feature, and a very popular one, but if one objects to it because it does not fit up snugly about the throat that is easily remedied by the addition of a narrow frill of the material or lace set about the edge. The elbow sleeves, too, may be lengthened without altering their shape, but in most of the house dresses both the elbow sleeves and the square or round neck are preferred to the cuff and collar finish. Pattern No. 6446 is cut in sizes for a 32, 34, 36, 38, 40 and 42-inch bust measure. Give size when ordering, as failure to do this causes delay in sending the pattern.

One of the prettiest of the breakfast jacket designs is that shown in No. 5378. Putting the name aside, such a jacket is a most convenient garment for home wear when one does not care to "bother" with the shirt waist and its belongings of collar and belt, or in other words, to be "dressed up." By noting the different designs in the illustration one may get an idea of the different developments possible with the pattern. The garment may be made up with or without the collar, and it may be made with pointed or square neck, as preferred. The lace makes the jacket somewhat elaborate for ordinary wear, and for such purpose a frill of the material or a plain finish is preferable. The sleeves are in elbow lengths and may be lengthened, either by means of the frill or by being cut longer,

Every man, woman and child may enjoy the healthiest of pastimes, shooting with the

## STEVENS

The shotguns and rifles that insure good sport. They never disappoint.

**OUR BIG CATALOG FREE**  
140 pages, dealing with single and double barrel shotguns, rifles, pistols. Send two 2-cent stamps to cover postage, and you get it right away. Ask your dealer—insist on Stevens. If you cannot obtain them, we ship direct.

## THE HAWKEYE Grain Grader and Cleaner

**BUILT EXPRESSLY FOR FARMERS**

It is both a grain grader and fanning mill with large capacity and does the best of work. It separates wheat or oats in two grades and cleans them at the same time.

It will clean and grade seed corn.  
It will clean and grade seed wheat.  
It will clean and grade seed oats.  
It will separate oats from wheat.  
It will separate timothy from clover.  
In short, it will do any work required of a fanning mill and grade seed grains besides.  
If your dealer does not handle it, write us for illustrated circular and prices. Manufactured by

**PARSONS HAWKEYE MFG. COMPANY,**  
NEWTON, IOWA.

## PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range  
Among the pleasant fields of Holy Writ  
I might despair.  
—Tennyson.

### The International Sunday-School Lesson.

First Quarter. Lesson II. Genesis I, 26; II, 3. January 13, 1907.

#### Man Made in the Image of God.

Genesis is essentially pictorial. It is a radiant panorama. For the end intended, its scenic method could not have been surpassed. The motive of the book is to reveal the reality, personality, and power of God; to show the material universe as an expression of His mind and a creation of His will; to make plain to him, man's own constitution and his relation to nature and to God. For the purpose to be conserved the form is singularly effective. When all is said and done by way of criticism, the book will still command respect. Theories concerning authorship and inspiration may be altered or discarded, but Genesis will never lose its hold upon the universal human heart.

The most remarkable content of the book is the thought of God in the creation of man. The radiant enunciation of this is the rarest jewel in this casket of gems. It is of practical and priceless value. With dramatic vividness the Father of the world is pictured as coming to a halt in His creative work. In the last of the great and long epochs, He pauses as if to separate and give special distinction to what He is now about to do. The fact that it is the last in order indicates that it is pre-eminent and climatical. The change in the creative formula is also significant. The "let be" used seven times is now changed to "let us make"—it is the "plural of majesty."

It is as if God is solemnly announcing to Himself His intention of creating a vicar who shall visibly represent Himself upon the earth. A being is now to be made who shall be like God: One with whom he can commune at pleasure, and one who by his intelligence and will shall bring everything, animate and inanimate, to its best estate. It pleases Him to create man in a dualism; male and female creates He them. He ordains their multiplication and commissions them to "have dominion." With the solicitude of a father He indicates the kind, quality, and abundance of food prepared for them. And now for the seventh time God spreads His hands in benediction over all His works. In the seventh epoch there is cessation from creative work, and God Himself gives an object lesson and example of respite from toil.

#### Analysis and Key.

1. Genesis pictorial. Effective method: To reveal God; the world as His handiwork, and man's relation to world and God. Theories concerning Genesis discarded, while for substance book is retained.
2. God's thought in man's creation chief content.
3. Man God's vicar.
4. Benediction.

# Marlin

Why is *Marlin* Model No. 17 the best low-priced 12 gauge repeating shotgun made?  
Eliminating the take-down feature in this gun enables us to offer a 12 gauge repeating shotgun of guaranteed *Marlin* quality for less money than any other good repeating shotgun.  
The *Marlin* Model 17 is as strong and sound as the most expensive gun made. The breech-block and all moving parts are of the best *Marlin* steel drop-forgings.  
The barrel is of the best gun-barrel steel, guaranteed to pattern better than 325 pellets in a 30 in. circle at 40 yards, using 1 1/4 oz. No. 8 shot.  
Send six cents for catalogue, which explains all the *Marlin* line more fully than we have space for here.  
**The Marlin Firearms Co.,**  
135 Willow Street,  
New Haven, Conn.

as even in the latter case the shaping need not be altered. The fronts are tucked to yoke depth, but the back is plain, except for the slight fullness at the waist line when a belt is used. This feature may be used or omitted. Also the belt may cross the back and be inserted in the under-arm seams, and tied at the front, allowing the fronts to hang free. Pattern No. 5378 is cut in sizes for a 32, 34, 36, 38, 40 and 42-inch bust measure.  
Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

## DO YOU RAISE CORN?

We will ship you this **Owens Seed Corn Grader and Sorter** on 30 days' free trial. It will help to increase your yield from 10% to 20%. Write at once for full description and prices.

Galesburg, Ill.

## THE POWERS

**Well Boring Machine**  
Bores 100 ft. in 10 hrs. Goes easily through frozen ground. A team of horses pulls it from place to place, and also furnishes power to operate. One man runs the machine alone, the auger drops through center of platform. 18 years use have proven this the lightest draft, the fastest and most economical to operate of any machine sold. Easy terms. Write for catalog.  
**LISLE MFC. CO.**  
Box 26, Clarinda, Ia.

## A MAN SAVED

BY USING A FOLDING SAWING MACHINE.

One man can saw more wood with it than two in any other way and do it easier. 9 CORDS IN 10 HOURS. Saws any wood on any ground. Saw trees down. Catalog free. First order secure agency.  
**Folding Sawing Mach. Co., 158 E. Harrison St., Chicago, Ill.**

#### 5. Exemplary respite from toil.

##### The Teacher's Lantern.

All that precedes in this story of creation is preparatory to man. Separation of light and darkness, waters above and beneath, creation of sun and moon, of life animal and vegetable, all is an orderly approach to man as the crown of all.

This is assurance of the dignity of man's station and the work of his being. It is his coronation at the hand of his Creator.

What constitutes man's likeness to God? It cannot be anything in physical nature, for God is Spirit without body. The likeness inheres in man's moral and intellectual faculties. He thinks, wills, loves. This power, not shared by any other creature, makes him to "lack little of being God."

Comradeship was in the mind of God in the making of man. God wanted company.

"Likeness and image" is simply rhetorical. It is not two different meanings, but duplication of the same meaning for emphasis.

Man's dominion over nature was never so great as at the present day. With retort, spectrum, and telescope he is wresting nature's secrets from her and subduing her forces to his use. The universe affords a limitless arena for man's skill and prowess.

We have to talk of God as if He were a man. Such is the limitation of language. So the narrative speaks of God as resting, although He can never be weary. His rest was exemplary.

#### HOW TO BUY AND KEEP TOOLS.

Years ago almost any old tool was good enough for home duty—a hatchet, a hammer and a screw-driver sometimes comprising the entire outfit. Nowadays, however, everyone sees the necessity of having a fairly complete set of tools, and economy as well as experience has taught us to get good tools.

To meet the demand of the household and to remove the risk of tool buying, the Simmons Hardware Company came to the rescue with their Keen Kutter Tool Cabinets.

These are beautifully finished oak cases fully equipped with every tool necessary or convenient for household use, each one belonging to the famous Keen Kutter brand, each one guaranteed perfect in quality, temper and efficiency. The Simmons guarantee removes all risk. If any flaw develops or any imperfection shows itself the tool will be replaced or money refunded.

This is the only tool cabinet containing a complete set of tools under one name and trademark, each of which is

guaranteed. The ideal way to buy and keep tools is in the tool cabinet, and the only safe tool cabinet to buy is the Keen Kutter.

Keen Kutter Tool Cabinets and Boxes come in all sizes, containing large and small outfits, ranging in price from \$7.50 to \$100.00.

In every cabinet are racks and hooks for each tool and drawers for materials and accessories.

Every cabinet contains in different varieties and numbers such tools as Saws, Braces, Bits, Chisels, Gimlets, Awls, Planes, Hammers, Hatchets, Files, Pliers, Screw-drivers, Wrenches, Nail-sets, Reamers, Rules, Squares, and everything that is necessary for ordinary work about the home. Keen Kutter Tool Cabinets are for sale at the leading hardware stores.

The Keen Kutter Tool Cabinet Booklet will be sent free if you drop a post card to Simmons Hardware Company, St. Louis and New York, U. S. A.

# EARLY LAMBS

Early lambs will bring big money if you save them, and get them to market at the right time. Give them a little of Dr. Hess Stock Food in the grain they eat—then, if you keep them warm and dry, there will be no losses, and they will be "fit" at the very moment when prices are best.

## DR HESS STOCK FOOD

the prescription of Dr. Hess (M. D., D. V. S.) contains bitter tonics for the digestion, iron for the blood, nitrates to expel poisonous material from the system and laxatives to regulate the bowels. These ingredients are recommended by Professors Winslow, Quitman, Finlay Dun, and the most noted medical writers in the country. It is not a food in itself, but makes all the food of the farm produce more milk, more meat and more work by increasing digestion and regulating the system generally. Sold on a written guarantee.

100 lbs. \$5.00

25 lb. pail \$1.60

Smaller quantities at a slight advance.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic, and this paper is back of the guarantee.

If your dealer cannot supply you, we will. DR. HESS & CLARK, Ashland, Ohio. Also Manufacturers of Dr. Hess Poultry Panacea and Instant Louse Killer.

## Cancer Cured No Knife, No Pain

People I have cured of cancer prove the astonishing results of my treatment. Peter Keagan, Galesburg, Ill., writes: "It is only a question of time—I must die." Doctors said "no hope." My new method was used and to-day Mr. Keagan's cancer of the throat is healed, and he is well. I have made wonderful cures without pain, operations, sticky balms, oils or plasters. My treatment is clean and wholesome. It gives instant relief from the smarting, itching and terrible burning pain, destroys the offensive odor and has cured cases given up by the family physician and specialists. If you have cancer or have a friend who has cancer, write me to-day. Full information, proofs and advice given without charge. Address DR. RUPERT WELLS, 2165 Kadol Bldg., St. Louis, Missouri.

## Sell 10% More Hogs and Sheep BY USING OUR

**DIG FORCEP** **HOG HOLDER**

Saving pigs and lambs; any one can use it. Hog Holder holds any size (around upper jaw, hand above) with two fingers. N. R. Hog Tamer stops rooting all sizes. Ear marks and numbers all stock. Price Forcep and Holder, \$1.00; Tamer and Marker, \$1.00, or both \$1.75, guaranteed and postpaid. W. L. Short Mfg. Co. Quincy, Ill.

## "MYSTERIES OF MEXICO."

A STORY of the Lost Bullion Spanish Mine, formerly worked by the Spaniards with slave labor. This interesting booklet contains much valuable information for the investors; also tells the story of the Conquest of Mexico, and romances of lost mines. Beautifully illustrated and bound in handsome crash cover. Free. Write today.

C. L. BLACKMAN & CO.,

### SHEEP.

## Clover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growthy rams and ewe lambs. Also 150 beautiful yearling ewes bred to 265 to 305 lbs. champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

Chandler Bros., Kellerton, Ia.

Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

## NORTON FARM SHROPSHIRE

FOR 30 days special prices will be made on one or a carload of choice recorded ewes, bred. Also Feb. ram lambs. Wish to make room for new importation. D. M. NORTON, Sanborn, Iowa.

### SHEEP.

20 REGISTERED Shropshire ewes, \$20 to \$35 each. W. C. Frazier, Atlantic, Cass Co., Iowa

Registered Shropshire Rams and Ewes of the best breeding. Willard Miller, R. F. D. No. 2, Anita, Iowa.

## OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

### CARE OF THE BREEDING EWE.

Some of the same principles apply in the care and management of the various classes of breeding stock. You may take the brood mare, the sow, or the ewe and each ought to have plenty of exercise. This is certainly one of the fundamental principles of success. The ewe that will not get out and rustle is likely being fed too much and her ration should be cut down.

We have known instances where men made a practice of hauling their fodder for the breeding ewes to a distance of a quarter of a mile from the farm buildings. This compelled the sheep to take exercise, and the good results that followed at lambing time compensated for the labor involved in hauling the fodder.

When it comes to the matter of feeding the ewe each man must utilize to the greatest possible extent the foods that are available on his farm. The danger is, however, in the central West that too much corn will be used. A ration of oats once a day through the winter, just what the ewes will clean up nicely, together with pasture and fodder, ought to bring them through in good shape. If there is a little clover hay so much the better, because it is somewhat laxative in its effect and it also is excellent because of the flesh-forming constituents which it supplies.

Nothing is worse for breeding ewes than to shut them in warm quarters. If they are under roof out of a draft and also out of snow and rain storms that is about all the protection they need. Of course their quarters should be dry, but it is a mistake to put them into a barn or shed and close the doors. All classes of animals need plenty of fresh air, but sheep especially seem to thrive on it.

### THE FEEDING TYPE.

The feeding type of sheep is discussed by Prof. John A. Craig in his book on "Stock Judging." Among other things Professor Craig says:

In considering the type of sheep which gives the best results in the feed lot, we have only to have in view the type that gives us the greatest vigor, insuring an active digestion and the most constitution, so that nothing may upset the sheep in the rapid progress desired. In this connection it will be well to report the results of an experiment made at the Wisconsin Experiment Station by the writer: Two lots of lambs were selected; the one bred by the station showing in fleece and form a high degree of merit for grade sheep. These lambs were bred from high-grade ewes and the rams had been selected at high prices for some years to make the best blend with the ewes. The lambs were very uniform as to type and they showed what might be called an unusual degree of merit for ordinary feeding lambs. To compare with these, some lambs native to northern Wisconsin showing the type common to that territory were put upon similar rations. The representatives of both these kinds of lambs, in addition to having the same kind of food, were kept under identically the same conditions, putting both lots of lambs in the feed lot at three cents a pound and taking them out at four cents at the end of the feeding period. The well-bred lambs of good feeding type after paying for the feed that they ate, at current

## A Boy and Three Horses Can do the Work of Two Men and Four Horses

When your corn needs cultivating it needs it bad and you know that you lose money every day it is left uncultivated.

It is true that with plenty of help it is no difficult matter to cultivate every acre at just the right time.

But—

When you need help the very worst way it is scarce and you know how hired help cuts into your profits.

We have just issued a book on the Midland Cultivator. Those who have seen it say it is one of the most interesting and instructive books ever issued for corn growers.

There are ten articles, each one written by an expert in his particular line. Some of the writers are: C. L. CENTER, Professor of Agriculture Illinois University, A. F. WIANCKO, of the Lafayette Experimental Station, O. E. YOUNG, Secretary Michigan Corn Improvement Ass'n and F. W. TAYLOR,

## "MIDLAND" TWO ROW CULTIVATOR

Now, if you know of a cultivator that would enable you to get on with less help you would be interested, wouldn't you?

Such a machine would pay for itself in one year.

Any young boy with three horses on a Midland Two Row Cultivator can cultivate as much corn as two men and two teams using one row cultivators.

That's the kind of cultivator you want, isn't it?

Chief of Departments of Agriculture and Horticulture, World's Fair, St. Louis

This book is FREE to every corn grower who is using one row cultivators and will write and tell us so.

Better send for a copy today. Learn more about the Midland and read the most interesting articles ever written on corn growing.

MIDLAND MFG. CO.

102 Main St.

TARKIO, MO.

prices yielded a profit of \$1.13 per head; while those representative of the poor type being indiscriminately bred only yielded a profit of sixty cents per head. The lambs of the best type ate more food, but they made more than a corresponding gain, and the chief point from each one of them was just twice as much as that from those being of inferior type.

It is just the same in sheep as it is in other classes of animals. The use of a well-bred sire means increased prepotency over the common individual, and this will tell on a crop of lambs. Not only will the well-bred lamb make better gains than the common kind, but he is worth more per pound on the market, for the reason that his carcass cuts out better.

### SALT FOR SHEEP.

Experiments conducted in France some time ago throw a little light on the value of salt for sheep. Three groups of sheep were fed the same food, but the first lot received no salt. In the second lot each sheep received half an ounce daily, and in the third lot each sheep was given an ounce of salt daily. For a given time (not specified in the results) the sheep in the second lot made a gain of four and one-half

pounds more than those that received no salt and about one and one-quarter pounds more than those that received the one ounce daily. The sheep that received salt produced one and three-quarter pounds more wool of a better quality than those that received no salt.

### A Good Farmer's Forge.

A good forge will save its cost price several times over every year on any farm. Much of the work that is ordinarily sent to the blacksmith shop can be done at home if one has a forge at hand. You then not only save what you would otherwise pay to the blacksmith, but you save the time going and coming, which is often worth more than the work itself. This is especially true in a busy season. The C. A. S. Forge Works, of Saranac, Mich., is offering a forge for \$3.50, and their advertisement will be found on page 21 of this issue. Their combination offer of forge, anvil and vice and one pair of tongs for \$5.25 is certainly a bargain. This liberal offer is only good for a short time, and our readers should take advantage of it at once. Ask the company for catalog No. 23, which will be furnished free. Address C. A. S. Forge Works, Saranac, Mich., and please mention The Homestead when writing.

### HARVEST YOUR OWN ICE CROP.

It pays immensely to harvest a crop of ice if one is located so that it can be done conveniently. With your own supply available you are entirely independent of the limited capacity of a dealer's storehouse or any tendency on his part to raise the price of ice when most needed. Then think of the advantage of having all the ice you want—whenever you want it—for dairy and creamery, the family refrigerator and the other uses of farmers, dairymen, marketmen and housewives. Ice can be had every winter in our northern climates, and it is really an easy matter to get in a crop with the well-known Dorsch double-row ice plow, made by Messrs. John Dorsch & Sons, of 216 Wells St., Milwaukee, Wis. This plow is the most practical ever constructed and does the work of twenty men with the usual hand saws. Strongly built, quick in operation and quite reasonable in cost. It cuts eight to ten inches deep—any size cake desired. Anyone can use this make of plow and it will be worth while for our readers to send to the firm mentioned for one of their free catalogs and a fund of valuable information on ice harvesting.

### A LIBERAL OFFER.

The Dr. Quinn Medical Institute, of Kansas City, is offering the well-known Dr. Quinn remedies to our readers, by mail, at the very nominal price of \$1. These are old, tried remedies and will, no doubt, do what they are recommended to do, as Dr. Quinn has cured thousands with these preparations. See the advertisement on page 18.

Sir Albany 9th 180123, a great Hereford bull. One of the great show and breeding bulls of the breed, winning first at Interstate Fair at Sioux City, second at Minnesota State Fair, 1906, as a two-year-old. Bred by C. A. Jamison, Peoria, Ill., owned by B. F. Clark, Albia, Iowa.

## FIELD NOTES.

If you are in the market for a good Duroc Jersey or Poland China sow, write to Mr. Gerald Wilcox, of McCook, Neb. He has about seventy-five good gilts and yearlings to offer, bred or open, and they are of very

son of the Cruickshank bull, Banner Chief. It will pay anyone wanting a bull to go and see these.

Mr. J. A. Penn, of Alta, Iowa, in sending date of February 28th as that on which he will hold a public sale of Poland China aows and Short-born cattle, writes: "I am going to have a Poland China sow sale, at which time I will sell about thirty-five aows and I will close out all of my Short-horns at the same time. I have about thirty-five head."

If any of our readers have not bought their Duroc Jersey boar they should write Mr. Grant Summers, of Malvern, Iowa. He has a few good ones sired by Lottie's Top Notcher (a son of the World's Fair boar, Top Notcher Again), and one or two that are sired by the Iowa State Fair winner, Crimson Wonder Again. Mr. Summers is offering some bargains in these boars.

Mr. F. E. Garrett, breeder of Duroc Jersey swine, of Lohrville, Iowa, writes under date of January 5th: "I have just sold a one-half interest in I Am a Wonder to Mr. W. H. Hudson, of Lohrville, Iowa, for \$250, making him a \$500 hog. I will have several sows in my sale on January 25th bred to this boar. He is a litter brother to the sweepstakes hog at the Iowa State Fair, 1906."

Mr. L. P. Sargent, of Gibbon, Neb., has a 120-acre Wood River Valley farm, located five and one-half miles northeast of Gibbon, on which he is making a price in his advertisement that appears on page 19 of this issue. On this farm there is a good house, barn, double corn crib and granary, chicken house, hog house and other improvements. Write Mr. Sargent for full description of his farm.

A first-class Red Polled bull, eleven months old, is offered for sale on page 23 by Mr. A. H. Jeffrey, of Indianapolis, Iowa. The bull is of good breeding and has been growing right along from birth. He promises to make a very good sire, as he has the right conformation and shows all the character that could be desired. Farm is only two miles out of Indianapolis. Price is \$60 and at that figure he should sell quick.

Mr. F. T. Wells, of Bristow, Iowa, in re-mitting for advertising already done, writes: "I have some good Poland China sows for the trade and they are bred to a son of Standard Chief. I think he is a better hog than the one I sold the experiment station of Minnesota for \$100. I am getting my herd of Angus cattle shaped up and am going to change business and will offer the whole herd at private sale in lots to suit buyer."

Mr. Harry R. Smith, of Maynard, Iowa, proprietor of the Willowdale herd of Poland China swine, is offering some young stock of both sexes for sale in his advertisement that will be found on page 35 of this issue. Mr. Smith, however, is reserving all of his old sows that are old enough to breed for his public sale which will be held February 13th. Send for his catalog giving full information. He also has some pure-bred White Wyandotte cockerels that he is offering for sale.

Those of our readers who are looking for land in South Dakota, Kansas, or Indian Territory will be interested in the advertisement of Messrs. Bingham, Bolin & Johnston, of Maryville, Mo., that appears on page 19 of this issue. They also have Nodaway county farms for sale that range in price from \$50 to \$100 per acre. Nodaway county is one of the best counties in Missouri, and farms purchased at these prices in that county may be considered bargains. Write them for lists and prices.

In this issue of The Homestead appears the advertisement of the Sioux City Seed & Nursery Co., of Sioux City, Iowa. We take great pleasure in commending these people to our readers. They have done business continuously at Sioux City for twenty-two years and are counted among the most reliable of the Sioux City business firms. By square dealing they have built up a large trade. They are issuing a new and very fine nursery catalog, which they will send free on application.

Mr. James Fisher, breeder of improved Chester White swine, of Eastman, Wis., in sending new copy for his advertisement, reports that he is all sold out of stock, but that he is now receiving orders for Chester White pigs from large, matured dams to farrow in March and April, the same to be shipped when three months of age. Mr. Fisher announces that he will pay express and ship these pigs C. O. D. if breeders ordering from him so wish. His advertisement appears on page 33.

Messrs. John H. Tryon & Son, of Lyons, Neb., will make a Duroc Jersey brood sow sale at their farm on February 27th, at which time they will sell four Orion sows, one of which is as good as was ever sired by that famous old boar. They will also sell three Proud Advance sows, and a lot of others sired by Trone's Oom Paul and Carroll Boy. The most of these will be bred to the noted boar, Junior Jim. Everything in the sale will be yearlings or aged sows, except two gilts, and it will be one of the best offerings of the season. Remember the date and arrange to attend the sale.

On February 6th, Mr. Geo. H. Miller will make a public sale of Short-horn cattle at Harlan, Iowa, at which time he will sell fifty head of well-bred cattle. He is offering an exceptionally good bunch of young bulls, all sired by his Scotch herd bull, Gloster Bad. There will be a choice lot of young heifers in the sale and a lot of splendid cows. Many of these cows will have calf at foot by Gloster Bud and others will be in calf to him. Mr. Miller is one of the best-known breeders in Shelby county and he is selling a good bunch of useful Short-horns. Write him and get your name on his list for catalog.

Mr. Frank E. Hankins, breeder of O. I. C. swine, of Sciota, Ill., writes: "At present the pigs are doing fine and sales are very good. I have on hand some very fancy gilts that I am breeding to my big herd header, Duke, and will offer them for sale at reasonable prices. I received a letter recently from Mr. W. J. Honck, of Cement, Okla., as follows: 'The three pigs arrived at Cement, Thursday evening at 4:15 p. m., and I want to say I am very well pleased with them, as they arrived in good shape.' I have sent fifteen pigs by express this week to different points in Kansas, Oklahoma, Missouri, Wisconsin, Iowa, and Illinois. I have a number of extra good pigs to ship yet."

Mr. Harkin's advertisement appears on page 33 of this issue.

Mr. J. W. Pittman, of Lohrville, Iowa, names February 27th as a date on which he expects to hold a Duroc Jersey bred sow sale. He writes: "On February 27th I will sell thirty matured sows, some by Orion, others by Proud Advance, American Royal, Crimson Wonder I Am, Young John West Side (brother to Crimson Wonder), Tientsin, and others, including twenty granddaughters by Orion by three different sons of old Orion, that will be bred to sons of sweepstakes hogs. I have a nice bunch of sows and am receiving very satisfactory letters from those who bought of me last season."

The Pickert-Hammond Land Company, of Houston, Texas, control 1,000,000 acres of land on the Gulf coast. It is fine level prairie, black loam, one to six feet deep subsoil. This land will be sold in 150-acre lots and up from \$6 to \$18 per acre, according to size of tract and location. These lands are all within two to six miles of railroad, school, churches and rural mail delivery. The soil produces alfalfa, corn, oats, cotton, sugar cane and all kinds of vegetables and fruits without irrigation. Crops can be grown every month in the year. Write the company for their free book, "Opportunity," which will tell you all about these lands.

Messrs. G. P. Tyrell & Son, breeders of Duroc Jersey swine and Short-horn cattle, of Oxford Junction, Iowa, in remitting for advertising already done, write: "Our male pigs are all sold and we are turning down orders every day, as each sale brought others from same locality. We are answering inquiries for gilts. Can spare twenty, bred for April farrow. As to the Short-horns, the roan bull is sold and the man wrote he is well pleased. We have some red yearling bulls, long yearlings, at farmers' prices to make room for the coming one-year-old fellows. Wampum calves are coming from Sittytton Sort heifers and everything looks extra and the herd is worthy of inspection."

On February 27th, Mr. J. W. Pittman, of Lohrville, Iowa, will make a public sale of Duroc Jersey brood sows at which time he will sell forty head of well-bred and high-class animals. Among these will be four daughters of Proud Advance, three daughters of old Orion, two daughters of Crimson Wonder I Am, four daughters of American Royal, besides daughters of Tientsin, the sire of Ruberta, the first-prize sow at the Iowa State Fair, and West Side, a full brother to Crimson Wonder. He will also sell several granddaughters of old Orion and Nebraska Belle. Mr. Pittman has always been one of the best buyers of the very best in Duroc Jerseys, and he has the leading blood lines in his herd. We will have more to say of his herd and his February sale in later issues of The Homestead.

Messrs. I. Barr & Son, of Davenport, Iowa, who, for the past twenty-five years, have been breeding Short-horn cattle and have drifted mainly into the Scotch and Cruickshank tribes, maintain the largest collection of Scotch cattle to be found in any herd in America. The families represented are: Victorias, Secret, Lavender, Mysie, Lovely, Miss Ramsden, Lancaster, Brawith Bud, Duchess of Gloster, Nonpareil, Violet, Claret, Mina, Queen of Beauty, Acorn, Butterfly, Orange Blossom, Princess Royal, Jessie, Rose of Strathallen and other Scotch tribes. The sires in service are: Imp. Prince Oederic 136398, Champion of Riverdale 245602, Royal Bud 220272, Golden Royal 234534 and Orange Champion 3d 264463. Anyone wanting a good, low-down, blocky, beefy bull of best Scotch blood will find a choice collection to select from (ranging in ages from one to two years).

Messrs. Blackmer & Nelson, of Albert Lea, Minn., breeders of milking Short-horn cattle, write that the demand for their class of cattle is even stronger than in the past and they are unable to supply the demand for good yearling bulls from dams with milk records. The demand in Iowa for this class of cattle is such that there is no doubt but that very profitable business awaits the progressive farmers who establish full blood breeding herds of this popular and useful kind of cattle. Many of our farmers milk their cows and feed out the steer calves and these farmers want bulls that will give them heifers that will milk profitably, as well as thrifty steers that will take their corn to market. Messrs. Blackmer & Nelson lay claim to having the largest breeding herd of milking Short-horns west of the Mississippi, and can furnish cows and heifers to those wishing to establish breeding herds. They will be glad to answer correspondence and will welcome visitors to their farms near Albert Lea at any time. See their advertisement on page 33.

Mr. C. F. Shaffer, the Poland China and Short-horn breeder, of Wellman, Iowa, in ordering change of advertisement, writes: "My Poland Chinas and Short-horns are going into winter quarters in fine shape. I have 100 of the best fall and summer pigs I ever bred—fifty-four hogs and forty-six gilts. They are sired by Black Chief and G's Perfection Jr., two of the best breeding hogs I ever owned. My pigs have good bone and length, broad backs, well hammed down to hock, with neat head, ear and nose, also fine black, silky coats of hair. I can furnish pairs and trios not akin. Now is the time to start a young herd. Hogs are high and will go still higher during 1907. I also have a fine lot of young bulls, all deep reds, of the low-down, beefy, blocky kind, with well-sprung rib and neat head and horn. They are the get of my prize

# Let Me Quote You A Price ON TIME

(We Pay the Freight)

## On The AMERICAN Manure Spreader

We will send you the famous American Manure Spreader direct from our factory, because we've stopped selling this celebrated machine through jobbers and dealers. You save their profits now. You get the wholesale factory price on the best Spreader made—not a "cheap" Spreader, but the best one in the market.

### I Don't ASK You to Send Cash

as we send you the American and you pay us on easy, liberal terms—letting the Spreader really pay for itself as it earns for you—after you've tried it free. You now get the American, recognized as by far the best Spreader, for no more than you must pay for an ordinary Spreader. It is the

### Lightest Draft Spreader Made

That saves your horses. The machinery works only when you start it in your fields—is at rest as you drive out. That saves wear and tear on the Spreader. And you ought to use a Manure Spreader. An American Manure Spreader will make your manure cover more ground, your ground grow more crops, your crops bring more money, and it will make your land worth more dollars per acre. The American has 40 per cent more exclusive features than any other Spreader. I want to tell you about

these practical exclusive features which make the American the only Spreader for you to buy at any price. The American is the Standard of the world. We allow

### 30 Days' FREE Trial

on every American Spreader made. We want every customer to see and try an American Spreader. We want every customer satisfied and to prove that our spreader is just as represented, therefore we say

### Test It in Your Own Fields

If it is not just as represented you can return it. We pay all freight—BOTH ways—trial being FREE.

My low price is for the American Manure Spreader delivered at your station—freight paid—including free trial—giving you the dealer's and jobber's profits, and—

### If Satisfied—Take Your Time Paying

for your American Manure Spreader. Now, I want you to know my new low price and I want you to know all about the American Spreader.

### Write Today for My Price

and I'll send it promptly. Also my free catalogue and booklet, which tell you all about the American Spreader, and Fertilizing. You'll be interested in both. You'll be glad you wrote. A postal will do. Don't buy until you investigate this. Take your time investigating, but—WRITE TODAY.

**W. W. Collier, Gen. Manager**  
**American Harrow Co., 145 Hastings St., Detroit, Mich.**

bull, Laurel Knight, and Scotland's Pride. I am selling my stock at farmers' prices. Look up my advertisement on page 35 and write me for prices and description. Pictures of herd bull and boar free on application.

Messrs. Ruebel Bros., breeders of Poland China hogs and Short-horn cattle, of Rockwell, City, Iowa, write: "We are all sold out of boars. We recently sold our herd boar, Iowa Chief, that we had advertised in The Homestead to Mr. Martin Emmick, of Lidderdale, Iowa, to head his herd. We are getting ready for our brood sow sale February 12th, and will have our catalogs out February 1st, when we will be pleased to send them on request. We will have the best lot of brood sows we ever offered at public sale. We have sows sired by Chief Perfection 2d, Keep On, Mischief Maker, Chief Tecumseh 3d, R's Keep On, Iowa Chief and other noted boars. They are the best individual lot that will go through a sale ring in this part of Iowa this winter. Our motto is 'Size with Quality' and we can prove it sale day. We have sold our farm here and purchased the Pleasant Hill Stock Farm of Mr. E. R. Stangland, of Marathon, Iowa, and will move to our new location about March 1st, when we will be better fixed than ever for breeding Short-horn cattle and Poland China hogs."

On January 24th Messrs. Sol Frank & Julch Bros. will sell a choice lot of brood sows at Mr. Frank's farm, Sioux City, Iowa. There will be thirty head, including Marie Antoinette (the first-prize yearling at Sioux City, defeating the Des Moines and Minneapolis first-prize yearlings there, and many hogmen would have made her sweepstakes sow of the show). It is seldom one finds so smooth and mellow a sow. She is certainly a great prospect for a purple ribbon winner for next year. She is safe in pig for an early litter by King Solomon, one of the second-prize litters of 1905, every boar of which went to head pure-bred herds. This mating should be something that's right, for, considering the time Mr. Frank has been breeding hogs, he has made a reputation to be proud of. His entire herd is in the pink of condition, as they are fed—but little corn. It is certainly a lot of sows that should interest both farmers and breeders. The breeders' meeting being at Sioux City, January 22d to 24th makes it very convenient to attend both, with good connections to attend the Stevenson & Cantine sale the next day. Write for catalog at once to Mr. Sol Frank, Sioux City, Iowa. Please mention this paper when writing. Mr. Frank's advertisement appears on page 28.

On January 25th Messrs. O. R. Stevenson and Lee Cantine, of Quimby, Iowa, will offer forty bred Duroc Jersey sows for sale. This is the best lot that was ever offered at the Cherokee farm. Among the good ones are four gilts sired by Keep On, their dams being Lucy Advance, a litter sister to Proud Advance and a full sister to Advancer. This is breeding that should make any breeder want them. Another gilt in the sale is sired by Top Notcher Chief, dam Nellie Advancer 2d, the top gilt at Messrs. Johnson Bros. & Newkirk's last February sale. She is strictly a show gilt, bred to Crimson Wonder Jr. This mating will not disappoint anyone. There are two gilts sired by Pericles 4499 that are extra good ones. Their dam, Miss Logan 9th, is a well-bred Ohio Chief sow, both safe to the service of Crimson Wonder Jr. The entire lot of sows are in excellent condition, not loaded with fat, but large and growthy, the kind that makes good brood sows. Further particulars will be given next week. Remember Mr. Sol Frank's sale on January 24th. Good connections from Sioux City to Quimby. Write for catalog at once to Mr. O. R. Stevenson or Mr. Lee Cantine, Quimby, Iowa. Please mention The Homestead when writing. Messrs. Stevenson and Cantine's advertisement appears on page 28 of this issue.

Messrs. Taylor & Jones, breeders of Percheron, Shire, Belgian and Coach horse, also Short-horn cattle, Williamsville, Ill., write: "We reported lately quite a list of our prominent sales of draft stallions and our report again some recent sales of much importance on account of the high excellence of the animals. Mr. S. E. Larabee, a hanker of Deer Lodge, Mont., came here while attending the International and being in search of the best money could buy, he took the first-prize two-year-old Shire stallion at the recent Illinois State Fair. Mr. James Cale, of Montrose, Iowa, bought an extra good, thick, two-year-old American-bred Percheron stallion to use on his pure-bred mares. Mr. C. L. McClelland came here to buy a ton Percheron for use on his big farm at

Foosland, Ill., and was so well pleased with our horses he bought two stallions and three fillies. Mr. Thos. Davin, Tower Hill, Ill., took a Shire and Percheron stallion, and Kendall Bros., Metcalf, Ill., got an extra good Percheron, while Mr. Curtis Neal, Newman, Ill., took a very big-class Imp. Shire horse. Mr. L. K. Foster, Shirley, Ill., bought of us three years ago a Percheron, and two years ago a Belgian, and now comes back, after both the other horses have proved entirely satisfactory, and buys a Shire to stand with them. We are proud of the fact that our customers keep buying stallions of us, which prove they have dealt with us satisfactorily."

Mr. J. B. McAllister, of Palo, Iowa, breeder of Poland China swine and Mammoth Bronze turkeys and Barred Plymouth Rock chickens, writes: "The Poland China sows I am offering for sale are the best bunch I ever raised. They are sired by H's T. C's U. S., a great, broad-shouldered, deep-hammed hog; one of the best all round hogs and best breeders that I ever saw. These gilts are of April farrow, all out of old sows and large litters. They have broad shoulders and deep hams, very nice heads and ears, mostly black in color, with white feet and some in face, good length and bone, right up on feet. The making of extra choice brood sows are and will be bred for April and May farrow, to an extra choice young boar. They will weigh right around 200 pounds each, in just nice breeding shape. I am pricing them at \$25 each and hold until I consider them safely bred. As I expect to move to South Dakota, am offering the entire herd for sale without reserve, also by great boar, H's T. C's U. S., at \$35, not half price for him, but I cannot use him longer. I have sold forty-eight Barred Plymouth Rock cockerels the past two weeks, but still have left a choice lot of them; nice, clean-colored fellows of the noted Eclipse strain for sale. I should be pleased to hear from any of your readers in need of Poland China sows of the good type or Barred Plymouth Rock cockerels." Mr. McAllister's advertisement appears on page 35 of this issue.

Messrs. Sandquist Bros., of Oakland, Neb., breeders of Poland China hogs, writing in regard to their sale of bred sows, on March 7th, say: "We are going to put in some extra fine sows. They have the size and bone so much desired in the West now and there will be sows good enough to go into any breeder's herd. They will be bred to Perfect Quality 36322, pronounced by competent judges one of the good hogs of this state. That expert judge of a Poland China, Mr. Harry Spurling, called him a good one when he was here last July and did some expert work for us. Others will be bred to M's Top Chief, a son of the international champion, Top Chief, and half brother to the great \$3,000 Kansas hog, Grand Chief. We are proud to be the owner of this great hog and have had a very flattering offer for him from a well-known Missouri breeder. He has demonstrated his value as a sire by siring some of the good hogs of the country. He is an exceptionally well-put-up hog, has ten-inch bone, wonderful hams and a spring of rib not found in every hog. Others will be bred to an outstanding good son of the half-ton hog, Expansion, and as to size, we believe he will not be far behind his noted sire when fully matured and we think him a good prospect for a crack good yearling. He is very growthy, heavy boned, broad head, neat ears and a smooth, glossy coat with ideal markings. He is a fine prospect for a good sire and lucky is the man who will get a sow or gilt bred to him. The man who is tired of the roly-poly Polands will do well to attend our sale on March 7th and secure some of this valuable blood."

Mr. F. A. Edwards, proprietor of the Bluffview herd of Short-horns at Webster City, Iowa, writes under recent date as follows: "Cattle at Bluffview are coming through the winter in nice shape; there is not a day but what they go to the pasture, the same as they did in summer. The blue grass along the river on the bottom pasture is fine. We aim to keep the cattle out in the open as much as possible. Have had thirty calves this fall and never lost one. By the way, the calves from Secret Viscount are just fine; great strong fellows that are up and sucking in a short time. The cattle going in the sale January 29th are doing splendidly, though they will be only in nice breeding condition. Will sell an extra fine lot of cattle, a large percentage Scotch, among them several imported Cruickshank cows. In short I am going to make this as attractive an offering as will be sold this year. Will have sale in a barn well heated."

The Homestead is in position to know that the Bluffview Short-horns are and have been for years the pride of Iowa. Mr. Edwards, the genial proprietor, has, from time to time, consigned from the Bluffview herd some of the choicest Short-horns that have ever gone under an auctioneer's hammer in the state. It was he who set the pace for the higher-priced Short-horns at the commencement of the late revival of the business by contributing from his herd such noted cows as Rose of Bonnie Brae, Golden Crest, Golden Lassie, Emma 17th, and other noted celebrities that have attracted not only national, but international attention. At the forthcoming sale of Mr. Edwards, on January 29th, we anticipate that there will be an opportunity to secure some of these high-class Short-horns, as he is contributing several imported Scotch and Cruickshank cows of the same character. In our next issue we will be prepared to say something more of these cattle after a personal visit and inspection.

### TEN DUROC JERSEY BOARS.

Any of our readers who have not purchased their Duroc Jersey boar should write Mr. Carl Hansen, of Herman, Neb. He has ten head for sale. These are good ones and are sired by his splendid boar, Bar None. He has reduced the price to \$20 to clean them out. Write him immediately and mention The Homestead.

### POLAND CHINA GILTS FOR SALE.

If any of our readers want Poland China gilts they can get them of Messrs. Sandquist Bros., of Oakland, Neb. They have a number for sale, bred along the most up-to-date lines and are bred to an exceptionally good boar. They are pricing these very reasonably. They also have a few good Short-horn bull calves for sale.

### WEBER SELLS FEBRUARY 4TH.

Mr. Henry Weber, of Friend, Neb., will hold his first sale of Duroc Jersey bred sows February 4th, in which he will offer a choice lot of sows. There will be about thirty-five head, including about half aged and yearlings sows, the balance spring gilts. They are large, smooth sows of the best breeding and bred to two extra good boars. Remember the date—February 4th—and arrange to attend this sale.

### URTISKA SELLS JANUARY 29TH.

Mr. Frank Urtiska, of Pawnee City, Neb., will hold his first sale of Duroc Jersey sows on January 29th, in which he will offer the very best stuff that he has in his herd. He has a nice bunch of growthy gilts of good breeding that ought to make good brood sows. He has his catalog out now and will mail one to any person who will drop him a card. His advertisement will appear in a later issue of The Homestead, stating what he has to offer.

### PERCHERON STALLIONS FOR SALE.

On page 33 of this week's Homestead will be found the advertisement of Mr. J. S. Golder, Scribner, Neb., who has five good Percheron stallions for sale. These horses are all young stallions, ranging in age from two-year-olds up, and they are extra good ones. If any of our readers want a Percheron stallion they can do business with Mr. Golder and do it right, as he sells his own horses. He therefore puts the price where they will sell. Write him or go and see what he has for sale.

### REIL & COOPER'S DUROC SALE.

January 24th is the date set aside for the annual brood sow sale of Messrs. Reil & Cooper, of Ferris, Ill. These gentlemen have been buying from some of the best herds and have themselves bred stock good enough to win at the leading state fairs throughout the middle West. The offering is made up of thirty-five head, nine yearlings and twenty-six gilts. They are bred to Wonder Boy, the first-prize boar pig at Illinois State Fair, 1906; others to Chief C. by I. J.'s Chief, the first-prize aged boar Indiana State Fair, 1905. The offering is about equally divided between the two herds. However, Mr. Cooper has included a few more than has Mr. Reil. We wish to call particular attention to the yearling sow, Lady Kruger, the first-prize under year sow at Illinois State Fair, 1906. This sow was sired by Kruger and is out of an Orion Chief sow. This cross has produced many of the best specimens of the breed, winning at both the World's Fair and the leading state fairs. Some breeder intending to show next year cannot go wrong in selecting this sow as one of the members of his show herd. Individually she is an extra good sow and will fill all the requirements of the most discriminating buyer. She is bred to the first-prize boar pig, Wonder Boy, at the Illinois State

Fair and should produce something good. Write for catalog at once, kindly mentioning The Homestead, as per the advertisement on page 31 of this issue.

#### THE HARLAN HEREFORD SALE.

On February 1st, at Harlan, Iowa, will be held a combination Hereford sale of fifty head of cattle, at which time will be offered a splendid lot of cows and heifers and a top lot of well-cared-for and well-developed bulls. The sale is under the management of Mr. F. W. Hann, one of the best young breeders in Shelby county, and he is contributing twenty-seven head. Mr. J. S. Mayne, one of the oldest breeders in the county, is contributing the rest and he is practically closing out his herd. The cattle will be in nice condition and it will be an excellent place to buy. Those who want bulls can get about what they want in the sale. Write Mr. F. W. Hann, Harlan, Iowa, for catalog of the sale.

#### HESS & SONS SELL FEBRUARY 12TH.

Mr. H. H. Hess & Sons, of Surprise, Neb., will hold their annual sale of Short-horns on February 12th, in which will be sold some choice Scotch animals. We ask all those wishing to get something good in the dual-purpose Short-horn line to secure a catalog as soon as possible and arrange to attend this sale, where you will see something good, both in breeding and in individuality. The offering will consist of about forty head of good cows and heifers and a few young bulls, most of the younger animals are the get of the great bull, Golden Victor 131686, a straight Scotch bull that is surely one of the best breeding bulls in Nebraska. The cattle represent the very best families of the breed. Watch for the sale advertisement in this paper and write for a catalog.

#### LARGE YORKSHIRES FOR SALE.

Mr. F. Rabeller, of Leigh, Neb., owner of one of the best large Yorkshire herds in the United States, writes us as follows: "I am now offering 100 head of choice-bred gilts, safe in pig. These gilts are bred to the very best imported boars secured from the best breeders in Canada, and are of the very best prize-winning strains. I also have some very good boars left, and these are in good breeding condition. All of my hogs have done well this season and are in a very healthy and growing condition. The demand for the large Yorkshires was never better and the American farmer is beginning to realize that he is today the best paying hog that he can raise. Just say to Homestead readers that these gilts are the best that we have ever raised and are strictly all right." If our readers want large Yorkshires they will find the Rabeller herd to be one of the best in the United States. When writing kindly mention The Homestead.

#### CHOICE BRED DUROC JERSEY GILTS.

On page 36 of this week's issue Mr. Roy E. West, of Churdan, Iowa, offers for sale twenty head of choice Duroc Jersey bred gilts, weighing from 150 to 300 pounds, that he is pricing at from \$25 to \$50. He says: "I have the best bunch of gilts I have ever seen and am breeding them to a Russell-bred Surprise yearling out of a Gold Dust Jim dam. My gilts have lots of size and are growing right along. I have some May pigs that weigh from 175 to 200 pounds that I will take \$25 for if taken soon. I have about eight April and early May pigs that today will weigh from 250 to 300 pounds. These are choice in every way and would be a credit to any herd. These are granddaughters of Jumbo Red and Prince Marti on the dam side, and Orton and Proud Advance on the sire side, and they are as good as any of the best breeders can show. The choice of these I will sell at \$35 to \$50, bred and safe in pig. I would not be unwilling to ship these on approval. I am offering some at \$25 that other breeders cannot duplicate for the money."

#### THE GREAT WESTERN DUROC JERSEY SALE CIRCUIT.

##### AUGUST VOGUE, JANUARY 19TH.

On the above date Mr. August Vogue, of Portsmouth, Iowa, will open the Great Western Duroc Jersey Sale Circuit with a bunch of forty head of choice-bred sows. Mr. Vogue's sale will be held on Saturday, and he invites all the boys to be present, because he is putting up one of the good offerings of the year. He is selling eighteen fall yearlings and open sows, and twenty-four spring gilts. He is selling three Tip Top Notcher gilts and one yearling Tip Top Notcher sow; eight Crimson Wonder I Am 2d gilts, and one Junior Jim gilt. Gold Dust Rose is the yearling daughter of the World's Fair sweepstakes boar, Tip Top Notcher, and she is bred to the Iowa State Fair prize winner, Kruger Lad. Two of the Tip Top Notcher gilts are bred to Crimson Wonder I Am, and one is bred to Kruger Lad. There will be a good gilt in the sale sired by Ohio Chief II, and she will be bred to Kruger Lad. A March gilt by Lafayette, a son of Belle's Chief, the third-prize World's Fair boar, will be the sensation of the Vogue sale. She is bred to Kruger Lad, and she is one of the great gilts to be sold this year. The Vogue offering is right up to date, and if our readers want a sow bred to Kruger Lad they should by all means attend the Vogue sale. Write for his catalog and be sure to be at Portsmouth on January 19th, because you will see one of the good offerings that will be sold in January.

##### G. W. HOCKETT, JANUARY 21ST.

The best offering of Duroc Jersey sows that Mr. Grant Hockett has ever sold will go through his sale ring on January 21st. He is going to surprise the boys this year. He has the most up-to-date blood lines, and has the sows, and those who attend the sale will say so when they see them. He has as much size on his gilts as any that we have seen this season, and when

# SPECIAL OFFER

## TWO PAPERS FOR THE PRICE OF ONE.

### You Know The Iowa Homestead

One of the two. It is recognized everywhere as the foremost agricultural weekly in the world—edited by working farmers—embodying the wisdom and experience of the largest corps of editors and contributors of any farm journal that is published. It has no equal.

### You Have Heard of Farm and Fireside

The other one; published twice a month, twenty-four times a year, a paper for the farmer, the farmer's wife and the farmer's children. Twelve of the numbers include the splendid Fiction Magazine Section, filled with stories, games and interesting reading for the family. An early feature is a complete novel by Miss Maude Roosevelt, entitled "The Strange Adventures of Helen Mortimer."

they are run through the ring the boys will not hesitate to buy them. He is selling forty head, among which will be two aged sow and fourteen spring and fall yearlings. One of the best brood sows that he will sell is by old Orion, out of Kruger Maid, the sow that topped the Manley sale in 1905 at \$410, going to Mr. Pete Alsinn, of Boone, Iowa. A few of the other sows are sired by Rural and Indiana Hector, two boars that were formerly used in the Hockett herd. Among the gilts are four by Jumbo Bob, he by Liberty Chief by Red Chief I Am. Here are four gilts that have wonderful size, good backs, plenty of bone and cherry red in color. The best one of these, and she is a good one, is bred to Crimson W., a son of Crimson Wonder I Am, and the rest to I Am Advance. Mr. Hockett also sells a good Model Chief gilt, bred to I Am Advance, and a very attractive Crimson W. gilt bred to the same boar. The gilts will be sired by Crimson W., Model Chief, Indiana Hector and old Rural. A word about the boars now at the head of the Hockett herd. I Am Advance, a son of the old sweepstakes boar, Advance, and out of Lady D. 2d, is the ranking boar in the Hockett herd. He is the best boar we have ever seen on the Hockett farm, and if nothing happens to him he should prove to be one of the best sons of old Advance. He is a full brother to Advancer and Proud Advancer, both of which have been prize winners at the Iowa State Fair. In arch of back and spring of rib he is hard to beat. He has wonderful bone, and a good head and ear for a hog of his size. He is one of the best sons of that famous old prize winner, and Mr. Hockett was very fortunate when he bought him. A sow bred to him will go well in any herd, and all the boys will like him when they see him. The other boars used on these sows are Crimson W., a son of Crimson Wonder; a son of old Tolstoy out of a Duroc Challenger dam, and E. L. Perfecto, a son of Rural. The offering is far and away ahead of anything ever sold by Mr. Hockett before. Breeders should by all means arrange to attend this sale. His catalog is now ready. Write for it and kindly mention The Homestead.

#### JOHN WRIGHTON, JANUARY 22D.

The third day of the circuit will be that of Mr. John Wrighton, at Audubon, Iowa, on January 22d. Here will be seen one of the model Duroc Jersey farms in the West, and one of the best offerings in the circuit of sales. Forty head is his number, including his young show herd at Des Moines. He puts in an especially strong lot of yearlings and aged sows, besides an attractive lot of gilts. The great attraction in this sale is Claremont Empress, the first-prize Iowa State Fair gilt, bred to Claremont Model, a son of Model Chief, and he was the first-prize boar pig at Des Moines. Here should be one of the greatest attractions of the earlier Duroc Jersey sale season. Mr. Wrighton also sells his entire young show herd at Des Moines, and here is something that should draw breeders from far and near. A number will be sired by Proud Advancer, the sire of the first-prize gilt and the second-prize litter at Des Moines. Ten head will be bred to Claremont's Model, fifteen head to Proud Advancer and five head to

Audubon, the twice sweepstakes boar at the Audubon county fair. He sells a litter sister to Claremont's Empress, and she is also bred to Claremont's Model, Queen Orion, a yearling daughter of Orland, out of Audubon Queen goes in and she is an exceptionally good sow. Two of her sisters also go in and they are bred to Claremont's Model. There will be a good daughter of Orion in the sale, and a litter sister to his herd boar, Audubon, called Audubon Rose, will also be sold. She is a great brood sow and a very large, deep-bodied animal. She has never raised less than ten pigs, and is bred again to Claremont's Model. The Orion sow will be bred to Proud Advancer, and several other of the best gilts will also be bred to him. The breeder's should turn out to the Wrighton sale, because he not only has the stuff to offer, but he has also been an excellent buyer himself. At the Sheldon sale he and Mr. Garrett bought the \$1,075 sow, S. E.'s Model, and one of her gilts will be sold in this sale. Write for his catalog. You will be pleased with it, and you will be better pleased when you see the sows that go in the sale. Kindly mention The Homestead when writing.

#### J. E. WEHR, JANUARY 24TH.

Forty head will be the number that Mr. J. E. Wehr, of Portsmouth, Iowa, will sell in his sale on January 24th. Eleven aged sows, four fall yearlings and the rest spring gilts will be his program for this annual event. These will be bred to Proud Advance Jr., Orion's Model, Minnesota Chief and Young Surprise. These sows are sired by Munson's Perfection, first-prize boar at the Iowa State Fair in 1906; Bryan M.; Orion's Model, and Roosevelt. He also sells a litter sister to Munson's Perfection in this sale. Among the good ones is a March 5th gilt by Munson's Perfection, dah Tessie Orion, a litter sister to Orion's Model, and she is bred to Proud Advance Jr., a son of old Proud Advance. A couple of Lady Wheeler's gilts go in and a couple of Luella gilts, and these are all good ones and have the making of good brood sows. These will all be bred to the Proud Advance boar. A litter sister to Young Surprise goes in, bred to Minnesota Chief. Perfection Belle, a daughter of old King Perfection, and one of the sows that was in the first-prize young herd at Des Moines will be sold, bred to Proud Advance Jr. Mr. Wehr is putting up a good offering and no one deserves a better sale. He is one of the popular Duroc Jersey breeders; is and always has been a good buyer, and generally puts up a good offering of brood sows. He has made every arrangement to look after the wants of the breeders in attendance, and will show them the best bunch of sows he has ever sold. The blood lines in the Wehr herd have been the very best, he having drawn his foundation stock from the good herds. Write for his catalog and kindly mention The Homestead.

#### F. E. GARRETT, JANUARY 25TH.

One of the greatest brood sow events of the earlier part of the 1907 season will be that of Mr. F. E. Garrett, at Lohrville, Iowa, on January 25th. We say one of the greatest because of the class of sows he is offering. He will sell forty-seven head alto-

gether, including the great Iowa State Fair prize-winning sow, Ruberta. Every breeder who attended the Iowa State Fair will remember her, and every good breeder will be anxious to buy her. Bred to the \$5,000 boar, Junior Jim, she should be the greatest attraction of the year. She is a daughter of Tientsin, a half brother to Crimson Wonder. He sells eleven yearlings, every one of which has raised litters. The rest will be spring gilts. Among these will be six head by Orion, all bred to Junior Jim. One of the best gilts that he will sell is a daughter of the Iowa State Fair sweepstakes boar, Crimson Wonder I Am; dam Fancy Orion. This gilt is a full sister to Crimson Wonder Agall, the sweepstakes boar at Des Moines. Here is indeed a show proposition for next year, and she is bred to American Lad, a son of Iowa Wonder. He also sells four gilts and one yearling, all sired by Proud Advance, and bred to Junior Jim and I Am a Wonder and Tientsin. He also sells four gilts by I Am a Wonder, two by Tientsin and one by Junior Jim. Two Proud Advance gilts out of the great sow, S. E.'s Model, go in, bred to Junior Jim. Also a litter sister to Ruberta bred to Jim goes. Ten head will be bred to this great boar. The Garrett sale has every right to be one of the greatest of the year because Mr. Garrett has the goods to offer. The up-to-date breeder will miss it if he does not attend the Garrett sale. Write for catalog and please mention The Homestead.

#### DR. J. A. DOWNS, JANUARY 26TH.

The last sale of the Great Western Sale Circuit will be that of Dr. J. A. Downs, at Gildden, Iowa, on January 26th. It is with pleasure that we call the attention of Homestead readers to his sale. For a number of years past we have watched Dr. Downs at the leading Duroc Jersey sales and we never saw him buy a poor one. We often made the prediction that some day he would have a good herd, and we have no hesitancy in saying that breeders will find his offering the equal of any in the circuits of sales. At the head of his herd today is the noted boar, Long John, the boar that helped make the Manley & Co. herd famous, and today is one of the greatest brood sow boars of the breed. Many of the sows that go into the sale will be bred to him, and the man that buys one of them will be laying the foundation for a good herd in the future. The other boars used in the herd are Clovercroft King by Orion II., Clovercroft Orion's son by Orion, Clovercroft Advance by Proud Advance and Adjuster by Dandelion. The sows that go into the sale will be sired by Orion, Proud Advance, American Royal, Peerless, Clovercroft Tip Top Notcher, Paruell Banner, Carroll Jumbo, Belle's King and other popular sires, and the blood lines contained therein are as good as will be found in any herd in the West. His aged sows are exceptionally fine and among these are some that are as good as will be found in any herd. Clovercroft Princess is a summer yearling by Clovercroft King out of a Carroll Jumbo sow. She is a double line bred Protection sow, and is bred to Long John for March farrow. He sells a splendid daughter of that noted boar, Peerless, that left so many good things in the West. There will be two good American

## DAIRY LANDS IN OREGON.

### SPECIAL INDUCEMENTS

For practical dairymen to settle on logged-off lands in Oregon.

### THE PARADISE FOR DAIRYING.

For authentic information, address,

OREGON DEVELOPMENT LEAGUE,

Dept. 29, Portland, Oregon

Royal sows in the sale, and a good granddaughter of American Royal. Manley's Pride is another good summer yearling by Belle's King, he by the noted prize-winning boar, Echo King, out of the great Nebraska Belle. She is bred to Long John and carries more of the blood of Orion and old Ella Roberts than any other sow that will be sold this year. There are others that we will make special mention of in our next issue. His gilts are growthy and well developed, with good feet and good bone, and bred to the boars at the head of the herd are certainly good enough to be sought after by our very best breeders. Dr. Downs' sale will be the last of this circuit, but it will not be the least, and every man should make it a point to be present on this occasion. Kindly write Dr. Downs for catalog and please mention The Homestead when doing so.

#### McKEEVER BROS.' SHORT-HORN BULLS.

Messrs. McKeever Bros., of Farley, Iowa, are old-time breeders of Short-horn cattle of the most approved business sorts. At the present writing they have an exceptional lot of young bulls; in fact, the best that they have yet had to offer the public. They are sired by their present herd bull—Victoria's President of Maine Valley. This bull is a straight Cruickshank Victoria, and one of the best specimens of the breed. He is a very thick, compact bull, of typical Scotch type and appearance and possesses all the good qualities necessary to the making of a great sire. The young bulls now on hand are a superior lot from every point of view, and at the prices asked for them, are certainly within the reach of all. They are pre-eminently reds in color and of the low, thick sort so much in demand throughout the middle West. Farley is located in Dubuque county, and the McKeever Bros. farm is just one mile west of town. Anyone in quest of a good bull will find these people thoroughly honorable and entirely truthful in all their statements relative to their cattle. Homestead readers can do no better than visit the McKeever Bros. if in need of a good red Short-horn bull at modest price.

#### CASTLE'S DUROC SALE—LAST CALL.

One of the good lots of females to be sold this season comes from the well-known herd of Durocs owned by Messrs. E. M. Castle & Son, of Joy, Ill. This sale will be held in town in heated pavilion, Friday, January 18th, the day after Messrs. McNeil Bros.' sale at Bowen, Ill., and breeders will find it convenient to get from one sale to the other. Forty head make up this offering, twelve aged and yearling sows and twenty-eight gilts. They are bred to Perfection Chief, one of the best boars to be found anywhere. This boar won first as yearling, 1905, and first as aged boar at

FRED S. CASTLE.

Wisconsin State Fair, 1906; second-prize yearling boar, 1905, and second-prize aged boar, 1906, Minnesota State Fair, and third-prize yearling and headed third-prize young herd Iowa State Fair, 1906. Several sows are bred to Sue's Tip Top Notcher, he by Tip Top Notcher; some to Prince Paul by Champion Paul; others to Prairie Advance by Proud Advance. We take pleasure in recommending this offering to our readers. Bids sent to Mr. D. M. Pierce, representing The Homestead, will be properly handled. Write for catalog at once, kindly mentioning this paper.

#### DISPERSION OF THE LATE O. L. KERR HERD OF O. I. C.'S.

Breeders of the O. I. C. throughout the corn belt will be interested to know that the

herd of O. I. C. swine owned by the late O. L. Kerr, of Independence, Mo., will be

THIS MEANS JUST WHAT IT SAYS. These are not "razor backs" but pedigreed pigs. Eligible to Register and are FREE, except Express, to any liveman or boy. One or more of these pigs easily secured. For particulars and copy of Best Swine Magazine, write Edwin, Box 14, Prescott, Ill.

dispersed on February 6th and 7th. Not an animal has left the herd since the death of Dr. Kerr. Kerr Dick and Big Mary will be in the sale, as will all the other herd boars and the sows that have produced the winners. Mr. Llewellyn Jones, of Independence, Mo., administrator of the estate of Dr. Kerr, has the sale in charge and all communications should be addressed to him. Watch for future announcements.

#### SMITH'S DUROC JERSEY SALE.

Thirty-five head of choicely-bred Duroc Jersey sows have been selected from the well-known herd of Mr. J. A. Smith, of Sciota, Ill., for his forthcoming brood sow sale which will be held on Wednesday, January 23d. The offering contains the blood of such noted sires as Tip Top Notcher, Hanley, Best of Top Notchers, Stoner's Improver and others of equal merit. Miss Seckman by Tip Top Notcher is an unusually good, broody sow of show-yard type and quality that will prove a valuable addition to some good herd. The Lad's Perfection by The Lad for Me and a very good sow by Best of Top Notchers will certainly prove attractive to the breeder who is in search of good breeding stock. The gilts are uniform and growthy and stand on good feet and legs. The entire offering is sold in good breeding condition, not pampered or burned out with corn, but is sold in good, serviceable shape, fit to do breeders or farmers much good. The catalogs are now ready and will be sent to readers of this paper as per the announcement on page 31 of this issue. Bids sent to Mr. D. M. Pierce, representing this paper, in care of Mr. Smith, will be properly handled. Kindly mention The Homestead when writing.

#### ROYAL GILTS FOR YOUR MONEY.

Mr. A. H. Jeffrey, of Indianola, Iowa, one of the old breeders in the Poland China business, has something to say in this week's issue about gilts that will certainly attract the attention of thoughtful breeders. We have just seen the choice bunch which Mr. Jeffrey is offering and have no hesitancy in saying that they can stand a great deal of praise. They are sired by Royal Purple, a grandson of L's Perf. 22488, and are worthy representatives of the strong individuality of their sire. The offering is from early litters, March and February, and have been growing right along so that at farrowing time they will be fully able to care for their litters in the best possible manner. They are bred to Paddy, a grandson of Perf. Perfection 24235. He is a strong individual in length and depth, hack and ham and carries all the bone that a good hog should. Mr. Jeffrey has been breeding hogs for thirty years and his late winnings at the Warren County Fair in strong competition testify to the high quality of his breeding work. As the offering is small and the price very reasonable we would advise buyers not to delay. On page 28 appears the advertisement. Kindly mention The Homestead when making inquiry.

#### LAST CALL FOR THE HUDSON DUROC SALE.

Mr. W. H. Hudson, of Lohrville, Iowa, will sell thirty-five head of well-bred Duroc Jersey sows at his farm on the above date. Mr. Hudson is offering a particularly attractive lot of sows in the sale, carrying the blood of Ohio Chief, Tolstoy, Crimson Wonder and Nebraska Belle. There will be five mature sows and five fall yearlings, the rest will be spring gilts. There will be two granddaughters of old Orion in the sale and a granddaughter of Tolstoy, the sire of Crimson Wonder. He has picked out his very best gilts for this first annual offering and in all fairness to Mr. Hudson we can say that for a comparatively new breeder he has selected and has bred some surprisingly good gilts. These will be bred to Ohio Chief Primrose, a son of Ohio Chief; Jim's Junior, a son of the \$5,000 boar, Junior Jim, and Re-Echo, a son of the prize-winning boar, Critic's Echo. Among the older sows that he will sell is Lady Belle, and she is bred to Ohio Chief Primrose, and Mahle H. is a granddaughter of Tolstoy and is bred to the same boar. The gilts are a very toppy lot, with good heads and ears, good feet and legs, and the man who goes to this sale will not be disappointed in the offering. Write for catalog and kindly mention The Homestead.

#### LAST CALL FOR THE WERNSMAN DUROC JERSEY BRED SOW SALE.

With this issue we announce for the last time the bred sow sale to be held on January 19th, by Mr. Jacob Wernsman, at Cedar Bluffs, Neb. We know from personal inspection something of the high character of the offering that will be lined up for this event and the boys will have to sit up and take notice when this bunch of forty-five head of brood sows go through the sale ring. If you don't want big ones, stay at home, as Mr. Wernsman puts out the kind that tips the scales at a good round figure whenever they are sold. We are safe in saying that this will be one of the best offerings of good, big-boned, useful sows that will be sold anywhere in the state this winter. It is high-class stock in every particular that will come before buyers at this time. It will be remembered that this is the home of Chitwood, the sire of Junior Jim, one of the highest-priced Duroc Jersey boars in the business today. He is sired by Larchwood by old Duroc Challenger. He is an extra good sire and breeds a type that are good feeders and mature at a very early age. Mr. Wernsman is also using Nutwood, a son of Chitwood, that he considers will make as useful a sire as the old hog. The latest addition to the herd was a very fine young boar purchased from Mr. B. C. Martz, of Polk City, Iowa. This youngster, Col. W., is a son of Colonel Perfection, and we consider him one of the most promising youngsters seen this year, and several of the very best gilts will be bred to him. There will be forty-five head of good, useful sows in this sale, of which twenty-five will be aged and yearling. Of these the greater part will be bred to Chitwood and those related to him will be safe in pig to Young Surprise, a son of Surprise, that Mr. Wernsman is using to good advantage. Taking everything into consideration we consider this a grand opportunity to secure the right type of a useful Duroc Jersey sow. They are daughters of such boars as Crimson Wonder and Echo King, and two are daughters of a full sister to Junior Jim. Seven of the best sows in the sale are granddaughters of Gold Dust Jim, first-prize hog in class at the Iowa State Fair. Mr. Wernsman has a nice catalog ready explaining

#### THE OLD RELIABLE ..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.  
TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs.  
I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.  
Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

#### COMING SALES OF BRED SOWS

Should be advertised in

## THE TWENTIETH CENTURY FARMER.

NO OTHER farm paper reaches all our 65,000 paid subscribers among the farmers and breeders of Nebraska, Iowa, Missouri and Kansas. Sale rates are reasonable and a field man will visit your herd if you will give him an order.

THE TWENTIETH CENTURY FARMER,  
1726 Farnam Street, Omaha, Neb.

everything, which can be had by dropping a card to him at Cedar Bluffs. The sale will be held right in town and those from a distance will find free entertainment at the Merchants hotel. Mail bids may be sent to Colonel Callahan or to Mr. Ray Page, who is representing The Homestead.

#### HANKS & BISHOP'S DUROC SALE.

Among the good herds of Duroc Jerseys owned in Iowa is that of Messrs. Hanks & Bishop, of New London, Iowa. These gentlemen have secured their breeding stock from some of the best herds and have exercised unusually good judgment in selecting the same. The writer representing The Homestead, recently inspected their offering and it is with a feeling of satisfaction that we recommend it to our readers. Uniformity of type and conformation coupled with good individuals have given these gentlemen the claim that no one will be disappointed in the offering on sale day. The offering is made up of ten yearlings and aged sows and about thirty spring gilts. They are bred to Model Wonder, acknowledged the best son of the sweepstakes boar, Crimson Wonder I Am, farrowed in 1906. The writer wishes to state that he has never seen a better spring male than this one from Crimson Wonder I Am, and none better from any boar. This is a strong statement, but is backed up by a pig of more than usual merit, and if carried along in his present form, should be heard from in the fall shows. A number of the gilts are bred to Iowa Chief, a son of Golden Rule, the principal herd boar in use in the noted herd of Mr. R. C. Watt, of Cedarville, Ohio. Iowa Chief is a very good boar and sows of leading strains crossed with such noted boars should be a good investment for anyone. Further particulars will appear in our next issue. Write for catalog as per the announcement on page 31 of this issue, kindly mentioning The Homestead.

#### LAST CALL FOR THE W. J. McLEAN SHORT-HORN SALE.

On January 14th, at Rock Valley, Iowa, Mr. W. J. McLean will make a public sale of fifty head of exceptionally well-bred Scotch and Scotch-topped cattle. It is with pleasure that we call the attention of Homestead readers to his sale, not only because he is offering an excellent lot of cattle, but behind them stands a man whose reputation as a breeder is par excellence. We therefore say to those who buy in the McLean sale that they will get cattle that are just as they are represented. The first animal in the catalog, and a cow that he regrets to part with, is Imp. Celia 9th. This splendid roan cow was bred by Mr. Campbell, of Scotland, and is a daughter of the Duthelred bull, Proud Star. She is safe in calf to the splendid bull, Choice of Archers, and a calf from this mating should be something good. Col. Geo. P. Bellows once remarked about her when a two-year-old that she had no superior. She goes into the sale without any strings on her and she will fit nicely in any of our best herds. She is a nicely-bred Miss Ramsden. Golden Lass is another of the choice attractions. She is a three-year-old, a daughter of Sittytown Hero and will have a calf on sale day by the great bull, Ceremonious Archer. He sells a nice two-year-old Victoria heifer called Queen Victoria 7th, and she is bred to his splendid herd bull, Valley Sovereign, one of the best bred Scotch bulls in northern Iowa. He is a son of Imp. Matadore and out of the great cow, Lily of the Valley. Mysie Lady, a seven-year-old daughter of Abigail, and a richly-bred Mysie, bred to Valley Sovereign, will be one of the good things in the sale. Generosity of Lakewood and Evelyn of Lakewood are both well-bred Scotch cows, and are both in calf to the Scotch bull, Morning Joy. There will be several very choice heifers in the sale. One of these is Matchless 10th, a yearling, a daughter of Valley Sovereign out of Matchless 7th of Main Valley. She belongs to the Matchless tribe and is a good one. There will be nine young straight Scotch. One of these is a roan called Sittytown Chief by Sittytown Lad, and he will make a good herd bull for some breeder. Viscount of Agle is a three-year-old and a son of Golden Charity Prince. He is a good medium bull and is an excellent server. He is offering a richly-bred Narcissus bull and a two-year-old son of Earl Victor. There will be bulls in the sale that

will be fit to head herds and also to go to farmers who are looking for a bull that will sire market toppers. Mr. McLean's catalog is out and ready to be mailed. Readers of The Homestead are requested to write for it and kindly mention The Homestead when doing so.

#### ROWE'S DUROC SALE, JANUARY 21ST.

A sale of Duroc Jersey bred sows that should attract attention among leading breeders of the corn belt is that of Mr. J. E. Rowe, of Stockham, Neb. This sale will be held at his farm, one mile from town, on January 21st, and we can recommend it as the place to secure something good in the Duroc line. It is seldom that a new breeder puts in as good an offering as Mr. Rowe will sell in this sale. In this offering there will be thirty-five head of fall yearlings and matured sows and a very choice lot of spring gilts. We feel that we cannot say too much about this grandly-bred lot of sows and Mr. Rowe is to be highly complimented on being able to put such a choice lot through the sale ring. In this sale will be sold three daughters of Middle Rose Lady, the first and sweepstakes sow at Nebraska State Fair last fall. These sows are sired by Sir Leicester 14069, the hog that has sired most of the show stuff that Mr. Rowe has won on in the last two years. Several of the older sows in the sale are bred to him. Billy Medoc, a son of Medoc, is doing good service in this herd, as you will see when you look over the bunch of gilts that are sired by him. These gilts are bred to J. P. Advance, a son of Jumbo Paymaster. Mr. Rowe certainly has a combination of blood to offer here that should attract the very best breeders. He is offering some of his very choice sows. The color is invariably on the cherry red order and they have wonderful spring of rib, depth of ham and good feet. If you are looking for something good to add to your herd you can find it in this sale. Catalogs are now ready and will be sent to you on application, and then you will surely want to attend the sale. When writing please mention The Homestead.

#### GREAT CLOSING OUT DUROC SALE.

On January 23d, the firm of Peek & Putman, of Tecumseh, Neb., will close out their entire herd of Duroc Jersey hogs, including fifteen head of tried brood sows, twenty head of good yearlings and ten head of richly-bred gilts. This we consider one of the best opportunities of the season to secure good Duroc Jersey bred sows, such as can only be had by years of careful selection from the best herds in the business. On account of Mr. Peek, of this firm, moving away to another part of the state, the entire herd must be sold to secure a proper division for both parties concerned. It would be hard to find a herd of hogs in the state of Nebraska that has a larger combination of good breeding than can be found in this herd. Mr. Peek put in three weeks last fall among the good herds of Illinois and brought home five of the best young boars and gilts he could find in that country, on two occasions topping good sales in order that he might get the best. Here will be a chance to pick up a tried brood sow, a good yearling or a good gilt. They sell them all and you can be the judge. The great sow, Banner's Top, is by Tip Top Notcher, and is bred to the great Kan't Be Beat for an early March litter. Boys, if you are looking for a sow with quality and breeding, don't forget this one, as she is one of the best things to be sold in any sale this year. She was bred to the great Kan't Be Beat, which ought to be a wonderful cross. There will also be sold in this sale two of the best Ohio Chief gilts that we have looked at recently, one of them bred to Tip Top Notcher Jr., a son of Tip Top Notcher, the other to Young Hanley by Hanley, the great boar now at the head of Messrs. McNeil Bros.' great herd, of Bowen, Ill. The boar at the head of this herd and the one that most of the aged sows in this sale will be bred to is Crimson Wonder. This hog is a good individual and as a sire has proven the best thing that this firm has ever used. He is assisted by Lincoln Top, a son of Morrison's Bell Top. This pig was the top in the Wilson sale at College View in October, Mr. Putman paying \$230 for him. They are also using a son of Tip Top Notcher, a son of Buddy K. IV, and a pig by Hanley, and they are

all good ones. Catalogs are now ready and can be had by dropping a card to this firm. Sale will be held in comfortable quarters. No postponement on account of bad weather. Mail bids may be sent to Mr. Ray Page, representing this paper, and they will be carefully handled.

POST SELLS BRED SOWS JANUARY 22D.

On January 22, 1907, Mr. G. W. Post, of York, Neb., will offer a draft of forty head of Duroc Jersey bred sows, including ten good aged and yearling sows and thirty gilts, the tops of this year's crop of pigs. We ask those wanting something good in the Duroc Jersey line to secure a catalog at once and arrange to attend this sale where will be seen something good, both in breeding and individuality. Mr. Post believes in raising the early-maturing kind of a hog and those at the ringside on sale day will be convinced that early maturity, size and quality can be combined in one hog. Most of the gilts included in the sale are daughters of Top Notch 41815, a son of Tip Top Notcher. His dam was Goldie O. 40th, the dam of more prize winners than any sow living. This hog weighed 640 pounds at twenty-two months old and was pronounced by competent judges one of the best boars Tip Top Notcher ever sired. These gilts will be bred to Ohio Chief I Am by the great Ohio Chief, dam Royal Lass by Nathan. Here we have the cross of the blood of two of the greatest Duroc Jersey boars in the world and any man purchasing one of these gilts has the right to expect something good from them. As a special attraction to this sale Mr. Post will sell Briggs' Choice, which he considers the very best sow he has on the place. She is by Colonel Bills and having for her dam Fancy Girl by Wonder, and will be safe in pig to Top Notch. She was the top sow in Messrs. Briggs & Son's 1904 bred sow sale and has been a profitable sow to Mr. Post. Remember the date, January 22d. Write for catalog and arrange to attend this sale. It will be held right on the fair grounds near York and in comfortable quarters. Colonel Callahan will do the selling and mail bids may be sent to him or to Mr. Ray Page, representing The Homestead.

THE GREAT ANGUS AUCTION AT SOUTH OMAHA.

What Sale Manager McGavock characterizes as the most superior lot of Angus he has ever offered at South Omaha, will be auctioned in the sale pavilion there on Friday, January 18th. No man is better posted on Angus breeding and type than Mr. McGavock, and as he has seen the cattle he is in a position to know their merits. Mr. C. B. Gray, of Corwith, Iowa, consigns seventeen head, including the Blackbird bull, Blackbird Wouder, a six-year-old by the famous Bell's Eclipse, and from a dam by Imp. Jim Jams, that was out of a dam by Imp. Guinea. The breeding of the bull could not be better, and he and his get will speak for themselves on sale day. A son and three daughters of Imp. Prince Ito, from dams of the most fashionable families of the breed would be attractive in any auction that was ever held in any country. Blackbird of Woodlawn 14th, a two-year-old by this great Highland Society champion and great \$9,100 bull, was bred by Messrs. Pierce. She belongs to the celebrated fourth branch of the aristocratic Blackbirds and is from a dam by the sire of champions, Bell's Eclipse, and her second dam was by Moon Eclipse, Woodlawn Barbara P., also by Imp. Prince Ito, and out of a Barbara dam that is doubly Erica topped. She is also two years old and one of the most attractive animals of the auction. The third daughter of Imp. Prince Ito consigned by Mr. Gray to the auction, is Nightingale of Woodlawn 5th. She is from a family with which the Messrs. Pierce have succeeded in producing many prize winners, descending maternally from a dam by Black Knight, the greatest Angus bull produced in America. One of the best-bred Erica females to be offered at auction is Erica of Woodlawn. She is also two years old, in calf to the Blackbird bull, Scottish Hero, a son of the International prize-winning bull, Woodlawn. Her dam, Maplelawn Erica, was by Prince of Estill, a Pride bull by the Ballindaloch-bred Imp. Entwistle, and from a dam whose sire and dam's sire were both bred at Ballindaloch. Lord Woodlawn, the champion of the Trans-Mississippi Exposition, is represented in the offering by his six-year-old daughter, Longbranch Crocus 2d, of the noted Crocus family and from a dam by Gay Blackbird. She will be sold with heifer calf at foot by Blackbird Wonder. Mr. Gray's entries not only represent the most fashionable families, but the greatest sires of the breed. A full list of consignors will be found in the advertisement and no Angus breeder can afford to miss this one of the greatest Angus auctions ever held in the West. The two-year-old Barbara bull, Baron Ito 2d, by Imp. Prince Ito, should

be looked after by those in search of herd headers. Special attention is called to the fact that Mr. W. D. Reynolds, of Villisca, Iowa, consigns ten head of very superior animals of the record-breaking, champion-producing, Drum-in-Lucy family, and he also includes representatives of other good sorts. Messrs. N. G. Daughmer & Son, of Douglas, Ill., sell a dozen sons and daughters of the double Blackbird bull, Blackset, by the champion sire, Black Monarch of Emerson, and out of the champion-producing dam, Blackcap 5th, and Blackset was himself a first-prize winner at the American Royal. Attractions are many for Angus breeders at Omaha, January 18th.

MOATS' GREAT HORSE AND MULE SALE.

On Friday, January 25th, Mr. M. S. Moats, of Randolph, Neb., will make one of the best Percheron horse and mule sales that has ever been pulled off in northeast Nebraska. He will sell thirty-three head of Percheron bred mares, horse colts and geldings, and twenty head of yearling and two-year-old mules. The most of these mares and colts will be sired by McMahon 23340, a horse that made a reputation for being the best Percheron stallion ever used in northeast Nebraska. The younger colts are largely sired by Blackbird 33756, a five-year-old coal black Percheron stallion weighing a ton. The latter horse now stands at the head of the Moats stud, and bred to these McMahon mares, the produce is simply as good as can be found anywhere. No. 1 of catalog is an eight-year-old mare called Juliet 22862. She is a black mare weighing 1,800 pounds and was bred by Mr. H. G. McMillan. Her sire is Nubian 17467 by Pluton by Vaillant. She is one of the best registered mares in Nebraska and she is safe in foal to Blackbird 33756 since May 21st. Here is a mare that any man can afford to buy, no matter what he has to pay for her. There will be a grand lot of mares and geldings in the sale sired by McMahon, and these will weigh from 1,200 to 1,600 pounds. There will also be a number of good horse colts in the sale. The geldings that he is selling will make great work horses, they having the size, the bone and the general conformation. They are excellent in color, are toppy actors, with plenty of style, and the man who wants this class of horses should not miss this sale. At the same time he will also sell twenty head of yearling and two-year-old mules. These are solid colors and are in fair flesh. They are a nice, thrifty lot and will make good, big-headed fellows and good money makers for whoever buys them. Write Mr. Moats at once for catalog and kindly mention The Homestead.

LAST CALL FOR THE COLLICOTT DUROC JERSEY SALE.

One of the good Duroc Jersey brood sow offerings that will be held in the early part of January is that of Mr. S. G. Collicott, of Lake City, Iowa, on January 16th. Mr. Collicott is one of the younger breeders, and this being his first public sale he has selected his very best. Of the forty head, thirty will be yearling and matured sows, and the rest are spring gilts. The sows that he is offering are descendants of old Higgins' Model, Belle's Chief, Tip Top Notcher, Orion and Leather Stockings, and are bred to S. G.'s Crimson Improver, a son of the noted Iowa State Fair sweepstakes boar, Crimson Wonder I Am, and Waveland Ohio Chief X, a son of the World's Fair boar, Ohio Chief. A number of the sows are sired by Jasper Jumbo, a son of Carroll Jumbo, by old Jumbo Red. Two of his best gilts are sired by Crackerjack 43787, a son of Red Chief G., and both of these are bred to Waveland Ohio Chief. He also sells a good gilt by Clovercroft Tip Top, a son of Tip Top Notcher out of an Orion II. sow. She is bred to the Ohio Chief boar for March farrow. There are a number of gilts in the sale sired by Adjuster, a son of old Dandelion, the boar that formerly headed the Manley herd, and there will also be a few gilts in the sale sired by Leather Stockings II. He is selling some good yearling sows that any breeder or any farmer can well afford to buy. A perusal of the Collicott catalog will reveal a lot of rich breeding. Females bred to a son of Ohio Chief and Crimson Wonder I Am, should certainly attract the storker for a pedigree, but better than all, he has the kind of sows the people want. Mr. Collicott says that he has fed this offering a balanced ration and has spared neither time nor labor to have them just as he wants them. He is offering the boys a good class of Duroc Jersey sows and they are not only bred right, but they are fed right, and they will do the huyer good who gets them. This is Mr. Collicott's first sale and every breeder in his section of the state should turn out and give him a helping hand. He needs their assistance in this sale, and they will be pleased with the offering that he will put up on sale day. There

TWO GREAT DUROC SALES

January 24 and 25, 1907.

January 24th we will offer thirty head of choicely-bred sows—twelve aged and eighteen gilts—including Marie Antoinette (the first-prize yearling at Sioux City, defeating the Des Moines and Minnesota State Fair winners). Most of the sows are bred to King Solomon or boars of equal merit. Sale will be held at Sol. Frank's farm, Sioux City, Iowa. Remember the Stevenson & Cantine sale January 25th. Good connections from Sioux City. For catalog address Sol Frank, Sioux City, Iowa.

SOL. FRANK, Sioux City, Ia.  
JULCH BROS., James, Ia.

On January 25th we will sell at the Cherokee farm three and one-half miles southeast of Quimby, Iowa, forty head of bred sows, representing the blood of Crimson Wonder Jr. (best son of Ohio Anna 8th), Pericles, Advancer, Top Notcher Chief, Keep On and Ohio Chief. Every sow a good one. Remember the sale at Sioux City, January 24th. Write for catalog. Col. P. McGuire will do the selling.

C. R. STEVENSON or  
LEE CANTINE, Quimby, Ia.

TOO LATE TO CLASSIFY.

PETERSON'S BLACK PERCHERONS.

# MOATS' GREAT PERCHERON HORSE AND MULE SALE

33

RANDOLPH, NEBRASKA, FRIDAY, JANUARY 25, '07

20

MULES

MARES, FILLIES, HORSE COLTS AND GELDINGS AND

In this sale will be a lot of daughters of the well known horse McMahon 23340, considered the greatest Percheron stallion ever used in northeast Nebraska. Many of these will be safe in foal to BLACKBIRD 33756, a ton horse and now at the head of my stud. One of the best mares I am offering is JULIET 22862, a black mare, bred by H. G. McMillan, and will weigh 1800 pounds. She was sired by Nubian 17467. She is one of the BEST REGISTERED MARES in the state and is safe in foal to Blackbird 33756. There will be some great Percheron geldings in this sale weighing from 1300 to 1600 pounds.

## 20 Head Yearling and Two-year-old Mules.

These are good solid colors and in fair flesh. A nice thrifty lot that will make good, big headed fellows and will be good money-makers for those that buy them. If you want PERCHERON BRED horses and mares or good mules you should come to my sale. It will be the greatest horse sale ever held in northeastern Nebraska. Write for catalog at once. Address,

COL. GEO. P. BELLOWES,  
AUCTIONEER

M. S. MOATS, RANDOLPH, NEB.

Kindly mention Iowa Homestead  
when writing for catalog.

### Last Call for McNeil Bros.' Noted Brood Sow Sale.

Thirty tried brood sows, such as Messrs. McNeil Bros., of Bowen, Ill., are putting in their sale are seldom seen in one offering. They have selected a number of their best producers, and as well bred as they are individually and having crossed them with as good boars as the breed affords, the produce will not in any way be a disappointment to those who secure stock from Maple Grove Herd. In our last issue we called particular attention to some of the boars in use in the herd. This week we wish to call attention to the class of females which are being offered to the public on Thursday of next week. Females that are known breeders of high-class stock when properly mated have been selected. Such a brood sow is found in Irene Clayton 32658 by Judo 7655 by Marti II. The writer has seen but few sows as good as this one to go under the hammer this year. She is of that good brood sow type, which the best breeders have for years sought to install in their herds. As ample proof of her breeding qualities her daughter, Sadie Mc 102315 by Cantine Boy by Cantine, will be offered for sale. Breeders and farmers are aware of the fact that never in recent years has the demand for good breeding stock been as brisk as it is at the present time. The farmer of today is the breeder of tomorrow and it is to the interest of very reader of this paper to secure the best stock for the foundation of herds or to those who already have herds it is just as important to secure the best stock. Such stock is found in the offering of Messrs. McNeil Bros. Another one of the good ones is Conqueror's Lady 137792, a daughter of the great Conqueror 32661. This sow is a full sister to the top of the fall sale, Creamie, that went to Mr. H. E. Browning, of Heresman, Ill., at \$400. She is a plump, good one in every respect and would be a valuable addition to any herd. Minnie Advance 129764 by Proud Advance, one of the most noted sires of the breed, is a litter mate to the Proud Advance gilt that sold in the fall sale of Messrs. Fagan, Browning & McCabe, at the record-breaking price of \$500 for an open gilt. She goes in the sale bred to Hanley, a boar that needs no recommendation as to his breeding characteristics other than his get show for themselves. Some breeder wanting to add this cross to his herd will do well to keep this sale in mind and particularly this Proud Advance gilt bred to Hanley. Fay Russell is another of the attractions of the sale, as is her daughter, Sallie Russell. Both of these sows are bred to Hanley. Pansy Blossom by Big I Am, by Buddy K. IV., is a very good sow and will be appreciated when seen. There are a number of other good sows which are equally deserving of special mention, but they are of the same good type which are found in all of Messrs. McNeil Bros.' sales. The herd boars, Hanley and Helen's Tip Top Notcher, carry the best blood the breed affords and through their liberal patronage have added as good blood as is found anywhere. The writer, representing this paper, is pleased to recommend the offering to our readers and is confident that the readers of this paper will be well treated sale day or any time they find it possible to visit this well-known herd. The catalogs are a work of art and will be sent to all who write for same as per the announcement on page 28 of this issue. Five generations are shown of each animal and the blending of the blood contained in this herd has given to the breed some of its greatest show and breeding animals. Plan to be present on Thursday, January 17th. If anyone interested in Durocs cannot be present, bids sent to Mr. D. M. Pierce, representing this paper, will be carefully handled. These bids should be sent in care of Messrs. McNeil Bros. Look up the announcement and get catalogs, which are ready. Kindly mention The Homestead when writing.

### Select Short-horns at Auction at South Omaha.

Mr. McGavock has inspected the cattle for his auction at South Omaha on January 17th, and he promises those who attend and those interested that he will present on this occasion the most superior offering of individuals that he has ever cataloged for an auction. The five-year-old imported Scotch bull Emperor 2d, Mr. McGavock succeeded in

obtaining as an attraction to this auction. He is not only a show bull, but the sire of International prize-winning calves and belongs to the Cruickshank Brawith Bud family, and was got by the Cruickshank Secret bull, Emperor, a son of Mountain Archer by the celebrated Scottish Archer. He is a beautiful roan and represents the best type of the Aberdeenshire Short-horn. Six high-class females intended as a nucleus for a herd at Riverdale, have been secured for this auction and are the last of the Short-horns owned by the S. E. Prather Co. The straight Scotch two-year-old heifer, Portia, of the Cruickshank Secret family, was got by the Duchess of Gloster bull, Gloster King, by Scottish King. She is a heifer of superb symmetry, with drooping horn and rich red color, and should command a good price wherever straight Scotch animals of the best type are appreciated. She is in calf since September 11th to Scottish Robin, a son of Imp. Cock Robin and an imported Scotch cow. Another straight Scotch red heifer is Rose Archer, descending maternally from Imp. Eliza, bred by Mr. Murray, of Aberdeenshire. She is sired by Imp. Master Archer, an International prize winner and full brother to Ceremonious Archer, the International champion and \$5,000 bull at the head of Colonel Lowden's herd. Roan Bess, calved March 3, 1906, is as big as a yearling and as ripe as a two-year-old. Even though calved at a date somewhat to her disadvantage, the best yearlings of this year's shows will find it difficult to defeat her if she is exhibited. She was got by the Scotch bull, Goldust and out of Sonerila 10th, a cow of wonderful scale and quality that was sired by the Scotch bull, Baron Keepsake by Imp. Baron Cruickshank. Barrington Rose was got by the straight Scotch bull, Village Chief, and out of a dam that was bred by the Messrs. Forbes and sired by Baron Gloster. She is also of showyard conformation and quality, and a very beautiful red in color. She is in calf to Imp. Highland Champion. The two cows, Royal Queen 3d and Roan Maid, are excellent individuals and good breeders, strong in Scotch blood, the former mentioned having an excellent bull calf at foot, and the latter being in calf to the straight Scotch bull, Pride of Riverdale, the highest-priced young bull of the Prather dispersion. The two show heifers consigned by Colonel Hart are beautiful reds of grand quality and he also consigns a great breeding cow in calf to Imp. Sovereign. Breeders should also remember that Messrs. Hadley & Leach consign the three-year-old bull, Prosperity, and a number of his showyard get, with some of the most thick-fleshed, massive breeding cows the breed has ever produced. A daughter of Imp. Spartan Hero will be sent by Prim Estill of Athens, Ill. Catalog will prove interesting reading and will be mailed on application to Mr. McGavock.

### Allen Bros.' Chester White Sale.

Having been very successful in producing some first-class swine that have been winning premiums at the Des Moines fair, Messrs. Allen will hold a joint sale at Russell, Lucas county, Iowa, on Friday, January 18th. Sale is to be held in sale barn and those in attendance will be made as comfortable as possible. Col. H. S. Duncan and Charles Moorehead will conduct the sale, which will be an exclusively female offering of thirty-five head of gilts and yearlings. All sows are guaranteed to be bred. The largest part of the offering is sired by Grandee 11773 by Iowa Chief 341. This sire represents a very prolific strain as a record of his work will indicate. The average size of litters in these two herds the past year has been twelve. On the dam's side the breeding is equally strong and traces back to some of the best eastern stock. As a producer of large, uniform litters Lorne 12307 (a granddaughter of Iowa Chief) has been notable. She represents a very excellent type of white hog and, in fact, all numbers for the sale are very good in this respect. Excellent length, with strong back and straight bone is quite characteristic. Teddy Jr. 6398 (a noted sire that, as a two-year-old, weighed 700 pounds and was of the growthy, large kind) is represented by gilts in the collection. The offering is bred to either of two boars, Jack the Ripper 12627, by Victor 2d 11613, and Albino Chief by Abe 10296. These boars are very good individuals and their ability to produce some splendid stock cannot be doubted. Albino Chief has seven inch bone, and length to correspond. There

## SCOTCH AND SCOTCH TOPPED

# SHORT-HORNS

RED OAK, IA., MONDAY, JAN. 21, 1907

### CONSIGNORS:

Jno. M. Bixler, Corning, Iowa.  
C. E. Shoemaker, Corning, Iowa.  
George Mahr, Corning, Iowa.  
S. A. Bixler, Corning, Iowa.  
O. L. Leeklighter, Prescott, Iowa.  
J. A. Robinson, Prescott, Iowa.

40 Head 5 Head Straight Scotch Cattle 40 Head

There will be some splendid Scotch cows and heifers in this sale; also some excellent Scotch and Scotch-topped bulls, sired by Imp. Bapton Admiral, Diamond Rex (a son of Imp. Cock Robin), Double Lavender, and other noted Scotch bulls. There will be a grand lot of Scotch-topped cows and heifers selected from the above herds especially for this sale. The breeder and the farmer will find what they are looking for in this sale. Write for catalog at once. Address

JOHN M. BIXLER, MGR.  
Corning, Iowa.

COL. GEO. P. BELLOWES, AUCT.

These cattle will all be on exhibition at the short course at Red Oak, Iowa, the week preceding the sale.

Please mention The Homestead when writing for catalog.

are several gilts that carry the blood of Miss Lucky (a very valuable sow) now at her best in one of the herds. Her litters have been regularly produced and much admired. For length she is hard to beat, as she measures fifty-nine inches from crest to tail head, at the same time carrying herself well. Those who are after some good stock of this breed will do well to be in attendance at the sale. The stock will be in the best of condition, not hog fat, however. Remember the time and place and send for catalog to Mr. Charles Allen, Russell, Iowa. Kindly mention The Homestead. See advertisement on page 34.

### Sir Albany 9th 180123—A Hereford Show Bull.

The owners of the above bull wrote, on Sept. 19, 1906, as follows: "We have just returned from the fair circuit. His winnings at Hamline was second in class (a much stronger class than was shown at Des Moines) and if he had carried a little more flesh he would have been good for first place. At Sioux City he won out first in a very

strong class. He is a bull we are counting on for another year, as we will not use him so hard, and fit him out to win, as the judges liked him very much. He had been in service right up to the fairs, and as a breeder there is none better, as he breeds his type—heavy quarters, good color, not as dark as himself. He also breeds that fine drooping horn, and for a pedigree you will not find anything better in the herd books. His dam is a double cross Garfield cow, which sold for \$1,000 in 1901, and was bred by Mr. Adam Earl, and was the top of his herd. His sire, Albany, is the highest-priced bull ever imported to this country as a two-year-old—at \$6,000. Sir Albany 9th 180123 was shown by Messrs. Edmonds, Shade & Co., of Kingsley, Iowa, and sold by them to Mr. B. F. Clark, of Albia, Iowa, to go to the head of his herd of Herefords. He will be in heavy service and perhaps will not be shown again, but will be there for inspection of parties looking for breeding stock of this class. Mr. Clark has been a reader of The Homestead for years and an advertiser in the columns with very good results, and we can highly recommend him to the farmer and others of the middle West. See illustration on page 23.

# GREAT WESTERN DUROC JERSEY SALE CIRCUIT

## 250

### THE CREAM OF SIX OF THE BEST HERDS IN THE STATE OF IOWA

Including daughters and granddaughters of Ohio Chief, Junior Jim, Crimson Wonder, Proud Advance, Tolstoy and other noted sires. Some of these were leading winners at the Iowa State Fair, including the first prize sow at Des Moines.

## 250

THE MOST UNIFORM LOT OF DUROC JERSEY SOWS THAT WILL BE SOLD THIS YEAR.

### JANUARY 19, 1907

Aug. Voge, Portsmouth, Ia., will sell at his farm

**40 Head** Eighteen fall yearlings and aged sows and 22 spring gilts. Three daughters of the World's Fair sweepstakes boar, *Tip Top Notcher* in sale; 8 daughters of *Crimson Wonder I Am 2d*, the third-prize boar at Des Moines; one *Junior Jim* gilt, and a daughter of *Lafollette*, considered one of the most sensational gilts of the year, bred to the first-prize Iowa State Fair boar, *Kruger Lad*, will also be sold. A big per cent of the offering will be bred to *Kruger Lad* and *Crimson Wonder I Am 2d*. If you want prize-winning blood come to my sale. Write at once for catalog. Address,

**Aug. Voge, - Portsmouth, Iowa.**  
Col. L. L. Luther, Auct.

### JANUARY 21, 1907

Grant Hockett, Manning, Iowa, will sell at his farm

**40 Head** Sixteen aged sows and spring and fall yearlings, rest spring gilts. Daughters of the great Orion, Model Chief, Crimson W., Rural and Hector, and are bred to

**I AM ADVANCE**

one of the greatest boars today in the state of Iowa; also to *Crimson W.*, *E. L. Perfecto* and a son of the great *Tolstoy*. I can show more uniformity and more size than has ever gone through an Iowa sale ring. Write me for catalog. Address,

**G. W. Hockett, - Manning, Iowa.**  
Col. L. L. Luther, Auct.

### JANUARY 22, 1907

Claremont's Bred Sow Sale, Audubon, Iowa.

**40 Head** of the best sows in the herd go at your own price. This sale includes *Claremont's Empress*, the first-prize gilt at Iowa in 1906, her litter sister, the gilts of the second-prize litter at Iowa, 1906, *Queen Orion*, the famous granddaughter of Orion, one of S. E.'s Model's best gilts and many others of great merit. This sale is made up of prize winners and sows of prize-winning blood.

**HERD BOARS.**

*Claremont's Model*, first-prize boar at Iowa, 1906; *Proud Advancer*, sire of the first-prize gilt and second-prize gilt at Iowa, 1906; *Audubon*, twice champion over all breeds at Audubon County Fair, and *Claremont's Prince*, a grandson of *Proud Advance* and Orion. Write for catalog. Address,

**JOHN WEIGHTON, - AUDUBON, IOWA.**  
Col. L. L. Luther, Auct.

### JANUARY 24, 1907

J. E. Wehr, Portsmouth, Ia., sells the cream of his herd.

**40 Head** Fifteen yearlings and aged sows, rest spring gilts. Sired by *Munson's Perfection*, first-prize boar at Des Moines; *Bryan M.*, a grandson of Duroc Challenger; *King Perfection*, sweepstakes boar at Des Moines, and other noted sires. Bred to *Proud Advance Jr.*, Orion's Model, *Young Surprise* and *Minnesota Chief*, first-prize boar Minnesota, 1906. I never offered for sale such a lot as will go through my sale ring this year. Write me for catalog.

**J. E. Wehr, - Portsmouth, Iowa.**  
Col. L. L. Luther, Auct.

### JANUARY 25, 1907

**Public Sale of Duroc Bred Sows.**

On January 25, 1907, I will sell fifty head of sows, six by the old hog, Orion 5293, six by *Proud Advance*, three by the sweepstakes hog, *Crimson Wonder I Am*, including one full sister to the sweepstakes boar, *Crimson Wonder Again*, others by *Junior Jim*, *I Am a Wonder*, *Young Advance*, *Tienstin* and other boars. I will also include the great yearling sow, *Ruberta*, winner of first prize at Iowa State Fair last year. They will be bred to the \$5,000 boar, *Junior Jim*, *I Am a Wonder*, Orion's Son and *Tienstin*, sire of *Ruberta*. Write for catalog and mention *The Homestead*.

**F. E. GARRETT, - LOHRVILLE, IA.**

### JANUARY 26, 1907

Clovercroft Durocs at Public Auction at Glidden, Iowa.

**40 Head** Fourteen tried brood sows and yearlings, balance gilts. Daughters of *Clovercroft King*, *Clovercroft Tip Notcher*, *Adjuster*, *Peerless*, *American Royal*, *Belle's King*, *Advance* and the great Orion. They are bred to the great *Long John*, *Clovercroft Orion*, *Clovercroft King* and *Adjuster*. Write at once for catalog.

**Dr. J. A. Downs, Glidden, Ia.**  
Col. L. L. Luther, Auct.

ADDRESS ANY OF THE ABOVE BREEDERS FOR CATALOG AND KINDLY MENTION IOWA HOMESTEAD.

## Closing Out Sale of the Cedar-Bank Poland and China Herd.

At Fullerton, Neb., on January 25th, will occur the closing out sale of the noted Cedar-Bank herd of Poland Chinas. This herd has been under the management of Mr. Thomas F. Miller, one of the best-known Poland China men in the West, and no breeder in Iowa or Nebraska has a better herd of the useful, money-making kind of Poland. This herd has been especially strong among the best western breeders for a number of years because it combined the size so much sought after by western men, and yet having the quality that is seldom found in a herd of this kind. There are sows in this sale that could not be purchased at any price were it not that the farm has been sold, and thus necessitates the dispersion of the herd. At the head of this herd stands the great Peter Sterling 6353, considered the best breeding son of old Chief Tecumseh 3d. As a sire of brood sows, combining quality and size, he stands second to no other boar in the land. The daughters of Peter Sterling have always been in demand by breeders who knew their value as brood sows, and we want to say to readers of *The Homestead* who are looking for the practical, money-making Poland China that they will never make a mistake if they secure some of the get of this great boar. There will be twelve or fifteen of his daughters in the sale, and there is not a poor one among them. They combine the size, the bone and the finish, and they certainly are great brood sows. The old hog will also be sold, and he should by all means go to some good herd. He is now six years old, but he is in good condition. He has always been well cared for and he is good for many years to come. The breeder who is looking for a sire of especially good brood sows will never regret it if he buys the splendid breeding boar. The other boars used in the herd are *Thickett Perfection 105415* (a son of the sweepstakes boar, *Thickett*, out of a daughter of *Chief Perfection 2d*), and *Mischief Maker 2d* (a son of the great *Mischief Maker*, and out of a *Corrector* dam). These three boars will be bred to the sows that go into this sale. Besides the Peter Sterling sows there are others that will fill the bill in most particulars. To the man that wants an especially attractive sow we would say buy *Starlight* (a daughter of old *Lamplighter* out of a daughter of *Proud Perfection*). She is a medium-sized sow, but she certainly is one of the most perfect sows that will be sold in Nebraska this year. This sow is neatness itself, with a good head and ear, a splendid hack and a deep ham, and she has always produced well to the service of Peter Sterling and she is bred to him again for March litter. *Orange Girl* is a daughter of *Orange Chief*, and is one of Mr. Peter Mouw's big kind. She is one of the biggest sows on the farm, and the man that wants a large, roomy brood sow will be pleased with her. She raised nine pigs this season, selling from \$25 to \$55 each. She is bred to *Thickett Perfection*. There is a good daughter of old *Corrector* in the sale, also several that are sired by *Searchlight*, a son of old *Lamplighter* out of a *Chief Perfection* dam. There are other

good sows in this offering, and we know of no sale this season where so many good things in the way of brood sows will be sold in one sale. One of the most up-to-date catalogs of the season is ready for distribution and will be sent to readers of this paper provided they mention *The Homestead* when writing. Any bids sent to Mr. M. T. White (Homestead representative) in care of Mr. Thos. F. Miller, will be properly attended to on sale day.

## A Well-Known Chester White Breeder.

Mr. J. L. Barber, of Harlan, Iowa, desires through the columns of *The Homestead*, to thank his customers and friends for the liberal patronage which they have extended to him this year, and extends to each the compliments of the season. As previously announced in *The Homestead*, the heavy demand for sows has induced him to change

his plan of selling and to dispose of all privately instead of by auction. At the head of his herd is *Captain 14119*, the first-prize hog at Iowa State Fair in 1904, also first at Minnesota and sweepstakes hog at Sioux City. He was first in yearling class and reserve in champion class at World's Fair, St. Louis. He is not only a good pig, but has been a notably successful breeder. He will be for sale after January 15th.

## Peterson's Percherons.

On another page of this week's *Homestead* will be found the advertisement of Mr. H. E. Peterson, of Lyons, Neb., one of the best-posted draft horse men in Nebraska. Without fear of contradiction, we will say that

there are few better judges of a Percheron horse in this western country. In years gone by he resided in Illinois and while a resident of that state always imported his own horses. Of late years he has been a resident of Lyons, Neb., where he always keeps a barn full of Percheron stallions. He now has an excellent lot of stallions for sale and he offers these at from \$700 to \$1,000, and they are certainly worth the money. It will pay any man who wants a stallion to go and see these. He has a four-year-old coal black stallion called *Fountain* that will weigh 1,900 pounds. His sire was *Kellerman 10715*, one of the best breeding stallions in Illinois. He was also the sire of *Epsilon*, the horse that took first prize and reserve championship as a three-year-old at St. Louis. *Fountain* is therefore a half brother to the great *Epsilon*, and he is a good one. Mr. Peterson has a two-year-old colt called *Denmark*, a son of the imported mare, *Prince Nor*, and out of an imported mare, that shows wonderful promise for next year. He has another gray Percheron, coming three years old, called *Tiger*. He is what you would call a Dutchman's horse, a well-made, clean-limbed horse and as smooth as a ribbon. He also has some younger horses and his prices on these are within the reach of anyone that wants a Percheron stallion. His horses are exceptionally clean of limb, with plenty of bone, lots of style and are good actors. If any of our readers want a good stallion at a reasonable figure it will pay them to go and see these horses. Mr. Peterson will be glad to hear from *Homestead* readers who are thinking of buying a horse, and will be glad to answer any inquiries. Kindly mention *The Homestead* when writing.

## Last Call for the Grinnell Sale.

This will be our last opportunity to direct attention to the very important offering of Short-horn cattle that are to be sold by the following well-known breeders at Grinnell and surrounding territory: Located at Grinnell and Malcom, Iowa, are Messrs. George Bonewell and James Duffus, whose enterprise in pushing the Short-horn interests of that community have made for them a reputation that is quite enviable. Not having quite enough surplus cattle that they cared to spare from their well-established herds to make the desired number for a sale, they have allowed Mr. J. B. Zirbel, of Malcom; Mr. D. C. Sleggel, of Brooklyn, Iowa, and one or two other parties to contribute somewhat to this sale. The sample pedigrees will suffice to show the high character of Scotch Short-horn blood represented in the sale. The herd bulls owned by each of the gentlemen contributing to the sale are superior bulls that have not only been satisfactory at the heads of their respective herds, but are of proper ages to give good satisfaction at the heads of any new herds that they may choose to go to. The sale catalog reveals some very choice Short-horn blood and, inasmuch as there are so many interests at stake in this sale, we cannot well individualize on these cattle without doing someone else in the sale an apparent injustice whose cattle might fail to be mentioned individually. It is sufficient to say, however, that there are a number of good Scotch females,

as well as five good Scotch herd bulls. Included in the offering is sixty head of Short-horns, a large per cent of which either have calves at foot or are well forward in calf. Certainly this will be a fine opportunity for the ranchman who is desirous of purchasing a carload, or for the small breeder who only cares for a few individuals. The sale management will be under the charge of Messrs. G. A. Bonewell and James Duffus, whose reputation for fair dealing and honesty is beyond question; and the other consignors will have to submit to the direction of these two gentlemen who are making the sale and who will be responsible for the conduct of the same. Col. Geo. P. Bellows, of Maryville, Mo., will conduct the sale, assisted in the ring by Mr. J. L. McIlrath. We regret that space forbids further mention, but it will be sufficient to receive the catalog and study the breeding just as it is set forth there. Application for these catalogs should be made to either Mr. Bonewell or Mr. Duffus, mentioning *The Homestead* when so doing.

## Last Call for Wheeler's Duroc Sale.

One of the best opportunities to buy Duroc Jerseys this season will be at Harlan, Iowa, on January 16th, when Mr. W. W. Wheeler closes out his entire herd. Some rare bargains will be offered in this sale. There will be more of the blood of that sensational sire, *Crimson Wonder*, in this offering than in any heretofore made. There will be twenty-nine daughters and granddaughters of old *Tolstoy* and it will certainly furnish breeders a good reason to be present at this dispersion sale. No. 1 of the catalog is a litter sister to *Crimson Wonder*, being a son of *Tolstoy* and out of the great sow, *Ohio Anna 8th*. It is the only sale where a litter sister of this great boar can be bought, and were it not for the fact that Mr. Wheeler is quitting the business, she would not be for sale at any price. She is bred to *Keep's Ohio Chief*, a grandson of the great *Ohio Chief*. Nos. 3 and 4 are full sisters to *Crimson Wonder*, only a year younger. Mr. Wheeler also sells *Lady Orion*, a daughter of old Orion, in this sale, and she is bred to *Improver Lad*, a son of *Improver 2d*. *Mayflower* is a four-year-old Duroc Challenger sow and she has been one of the best brood sows on the farm. She is bred to *Scarlet Wonder*, a son of old *Pericles*. One of the best things in the sale is *Lady Belle*, a daughter of *Belle's Perfect King*, a son of the great sweepstakes sow, *Nebraska Belle*, and out of *Lady Wonder*, the litter sister to *Crimson Wonder*. There will be several of these *Belle Perfect King* sows in the sale and they are generally good ones. There will be daughters of *Carmine Wonder* and *Scarlet Wonder* in the sale, also daughters of old *Majestic*, one of the good boars used in the Wheeler herd. Mr. Wheeler was one of the best buyers of the good stuff when he purchased his foundation sows, and now he sells them all. It will be a place to buy Durocs. If you are wanting sows of this breed, and good ones at that, you cannot afford to miss the Wheeler sale. Nothing is reserved and everything will be sold. Write Mr. W. W. Wheeler, Harlan, Iowa, for catalog and be sure to attend the sale. Kindly mention *The Homestead* when writing.

# Eastern Iowa and Western Illinois Duroc Jersey Circuit

THE OPENING CIRCUIT OF THE YEAR

## January 22d to January 25th inclusive

### Tuesday

January 22, 1907

## Hanks & Bishop, 40 Head

New London, Iowa

Offer forty head of richly bred Durocs; ten aged sows and yearlings; thirty spring gilts, the get of such noted boars as Proud Advance, Buddy K. IV, Major Jr., Top Notcher Again, Indiana Boy by None Such, the sire of Hanley, Ben Davis, first at Iowa State Fair, 1904, Indicator and other noted sires. Sows are bred to Model Wonder, a sensational son of Crimson Wonder I am, the best son of this noted boar farrowed in 1906. Several bred to Iowa Chief, a son of Golden Rule from the noted herd of Messrs. Watt & Foust. Our stock is in excellent breeding condition and will please all lovers of good Durocs. Sale will be held in town in heated pavilion. Catalogs now ready.

### Wednesday

January 23, 1907

## J. A. Smith, 35 Head

Sciota, Illinois

Invites the readers of this paper to attend his annual brood sow sale. Thirty-five head of nicely bred Durocs have been selected for this sale. Fifteen aged and yearling sows and twenty spring gilts sired by Tip Top Notcher. Best of Top Notchers, Long Notcher, a good son of Tip Top Notcher, Major R., Stoner's Improver, J. I. C., a son of Kan't Be Beat and out of Cedarvale Queen VIII, junior champion sow at World's Fair and others of equal note. Write for catalogs.

## Reil & Cooper, 35 Head

Ferris, Illinois

Offer thirty-five head of richly bred Durocs at auction. Thirty-five head; tops of two herds. Nine yearlings, twenty-six gilts, bred to Wonder Boy, 1st prize boar pig Illinois State Fair, 1906; to Ambition II, by Ambition, the noted yearling owned by Messrs. Thomas & Hogsett; several are bred to Wonder Lad, litter brother to Wonder Boy, others bred to Chief C. **Special Attraction:** Lady Kruger 3975a, 1st prize under year sow Illinois State Fair 1906, goes in sale, bred to Wonder Boy. Write for catalogs.

### Friday

January 25, 1907

## N. B. Cutler, 35 Head

Carthage, Illinois,

Proprietor of Bonny Mede Farm.

Offers to the public thirty-five head of choicely bred Durocs. The offering is made up of eighteen yearling and aged sows and seventeen gilts bred to Wonder Boy, 1st prize boar pig Illinois State Fair, 1906, and headed first prize litter same show. Several to Peter The Great, he by Big I Am. The best lot ever offered from Bonny Mede herd. Each animal a useful one and many sows of rich breeding and show yard individuality. Among the best is the show sow Iona Queen, always a prize winner at leading state fairs. An attractive gilt is offered in a full sister to Wonder Boy, one by Milton Orion, a full sister to Red Carnation, the sow which has topped two noted sales. Catalogs sent free.

Breeders and farmers are invited to be present at the week's sales, the offerings being of the richest breeding and individual merit. **Parties who cannot be present, send bids to Mr. D. M. Pierce, representing this paper. Cols. McGowan, Reppert and Duncan, Auctioneers. Mention this paper when writing.**

# THREE DAYS' AUCTION

## OF HIGH CLASS

## SHORT-HORNS, ABERDEEN-ANGUS

## and HEREFORDS

AT SOUTH OMAHA, NEB., THURSDAY, FRIDAY AND SATURDAY, JANUARY 17, 18, 19, 1907.

Fifty show and breeding Short-horns, including the straight Scotch show bull, Imp. Emperor 2d 205154 (a five-year-old and sire of International winners); the great three-year-old Prosperity 222313 and a number of his showyard get; the straight Scotch heifers, Portia and Rose Archer, and show heifers by the \$1,000 bull, Imp. Sovereign 157330, and cows and heifers in calf to Imp. Sovereign, Imp. Highland Champion and other famous sires, being the best all-round offering of Short-horns that I have ever cataloged. They will be sold on January 17th, and are consigned by Col. T. B. Hart, Edinburg, Ill.; Hadley & Leech, Cedar Rapids, Neb.; S. E. Prather Co., Sherman, Ill.; Chas. F. Mills, Springfield, Ill.; John Sippel, Casey, Iowa; W. W. Griffith, Anawan, Iowa; H. G. Bowers, Elmwood, Ill.; W. L. Tiller & Sons, Pawnee City, Neb.; Harry Davidson, Adrian, Mo.

Sixty Aberdeen Angus, constituting the most superior offering of the breed that I have ever sold at South Omaha, will be auctioned on January 18th. Included are high-class representatives of the Blackbird, Erica, Queen Mother, Drumin Lucy, Barbara, Crocus, and other noted families, and sons and daughters of the famous bulls, Imp. Prince Ito, Bell's Eclipse, Lord Woodlawn, Woodlawn, Blackbird Wonder, Lon 4th, and other celebrated bulls. They are consigned by W. D. Reynolds, Villisca, Iowa; C. B. Gray, Corwith, Iowa; Barr & Lonecker, Dexter, Iowa; N. G. Daughmer & Son, Douglas, Ill.; Martin H. Knudson, Farmingdale, Ill.; B. H. Keck, Cornland, Ill. There are high-class herd-heading bulls, and females good enough to go into the herds of the best breeders of the land, and we trust that western Angus breeders will appreciate this great offering.

Thirty Herefords, representing the substance and thickness for which the breed is famed, will be auctioned on January 19th. The blood of the present-day prize winners and champions, as well as that of the champions of past ages, will be found cataloged. The animals are consigned by H. K. Philson, Harlan, Iowa; N. J. Hiltabrand, Lostant, Ill.; Hugh Whiteford, Guilford, Mo., and W. J. Pellett, Atlantic, Iowa.

## HEREFORD CATTLE.

## .....9 CHOICE YEARLING HEREFORD BULLS 9.....

## FOR SALE.

I HAVE for sale the choicest lot of yearling Hereford bulls that I have ever had. They are sired mostly by Beau Donald 48th 121465 and out of cows of the richest Hereford breeding known to the breed, such as Anxiety, Lord Wilton, The Grove 3d, and others of like breeding. A visit to my farm, two miles west of Mechanicsville, Iowa, will prove that the bulls I am offering at from \$100 to \$125 are the equal of those usually sold at twice this sum. I have no females to spare at this time. Have been breeding Herefords seventeen years and have fifty breeding cows in the herd. For particulars, address,

JOHN SECOR,

Mechanicsville, Iowa

## ABERDEEN ANGUS CATTLE.

# Prairie Farm Durocs at Auction

At Joy, Illinois, Friday, January 18, 1907

**40** Head of choicely bred Duroc sows. 12 aged and yearling sows **40**  
several of which have raised fall litters of show yard merit. 28 gilts

We have selected the tops of over 300 head for this offering and have drawn upon some of the very best herds of the breed for our foundation stock. The blood of Tip Top Notcher, Kruger, Major R., Royal Plummer, American Royal, Proud Advance and other famous sires is found in this offering. Many of the offering are sired by the state fair prize winner, DeSoto's Model. Sows are bred to Perfection Chief 34729, first-prize yearling 1905 and first-prize aged boar 1906, Wisconsin State Fair; second-prize yearling, Minnesota State Fair, 1905; second-prize aged boar, Minnesota State Fair, 1906; third-prize yearling, Iowa State Fair, 1905, and headed third-prize young herd, 1905, Iowa State Fair.

A LIMITED NUMBER OF SOWS ARE BRED TO THIS NOTED BOAR. Other sows are bred to Sue's Tip Top Notcher 53955 by Tip Top Notcher; Prairie Advance 53957 by Proud Advance; Prairie Paul by Champion Paul; Dreamland Major 53959 by Major R., a World's Fair winner. Individuality combined with the richest blood lines the breed affords makes this one of the most desirable offerings of the year. Write for catalog at once.

## E. M. Castle & Son, R. 3, Joy, Ill.

Send bids to D. M. Pierce, representing this paper in care of Messrs. Castle. Cols. Reppert & Keil, Aucts.

## DUROC JERSEY HOGS.

## Wheeler's Duroc Dispersion.

13 | Wednesday, January 16, 1907. | 33  
SOWS | At the Sale Pavilion, Harlan, Iowa. | GILTS

ON the above day and date, I will sell every Duroc Jersey I own. I regret to do this more than I can tell you, but one man can't do everything. I have spent years of time and an endless amount of money to establish this great herd of Duroc Jerseys. I will sell three full sisters to Crimson Wonder, one litter sister, one daughter of Orion, one daughter of Duroc Challenger, 33 gilts sired by Carmine Wonder, a half brother to Crimson Wonder, Scarlet Wonder, a son of Pericles and out of a full sister to Crimson Wonder and Belle's Perfect King, a son of Nebraska Belle. They are bred to a grandson of Ohio Chief and Improver 2d. This is a grand herd of Duroc Jersey hogs. Take a day off and spend it with me. You will never regret it. Write for catalog.

W. W. WHEELER, - Harlan, Iowa

## HORSES.

## His Majesty, King Edward VII, of England, and Lord Rothschild's Exhibit of Stallions Were Purchased by ROBERT BURGESS & SON at the International Exposition at Chicago, 1906.

Winnings 1906 Demonstrating to the Public the Superior Quality of Our Stud:

Champion Percheron Stallion at the Kansas state fair.  
Champion Belgian Stallion at the Kansas state fair.  
Champion Shire Stallion at the Illinois state fair.  
Champion Shire Stallion at the American Royal, Kansas City.  
Champion American-Bred Percheron Stallion at the American Royal.  
First Best Five Percheron Stallions at the Kansas state fair.  
First Best Five Belgian Stallions at the Kansas state fair.  
First Best Five Shire Stallions at the Illinois state fair.

Second Five Best Belgian Stallions at the Illinois state fair.  
First Best Five Shire Stallions at the American Royal, Kansas City.  
Second Best Five Belgian Stallions at the American Royal, Kansas City.  
Second Best Five Percheron Stallions at the American Royal, Kansas City.  
Champion Shire Stallion at the Chicago International.  
Best Imported Shire Stallion at the Chicago International.  
Best Five Shire Stallions at the Chicago International.  
Reserve Champion Belgian Stallion at the Chicago International.

Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper who is assisting in placing the stallion in your neighborhood, who usually is one of your own neighbors (the most influential man of the neighborhood), whose influence is obtained by a large commission paid to him by the seller placing the stallion. The long-time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. WE KNOW WE CAN SAVE YOU AT LEAST 50 PER CENT. IF YOU HAVE TO HAVE A COMPANY TO HAVE A HORSE IN YOUR NEIGHBORHOOD, FORM YOUR OWN COMPANY and come to the barns. BE CONVINCED THAT YOU CAN SAVE from \$1,000 to \$1,500 which has to be paid to this influential neighbor or neighbors to sell you a horse.

Good American-bred stallions, \$800 to \$1,000. First-class imported stallions, \$1,200 to \$1,600. Choicest stallions a little higher.

We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from—SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS. Come to Wenona and deal with Bob Burgess, who has been in the business over thirty-two years—longer than any one man in the stallion trade—and we guarantee to make every deal satisfactory to you. Get your guaranty and insurance direct from headquarters. Visit our barns and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and has the quality of stock that will suit the people, is perfectly good for the guaranties and will sell to you more good horse quality for less money than anyone. Come to the barns and get the most reasonable terms that can be offered.

Send for illustrated catalog and calendar.

Wenona, Ill.

Wichita, Kan. Apply Rosberry & Coon.  
Dawson, Neb. Apply Leroy Judd.

## H. LEFEBURE'S BELGIANS.

FAIRFAX is eight miles west of Cedar Rapids on two railroads and is the greatest Belgian horse market in America. Cedar Rapids and Iowa City electric car passes near farm every 45 minutes.

JESSE S. GOLDER, - Scribner, Neb.

## Percheron Stallions and Mares For Sale

I AM the breeder of Glades, second prize winner at the St. Louis World's Fair, the largest two-year-old mare in the world. My three-year-old stallions weigh 1,850 to 1,900 lbs. I also offer my herd stallion, a jet black, 2380 lbs.

NICHOLAS STAMM, Letts, Iowa

## PERCHERONS FOR SALE.

IMPORTED and home bred stallions and mares one to seven years old; several match teams of mares. All stock registered in Percheron Society of America record. New importation arrived Oct. 10. Mansdum & Wheeler, Fairfield, Iowa

SHIRES, PERCHERONS, BELGIANS—Imported horses, \$1,000; home-bred stallions, \$250 to \$750; also Shire mares. A. LATIMER WILSON, successor to L. Banks Wilson, CRESTON, IOWA.

IMPORTED Shire, Belgian and Percheron stallions, \$1,000. Home bred draft stallions, \$250 to \$300. Hart Bros., Osceola, Iowa.

PERCHERONS, SHIRES, STALLIONS AND mares. Prices from \$200 to \$800 each. Address, E. Fugler, Creston, Iowa.

## 80 STALLIONS

THE BEST IMPORTED STALLIONS

ONE THOUSAND DOLLARS each. Home bred registered draft stallions \$250 to \$750 at my stable door. Address, A. LATIMER WILSON, CRESTON, IOWA

## 21 IMPORTED STALLIONS 21

FOR SALE—I have recently landed from Belgium (everything considered), the choicest bunch of imported Belgian stallions and mares that I have ever owned. They range from two to five years old. They are blacks, bays and roans. Address,

E. H. KNICKERBOCKER, Fairfax, Iowa

## Percheron Stallions For Sale.

IMPORTED and home bred, from two to seven years old. All coal black. Best of bargains. If you want a stallion, come and see me.

G. C. HARRISON, - Blencoe, Iowa

A PERCHERON stallion for sale, imported, color black, coming 11 years in spring. A sure breeder, weight about a ton. Write L. Maasdam, Peila, Iowa.

WANTED: Registered cattle, stallions and jacks in exchange for Illinois, Iowa, Missouri, Kansas, Nebraska, Minnesota or Wisconsin farm. Box 164, Independence, Iowa.

## HORSES.

# FRANK IAM'S "TOP NOTCHERS"

LARGEST pair of four-year-old Percheron and Belgian stallions in United States, weight 5080. Winners of 1st prizes and sweepstakes prizes (over all) at Nebraska state fair, 1906. A pair of "nutcrackers," "Iams' kind." Iams' "Horse show" at Nebraska, Iowa and Illinois state fairs was the "talk" of the "people and press." His 2,500 pound Percheron "Trallala" defeated the "Champion winner" "Bibi" of France at Iowa state fair. Iams stirred up "the animals here," "they sat up and took notice" of his winners and sons of winners. He hypnotizes buyers with "top notchers" at "let-live prices." "When! Shy Ann." Buy a stallion today, save \$300 and get choice of Iams barns filled to the roof with

168—PERCHERONS, BELGIANS AND COACHERS—168

TWO to six years old, weight 1,700 to 2,500 pounds. Ninety per cent "black boys," 50% "ton stallions." All registered and approved. Mamma, Iams is a hot advertiser, but he has "the goods." He sells "toppers" at \$1,000 and \$1,500, so good that they need not be "peddled" or put on "auction block," to be sold. He has on his "selling clothes," they fit all buyers. No man with money or bankable notes gets away from Iams. He buys, owns and sells more stallions than any man in United States, saves thousands of dollars to stallion buyers. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000---Saved at Iams---\$1,000

KEY, what a rich graft these "slick stallion salesmen" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "Topnotchers" so good, big and cheap that they need not be peddled to be sold. Mr. Buyer, see Iams' stallions yourself. Take no "gold brick stallion salesmen's word." Iams has "the goods" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high price" out of the Xmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. George, dear! buy a stallion of Iams. His \$1,200 stallions are much better than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from breeders, pays no buyers, salesmen or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a better stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by slick salesmen, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives sixty per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. References: St. Paul State bank and Citizen's National bank.

## SAINT PAUL, - NEBRASKA

## PINE RIDGE STOCK FARM

Has the biggest and best barn in the United States and it contains the BIGGEST and BEST lot of Percheron and French Draft Horses. The last chance to obtain a colt by SAMSON 27233, as his last colts are now yearlings. Over 150 head of horses showing more bone, size and quality than any similar number in America. TAVERNIER P. 33719 and F. D. 12610 now at head of the stud. Prices below competition. Barn at Moose Jay, Sank., Can., in charge of E. F. Muxey. L. M. HARTLEY, SALEM, IOWA.

## PETER HOPLEY & SON

LEWIS, IOWA

Percherons, Shires, Suffolks, Belgians and German Coachers.

The best of these great breeds always to be found and our prices are the lowest. If you are in need of a Stallion of the above breeds or contemplate buying, write us. BARNS AT FARM.

A FEW CHOICE SUFFOLK FILLIES FOR SALE.

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. A Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

## PERCHERON IMPORTING COMPANY, CHARITON, IOWA.

YOU want an imported stallion of purest breeding. With a short back, upheaded, gentle and handsome. We have them. We pay the freight and return fare. We guarantee and insure every horse. We give you a square deal at a low price. OURS ARE THE BEST. NEW IMPORTATION IN AUGUST. Blacks and dark grays. On main line and branches of Burlington Route. CHARLES R. KIRK, CHARITON, IOWA.

## HORSES.

# Watson, Woods Bros. & Kelly Co. Lincoln, Neb.

One of the oldest importing firms in America have in their stables, at Lincoln, Nebraska, 60 head of the best Percheron, English Shire, Belgian and Hackney stallions. Mr. Watson is in Europe constantly buying. 50 head more will arrive soon. This firm are careful in their selections, buying only the best stallions and selling them at a very small profit. We give our customers the lowest possible price, the very best of stallions and a guarantee that you know is absolutely good and backed up by a reliable firm. Write for pictures.

**Watson, Woods Bros. & Kelly Co.,** LINCOLN HOTEL BUILDING, Lincoln, Neb.

## CHAMPLIN BROS., CLINTON, IA.

Percheron, Belgian, Shire, French and German Coach Stallions.

## EASIEST TERMS.

PROTECTION FOR TWO YEARS.

MOST LIBERAL CONTRACTS ON EARTH A NEW PLAN

## FINEST HORSES:

BREEDING, SIZE, QUALITY, STYLE, FINISH, ACTION, DARK COLORS. GUARANTEED FOAL GETTERS.

### Our Own New, Personally Selected, Direct Importation.

A GREAT NUMBER OF PRIZE WINNERS from the leading horse shows of Europe. If you have not seen OUR HORSES, you have NOT seen the best. YOU want a FIRST-CLASS stallion. Come to our superb new, up-to-date stables and SEE for yourself—just what you want. Write about transportation here and return. ON OUR PLAN you can make a first-class horse pay for himself. No money required.

### OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landshaftwart O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANN'S BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

## S. J. MILLER, KIRKSVILLE, MO.

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

25

Percheron stallions, among which are prize winners in France, coming threes and fours, weighing 1,900 pounds, all dark colors.

25

No importer can sell you a better horse at from \$700 to \$1,400 than I am offering, for they were not brought over this year. Among my French coachers you will find a four-time winner in France. To the man wanting a first-class mammoth jack or jennet, will say I have them. Come to my barns and let me show you, or write me, telling what you want. Barns in town. Kirksville is on the Wabash and Burlington railroads.

## M. L. AYERS - SHENANDOAH, IOWA.

Importer and Breeder of

PERCHERON HORSES

100 Stallions and Mares. Big ton stallions and a fine selection of young two and three year-old home bred stallions, home bred and imported. The imported Brilliant bred stallion Blande (36577) at head of stud. Thirty years draft horse breeding. Red Oak Branch C. B. & Q. R. R.

## PERCHERONS AND PERCHERONS ONLY. L. H. Humbert & Son, Corning, Ia.

ARRIVED home with their twenty-seventh annual importation of Percheron stallions this year. 80 HEAD STALLIONS and MARES now on hand. We can sell you a good horse for less money because we are natives of France and buy our own horses without the aid of an interpreter. Write or come and see our horses. Be sure to see OUR Percherons before buying. Telephone service. L. H. Humbert & Son, Corning, Ia.

## Trumans' Champion Stud

WE ARE THE LARGEST IMPORTERS OF ENGLISH HORSES IN THE WORLD.

We sell stallions of the different breeds for less money than any firm or individual in America.

## TRUMANS' PIONEER STUD FARM

BUSHNELL, ILLINOIS.

## THE Lafayette Stock Farm

Lafayette, Ind.

Largest importers in America of Oldenburg German Coach, Percheron and Belgian stallions and this no man can dispute. Our importation of 1906 arrived November 15th. We have won more blue ribbons in 1906 than all other importers combined.

At the great Illinois State Fair at Springfield we won, out of fourteen shows, twelve blue ribbons in the Percheron, Belgian and German Coach classes. We won the championship offered for the five best Percheron stallions owned by one firm and also the same championship offered for the best five Belgian stallions. We won the championship for best Belgian stallion and second, third and fourth in that class. At all other fairs we have done as well and we can show buyers more good, serviceable draft and coach stallions than ever before.

Our exhibition in 1906 at the great International surprised the hundreds of thousands of visitors that attended. We can and do sell our stallions as low as they can be sold at any place in America.

## DEPARTMENTS

SEDALIA, MO. NASHVILLE, TENN. SAN JOSE, CAL.

## TAYLOR & JONES,

IMPORTERS AND BREEDERS OF PERCHERON, SHIRE, HACKNEY AND BELGIAN STALLIONS.

We are selling our Stallions direct from our barns and are selling better horses at from \$700 to \$1,400 than any firm in America. We have a few sensational show horses that will come a little higher. Special prices to dealers wishing to buy from 3 to 15 stallions.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

We are located on main line of the Chicago & Alton R'y., 12 miles north of Springfield, Illinois, also on new Interurban railroad that is now running cars every hour between Lincoln and Springfield, connecting with lines from St. Louis, Edwardsville, Carlinville and Decatur. Handsome illustrated catalog free. Address,

**TAYLOR & JONES,** BOX 68, WILLIAMSVILLE, ILLINOIS.

## JACKS.

## FOR SALE.

GOOD, large, young, lively, heavy bone Kentucky Mammoth Jacks at reasonable prices. These Jacks have been carefully selected and are right in every respect. Located eight miles west of Cedar Rapids, Ia. on Chicago & Milwaukee, also Chicago & Northwestern railroads.

John Henry, Fairfax, Iowa, at the Fair Grounds.

When Writing to Advertisers Please Mention This Paper.

**PRESIDENT W.M. McKINLEY SAID:**  
"I am familiar with Ridpath's History of the world, and cordially commend it to the scholar as well as to the plain people generally."

**PROF. W. F. WARREN, Pres. Boston University, said:**  
"I should be glad to see it placed in the library of every young person in the United States, and even in the English-speaking world. In families where there are bright children it will render excellent service."

## THE Publishers Failure is Your Opportunity

**PRESIDENT BENJ. HARRISON SAID:**  
"Dr. Ridpath's labors are deserving of the highest praise. I most heartily recommend his History of the World for study and convenient reference."

**Prof. E. H. LONG, Supt. Public Schools, St. Louis:**

"I unhesitatingly commend Dr. Ridpath's 'History of the World' as the ablest work on that subject which I have ever examined."

Iowa Homestead Readers are Offered the Opportunity of a Lifetime  
To place in your homes The World Famed Publication

# Ridpath's History of the World

Brand new, latest edition brought right down to date, including Peace Treaty of the Russia-Japan War, beautifully bound in Half-Morocco. We are selling them while they last, first come first served.

**At LESS than even DAMAGED SETS were ever sold**

The Homestead in reviewing this great work said: "Ridpath's History of the World may be regarded as a complete library in itself. In those nine volumes may be found the equivalent of thousands of ordinary books. Right in this statement lies the value of such a set of books. The average individual desires to have his library as well stocked as possible. To select from the maze of books of numberless subjects now on sale, those which will be the most useful and cover the most ground is a task not for an ordinary person. Dr. John Clark Ridpath is generally admitted as America's greatest historian. We cheerfully recommend this famous History of the World to our readers. It is a work that should be in every home."

Here is your opportunity to secure Ridpath's History of the World at the lowest price ever offered — and on easy terms. It will cost you nothing to inspect the beautiful specimen pages and let us give you full particulars of our offer.

Dr. Ridpath is dead, his work is done, but his family derive an income from his History, and to print our price broadcast for the sake of more quickly selling these few sets would cause great injury to future sales. We will name our price only in direct letters to those sending the coupon below. Tear off the coupon, write name and address plainly, and mail now before you forget it.

9 massive royal octavo volumes, encyclopedia size, 11 in. tall; 8 in. wide; 2 in. thick; weighs 55 lbs.; 4,000 double-column pages; 2,000 superb illustrations.

**RIDPATH'S** enviable position as an historian is due to his wonderfully beautiful style, a style no other historian has ever equaled. He pictures the great historical events as though they were happening before your eyes; he carries you with him to see the battles of old; to meet kings and queens and warriors; to sit in the Roman Senate; to march against *Saladin* and his dark-skinned followers; to sail the southern seas with *Drake*; to circumnavigate the globe with *Magellan*; to watch that thin line of Greek spearmen work havoc with the Persian hordes on the field of Marathon; to know *Napoleon* as you know *Roosevelt*.

**RIDPATH** in your home means you need never spend a lonely evening. You can associate with the world's heroes; you can cross the Rubicon with *Cesar*, after which Rome was free no more. You can sit at the feet of *Socrates*, the loftiest genius of the ancient world. You can kneel at the shrine of *Lincoln*, "the greatest character of all time; the gentlest memory of our world." It is ennobling to commune with these children of destiny. To be associated with great men and events is to be great one's self, and you will add to your store of knowledge, which is power, and to the richness of your life. You owe it to yourself and family to place this work in your home.

Send Coupon To-day.

**RIDPATH** takes you back to the dawn of history, long before the pyramids of Egypt were built; down through the romantic, troubled times of Chaldaea's grandeur and Assyria's magnificence; of Babylonia's wealth and luxury; of Grecian and Roman splendour; of Mohammedan culture and refinement; of French elegance and British power; of American patriotism and religious freedom, to the dawn of yesterday. He covers every race, every nation, every time, and holds you spellbound by his wonderful eloquence. Nothing more interesting, absorbing and inspiring was ever written by man.

**RIDPATH** throws the mantle of personality over the old heroes of history. *Alexander* is there; patriot, warrior, statesman, diplomat, crowning the glory of Grecian history. *Xerxes* from his mountain platform sees *Themistocles* with three hundred and fifty Greek ships smash his Persian fleet of over a thousand sail, and help to mould the language in which this paragraph is written. Rome perches *Nero* upon the greatest throne on earth, and so sets up a poor madman's name to stand for countless centuries as the synonym of savage cruelty; *Napoleon* fights Waterloo again under your very eyes, and reels before the iron fact that at last the end of his gilded dream has come. *Bismarck* is there, gruff, overbearing, a giant pugilist in the diplomatic ring, laughing with grim disdain at France, which says, "You shall not." *Washington* is there, "four-square to all the winds," grave, thoughtful, proof against the wiles of British strategy and the poisoned darts of false friends; clearing over the heads of his fellow-countrymen, and on into another century, the most colossal world-figure of his time.

**ADVANTAGES AND DISADVANTAGES OF SHREDDING FODDER.**

According to some statistics prepared by the Department of Agriculture at Washington the cost of producing a crop of corn when the fodder is cut, shocked and shredded is \$14.75 per acre. The items that make up this total are: manuring, 58 cents; seed, 24 cents; plowing, \$1.20; dragging, 48 cents; planting, 22 cents; cultivating, \$1.62; cutting with corn binder, 67 cents; shocking and tying, 52 cents; twine, 47 cents; picking up ears, 25 cents; shredding, \$3.79; machinery cost, \$1.20; land rental, \$3.50.

At first the amount mentioned, namely, \$14.75, seems a little high, especially when it is taken into consideration that these statistics were taken in the state of Minnesota. However, a consideration of the items given above will show that after all they are reasonable. Where a similar acreage is husked out the cost amounts to \$11.77 per acre. In other words, it costs less per acre to handle a crop when it is husked and the fodder left standing in the field than it does to cut it with the binder and shred the fodder afterwards.

When it comes to the matter of comparing the value of a corn crop that has been shredded and one that has been picked and the corn stalks afterwards pastured, we find that the bulletin referred to compares the two systems in this way. It is assumed that thirty acres of corn fodder is cut and the stover shredded to provide roughage for cattle at \$14.75 per acre. The cost of raising and shredding this thirty acres will amount to \$442.20. The crop will yield 1,350 bushels of grain which, at thirty cents a bushel, amounts to \$405, while, in addition, there will be thirty-eight tons of shredded fodder at \$2.84 cents a ton, amounting to \$107.92. The total value of the crop is therefore \$512.92.

Turning now to another field where twenty-five acres are husked out and five acres cut for fodder, we find that the cost of raising and harvesting the crop to be \$355.35. Eleven hundred and twenty-five bushels of corn are produced on the twenty-five acres, which, at thirty cents per bushel, amounts to \$337.50. On the five acres cut for fodder there are seventeen and one-half tons, which, at \$4.90 per ton, amounts to \$85.75. The twenty-five acres of corn stalks are estimated to be worth for pasture \$1.25 per acre, thus making the value of the pasture \$31.25, or a total in the valuation of the crop from this thirty acres of \$454.50. This means only a difference of \$58.50 in the value of the crops from the thirty-acre tracts handled in the manner described.

While this is not a very strong showing in favor of the practice of shredding, at the same time attention should be called to the fact that the cutting of the corn crop just as the grain begins to dent and the shredding of the fodder when it is dry saves a by-product that otherwise would largely go to waste. In the second place, the cutting of the crop enables one to do his fall work with much more regularity, and especially to plow his corn land, which is of great advantage in these days of insects. Instead of leaving the fodder in the field to go to waste, which much of it is bound to do, no matter how closely it is pastured, one has his surplus stover to use as bedding when it is shredded. Because of these things, the actual cash showing made by a field of corn that is shredded does not

set forth the true state of facts, because the practice of taking off the crop instead of leaving it standing so affects for the better the whole system of tillage on a given farm. Of course the labor question is an important one, and more than anything else interferes with the much freer advocacy of the shredder system.

**THE QUESTION OF HOG LICE IN COLD WEATHER.**

One of our subscribers, who requests that his name be withheld, sends the following communication to this paper:

Your issue of a week or so ago contains an interesting article upon "Killing Hog Lice in Cold Weather," in which you invite discussion on the subject and ask for results of experience along that line.

I have used several different kinds of dip and in various ways, have used a tank large enough and deep enough to immerse a 300-pound hog, and have so immersed every hog on the place from a two-week-old pig to a 350-pound boar. I have used a sprinkler and sprinkled them with dip, poured it into the wallow holes, and scattered it in their sleeping places and under the shade trees where they "loaf" during the middle of the hot summer days, and think I have derived great benefit from it as a disinfectant and to re-

move scurf and give the skin and hair a nice, soft, smooth and glossy appearance. My experience has been that dip is no more effectual in riding a herd of hogs of lice than a sponge bath in cold water is in ridding a lumber Jack of gray-backs, and I have had experience and observation of both.

There may be dips that will kill lice, but none that I have tried have done it for me, and the same holds true with some of my neighbors. It is also claimed that dipping affects the hearing and that it also injures the eyes, and I think it does. I am a strong advocate of dip as a disinfectant and am never without it. Twice a week we sprinkle it around the pens, sheds, sleeping quarters and on the feeding floor, but when we want to kill lice we use kerosene and machine oil, equal parts, and it is sure shot and can be used in cold as well as warm weather, only one would want to select a mild, sunny day if using it in winter for his own convenience.

My process is as follows: Near one end of my chute I place a temporary gate which extends across the chute when closed and is just far enough from the end of the chute to hold one hog. The gate is opened, the hog run in, and the "killing" commences. I apply the kerosene and machine oil with a bath rag and grease every part of the animal even to the crevices in the ears, and every louse is killed as soon as the kerosene touches him. The machine oil prevents the hair from coming off. I have thoroughly tested this process and find it effectual and no bad results follow. It is surprising how fast one can get over the herd after a little practice. We have a herd of 150 and with

the assistance of one man to use the hurdle and run them into the little pen I can do the entire bunch in half a day. But, suppose it takes two or three days. If one's herd is badly infested it will be the most profitable three days' work you have done during the season. Kerosene will not kill the nits and the process should be repeated in ten days. There is nothing that will kill the unhatched unless it is strong enough to kill the hog.

We are pleased, indeed, to give our readers the benefit of this man's experience, although it does not coincide with the experience of a great many successful men, because swine breeders on every hand can be found who have succeeded in killing lice by the use of good dips; in fact, this matter was worked out to some extent at the St. Louis Exposition and it was found positively that the dips would kill lice. However, the plan suggested here is unquestionably effective, and it will certainly pay any man who has lice in his herd to spend at least half a day occasionally to go over them, providing the lice cannot be killed in any other way. It is almost impossible to make gains on a lousy hog, and for that reason it will pay to adopt any or every means to get rid of them, and to get rid of them right away.

**THE NUMBER OF ROWS ON AN EAR OF CORN.**

One of our subscribers, Mr. C. D. Fox, of Rock county, Wis., sends a sample of corn upon which he has been working as an experimenter for a number of years. He states that the ears sent are medium in size and medium in the number of rows per ear. He also states that some of his largest ears run as high as forty or fifty rows to the ear. It is his opinion that by increasing the number of rows to the ear and the size of the ears that you can continue to increase the yield of your corn. His experiments up to date indicate that the larger the ear the greater the yield.

This question of the number of rows that should be found in an ear of corn bobs up periodically, and we doubt if it is possible at this time for any man to state just how many rows one should aim at in the selection of his seed and in the fixing of the type. However, we think that Mr. Fox is entirely wrong when he suggests breeding corn that contains as high as forty or fifty rows per ear. One of the ears that he sent measures nine inches in circumference and it carries twenty-six rows, though the length of the ear is but eight inches. The cob itself measures six and one-half inches in circumference, which is altogether out of proportion. This ear weighed fourteen and one-half ounces and it yielded eleven ounces of grain. This makes the proportion of grain to the total weight of ear about 75½ per cent. Now, as a matter of fact, it ought to run at least 10 per cent higher than this, and some of our score cards call for as high as 88 per cent of grain.

The objection to so large an ear as this, and especially to one carrying such a large cob, is that it takes a long season to mature such corn and after it is matured it takes a long time to dry out. This is one of the reasons why a little more emphasis is being placed on the matter of producing corn that has a comparatively small ear as compared with former times. If one will pick up a good ear of corn that measures about seven and one-half inches in circumference and it is rightly proportioned, he will find that it carries eighteen or twenty rows and that it will yield from 85 to 88 per cent of grain when it is

The above is an illustration of the "Morecorn" Sorter, manufactured by the Monarch Self-Feeder Company, 95 Main St., Cedar Falls, Iowa. It is the only corn sorter that can and does sort corn according to length as well as thickness. A very few machines intended to grade corn have been offered to the trade, but nothing ever brought out filled the long-felt want until this wonderful machine was placed on the market the past corn-planting season. The demand that sprung up for this machine was remarkable. It is simplicity itself when it comes to the point of operation and construction. A Homestead representative called at the factory of the "Morecorn" Sorter and tested the machine carefully and found that all the claims made for the machine by the manufacturers are true. Among these claims is that of sorting the corn accurately. The representative went through a box of corn sorted by the machine and measured a great many doubtful kernels and found that they all came well under the specified size. The principle of the machine is such that it is almost impossible to do otherwise than sort the corn perfectly. The corn is sorted into five different grades; the first, those kernels that are too narrow for good seed; the second, those that are too thin; the third, those that are too thick; and the fourth, those that are right for planting. Then this latter assortment is again graded as to length; the kernels one-half inch and shorter will be deposited in one box, and those over one-half inch in length in another. These last two grades of corn were tested with regard to their going into the cells of the edge-drop corn planter, and not a single kernel that would not fit was found. The Homestead takes great pleasure in recommending this machine to its readers, for by so doing it feels that it is assisting in the larger corn yield for them, and at the same time their general prosperity. This machine has been tested to sort corn so perfectly that an edge-drop planter drops the corn 95 per cent perfect, while 65 per cent is the best it can be sorted by hand.

dry. If the rows are more numerous the chances are that the kernels will grow a little too slender, at least this will be the case unless the ear is larger in circumference. Now, a slender kernel is not desirable for the reason that this is the most difficult kind of corn to plant. Every man who selects corn should decide on what kind of a kernel he likes best, and should hold to this type. Only in that way will it come about that corn can be planted uniformly, even though the seed is graded before it is planted.

There are no conditions found any-

where in the corn belt under which it is advisable to select corn so as to fix the habit or characteristic of producing thirty, forty or fifty rows to the ear. We do not state that any man knows the number that should grow on an ideal ear of corn, but we assert again that it is somewhere around eighteen or twenty rows. In any event, it is not advisable to greatly increase the size of the cob in order that the number of rows may be increased, because most assuredly you will then fix the characteristic of late maturity in the corn you are handling.

## The Land Renting Problem

*Expressions from both sides of the question*

As the land renting question is open for discussion for tenants as well as landlords, I will express my opinion from a tenant's standpoint.

I have been a renter for the past seven years and have in that time lived on two different farms. I am now living on a 240-acre farm and could have leased for as long as I wanted, but next spring I shall take charge of a 400-acre farm. The plan on which I am renting is half and half, as tried by Mr. Allen, with the exception that I even give half of the poultry and have no butter for family use, although I am milking thirty cows. But as I own the work horses the landlord pays for all the horse service, as I think it is enough for the tenant when he furnishes the horses. The mare loses a great deal of her work during the foaling period, as well as running the risk of losing the mare without paying for any services when he gives the landlord half interest in the colt.

According to my view and observation I believe that the best and safest plan for a person with limited means, from the standpoint of both landlord and tenant, is on the half and half basis. Each furnishes half of the stock and machinery, each half of thrashing and twine, the tenant doing all the work and dividing half of the proceeds of what is sold, be it stock, grain or cream. Both should honestly give their opinions as to their different methods of management, caring for the stock and conducting the business generally, then the best plan should good-naturedly be adopted. If this is carried out and prices and crops are as good as they have been the past year, both will make money.

But it must be admitted that there are a great many shiftless renters who take no interest in keeping up the farm, either in appearance or fertility. They let everything—fences, buildings, etc.—go to destruction and let the weeds grow in the field unmolested along the roadside, as well as in the yards about the house and barns. But it must also be admitted that there are just about as many shiftless land owners who work their own farms. These do not have enough pride about them to keep the weeds down or their buildings in respectable appearance, but still they are considered good and well-to-do farmers, simply because they own their own land. It will therefore be seen that there are both thrifty and unthrifty land owners as well as tenants, and Mr. Allen has been very unfortunate in most all cases in the selection of a shiftless tenant. To a certain extent the landlords or owners are to blame for this shiftlessness of tenants, as they will not look after what is really needed for repairs and not think of furnishing any until the fences and buildings are almost a total wreck. Then they will rumble at the expense of keeping up the place. When they lived on the farm themselves they failed to keep any account of what was spent for repairs, hence they think the tenant is extravagant.

It is also true that many of these landlords and land owners have never worked on a farm. Nine cases out of ten they have made their money by side deals or buying and selling land, so they do not realize the amount of time or labor it takes to keep a place up in appearance and fertility; and it is a great deal easier to drive along the highway and find fault with the tenant than it is to take scythe and give him a helping hand to mow the weeds along the roadside or repair the fences and buildings. The tenant is compelled to do this work, for which he receives no pay, whether he can spare the time from the fields or not.

Because a man is not fortunate enough to own a piece of land and has to be

a renter for a few years does not prove that he is not qualified or does not have good judgment for managing a farm. There are many renters who have better judgment than landlords in regard to running a farm and making it profitable. M. Olsen.

Humboldt county, Iowa.

In reading the article by B. S. Allen on renting land it occurred to me that a few remarks from a renter would not come amiss. In the first place I think Mr. Allen has been very unlucky in getting tenants, as he has had three or four and none have suited. Before passing judgment on the renter I would like to hear the renter's side.

I have a case in mind that happened here this fall. A young man inherited about 700 acres of land about ten years ago. He rented part of this land to a person who has lived on this place for eight years. This fall they had some trouble and the owner is telling that this man was not a good farmer. It looks as though he could have found that out before eight years had slipped by. The renter was responsible financially, as he has bought a farm. I am living on a 190-acre farm. I furnish horses and machinery. The landlord and myself own the stock together and we divide the profits half and half. The landlord pays half of the thrashing, coal and twine. We keep from thirty to forty cows and sell milk. Last year the landlord received about \$1,100 for his share and I think I will do better this year, as we had a better corn crop. Thirty acres of this land have been rented for cash for nine years and no manure applied and corn was raised eight years out of the nine. This land is on the north side of a hill and is not good. The landlord says he wants \$100 per month or \$1,200 per year. It looks to me as though the landlord receives too much of the tenant's labor under this plan, as this land farmed for fat cattle and hogs would not pay the way it does now with milk cows.

I think the cash rent system is the best for all concerned. The landlord can protect himself by inserting in lease that tenant must seed down a certain number of acres every year and must keep a certain amount of stock, depending on the size of the farm.

Lee Co., Ill. Milford Johnson.

I have read the article of Mr. B. S. Allen in regard to renting lands with great interest. I think Mr. Allen's position is a more difficult one than the one of a retired farmer who moves to a nearby town, but still is in close touch with the renter, having one or two eyes on him most of the time. The contract with a renter protects the land owner but little. If this contract is made with a shiftless, good-for-nothing man the land owner is beaten anyhow, and the difference of renting, whether partnership or share rent, makes but little difference. I therefore regard it as a most important point to investigate the character and ability of the man more than his financial standing. In fact, I have had the best success with poor men who had nothing but a sound body, good will and no bad habits. If he has a clean, ambitious young woman, not afraid to milk a cow, or help her husband a little in the field work, so much the better. This kind of a renter always gives satisfaction and always stays until he buys a farm of his own.

This reminds me that Mr. Allen says nothing about the term of lease, which is most essential because a one-year renter means no rotation of crops, or, in other words, it means soil robbery. A land owner should lay down an iron-

clad rule by which not less than one-fourth of the farm should be in meadow or pasture.

Now, let us return to our young renter. He will naturally rely upon the land owner's judgment, and little by little the interest in crops and stock may be made mutual. If he has no experience with stock and don't care to use the pasture, nothing is lost if the owner is compelled to stock it up himself. And even plowing under the entire crop of clover would incur no loss to the landlord. I would prefer the latter method to the renting of meadow and pasture for cash, allowing the renter to take in stock, because he would not allow a spear of grass to fall to the ground but have the roots of the forage plants gnawed out of the ground. Pastures kept very short all season don't help the land much in future crop raising; in fact, on rolling ground the bad effect is often seen. The crops suffer from the slightest drouth, and we say the ground was too loose or we may think the straw or corn stalks were too heavy, when it most generally is a fact that a good soaking rain, that made the corn field too wet to get into for several days, has not stored any moisture in the pasture soil. The bare sod carries the water rapidly to the draws without other effect than the washing of ditches.

A rotation of crops divides the work of the renter so he can do more himself than by the one-crop proposition. Suppose he has on a quarter section 120 acres of corn. If he has two boys large enough to run cultivators and has three teams, he might raise a good corn crop. But what else can the boys do from the time the corn is laid by until thrashing time than by working by the day or month elsewhere or loaf around in a nearby town looking for a job? Now, if this man has the place for five years, what about crop rotation? He must change his plans every year, while on the other hand he may handle a half section and figure out his work ahead for an indefinite time. The renter with grown-up boys and no means or plenty of personal property around him is no good. He has evidently done nothing for himself and will do nothing for his landlord. He is hard to handle, because he does not have confidence in himself and more than likely refuses to take advice from another. It has been my plan to make my interests and the interests of the renter mutual as far as possible with best results.

A member of the corn improvers' association of Nebraska has hung up several hundred dollars in prizes for his several renters in a corn growers' contest, and claims good results. He is a large land owner and I would like to hear him on the rent proposition.

In conclusion, I will say again that without an agreed proposition upon crop rotation there is no intelligent understanding between renter and land owner, and if the renter fails to give satisfaction it is not necessarily his fault alone. I would rather take \$2.50 per acre from a renter who has agreed upon a crop rotation than \$3.50 from a man who takes the farm without. The latter will more than likely destroy the fertility of the soil to a greater extent than would make up the difference in rent.

One more suggestion and I will close. The most desirable renters are families just new from some parts of the country "across the pond," such as Germany, Sweden, Norway, etc. If the organized agriculture of the West would establish a labor bureau in Castle Garden to direct those newcomers to the West and help them find employment as farm hands or renters, it would not only be helping to get farm laborers, but it would be doing a whole lot for the people who are now picked up by the railroads and the manufacturing plants to live a miserable life in cities. Johnson Co., Neb. Wm. Ernst.

## CENTRAL SHORT-HORN BREEDERS ASSOCIATION MEETING.

The tenth annual meeting of the Central Short-horn Breeders' Association will be held in Kansas City, Mo., February 5th and 6th, at which time the following program will be carried out:

President's address.  
The Possibilities of a Foreign Market—Walter L. Miller.  
Show-yard Etiquette—Col. W. A. Harris.  
Straight, Crooked or Cross-wise, but Always the Best—John R. Tomson.  
Two Classes of Bulls to Castrate for the Good of the Breed—Prof. W. J. Kennedy.  
Best Foods for Economic Production of Beef—Prof. R. J. Kinzer.

## Horse Owners! Use GOMBAULT'S Caustic Balsam

A Safe, Speedy, and Positive Cure  
The safest, Best BLISTER ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses and Cattle. SUPERSEDES ALL CAUTERY OR FILING. Impossibility to produce scar or blemish. Every bottle sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars. THE LAWRENCE-WILLIAMS CO., Cleveland, O.

How to Establish and Maintain a Good Local Trade—S. C. Hanna.

We are not informed as to the place of the meeting, but this will be given in our next issue.

## SECRETARY COBURN ELECTED.

After one of the most successful meetings of the Kansas State Board of Agriculture that has ever been held the secretary, F. D. Coburn, was re-elected by the board for another term. The fact that Secretary Coburn had refused a seat in the United States senate resulted in the board passing unanimously the following resolution:

Resolved, That we hereby express our acknowledgments to Secretary Coburn for the compliment, unprecedented distinction and dignity conferred upon the Kansas State Board of Agriculture, and the office of secretary thereof in refusing the office of United States senator. By this action he has set an example for the nation and all men who labor that agriculture and devotion to the cause of genuine agriculture when best understood has a dignity and a pleasure second to no other pursuit in business or political life.

The other members of the board are: President—A. L. Spensler, Hutchinson. Vice-President—Chas. E. Sutton, Lawrence.

Treasurer—Edwin Snyder, Oskaloosa. With the exception of C. E. Sutton, the retiring members of the executive board were re-elected. Mr. Sutton became a member of the board by his election as an officer of the board, and J. W. Robinson, of El Dorado, the retiring president, was elected to fill the vacancy on the board. The first four of the following directors were elected this year:

J. T. Tredway, La Harpe, Allen county.  
G. W. Glick, Atchison, Atchison county.  
Edwin Taylor, Edwardsville, Wyandotte county.  
George W. Hanna, Clay Center, Clay county.  
T. A. Hubbard, Wellington, Sumner county.  
W. R. Dowling, Norcatur, Decatur county.  
Thomas M. Potter, Peabody, Marion county.  
A. W. Smith, Grove land, McPherson county.  
L. L. Diesem, Garden City, Finney county.  
E. W. Hoch, governor (ex officio), Topeka.  
J. R. Burrow, secretary of state (ex officio), Topeka.

## ABOUT THE SMOKING OF MEAT FOR SUMMER USE.

At this season of the year it becomes a matter of anxiety how best to prepare our meat for summer use. We have all experienced the trials incident to butchering, curing and smoking meat, and it is with apprehension that we always approach the last part of this work, the process of smoking. During the last eight years a firm in Kansas City, Mo., has been exploiting a new way of smoking meat and where their method has been adopted all the work and worry

attending the old way of smoking meat has been done away with. They manufacture what is known as Wright's Condensed Smoke, which is a liquid, made by burning selected hickory wood, condensing the smoke into a liquid, which is then put up in quart bottles, one of which is sufficient to smoke a barrel of meat. By referring to the advertisement of the E. H. Wright Company, Ltd., on page 21 of this issue you will learn how to procure a small sample of their preparation free of charge. In writing them, please mention this paper.

TO CURE A COLD IN ONE DAY  
Take LAXATIVE BROMO Quinine Tablets. Drug gets refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

## Farm Furrows

Turned by a Practical Farmer.

There are no tonics better for the calf than plenty of sunshine and pure air.

At the present prices for lumber a good cottonwood grove would make a farm several hundred dollars more valuable if we were buying.

I am not a believer in much skimmed milk for the family, but prefer the real article. If a farmer cannot have the best, I would like to know who can.

A work was published some time ago entitled "Pigs is Pigs." I want to say that when they get up to six and a half cents a pound pigs "is" pigs.

Did you ever try to carve a fowl in the presence of a large number of your friends? If you did, you know all about just how jointless the pesky thing is at such a time.

Will some kind reader please state how he catches young gobblers that have been allowed to roam at large all their lives? I have tried driving them into sheds, stables, hen houses, etc., and have failed. They simply pick up and fly over everything.

The feeding of a big bunch of fattening hogs in soft weather during the winter is rather a tough proposition. This is especially true where you do not have a feeding floor. I always practice grinding my grain and feeding it in that form either dry or moistened during muddy weather. It is fed in troughs designed so that hogs cannot get their feet in them.

In these days of rapid printing, how is one to keep up with the times? Even an omnivorous reader can scarcely follow a fraction of 1 per cent of what is published. My plan is to follow closely two or three good agricultural papers, two or three good magazines and a few of the best books. I guess I miss a

## Harrow FREE

RETURN AT OUR EXPENSE  
IF IT DOESN'T PLEASE YOU.

Here is a harrow that looks very different from the old spike or spring toothed harrow.

It is different. Every point of difference is a point of big improvement. It is as much better than the old fashioned harrow as a modern plow is better than the Indians' crooked stick.

ACME

Sizes  
3 to  
17 ft.

Pulverizes the plowed land, crushes the clods.

The coulters or teeth of the "Acme" work as a gang plow. They turn over the pulverized ground and give the crop all the soil's benefit. Farmers will tell you that bigger crops grow after an Acme harrowing.

FREE BOOK for your Farm Library.

Write us today and we'll send you free, a valuable booklet, "A Perfect Seed Bed." It means money to you.

DUANE H. NASH,  
Box 44. Millington, N. J.

THIS PIPE  
FREE

THIS HANDSOME PIPE FREE! Full sized dark mahogany finished, imitation genuine Freeh Briar. Handsome bowl and stem with German Silver ferrule giving the whole pipe a very rich appearance. Screw stem is detachable, bowl is large, the pipe is sweet and affords as delightful a smoke as the best pipe made. You can get one absolutely free. All we ask you to do is to send us two names and addresses of farmers and 25 cents for 6 months subscription to Successful Agriculture, the finest and nearest farm publication in the United States. Full of beautiful half-ton illustrations with a department for every branch of home and farm and page of fashions for the ladies. Send us 25 cents today, stamps or silver, to cover 6 months subscription to the paper. The pipe is free.

SUCCESSFUL AGRICULTURE,  
205 Union Block, ST. PAUL, MINN.

# A dollar's worth of Standard Stock Food

—contains more feeds,  
—will go farther,  
—last longer and  
—produce more and better  
results,

than a dollar's worth of any other stock food  
made, whether it costs 5c or 15c a pound.

**Y**OU can easily prove this to your own satisfaction, simply by examining various stock foods and their manufacturers' directions for feeding.

The Standard looks better, smells better, tastes better and is better—stronger, richer, more concentrated—and a much less quantity of it is required at each feed.

That's why it lasts longer and costs you less per animal per month.

It gives the best results at least cost.

Sold on our Square-deal, Money-back Guaranty. You run no risk.

We have more than 400,000 satisfied customers who have proved that "It Makes Stock Thrive." Ask your dealer to supply you; if he cannot, do not take a substitute but send to us direct. We will ship immediately and protect you with our Square Deal Guaranty.

**Free to You** Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep. Write today.

**Standard Stock Food Co., 1516 Howard St., Omaha, Neb.**

great deal, but I hope the other fellow will get what I miss.

I am not much of a believer of stirring stock up early with a lantern during the winter months. I believe it pays to let them sleep right through until daylight.

I have never had any marked success with a hot-bed, but I am going to try again. Early vegetables taste just a little better when you know that your neighbor has none.

Did you ever know a chap who had the biggest and best of everything? No matter what was talked about it would always come out that he was in the lead. Such conceit is generally found in the pate of a cheap skate.

For putting good rich blood into boys and girls I doubt if anything will beat oatmeal and good rich cream. The baled hay idea as applied to breakfast food never appealed to me—pardon me, I meant to say baled excelsior.

Why not paint all the farm buildings one color? This makes uniformity, which results in a much more attractive appearance all around, rather than a crazy-quilt-patch-work effect where the buildings are not of one color.

Is there anything that tastes better than a good apple when you have worked hard all day and have settled down to a good evening's reading? At such a time I think a good Jonathan has the best orange that ever grew skinned a mile.

The winter has been unusually mild thus far, and cattle that are fed a little grain twice a day are doing as well in the stalk field and running on pastures as they usually do during the summer and fall. This winter is simply a stockman's snap.

There are two steps in the process of feeding out a pen of barrows for market. The first is to grow them with plenty of meat and bone-making foods. After you have secured a good frame, well covered with meat, then you can pile on the fat with corn.

There is a good deal of trouble caused by men being slow in sending pedigrees after selling pure-bred animals. When a man buys a pure-bred it is not unreasonable if he expects that the pedi-

## A Tank It Pays to Buy

Don't confound the "Bushnell Pump Co.'s" tank with other tanks. The Bushnell is in a class by itself. Here are some of the reasons:

Big, thick staves that are made to fit from edge to edge all the way down. Machinery makes every joint perfect. Lumber especially selected for tank purposes, not cast-off pieces from furniture and other factories. Every Bushnell tank tongued and grooved. We're ready with the machinery to do it right. Other tank builders do it just occasionally "to meet Bushnell Pump Co. competition" doing it then as best they can. Strong, heavy steel hoops. We give them to you round or flat. Adjustable patent draw lugs: look at the picture and you'll see what we mean. You can always keep your tank hooped up snug and tight. Galvanized hoops when wanted. Tank lasts a lifetime.

We can give you any size you want—2 to 16 feet high, 4 to 16 feet in diameter. Capacity from 5 to 760 barrels.

Don't forget the long line of Bushnell Wood and Iron Pumps, Steel Tanks, Iron Pipe Fittings and general line of Steam and Well Supplies. Write for descriptive matter. If your dealer does not have our goods in stock, send us his name and address.

**THE BUSHNELL PUMP COMPANY, Dept. C, Bushnell, Ill.**

# CROPS WITHOUT WEEDS

The way to get them is to clean and grade your seed. Clean, graded seed yields 5 to 15 bushels more per acre, the grain is better quality, less liable to rust and smut and sells for a much higher price. Every 20 acres of land cultivated will pay for a grader every year; the increase in value and crop yield will net you a handsome increase in profits and pay the Rent for the Renter besides ridding your farm of weeds and noxious plants. Our Little Star

## COMBINED CORN SORTER, GRAIN GRADER AND GRASS SEED CLEANER

is the most efficient and economical machine of its kind made. Cleans, grades and separates any seed or mixture of any four similar seeds at the same time—does the work of Three Machines but costs only the price of one. Has double the screen surface of any machine of its kind—7 complete riddles and 4 double wire screens.

Our "Corn Grader" Screens No. 8 and No. 9, provide an absolutely uniform "drop" from the "Corn Planter," edge drop or otherwise. Every machine guaranteed. Will do all grain and seed work for 100 acres. Price \$19.98. Freight paid. Write today.

HALL GRAIN GRADER CO., 224 Locust St., Winfield, Iowa.

gree be sent to him in a very few weeks at the outside. The man who would represent an animal to be pure-bred, es-

pecially a male, when as a matter of fact no pedigree or certificate can be furnished should be put behind the bars.

# THE HOMESTEAD

A Practical Journal for the Farmer,  
Stockman, Fruit Grower, Poultryman,  
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

## WARMING WATER FOR HOGS.

Mr. P. H. Kaiser, of Blackhawk county, Iowa, submits the following communication:

Some time ago an article appeared in your paper asking for experience from your readers in regard to warming water for hogs and devices for doing the work. Some years ago the writer had an upright factory-built boiler which was used to some extent, but on account of size and monkey-work was discarded later on and ice cold water or swill again used. Not because we wanted to, but for the reason that we were unable to find anything that would fill the bill.

However, this winter we have put in an arrangement that is not expensive and does the work. For the benefit of others we will herewith give same in detail. A galvanized tank eight feet long, three feet wide and two feet high was purchased, same holding eleven barrels. A foundation was then built the length of the tank and sixteen inches high, a fire door being placed at one end and a six-inch pipe placed at the other end. Now, we have a fire-place which is large and roomy, will burn coals, old posts or coal or anything else, and enough can be put in at one time to last for the heating of an entire batch. With this arrangement enough swill can be heated for a dozen or several hundred pigs without any more trouble. The cost of the entire outfit, including labor, is \$15, and this device is surely equal if not better than some that are on the market selling for \$65.

At this time of the year we add about ten quarts of linseed meal (old process) each morning, to the amount of water that is required for the day for eighty head of hogs. When warmed up this is relished very much.

About the only comment that we desire to make on Mr. Kaiser's plan is that he will in all probability have to spend another \$15 installing a new tank next year, because we have never found galvanized iron that would stand more than one winter if used for such a purpose as this. We do not say this in the interest of any manufacturer of feed cookers, but state it simply as the result of a more or less costly experience.

Where one makes a practice of cooking feed daily or even three times a week it should be done either in steel vessels or in those made of malleable cast. Then, of course, there is the other plan of using steam only for heating water and slop. This is a method that involves comparatively little labor, and it has this advantage, that there is no danger of burning the food.

We therefore say to those of our readers who are coming to believe that it pays to do some warming of feed and water in winter that in the end some kind of a good feed cooker is cheaper than one that can only last a year or two.

We do not know how many of our readers are following the Litchfield continued story which appears in this issue on page 5, which we have been publishing for some time. We are certain,

however, that a good many are interested in it. We think it will pay any of our other readers who are land owners to read these stories.

## HOW FARMERS ARE MAKING MONEY ALL THE YEAR AROUND.

Thousands of farmers in this country have taken advantage of the free trial offer of the National Cream Separator people to prove how easy any farmer can make money on the side, separating his own cream and his neighbors' instead of wasting one-fourth of the cream by setting milk in the old-fashioned way. Anyone of our readers who wants to prove this by thirty days' free trial of the National Cream Separator can do so by simply writing and saying that they read this publication. The Wisconsin Experiment Station has proved that every cow's milk is worth \$12 more per year in cream if a separator is used instead of skimming and wasting one-fourth of the cream. You can easily prove the truth of this statement by thirty days' free trial of the National Separator. Just write today and ask for the free catalog telling about this, and say you want to try the National Separator for thirty days. Address the National Dairy Machine Company, Goshen, Ind., or the Hastings Industrial Company, of Chicago, Ill. Say you are one of our readers.

## ADDITIONAL FIELD NOTES.

Miss Nettie Crane, proprietor of the Bob White Poultry Yards at Blencoe, Iowa, is offering Single Comb Buff Orpingtons for sale in her advertisement that appears on page 14.

## HANKS & BISHOP'S DUROC JERSEY SALE.

The breeder or farmer who is in the market for good Duroc Jerseys should plan to be present at the forthcoming Duroc sale of Messrs. Hanks & Bishop, of New London, Iowa. Forty-two head have been cataloged and for uniformity of type and color the offering is unexcelled. By the use of extra good boars and the addition of good sows each season, this firm have been successful in building up one of the good herds to be found in the central West. They have fixed a type and adhered closely to it. Indiscriminate buying always results in failure. The breeder who buys with a definite type in mind invariably meets with success. Such is the case with Messrs. Hanks & Bishop. The herd boars in service are very good ones and come from the fashionable families of the breed. We wish to call particular attention to the spring boar, Model Wonder. He was sired by Crimson Wonder I Am, the first-prize and champion boar at the Iowa State Fair, 1905. Model Wonder is also a half brother to the first-prize and sweepstakes boar at the same fair this year, and it is safe to say that if Model Wonder is properly cared for he stands good chance to be in the prize lists this coming fall. Safe to say there is no breeder but what can improve his herd by securing a good sow bred to Model Wonder. Another boar to which many of the sows are bred is Iowa Chief 4847. He was sired by Golden Rule, the principal boar in use in the herd of Mr. R. C. Watt, of Cedarville, Ohio, and the sire of much of the good stock which is to be found in that noted herd. The dam of Iowa Chief was sired by that noted show and breeding boar, Ohio Chief. Top Notcher I Am, is another of the good boars used in this herd. He was sired by Top Notcher Again, he by Top Notcher and out of Cedarville Queen II, the dam of much of the show stock exhibited by Messrs. Watt & Foust at the World's Fair in 1904. The dam of Top Notcher I Am was Miss Indicator, she by the state fair winner, Indicator. The sows selected for this offering represent the tops of many herds. Several of them are put in the sale especially as attractions, several of their get being included, which will prove to those present that they are desirable sorts to add to already established herds, or to the beginner who wishes to start with the right kind of stock. The get of Top Notcher Again, Buddy K. IV., Proud Advance, Indiana Boy (he by None Such, the sire of Hanley), Mayor Jr., Young Crimson by Ben Davis (first at Iowa State Fair in 1904), and others of equal merit make up the offering and we take pleasure in recommending this sale to our readers. Those who cannot be present sale day may send bids to Mr. D. M. Pierce, in care of Messrs. Hanks & Bishop. Write for catalog at once, kindly mentioning The Homestead, and plan to be present sale day.

## MANLOVE BROS. & NORRIS DUROC SALE

One of the most important sales of Durocs to be held this season is that of Messrs. Manlove Bros. & Norris, at Bowen, Ill., on Friday, February 1st. Fifty head, sixteen tried sows, thirteen fall yearlings, twenty-one early spring gilts have been selected for this occasion, and it is safe to state that no breeder will be disappointed in the offering. The blood of many noted sires is to be found in the offering. The boars in service in these good herds are worthy of more than passing notice. Big I Am, acknowledged to be the best son of Buddy K. IV., was used with much success in the herd. This boar was first prize pig under six months at the Illinois State Fair 1904, and up to the time of his death the past summer,

# PILES NO MONEY TILL CURED.

**FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.**—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 352-page illustrated treatise, also our 132-page illus. book for women; both sent free and postpaid.  
**DRS. THORNTON & MINOR, 3639 Olive St., St. Louis, Mo., and 1010 Oak St., Kansas City, Mo.**

was used extensively in the herd. Breeders were quick to pick up one of his get whenever they were offered for sale. He was followed by Hambletonian, a boar which breeders throughout the West are familiar with. He was used with much success in the herd of Mr. H. B. Loudon, at Clay Center, Neb., and from him was secured by Messrs. Manlove Bros. & Norris. He was shown at the Nebraska State Fair in 1904, winning first in the twelve and under eighteen months class, and his produce won second as herd in the same show of 1905. Individually Hambletonian is of show yard type. He has plenty of length, nicely arched hack, plenty of bone and stands upon the best of feet and legs. He is one of the surest breeders the writer has known, and a gilt or sow bred to him should not go begging in this sale. A number of the best sows have been bred to him. Another boar recently added to this herd is Illinois Chief. He was sold at auction at \$500, and is thought by many to be one of the best sons of the old champion, Tip Top Notcher. He won second in the under twelve months class at the Illinois State Fair in 1906, and was a favorite among many for a higher place. He has been used steadily since his purchase and is in fine shape. If carried along in his present form, he will make his mark in the fall shows. Has a nice head and ear, good hack with wide full ham, and an extremely large bone. His dam was Daisy Improver, one of the best producing sows to be found in any herd. She farrowed a litter of eight, four boars and four gilts, that during the past season elicited much favorable comment for their uniformity and excellent individuality. It is not necessary for us to go into detail regarding the offering, further than to state that it is one of the most uniform and well bred that will grace an auction ring this year, and the writer representing this paper is sure that the breeders will not be disappointed sale day. In our next issue we will have something to say regarding the offering individually, and would advise our readers to get a copy of the catalog and examine it carefully. If any cannot be present sale day bids sent to Mr. D. M. Pierce in care of Messrs. Manlove Bros. & Norris will be properly handled. This sale occurs the day after that of Mr. H. B. Griffiths, and both sales can be made at the same expense. Arrangements have been made to properly care for all visiting breeders. Look up the advertisement on page 24 and plan to be present at the Grand Champion Circuit of sales.

## DISPERSION OF THE O. L. KERR HERD OF O. I. C.'S.

Breeders of the O. I. C. hogs throughout the corn belt should take a great interest in the dispersion sale of the famous herd of O. I. C. swine owned by the late O. L. Kerr, of Independence, Mo. That this should be a great event in O. I. C. circles will not be questioned, as Mr. Kerr had, up to the time of his death, done as much, if not more, for this great breed of hogs than any other breeder in America. It was Mr. Kerr who proved to the hogmen of the corn belt that the O. I. C. could be bred to such a state of perfection as to make them more popular among the farmers than ever before. That this is so is because Mr. Kerr was progressive, saw the needs of the breed, knew how to mate his hogs so as to produce the desired results and then show them at the leading shows. We regret that we have not a list of the winnings made by Mr. Kerr's hogs, but breeders who have followed the show records know that more prizes have gone to Mr. Kerr's herd in the past three years than to any herd in America. To Mr. Kerr also belongs the credit of producing more high-selling O. I. C. hogs than have ever been produced in the corn belt. The foundation stock that has produced all these winners and high-selling O. I. C.'s will be in the sale. Several of them are winners, such as the great breeding boar Kerr Dick that stands in a class by himself, Kerr Rex, a litter brother to Kerr Garnett, that sold in Mr. Kerr's fall sale for \$625, the record price for the breed; Kerr Dexter, a son of Kerr Dick, and Kerr Paul. These are the herd boars that Mr. Kerr was using, and all go in the sale and for the high dollar. Another such an opportunity to buy herd boars has never been offered and it is doubtful if another will be found in years to come. Sows of equal prominence are found throughout the offering and it is to be regretted that Mr. Kerr could not have lived to see such sows as Big Mary, the World's Fair champion; Nancy, a first-prize winner; Silver Mine, probably the greatest brood sow of the breed; Una, a St. Louis World's Fair winner; Sally, the 1906 champion sow, and many others go on and produce as he had planned they should. That it was possible for Mr. Kerr to achieve so much was because he had from boyhood been a lover of good hogs. Then when grown to manhood he aspired to do things, not by halves, but in such a manner as to cause all who met him to realize that the top round of the ladder was his goal. In this dispersion sale there will be about 150 head, consisting of fifty-five to sixty bred sows, twenty-five or thirty of which are bred to Kerr Dick. This will be an opportunity unparalleled, as Mr. Kerr had decided never to offer another sow bred to Kerr Dick and had he lived, the only way breeders could have secured the get of Kerr Dick would have been directly from Mr. Kerr. About twenty-five boars aside from the herd boars will go in the sale. These are large enough for service. There will also be a great line of summer and fall pigs. Throughout the entire offering there will be found show material that

should go to the men wanting show stuff. Everything is in nice condition, the sows showing that they are in pig and in the very best of condition to produce good litters. Breeders wanting anything from a herd boar with a national reputation, a brood sow of equal reputation, or younger stock, descending from these great sires and dams will find this the greatest opportunity ever offered. As the sale is an administrator's sale it must necessarily be a cash sale with no favors to friends or foes. Mr. Llewellyn Jones, of Independence, Mo., administrator of the estate, will have charge of the sale. All pedigrees will be delivered on settlement for stock purchased and all communications regarding the sale should be addressed to him. Cois, Jas. W. Sparks and F. J. Zaun will do the selling. Mr. C. J. Hiles, secretary of the O. I. C. Association, will be in attendance and offer all assistance possible to buyers, so if you cannot be present, your bid to him or either of the auctioneers will be treated honorably. See page 34 for advertisement and write Mr. Jones today for a catalog.

## THE OPPORTUNITY OF A LIFETIME TO SECURE GILT-EDGE BROOD SOWS.

On page 39 of this issue of The Homestead will be found the announcement of a very important sale of brood sows bred at LeGrand, Iowa, January 22d. They are the property of Mr. R. G. Tweed, who has won much notoriety at the Iowa State Fair of recent years by capturing many of the most-coveted prizes. Mr. Tweed will sell fifty-six head of hogs on the above date, divided as follows: Seventeen tried Poland China brood sows, all safe in pig; nineteen select Poland China gilts, bred; six Poland China boars, among which are some top notchers; seven Duroc Jersey sows bred and one Duroc Jersey boar; six exceedingly fancy Chester White sows safe in pig to some of the best Chester White boars in the state. The Poland Chinas are in a class by themselves as compared with the average consignment of Poland Chinas for the sale ring. In fact, if this same class of hogs of like breeding and individual merit were consigned to some of the eastern sale circuits, where the business is booming, the average on such a bunch would reach three figures. But in this case Mr. Tweed, while having spent very much money in gathering together and breeding up such a herd, does not anticipate fancy prices. These hogs are of the large roomy sort, yet possessed of plenty of finish and are the low-down, wide-out sort, with great arched backs, splendid ribs and heads and ears that add to the finishing touches, making them well-nigh complete and perfect animals. It has been many a year since the writer, who is himself an old swine breeder, has seen such a choice offering as this pass under the auctioneer's hammer. If we had had more time to properly advertise this sale we doubt not that some record prices for Iowa, at least, might have been made, but as it is it will be the buyer's opportunity to secure stock of the highest possible character at his own price. Not only are the Poland Chinas a select lot and of the most fashionable breeding, such as Chief Perfection 2d, Chief Tecumseh 2d, Wilkes, One Price, etc., but the Chester Whites, while not numerous, are as choice a bunch as can be found in any herd. Mr. Tweed is unquestionably a successful swine breeder, and equally as successful as a fitter. His hogs from the little fall pigs now on hand to the matured sows, without exception, are well grown, thrifty and in the pink of condition throughout. The Durocs also are of the same high class as are the other breeds. The Poland China sows are all bred to three exceedingly good and useful boars, all of the most approved and fashionable breeding. A large per cent of the sows bred are by Iowa Boy, he by Perfection I Know and he by Proud Perfection, out of the celebrated sow, Lady Louise. Iowa Boy's dam is Beauty U. S. 2d, a daughter of Hands Up and Beauty. This boar is a full brother to Lady Lucile, champion sow at St. Louis in 1904 and sold at a fabulous figure. The good boars to which these Poland China sows are bred are as follows: R. G.'s Perfection, Rowdy S. and Perfection E. L. Again. Certain it is that a better lot of brood sows of equal number, bred to boars that are the superior of these three mentioned, would be very difficult to find. It is only by chance that the breeders of the middle West secure an opportunity at such a high class of stock in the hands of a man who has in no way been connected with any boom or fictitious sale. The Chester White sows, as before mentioned, are a very superior lot bred to Young President, Romeo and Groves' Choice. The Duroc Jersey sows are all bred to the one choice herd boar, Senator W. Mr. Tweed extends a cordial invitation to our 100,000 Homestead readers, or at least that portion of them who may be interested in improved hogs, to attend his sale, January 22d, where free entertainment and cordial treatment will be accorded. Fair and honorable dealing and everything as represented will be the word of the day. At the same time and place Mr. Tweed will sell four choice registered Short-horn bulls. Inasmuch as this is a hog sale, it is not an opportune time to sell bulls. Nevertheless, it will be the buyer's opportunity on this account, and as there is only a few of them, Mr. Tweed is willing to make this sacrifice and take his chances. Haste in sending for a catalog will be necessary, inasmuch as there is but a few days until the sale will occur. The Homestead goes on record as saying that the offering is a superior and superb one, and no one will be disappointed in the quality of the offering or the high character of the breeding.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

## LAW QUESTIONS CONSIDERED.

## DANGER OF ADVERSE POSSESSION.

A Subscriber, East Peru, Iowa.—A and B own tracts of woodland adjoining each other. A's land lies on two sides of B's land. In order to save fencing A has fenced his land by fencing across B's land without the knowledge or consent of B. (1) Does this in any way invalidate B's title? (2) Should B protest against it?

Answer.—(1) Fencing across B's land does not invalidate B's title at all, but in case A should claim the land and keep it enclosed by a fence and use it for ten years, it might cause B some trouble and expense to defeat A's claim. It would therefore be prudent for B to protest against the fences across his land, and demand the removal of them.

## PARTITION WILLOW FENCE.

Mr. A. B. Butler, Montezuma, Iowa.—The partition fence between my neighbor's farm and mine is mainly a willow fence. (1) Is a fence consisting of wires stapled on the willows a lawful fence, or does it require posts? (2) Can I compel my neighbor to trim the willows on his part of the fence on my side so that I can cultivate, or mow over my ground up to the fence?

Answer.—(1) In a lawful wire fence, the posts must be not more than two rods apart with two stays between, or not more than one rod apart without stays. We suppose that if growing willows furnish posts to which wire may be attached, and so form just as good a fence as though posts were actually set in the ground, it would be deemed a lawful fence, provided it would pass the judgment of the fence viewers. That is after all the test. If one has a fence not made exactly as the law prescribes, he should call the fence viewers to examine it and if they say it is equivalent to the prescribed fence, that settles the matter. (2) You should call the fence viewers and get an order from them as to the trimming back of the willows. The law requires such willows to be trimmed back once every two years to within five feet of the ground. The

fence viewers will make the proper order for your neighbor to trim the willows.

## TRESPASS—ADVERSE POSSESSION.

A Subscriber, West Point, Neb.—(1) A and B own lands in one section. A stream of water runs through B's land. B rented his land to C. Has C a legal right to cross A's land in order to get to the rented land? (2) A and B own adjoining lands. There is a partition fence between these lands which has been claimed by both parties as the line for forty years. A has recently had his land surveyed and finds that the true line is about four rods over on B's land. Can A lawfully claim this strip of land?

Answer.—(1) C has no right to go across or upon A's land without A's consent. (2) A cannot hold the strip of land by law, because the same has been held in open notorious continuous possession under claim of right for forty years. This makes A the owner of the strip by adverse possession.

## ASSAULT AND BATTERY.

A Subscriber, Axtell, Kan.—In the town school here the children sometimes sang the song, "Everybody works but father." One Sunday Mr. Long, who is professor in the school, was walking down the street, when one of his pupils, who was standing in the door yard of his father's house, repeated part of the song in this wise, "Everybody works but Long." On Monday morning the professor whipped the pupil unmercifully for this caper. Had he a right to do so?

Answer.—He had no such right. By doing so he clearly demonstrated his unfitness for the position of a teacher, and besides he is liable to arrest and punishment for assault and battery. The child was not within the legal control or jurisdiction of the professor when he committed the childish prank for which he was punished.

## DRAINAGE DITCH.

A Subscriber, Shellrock, Iowa.—I own land in Minnesota. Parties owning land above mine have dug a big ditch for drainage purposes, four or five miles long, and the outlet is at the line of my land—that is, the lower end of the ditch is there. This results in water overflowing my land, and also the public road. (1) Have the parties any right to do this? (2) Will the county have to drain the road?

Answer.—(1) Parties have no right to so drain their lands as to cause land belonging to other parties to be overflowed by surface water. You have given such a meager statement of facts in your case, that it is difficult to advise you. Most likely you have a good case for damages against the upper owners, and can also restrain them by injunction from turning their drainage waters upon your land. (2) If it is a county road the county will have to keep it in repair, by draining if necessary. The county may also have a good

## HONEST CONSTRUCTION

WHAT DOES THIS MEAN?

"HONEST CONSTRUCTION" in a Manure Spreader, under the policy of the Litchfield Manufacturing Company, will prove to be a revelation to some of our readers when thoroughly understood.

We feel that we must tell our simple story over and over to those who have had experience with many of the other spreaders and the methods used to exploit them. We have an inspiration to say precisely what we mean and to mean only what our machines have repeatedly proven that they will actually do. We want to have it understood that by "honest construction" we do not only mean good lumber, best quality of steel, first-class paint and workmanship to match, but we mean also that no representation shall be made concerning this Modern Manure Spreader which the working results and the staying qualities of the machines, as well as the material and workmanship, shall not in every way substantiate.

By "honest construction" in the machine itself, we mean to produce a spreader that will meet every requirement that any spreader is capable of fulfilling, giving in this machine full and absolute value for every dollar that is paid for it. We mean that the Litchfield Spreader will not only fulfill this on the start, but will continue to do so until the infirmities of age demand a hearing.

The Litchfield Spreader stands today without dispute as the finest and best appearing Spreader made. "Fine feathers do not make the bird." Neither do fine feathers injure the bird. If the Litchfield Spreader is better painted (not dipped painted, but hand brushed one coat at a time), does this not indicate a painstaking effort throughout the machine? Talk is cheap, although not always so. But when the machine backs this talk up with the heaviest axles, the strongest bearings, the best quality of paint and painting, and with steel wheels (twice as strong as are necessary), besides bristling with other evidences, even to the most casual observer, of honest construction, then this talk necessarily begins to cut a figure.

The slender thread of popularity is too easily broken, when once it has been successfully woven, to permit of the slightest deviation from the "straight and narrow path," in producing a machine of this kind, if permanent success is to be relied upon.

"Honest Construction" is, being honest with ourselves as well as honest with our customers, which is the only policy that can withstand the decaying influence of time. Practical value, not value in theory, is what we are giving our trade, and what we mean by "honest construction." If you cannot see us, drop us a line.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

cause of action against the ditch parties.

## VALID WILL—DESCENT IN KANSAS.

A Subscriber, Nowhere.—(1) A and B are husband and wife. A and other children inherited considerable real estate from their father when he died. Suppose A should make a will giving his portion of the land to B, would the will be valid? (2) A man owned land in Kansas. He died without a will, leaving a wife, but no children. What part of the land does the widow get?

Answer.—Contrary to a thousand gentle hints, more or less, given in the columns of this department at various times this correspondent fails to give the name of his town, county or state. The first question can be answered however, because the law on the subject is the same in every state. Such a will would be valid anywhere. The second question can be answered because the land is located in Kansas. The widow gets the whole estate.

## DAMAGE BY CATTLE.

A Subscriber, Harris, Iowa.—A and B own adjoining lands with a partition fence between. This fence was not made according to law, and was never divided. A rents his land to C, and B rents his land to D. C's cattle broke through the partition fence into D's corn field, and the two tenants just let them stay there, expecting A and B to pay the damages. B gets one-third of the corn crop as his rent from D, and now D wants to retain part of B's share of the crop for damages. Who is liable for the damages?

Answer.—The last part of section 2313, page 802 of the Iowa Code, provides that if there is no lawful fence between adjoining lands, and the line thereof has not been divided or assigned either by the fenceviewers or by agreement of the parties, any animal trespassing across such partition line shall not be distrained, nor shall there be any liability therefor. Such tenants as you describe, ought to be fired without delay.

## QUIETING TITLE.

A Subscriber, Tipton, Iowa.—I purchased some real estate and required an abstract of title. This showed the title to be imperfect. An action to quiet title was brought by the man who sold the land, and notice by publication was made and published in the papers. In this published notice was named several deceased parties instead of the unknown heirs of such deceased parties, or unknown claimants, and a decree quieting title was rendered. My attorney says the decree is worthless, while the attorney for the seller says it is valid. What is your opinion?

Answer.—It is difficult to give a reliable opinion on the matter without knowing more about the facts and circumstances. It is quite clear that notice published against deceased persons has no effect whatever. It is also clear that if there be any person who has a claim against the land, or to it, he is

Active and retired farmers, and all persons owning, renting, dealing in real estate or property of any description to send for sample pages of the only work of the kind published in the world.

Wagon-Box Manure Spreader

Fits Any Truck Saves You 50%

Only Endless Apron Force Feed Spreader Made.

JUST that:

It's been a long time getting here—but I've got it.

The Only Endless Apron Force Feed Manure Spreader in the World.

The Only Wagon-Box Manure Spreader on the market.

Think of the combination!—Just the two things in a manure spreader the farmer has always wanted.

The wise ones said it couldn't be done. I've disappointed them.

First—they said a wagon-box spreader wouldn't work.—My hundreds of well satisfied customers have already stopped that talk.

Then—when it came to an endless apron, force feed machine—they said, "impossible". Did you have free mail delivery, telephone or a cream separator ten years ago? Nothing is impossible! You will say so when you see how simple and how wonderfully effective my great new improvement is.

It is simply turning the spreader business right end to and giving the farmer a chance.

Every farmer can afford a Galloway Wagon-Box Spreader. I want every farmer in the United States to own one.

That's why I sell it direct to you, saving you every cent. (Tell your neighbors.)

Right at the start I am selling this machine for \$59.50, freight prepaid. At retail it would cost you \$75.00. I also save you tying up \$50.00 to \$70.00 in a spreader truck useless eleven months in the year.

My guarantee is the broadest possible—I back it up to show you that I mean business by a \$25,000 legal bond.

Then to absolutely convince you I say, "try one of my spreaders for 30 days on my free

plan." Let me send you one to take out in the field to use, or abuse if you want to, for 30 days. If it's not worth more than my price—take it to the depot—ship it back—and I'll return your money.

Why not get everything that's coming to you out of your land? That manure heap outside of your barn will buy my spreader twice over for you.

Every farmer has been saying,—"I must own a spreader."

Forty-nine out of fifty say the old style horse-killing machine is too high in price. Isn't that a fact?

Now, I claim the Galloway is right in every particular.

Made in three sizes—capacity 50 to 60 bushels. Fits any truck, narrow or wide tread. Lightest draft and simplest machine made and the work it does under all conditions is perfect.

Why not let me send you a machine—and let you be convinced by the machine itself, without sending me a cent? I'll do it today if you will write me.

I have just this further clincher to offer you. For a limited time I will make a proposition to the first farmer owning a Galloway Spreader in every community whereby he can

partly or entirely pay for his machine without a bit of work done. It's a strictly business proposition and will positively hold good only for the first few farmers buying. Either send in your check pinned to this ad, telling me the style of truck you use, or write me at once, postal or letter, so I can send you by return mail my free booklet. Address me personally.

WILLIAM GALLOWAY, President, WILLIAM GALLOWAY COMPANY, 109 Jefferson St., Waterloo, Iowa.

Ask me also for my large Farm Implement Catalog.

"THE ONLY WAY IS THE GALLOWAY—FROM FACTORY TO FARM."

William Galloway, Builder of the Only Endless Apron Force Feed Manure Spreader in the World.

## IOWA CORN CONVENTION.

Under the auspices of the Iowa Corn Growers' Association there is annually held, in connection with the two weeks' short course given at the Iowa Agricultural College, a corn show. These events have in the past resulted in bringing together a large number of good samples of corn, but all events of the past have simply been preliminary to the one held during the first two weeks of the new year.

When 700 busy men are willing to spend two weeks of their time in close application to the study of corn and live stock, it must be clear to all that the end in view must be an important one, and so it is, because in this case the object is the improvement in the quality of the grain and live stock of the state.

The college has never been so well equipped in the past to care for its short course students as was the case this year, and to every citizen of the state of Iowa it must be a source of satisfaction that as these short courses grow in popularity the work in itself becomes more effective. Thousands of samples of corn of every variety were on hand this year, furnishing material to develop the skill of the eager students in attendance.

The contest for premiums between the corn growers of the state was simply incidental, and yet it was a most important occasion, after all, of this fortnight's experience. A record was certainly made in more ways than one, but the outstanding event of the two weeks was the sale of the winning individual ear of corn. This was raised by D. L. Pascal & Sisters, of DeWitt, Iowa, and was pronounced by Professors Holden and Shammel to be the best ear of corn ever exhibited in a corn contest in the central West. These men, be it remembered, have taken part in the principal corn carnivals and shows that have been held in the corn-belt since the inauguration of these events, and this in itself would make the occasion a notable one. All experts who examined this ear claimed that high-water mark had been reached, in so far as the production of one ear of corn is concerned, and that future work of the members of the Corn Growers' Association must be to come up to this standard with a whole exhibit and then after that to bring the whole crop as near to it as possible. The record made by this ear of corn in selling for \$150 will not be forgotten soon, especially so when viewed in the light of the fact that the man who grew it had to pay this price in order to get possession of it after the contest; that is, he had to pay it in the auction ring when the ear was sold.

So important do we regard this work of improving seed corn that we deem it advisable to append herewith the names and postoffice addresses of all prize-winners at the 1907 contest. The men who have engaged in this work of improving corn and in bringing it up to a standard high enough to win at an event of this kind deserve to have their names placed high among those who are working in the interest of advanced agriculture, and we only hope that each man whose name is given in the list below is in a position to furnish his neighbors with enough seed to give them a start along right lines:

## NORTHERN SECTION—CLASS A.

District No. 1—First, Geo. M. Allee, Newell, Iowa; second, Victor Filler, Washta, Iowa; third, J. W. Earl, Pocahontas, Iowa; fourth, H. L. Filler, Washta, Iowa.

The Prize Winning Ear.

We present herewith an illustration of the remarkable ear shown at the convention held at the Iowa Agricultural College recently by D. L. Pascal and Sisters, of DeWitt, Iowa. This ear was pronounced by Professors Shammel and Holden to be the best that has ever been placed on exhibition in the corn belt. It is ten and a quarter inches long, seven and seven-eighths inches in circumference at a point three inches from the butt, and six and seven-eighths inches at a point two inches from the tip. It weighs nineteen ounces and carries twenty rows of kernels. It was raised on land that was in corn the fifth year and averaged sixty-five bushels per acre. It is of the Reid's Yellow Dent Variety and has been grown on the same farm for a number of years. Another ear shown by the Pascal firm, taken from the same field, was a remarkably close second to the champion, thus indicating that there might not after all be so much guess work about the fixing of characteristics in corn as men have been inclined to think in the past. The sale of this ear for the neat sum of \$150 makes it a record breaker in more ways than one. It was purchased by Mr. Pascal and will be used no doubt as foundation material for another crop.

## The Famous Angle Lamp

WHEN we tell you that The Angle Lamp will light your home better, cheaper and more satisfactory than gas, electricity, gasoline, acetylene or any other light, we mean better, cheaper and more satisfactory and are ready to back these statements with proof. For our lamp is constructed on a new principle of oil lighting (patented by us) which completely does away with the smoke, odor and bother of the ordinary lamp and yet makes "The Angle" so much cheaper to burn than even the ordinary lamp that it PAYS FOR ITSELF.

## Better Than Gasoline.

Because all gasoline lights use mantles. And all mantle lights are intense, glaring, penetrating. That is why one conscientious American manufacturer tries to give his mantle at least a little of the soft yellow tone which makes the kerosene light. And absolutely refuses to make a "pure-white" mantle. For he knows what all students of lighting methods know—that the "pure-white" mantle creates a blindness. And yet some people, because the very penetrating qualities enable them to read at a long distance as from the fixtures, still use such eye-destroying lights.

Then, too, gasoline is one of the most dangerous illuminants; while the constant breaking of the delicate mantles makes it expensive far beyond the cost of the fuel.

The Angle Lamp, on the other hand, while giving a light of the finest quality known to science, is absolutely safe, requires little attention and never gets out of order. Mr. E. C. Parmelee, Highlands, N. J., sums it up briefly in a recent letter, "My Angle Lamps," he says, "have saved 20 times their cost in oil, burners, chimneys and cuss words."

## Better Than Acetylene.

"The Acetylene Light" says Dr. David T. Day, Chief of the mining and mineral resources division of the U. S. Geological Survey, "is even more glaring indoors than the arc light outdoors." Dr. Day places Acetylene as the worst of all artificial lights for home use—more penetrating and more harmful than the mantle lights.

But Acetylene has a worse feature, even than this—the danger. It is one of the most explosive and probably the most penetrating gases known to science, so penetrating is it that it sifts through even the water with which all acetylene generator manufacturers presume to

seal the gas-storage tanks. And don't think a large quantity need sift through to cause trouble. For any mixture of acetylene and air from one part of gas to three of air, up to one part gas to 40 parts of air may explode!

How strong the contrast between this dangerous system of which you never can be sure and the safe, clean Angle Lamp, which, because of its double fount construction and "angle" flame, absolutely cannot explode. And how strong the contrast between the intense, eye-straining acetylene light and the soft, warm, restful Angle Lamp!

## Better Than Ordinary Lamps.

"The oil lamp," says Dr. Day, in another part of the article above referred to, "yellow, steady, fairly soft, is still the supreme reading light in general use." This splendid kerosene quality of light forms the only ground for comparisons between our lamp and the old fashioned kind. Because The Angle Lamp is an entirely new principle of oil lighting which, while generating a far better and more brilliant light than the old style lamp, has completely done away with all the smoke, odor and bother of the old style lamp.

The Angle Lamp is lighted and extinguished as easily as gas. It requires filling only once or twice a week, which may be done with abso-

lute safety while the lamp is lighted. It never smokes or gives the slightest odor whether the light is turned at full height or turned low like gas. It is absolutely safe.

And yet the very features which make The Angle Lamp the most convenient light ever invented by giving perfect combustion of oil, make it also the cheapest. For one quart of oil burns 16 hours. Figure what that means in economy!

Now if you have read this advertisement closely you understand why we offer to prove what a completely satisfactory light The Angle Lamp is by sending any lamp listed in our catalog "33", on

## 30 DAYS' TRIAL.

And you will understand why such people as ex-Pres. Cleveland, the Rockefellers, Carnegies, etc., who care nothing about the economical features of the Angle Lamp have chosen THIS oil-burning lamp for lighting their homes and estates in preference to gas, electricity, acetylene or any other system. The Angle Lamp will please you as it does thousands of others. Write for our catalog 33, listing 32 varieties from \$1.80 up, and giving you information about all lighting methods that would cost you hundreds of dollars to collect.

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## PLYMOUTH ROCKS.

**ROCKY CREST FARM** is offering choice Barred Rocks, both cockerel and pullet bred lines, with score cards by Judge McClave. Prices reasonable. These birds line bred for years. At Rochelle, Ill., in strong competition, won four firsts and tied for fifth first. Eggs for sale in season. Write for prices. Member American Plymouth Rock Club. Will D. Quick, Ashton, Ill.

**EVERGREEN Linn Farm, M. Hummel, prop.** Monroe, Iowa, breeder of heavy-boned Barred Plymouth Rocks for 22 years, has for sale 450 birds sired by high-scoring Iowa State Fair and Jasper County Fair first prize winners. We won nine first prizes at the Jasper County Fair in 1905. Nothing but first-class stock shipped.

**BARRED Plymouth Rocks** for sale. 300 cockerels, hens and pullets at a bargain. Large-boned, vigorous, farm raised, scored birds that win. I have developed heavy egg producing strains. Mrs. A. A. Berry, Box 128, Clarinda, Iowa.

**RILEY'S Pure Barred Rocks, Hawkins-Thompson strain.** Get eggs of us if you want good value. There's a reason. Ask why and get prices. Any number. Orders now or later. Mrs. J. Willis Rilea, Box 54, Grand River, Iowa.

**BARRED Plymouth Rocks, Hawkins-Thompson, Felch and Todd strains, cockerels, \$1.50 to \$2.00 each. Hens and pullets, \$1.00 a dozen, if taken soon, as we intend to leave.** Lou Blatner & Co., Prairie City, Iowa.

**50 WHITE PLYMOUTH cockerels** from Canada's pedigree laying strain, large, strong, true Rock shape, snow white. Must be sold at once; choice cockerels, \$1.50, bargains. C. A. Steele, Ogden, Iowa.

**WHITE ROCKS—Exclusively.** Fishel strain, Range bred, healthy and vigorous. Scored, \$2.00 up. Unscored without disqualifications, \$1.50. G. H. Blake, Route 2, Oelwein, Iowa.

**WHITE ROCKS, pure bred.** Pullets, \$1.00, cockerels, \$2.00 during January. Buff Rocks, July hatch, cheap to close. All are good; culls all sold. A. H. Prater, Council Grove, Kansas.

**WHITE Plymouth Rock pullets and cockerels and Silver Comb Buff Leghorn cockerels, prize winners.** Free circular. D. W. Harberts, Marion, South Dakota.

**FOR SALE—Barred Plymouth Rock cockerels, Mammoth Bronze turkeys, raised from high scoring stock.** Eggs in season. Mrs. Eugene Scott, Lathrop, Mo.

**MASON C. OGG, Fairmount, Iowa, breeder of extra large, well-shaped, nicely marked Barred Rocks.** 100 choice cockerels for sale. Eggs in season.

**BARRED ROCKS—Pullets, cockerels, scored 88% to 93%.** Large, vigorous. Write your wants. Prices low. Circular free. J. Eddie Anderson, Alta, Iowa.

**75 BARRED Plymouth Rock cockerels for sale.** Nicely barred and with large bone. Prices reasonable. L. M. Churchill, Fairmount, Iowa.

## LANGSHANS.

**100 BLACK Langshan cockerels** from pens scoring 93 to 95; four firsts, grand average stake, Creston Fair. Philip Stalcup, Lodi, Iowa.

## RHODE ISLAND REDS.

**CHOICE Rhode Island Red cockerels.** Fine color, large bone. Mrs. G. E. Ostheimer, Eldora, Iowa. On Iowa Central and C. & N. W.

## COCHINS.

**PAIRTRIDGE COCHINS exclusively.** Both sexes for sale. None better. Mrs. C. E. Wonderly, Benedict, Neb.

## WANTED.

**WANTED—A thoroughly practical farmer** capable of taking charge of 500 acre stock and grain farm. Must thoroughly understand hog raising and cattle feeding. Address with references, Box 302, Marshalltown, Iowa.

**WANTED—All cream producers to know that the Des Moines Creamery Company pays at all times top prices for cream.** Write for proposition, Des Moines Creamery Co., Des Moines, Iowa.

## SCHOOLS.

**LEARN plumbing, plastering, bricklaying by actual practice.** Taught thoroughly in three months at school. These trades pay \$4.50 to \$8.00 per day. Positions secured. Write for free catalog. Coyne Trade School, 843 N. Ashland, Chicago.

## The Week In Kansas.

To the Editor of The Homestead:

This has been the first whole week of the new year, and the first week of winter. However, it has been Kansas winter, therefore it would not be called winter in that section a few hundred miles north, where the winters are said to be such that "you don't feel the cold." It has tried hard to snow all week, and up to this moment it has not succeeded, except to barely whiten the ground. Last evening and the evening before that it looked as if it could not avoid giving us a few inches of that which the daily papers imagine "saves the wheat crop," but now the wind has got out of the northeast, and into the southwest, with more signs of clearing than we have had for a week. Perhaps this, though, only means that it is getting ready to storm. The weather is more or less of a game, played by the same tactics as are politics—just as

## WYANDOTTES.

**30 WHITE WYANDOTTE cockerels.** They are beauties. Write me about them. S. W. Harr, Riverside, Iowa.

## LEGHORNS.

**ROSE Comb Brown Leghorns exclusively.** The best lot of cockerels ever raised at Pike Timber Stock Farm, for sale. T. A. Davenport, Belmont, Iowa.

**FOR SALE—Ten dozen Rose Comb Brown Leghorn Pullets, laying now.** One dollar each or ten dollars per dozen. C. E. Lister, Iowa City, Ia.

## MISCELLANEOUS POULTRY.

**MAMMOTH Bronze turkeys, sired by 46 lb. tom, scored 96%; Toulouse geese, Pekin ducks, Single Comb Buff Orpingtons, Single Comb, Brown, White and Buff Rose Comb, Brown and White Leghorns.** Wm. Gulda, Osgood, Iowa.

**PURE BRED poultry and eggs of all kinds for sale.** Barred and Buff Rocks, Pekin ducks and Bronze turkeys a specialty. Enclose stamp for catalog explaining our method of business. J. F. Foy, Redfield, Iowa.

**MAMMOTH White Holland turkeys, Imperial Pekin ducks and Barred Plymouth Rocks** from prize-winners of extra heavy weight and high scoring. Fred Post, Moulton, Iowa.

**FOR SALE—Barred Plymouth Rocks, Rose Comb White Leghorns, Rose Comb Rhode Island Reds, cockerels and pullets.** Write for prices. H. Pain, Emmetsburg, Iowa.

**MAMMOTH Bronze turkeys; fifty from stock scoring 96 to 97.** Barred Plymouth Rock cockerels all sold. Eggs in season. J. C. Watts, Berwick, Ia.

**BUFF Plymouth Rock cockerels, large size, good color, \$1.50 each; Mammoth Pekin ducks, \$1.00 each.** Mrs. J. W. Martin, Mason City, Ill.

**FINE Partridge Cochins, Golden Wyandottes for sale.** Pullets, \$1.00 up; cockerels, \$1.50 up. E. L. Elliott, Oelwein, Iowa.

**WHITE Holland turkeys, White Wyandottes for sale.** Write for prices. W. A. Marsh, Jr., Aledo, Ill.

## DOGS.

**FOR SALE—Fine registered Scotch Collie female puppies at \$5.00 each.** Guaranteed natural heelers. A. H. Gerot, Riverside, Iowa.

**FERRITS and Scotch Collie dogs for sale.** H. B. Simpson, Albany, Ill.

## CATTLE.

**RED POLLED Cattle.** Champion beef and milk producers, choice animals, either sex, priced right. Write for booklet and particulars. O. P. Russ, Ravenwood, Mo.

## HORSES.

**THREE home-grown, pure bred Percheron stallions for sale; two 3 and one 2 year old, blacks, 1,500 to 1,800; heavy boned, extra quality.** Priced right. Grant McCoy, Indianapolis, Iowa.

**FOR SALE—One 8-year-old imported Percheron stallion, one 2-year-old and one yearling, home bred, all black, good ones.** R. D. Humphrey, Lacey, Ia.

**PERCHERON Stallion for sale.** Home bred, an extra good one, six years old, weighs 1,800 pounds. Address, Grant Spangler, Burnside, Iowa.

## HOGS.

**FOR SALE: Poland China Glts out of splendid aged sows.** Good bone, good quarters, nice head and ears, good color. Safe in pig by "Sunlight," one of the best young hogs in the country. H. M. Crumbly, Ulysses, Neb.

**30 POLAND CHINA and 20 Duroc Jersey bred glts for sale.** Weight 250 to 275 lbs. Every one guaranteed. Joseph Bouska, R. 2, Calmar, Iowa.

**J. H. BARNETT estate will sell seven young Percheron stallions at a sacrifice for the next two months.** J. H. Dyke, Administrator, Indianapolis, Ia.

## AGENTS WANTED.

**FARMER Agents Wanted.** Time saver and money saver for farmers. Over one thousand sold in one county. Quick, easy seller. Liberal commissions. Write right now. Farm Record Company, Newton, Iowa.

## MISCELLANEOUS.

**KANSAS FARM BARGAIN.—320 acres choice land, good house, barn, granary, cistna, good wells, windmill, orchard; 180 acres in cultivation, 20 acres alfalfa, balance pasture; all fenced, 135 acres growing wheat goes with sale. I have other good bargains. Call on or address, J. K. Bremyer, McPherson, Kan.**

**A BARGAIN.—85 acres, level, deep cherty soil, no waste.** In settled community, best dairy country on earth. One mile from creamery, postoffice and store. Only thirty miles to St. Paul and Minneapolis markets. Partly improved. \$1,700. Terms to suit. L. C. Perkins, Balsam Lake, Wis.

**FOR SALE—160 acres, two miles from Clara City, Minn., well improved, good bearing orchard and small fruit, German neighborhood; price \$50.** \$4,500 mortgage; will trade equity for small farm clear. Address, Geo. Caruth, Rural Route 1, Clara City, Minn.

**FOR SALE—Improved and unimproved farms in South Dakota, improved farm in Northern Missouri. I sell on small commission, none sell cheaper. For square deal, write W. L. Cochran, Box 309, Aberdeen, S. Dak.**

**240 ACRES top wheat, corn, alfalfa land for sale; 3 1/2 miles from college town of Nickerson, direct to purchaser, less real estate dealer's commission. For description, price, Eliza A. Stroup, Nickerson, Kan.**

**SOUTHWEST MINNESOTA—Black loam prairie corn lands, safe, sure, profitable; \$26 per acre up.** Three farms for share rent. Particulars and map free. E. H. Crandall, Montevideo, Minn.

**560 ACRE ranch, well improved, in Coffey county.** No better in eastern Kansas. At a bargain if taken soon. For descriptions and maps write, Lane & Kent, Burlington, Kansas.

**A BIG SNAP—320 acres, Kay county, Oklahoma; all smooth land, 200 acres broken, balance grass land. Price less than \$35 per acre.** Write Chas. E. Voge, Newkirk, Oklahoma.

**WE WILL sell you a home in the city, or a farm in Weyler or adjoining counties, at exactly the list price furnished by owner.** Frauks, Page & Harris, Winfield, Kansas.

**FOR SALE—Farms, Reno and adjoining counties, ranches west, special bargains.** Write me what you want. A. M. Jewell, North Main Street, Hutchinson, Kansas.

**KANSAS, Oklahoma and Texas lands.** We are located in the finest wheat, corn and alfalfa country in the world. Write us. Southwest Land Co., Newton, Kansas.

**IF YOU WANT a dairy, fruit or poultry farm in the Willamette valley, Oregon, do not wait.** Write, F. B. Phillips, Cottage Grove, Oregon.

you think it is sure to do one thing, it turns and does just the opposite.

As far as farm news is concerned, it is the same old story, a continuation of the events of last week and the week before that. Some are hauling off corn, a few have been trying to thrash their shocked corn and kafir, others, when the ground was not too wet or frozen, have been trying to plow. The average Kansas farmer is a man who is usually busy, and the man who thinks he strikes an "easy lot" when he strikes Kansas, is on the way toward being mistaken. Between here and farther north, where we have lived, the farmers here do more work, and more hard work. We have here all the energy of the North, with a long season to exercise it in. The Kansas farmer is busy the year round.

Top hogs are crowding the six-cent mark at all our local markets, with well-finished steers selling not far from that figure at Kansas City, less than 100 miles away. The man who has good stock and knows how to feed them, cer-

tainly has no kick coming, under these circumstances and with these prices. The great bulk of the corn is being marketed in live stock, a greater per cent than ever before.

If the sun would only shine, as is its usual way in Kansas, we would have no kick coming. It has been cloudy now all week, which is not exactly the most cheerful weather there is. However, there has been no deep snow, no crawling down toward the bulb in the thermometer and no bad roads, so perhaps, after all, we should take the clouds with cheerfulness, glad that it is no worse.

Henry Hatch.

Coffey Co., Kan., Jan. 10, 1907.

**Inexpensive But Good Seeds.**

On page 11 of this issue is found the advertisement of the T. M. Roberts Supply House, of Minneapolis, Minn. By turning to that page it will be found that this company is offering thirty-seven packages of the best vegetable seeds for thirty-seven cents. This amount

would ordinarily cost anywhere from \$2 to \$3. An examination of the advertisement referred to will show the kind of seeds that are included in this list. This is a marvelously low price for good seeds, and yet this firm has been doing business with our readers so long without a single complaint having been registered with the publisher, that we have every confidence that the seed will be true to name, free from weeds and up to the standard in germinating qualities. The company publishes a 920-page catalog which will be furnished free with the first order that is sent to each customer by freight. Those sending thirty-seven cents for the collection of vegetable seeds should send seven cents extra for postage if they desire to have the seeds forwarded by mail.

Tobacco warehouses in the vicinity of Janesville, Wis., have opened for the handling of this year's crop. Nearly 1,000 workers are employed and out of this number six hundred are girls.

## A Very Lame Excuse

Is that offered by other Cream Separator concerns, when they tell you that even though they do not extract all the cream what they leave in is not wasted because it goes to fatten the pigs. This is a fallacy. Professor Haecker, of the Agricultural Department of the University of Minnesota, declares that there is as much food value in skim milk as in whole milk. Therefore, the cream remaining is wasted.

You prevent all this waste by using an

## Iowa Dairy Separator

What you want is every particle of the cream, and this is exactly what you get with the "IOWA." Write at once for catalog 25 and full information, which will come free by return mail. Address,

The Iowa Dairy Separator Co.,  
Waterloo, Iowa.

## DOES THE WOMAN'S WORK

No pans to wash—no milk to set night and morning—no skimming to do—and—  
**Only 2 Parts to Clean**  
You pour in your warm milk—turn the handle easily. Then you get one-quarter more cream than by "setting" your milk.

**Send No Money But Just Try a National Cream Separator 30 Days FREE**

No Hard Lifting  
Only 48 In. High  
Lightest Running  
Easiest Cleaned  
Closest Skimming

Even if you have only 2 or 3 cows it will pay you well. Try it, and if you decide to buy it we'll make you a special proposition. The National will pay for itself as it earns for you. Write today for FREE Catalog and Dairy Guide No. 133, addressing nearest office.  
National Dairy Machine Co.,  
Goshen, Ind.  
The Hastings Industrial Co.,  
Chicago, Ill.

**You Should Buy a DAVIS Cream Separator**

Because by so doing you **Save \$20 to \$50** of your own good money. You will readily see how we make the great reduction in selling cost, when we tell you "there is no one between you and us," no wholesale or jobbers' commissions, no state or district agent to pay. **We are Bona Fide Manufacturers.**

It costs us as much to manufacture the Simple Davis, materials cost more if anything, for we use nothing but the best. Under our plan it does not cost as much to sell as it does to make, therefore our low price.

The Simple Davis has a simple 3 piece bowl made so good that it requires no balancing, consequently always in balance. The low tank is only 3 ft. 7 in. high. It's the easiest to clean, run and use.

Our liberal selling plan is fully explained in our money saving catalogue No. 118. It's absolutely free. A postal request brings it. Remember we pay the freight and guarantee safe delivery.

**Davis Cream Separator Co., 541 North Clinton Street, CHICAGO, ILL.**

**CASH SALARY** and all expenses to men with rig to introduce our Guaranteed Poultry and Stock Remedies. Send for contract; we mean business and furnish best references. G. B. BIGLER CO., 829, Springfield, Ill.

## OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### PACKING BUTTER NEATLY.

The market is more and more recognizing the quality of neatness as applied to the package in which goods are delivered, and no product handled by farmers is more susceptible to an increase in value by its attractive appearance than is butter.

When butter is put up in tubs pains should be taken to see to it that it is packed solidly throughout its entire mass. In many cases it is put in the tub in such a way as to leave large holes in the body of the butter. When the tub is full it should be neatly covered with a parchment paper lining and this should be cut so as to exactly fit the top of the package. You then have something that appeals to the eye at once, and when such a tub is opened for use it stands inspection from the top to the bottom; that is, if care has been taken in packing it solidly throughout.

The pound prints or squares are exceedingly popular, and indeed appear to be growing in popularity. The outfit for making these prints is not expensive and no farmer who markets butter can well afford to be without one of these prints. Of course there may be times when the butter will be put in tubs, but when the cream supply runs low and only a few pounds are made at a churning there is no package that looks so well and shows off one's product so favorably as the pound print.

It is the custom for appearance's sake, as well as for the sake of cleanliness, to wrap prints in parchment paper. Then some prefer to go one step further and place each pound or square into a pasteboard box by itself. Whether this should be done or not depends somewhat upon one's market, though we have in mind instances where butter was marketed in pound prints in the pasteboard boxes and sold for at least two cents a pound more than the same quality of tub butter.

### Be Kind to the Cows.

To the Editor of The Homestead:

Every milker thinks he knows how to milk, but if the cows could express their opinions they would probably intimate that a few lessons in the gentle art were not unnecessary. It is not fair treatment to sit down to a cow and tug and haul on her until she steps around in the stall and acts as if she were badly hurt. Sometimes a cow will stop eating and wait until the ordeal is over before she will resume her meal. The cow that does that is not comfortable, and an uncomfortable cow will not do her best for her owner.

Some men have a way of milking that so pleases the cow that she clearly shows she enjoys it. These are the men whose methods should be copied. Observing them we see that they never shout at, strike or otherwise ill-treat their cows. They sit down quietly, take hold of the cow's teats gently, no matter how much of a hurry they may be in, and begin to draw the milk without pressing too hard for they know they are touching her at a tender point. Then they keep steadily at it until the last drop is out. There is no excuse for having a kicking cow in the herd. The kicking cow is invariably made so by her attendant. If a cow is handled before she comes in so as to become familiar with her attendant, and has been kindly treated, there will probably be no trouble. It is my opinion that in nine cases out of ten, where there is trouble of this kind, it serves the attendant right to get a good kicking. I think if all milkers would take a little trouble to do a little thinking, a little sound reasoning, and investigate matters a little, they would probably find that sore teats is a common cause for a kicking cow, especially so with young cows; and instead of using the much-talked-of straps or ropes buckled around the body, I should advise them to use our remedy (which has proven effectual without a single exception) and that is simply clean lard.

About fifteen or twenty minutes before the cow is milked the first time the lard should be applied to the teats and when through milking wipe the teats perfectly dry with a dry soft cloth and apply the lard again. This was usually found necessary for about five

# 1 1/2 more butter 1 1/2 lbs.

If you can increase your butter production without any increased cost or any more work won't it pay you to do it? And if you can get more butter from you milk with less work, that will be still better, won't it? That's exactly what you can do if you will do as MR. LEITING did—buy a Sharples Tubular Separator. Here's what he says about the Tubular:

**MORE BUTTER  
MORE MONEY**

gets all the cream there is in the milk, does it so easy that it's not work to run it at all, and is so simple, with only one little part in the bowl to wash and keep clean that comparison is out of the question.

The extra cream it gets makes the Tubular a regular savings bank for its owner.

All the other good money-making points are told in book F-121, which you ought to read. Write for it today—we'll send it free to you.

### Here's Why You Want

## The Omega Separator

YOU want the cream separator that will do you the most good—

That's also why you want the Omega—at least we are sure that if you will investigate its good qualities, you will want an Omega.

Because it is different—

A good many persons say we ought to call it the "common sense machine"—And that's what it is—

The separator that embodies common-sense in its construction and operation.

For example:

Instead of leaving the top of the bowl without support—to wobble like a top—we have a bearing at both the top and bottom of bowl.—Isn't that common sense?

Instead of enclosing the bowl in an iron-pot—a filth and germ-breeder—we run the bowl in the open.—Isn't that common sense?

Instead of forcing the cream through crooked cream tubes at the top of the bowl, we take both cream and skim-milk from the bottom of the bowl.—Isn't that common-sense, too?

Instead of making you wait until the bowl "runs down," we arrange for you to stop it instantly—the minute you have finished separating.—That's more common-sense, isn't it?

Instead of taking 15 to 25 minutes of your time for cleaning, the Omega can be stopped, washed thoroughly, and the bowl and all parts replaced in four minutes!—The most common-sense yet!

And these are only a few of the many good things about this great machine. In convenience and reliability, no separator ever made approaches it. In durability it excels. Many users of the Omega have run their separators for 10, 12 and 15 years with practically no expense for repairs. That's a feature worth looking after!

All we ask is the chance to prove these things to you, it's as much to your advantage as to ours. On "More Milk Money," also our new catalogue and our "Golden Rule Guaranty." You ought to know more about the Omega.

**THE AUTO-FEDAN HAY PRESS CO.**  
1062 Jefferson St., Topeka, Kan.

milk her. It was then that I happened to have my attention called to it, so I told him of our method which we at that time had tried only with three or four young cows. He simply laughed at me, when I suggested that I would myself apply the lard. But the poor cow's teats were now so sore she would not even let the calf touch her. With con-

or six milkings. Many milkers have the bad habit of wetting their fingers when milking, and when the teats of young cows are left in this condition, especially in the winter time, they get sore, while lard heals or takes away the soreness that is so natural, considering that many milkers have rough, hard hands and considering that the teats are not accustomed to the milking process.

I once visited a farm where they had a fine young Holstein cow which had just come in for the first time, and the milker and the poor animal had gone through most everything during the first three milkings. The cow had no means of telling of her sufferings except with kicks and the owner, although a kind, intelligent person, could not think of other methods to apply except what he had used so often before with other cows—tying her with straps or ropes. He decided then to let her keep the calf, as it seemed an impossibility to

siderable patting and rubbing and kind words I had the satisfaction of getting the lard applied, and the still greater satisfaction of seeing the cow stand perfectly still a short time afterwards to the great astonishment of those present.

The cow is a creature of habits, and upon the attendant depends the regularity of those habits. The more regular they are the better work she will do in the dairy. Teach the young boys to be kind to the cows, to feed them properly, and do everything in their power to make them contented and happy. The true dairy cow usually possesses a highly nervous temperament that rebels against harsh treatment. In view of this fact it is ill-advised economy for the dairyman to share with the farm dog the duty of caring for her, for if he does, she will in all probability even up

with him by giving an ever-diminishing quantity of milk. Gentle treatment is about as important as good feeding and must be the practice of dairymen if they expect to succeed. A. F. Sorensen.  
Howard county, Neb.

#### Feeding Corn Silage.

To the Editor of The Homestead:

Corn silage is pre-eminently a feed for cattle. Having large digestive organs cattle are able to consume it in large quantities. It may be fed to all classes of cattle except young calves. The dairy cow produces more milk from silage than she will from the same amount of dry matter in either cured corn fodder or timothy hay, because of the succulence of the silage. Poor silage, however, is likely to taint the milk, but this kind of food must be guarded against.

It must not be expected that silage will take the place of all other food stuffs, because it is a carbohydrate food, and low in protein. With silage, cattle should have clover hay and if they are giving milk they should get also a grain mixture of about eight pounds for every thirty pounds of milk they give daily. Full grown cattle take from thirty-five to forty pounds of silage daily. It may be fed alone just after milking, or a better method is to cut the hay and mix it with the silage a day ahead and allow it to ferment for about twelve hours. This method gives greater palatability to the hay and causes the animal to eat it all.

Silage is also valuable as part of the ration for fattening steers, as was shown by a test recently concluded at the Kansas Station. According to the results of the test, silage has a feeding value of \$3.29 a ton and 3.02 tons of silage proved equal to one ton of chopped alfalfa hay.

Silage has proven a very good substitute for roots (mangles and turnips), thus supplying a long-felt want of the breeders of the corn belt.

Breeding ewes take kindly to roots and silage and they should always be fed some silage where it is available before the lambs come, as well as after.

During the winter when horses are not doing heavy work they may be fed small quantities of silage with hay and grain, but a horse should not be fed as much of this food as a cow, because its digestive organs are not suited to taking large quantities of food. Some successful hog breeders feed silage to their brood sows in small quantities, along with grain. However, an exclusive ration of silage fed to a brood sow would prove disastrous. The sow would likely gain in flesh and appear to be doing well but her offspring would be weaklings. E. E. Arthur.

Iowa county, Iowa.

## FREE! TREATMENT FOR MEN

### Cure Yourself At Home!

When afflicted with Nervous Debility, Weakened Vitality, Blood Poison, Skin Diseases, Prostate, Urethral, Kidney or Bladder Disorders, the uppermost thought is "where can I obtain a positive cure with the least inconvenience and at the least expense." Doctors charges for treatment of these troubles at their offices are very high. The cure usually uncertain.

### OUR HOME TREATMENT

places within your reach the best possible treatment at a moderate expense. Our 20 years practice and thorough knowledge of these diseases has enabled us to prepare and perfect a new method which can be successfully used at home. To prove the merit of our new method we will send you a month's treatment especially prepared for your case and allow you to use it for fifteen days. If you are not better or the treatment unsatisfactory return it to us and it will cost you nothing.

Write us today about your case even though you are discouraged with other treatments; let us

## THE INVENTION THAT REVOLUTIONIZED DAIRYING

Within the last twenty-five years the dairying industry has been completely revolutionized. In that time dairying has developed from a mere "side issue" to be one of the world's foremost industries. Once the cow was looked upon as a luxury. Today she is a wealth producer of the first order. What has been the cause of this progress? A single mechanical invention accomplished it,—the invention of the DE LAVAL Centrifugal Cream Separator in 1879. Ever since then dairying history has been DE LAVAL history. Soon the farmer who does not own a separator will be the exception. It is simply a question of the cow owners learning about the wonderful benefits and advantages of the DE LAVAL machine. If you don't know what they are ask the DE LAVAL user and write for a DE LAVAL catalog, or better still ask for a free trial of a machine in your own home. We won't expect you to buy unless you choose and you will be under no obligation whatsoever. We want you to see the invention that revolutionized dairying,—the DE LAVAL cream separator,—the separator that was first, is first, has always been best and cheapest and has led in every stage of cream separator improvement and dairying progress. The DE LAVAL stands as a champion of the dairying industry and the leader in the separator field. Its interests are your interests and DE LAVAL success can only come with your success. Now is the time to look into the matter before your cows freshen. Write us today for a free trial of a DE LAVAL machine, or at least a catalog.

## Cancer Cured No Knife, No Pain

People I have cured of cancer prove the astonishing results of my treatment. Peter Keagan, Galesburg, Ill., writes: "It is only a question of time—I must die." Doctors said "no hope." My new method was used and to-day Mr. Keagan's cancer of the throat is healed, and he is well. I have made wonderful cures without pain, operations, sticky balms, oils or plasters. My treatment is clean and wholesome. It gives instant relief from the smarting, itching and terrible burning pain, destroys the offensive odor and has cured cases given up by the family physician and specialists. If you have cancer or have a friend who has cancer, write me to-day. Full information, proofs and advice given without charge. Address DR. RUPERT WELLS, 2165 Kadel Bldg., St. Louis, Missouri.

EARL OF LAKEVIEW 6TH 164251

The best forks bear this label

## They Cost No More

A Good Fork must be formed on correct lines, for the *special work* it has to do. And it must "hang" just right, feel handy, and work easily.

True Temper forks are as perfect as the science of mechanics and skill of workmen can produce. They must prove true in quality, construction, "hang" and temper under severe tests and inspections before they are allowed to wear the True Temper label — the label that appears in this advertisement. They are by far the best made.

Ask your Dealers to let you see the True Temper line.

It includes Hay Forks, Manure Forks, Spading Forks, Barn Forks, Header Forks, — every known kind of good fork, as well as Hoes, Rakes, Weeders, Hooks and all other Farm and Garden Hand-Tools — "The best tools you have ever bought at the same prices you have always paid."

Write us today for our FREE BOOK, Tools and Their Uses. It tells how to save time and money on your work.

AMERICAN FORK AND HOE CO., 335 Am. Trust Bldg., CLEVELAND, OHIO.

## SEEDS THAT GROW! If you want the Best Seeds that can be grown, — as proved by thousands of tests at the Largest Trial Grounds in America, you should read

### Burpee's Farm Annual for 1907, — "The Leading American Seed Catalog."

A handsome book of 200 pages with beautiful half-tone illustrations from photographs, it tells the plain truth! Among other important Novelties for 1907, six pages are devoted to two unique "NEW CREATIONS," in which nature has surpassed herself. These are the most wonderful advances, over existing types, that have ever been known in any vegetable. Their discovery will be worth many thousands of dollars annually to American gardeners.

If you can appreciate Quality in Seeds and are willing to pay a fair price, write to-day (a postal card will do) and you will receive our Complete Catalog by return mail.

W. ATLEE BURPEE & CO., Seed Growers, PHILADELPHIA, PA.

## SEED CORN

The Iowa corn crop is worth more money than all the mines in the United States. Will it pay you to spend 50c per acre to increase your yield 25 bu. 7 ft. will.

We can furnish you seed corn that has breeding back of it. "Why?" "Because."

We have been breeding the best varieties for years. We have a \$14,000 equipment for handling it. We have experts to grade it and select the best. We have 1,200 acres of the best land in Page county devoted to its growth. We have graduates of Agricultural Colleges in

our employ who have conducted an Experiment Station.

We have made frequent shipments to the Department of Agriculture at Washington, D. C.; which proves our ability to produce the best type of seed; in fact, we have spared neither time nor money to make the seed the best that can be produced.

Send for our 1907 illustrated catalog which gives full information as to our method of handling seeds of all kinds. Send for it today. IT IS FREE.

A. A. BERRY SEED CO., Box BZ, CLARINDA, IA.

## SEED CORN SOLD ON APPROVAL

Test it any way you please for ten days. If not perfectly satisfactory, return at our expense and money will be refunded. Best and largest yielding varieties: Sutton's Improved Boone Co. White; Sutton's Favorite White; Reid's Yellow Dent; Gold Standard; Leaming and Premium Yellow Dent. All corn carefully selected, placed in our mammoth dry house and perfectly dried with steam pipes and air shafts. From 600 acres we selected 8000 bushels of fine seed ears. When sold we quit, so order now. We handle no outside corn. Shipped in the ear (Bushel boxes) or shelled. All shelled corn rubbed at both ends and graded. Has highest germinating power, and stands cold spring rains better than common corn. Letters from Iowa, Missouri, Ohio and Illinois this year, state that our corn out-yielded all other, making from 85 to 125 bushels per acre. Send for catalog and read these letters signed by the parties raising the corn. The actual test is what talks. My seed corn may double your yield. Write for illustrated Seed Corn Book and samples. Free. Address My ad will appear every other week. G. D. SUTTON, Dept. D., Mason City, Ill.

## A SWEET CHESTNUT TREE

To get this valuable "Blizzard Belt" Chestnut quickly introduced and at same time gain new friends, we offer to send a Hardy Sweet Chestnut tree 1 year old, entirely Free to a limited number of property owners not already our customers. Mailing expense 5cts which send or not as you please. A postal will bring the tree. Our Catalog containing 64 colored plates of our "Blizzard Belt" Fruits, Ornamentals, Evergreens, etc., and a mine of valuable information for fruit-growers is free. Write today. The Gardner Nursery Company, Box 702, Osage, Iowa.

## We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties. We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

Box 16

W. W. VAN SANT & SONS

Farragut, Iowa.

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### HORTICULTURAL NOTES.

One should not be guided in the selection of fruit trees by what he sees at fruit exhibitions alone. Show ring qualities are not the only ones to consider. The highest-priced Short-horn cow ever sold in America was absolutely barren and hence worth only her value for beef. Likewise, the fine plate of apples is too often all that were borne upon a certain tree. Nice to look at, 'tis true, and fine to eat, but it takes bearing qualities and hardiness of tree to make any variety valuable. And these essentials cannot be determined by looking at a plate of the fruit.

A few days ago we found that our potatoes stored in the cellar are beginning to sprout. They are Rural New Yorkers, too, a variety exceptionally free from this fault. Potatoes which have sprouted, especially if the sprouts are long, are damaged both for food and for planting. This trouble is increased by the furnace heat in the cellars of our modern houses. Its prevention is simple. The temperature in the cellar should be kept down by ventilation in the day time. Potatoes will not sprout unless the temperature is about 50 degrees F. It may be found necessary to remove the potatoes to a place in the cellar where no daylight can enter. This last is often necessary late in the spring when it is impossible to keep the cellar cool.

We recently examined some strawberry beds which were mulched about December 1st. The vines were in good, healthy condition, the leaves green and the crowns large and plump. The mulching is the keystone to successful berry growing. It is not yet too late, and beds which have been neglected so far should be covered at once with straw or slough hay.

A friend who is engaged in growing raspberries on an extensive scale has been bothered so much by anthracnose or cane disease that he seriously considered going out of the business. Last spring he went over a twenty-four-acre field of raspberries with a mowing machine cutting the canes close to the ground and then raked and burned them. Between the rows he planted corn and gave the soil good cultivation. He obtained no raspberries, of course, but the plants made a fine growth. They were tipped when they had attained a growth of about three feet. A few days ago he reported to us that the field was in fine condition with no sign of disease and bid fair to yield a fine crop next season.

Now is the time when the despised and maligned Ben Davis begins to taste good. Jonathans at fifty cents a peck taste too much like money for our simple appetites.

Those who took advantage of the low prices of fruit during the fall and supplied themselves well with preserves, jellies, jams and canned fruit can be somewhat independent of the present prices.

### Trans-Atlantic Fruits.

To the Editor of The Homestead:

An Oklahoma City business man, who is a native of Germany, has a taste for horticulture which he seeks to gratify in the cultivation and management of a five-acre tract a mile out of town. Mindful of the good things which used to grow in the fatherland when he was a boy, he has several times sent thither for consignments of nursery stock. His importations in this line have included cherries, (several varieties each, of both sweet and sour), prunes, apples, currants, gooseberries and red raspberries.

Since the first importation was made nearly six years ago, several varieties of the fruit thus introduced have been fruited successfully. Of these none have attracted such general attention as the cherries. Because of their large size and excellent quality, as well as their productiveness, both sweet and sour varieties promise to become popular with the general fruit grower in Oklahoma.

One novel feature of this trans-At-

## GOLDEN NUGGET TOMATO

THIS grand novelty is a real gold nugget in value. Wonderfully prolific; each plant bears 150 to 200 fruits. Rich golden yellow color, delicious flavor and very solid. We are offering:

**\$25.00 IN CASH PRIZES**

to the persons growing the greatest number of fruits on a single plant. Seed sells at 20 cents a packet, but if you mention this paper, we will send a Prize Competitor's package of 25 seeds for two 2-cent stamps, with privilege of competing for prizes. Large, illustrated catalogue of

Vegetable, Flower and Farm Seeds, FREE.

IOWA SEED CO., Des Moines, Iowa.

## GREGORY'S SEEDS

If you have never planted them, try them this year. They never disappoint — they grow — they yield. Always sold under three guarantees, insuring freshness, purity and reliability. For this reason, thousands of farmers, gardeners and planters, both in the United States and Canada, plant Gregory's Seeds exclusively. Our new Catalog contains many suggestions and directions — the fruit of fifty years' experience in the seed business.

J. J. H. Gregory & Son, Marblehead, Mass.

SELL direct — guarantee lowest prices, and the finest of everything in Trees, Shrubs, Roses, Evergreens, etc. Send for special cut-rate price list. Free.

M. J. WRAGG NURSERY CO., 330 GOOD BLOCK, DES MOINES, IA.

## HEALTHY TREES HONEST IN QUALITY

WE PAY FREIGHT. Grafted apple 4c, budded peach 4c, budded cherry 15c. Concord grapes \$2 per 100. Black Locust \$1 per 1000. Complete colored cat. free. Galbraith Nurseries, Box 52, Fairbury, Neb.

lantic horticulture is the grafting of gooseberries and currants upon a strong growing stock somewhat similar to the

yellow-flowering wild currant which is native in many of the western states. The stock selected is from one to two feet high and, as the result of grafting, the head of the currant or gooseberry bush is formed from that point. The strong growing character of the stock, with its abundant root system furnishes good support for the growth of a full head and the fruit grows to be of large size and excellent quality. Ordinarily, and except when artificial shade is furnished, gooseberries and currants do not thrive in Oklahoma, but these plants which have been grafted on a strong growing, vigorous root and stock seem to be perfectly adapted to the natural conditions of the country. The nursery-men of this country might make a profitable experiment in grafting gooseberries and garden currants on stocks of the native wild black currant which, in some parts of Oklahoma, grows to a height of six or seven feet. J. B. T.

### THIRTY-SEVENTH ANNUAL CATALOG.

The Iowa Seed Company, of Des Moines, Iowa, have issued their thirty-seventh annual catalog and planter's guide. It is more complete and more practical and up-to-date than any of those that have preceded it. It is profusely illustrated throughout and has a beautifully lithographed cover and interior colored plates of seed corn and flowers. It lists and illustrates a great many vegetable and floral novelties for 1907 (among which are Luther Burbank's famous creations), as well as all of the best standard varieties of field, garden and flower seeds, nursery stock, etc. Full cultural directions for all seeds and plants are given at the head of each department. All descriptions are complete and unexaggerated. In fact, the book is a complete farmer's and gardener's guide and will prove useful as a work of reference. During the past year the company have added seven new greenhouses to their already large establishment, making thirty-one in all, also increased their cold storage capacity, which gives them one of the largest ranges of greenhouses in this part of the country. In addition to this, they have built an immense seed corn warehouse fully equipped with modern machinery, and ventilating and heating apparatus, enabling them to practically and scientifically care for seed and preserve its vitality. See advertisement on page 10.

### MAKING WASTE LAND PAY.

Many a piece of land not fit for grazing or tilling can be made a source of much profit in growing hardy trees. As one rides through farming districts regrets come rushing to the mind that so many waste places are barren of trees, which might be steadily, quietly, yet persistently growing a savings bank account for the owner. Here is a good opportunity for every farmer. The Galbraith Nurseries, of Fairbury, Neb., to get in touch with a few thousand more customers are giving away twenty-five black locust seedlings ready to set out in the spring. They are fitted for rapid growth on waste land and make excellent fence posts. The mailing expense is five cents, which one may send if he wishes when he writes for the Galbraith catalog. This book is well worth having. Has colored illustrations and gives prices and descriptions of hundreds of varieties of nursery stock, small fruit and forest trees. See advertisement on page 10.

### A SPLENDID SEED BOOK.

The firm of William Henry Maule is not new to the majority of our readers, because his seed catalog has in the past been almost as common a sight in the homes of the corn belt as the family Bible or Webster's dictionary. But Maule's 1907 seed book is finer than ever and we are anxious to have our readers send for it at once. Address William Henry Maule, 1757 Filbert St., Philadelphia, Pa., and please mention this paper when you write.

### CLOVER

Largest growers of Clover, Timothy, Grass, Oats, Barley, Corn, Speltz, Rape and Farm Seeds of all kinds in America.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## NEW TURKEY AILMENT.

We have received the following inquiry from one of our subscribers at Bagley, Iowa:

I would like to have you tell me what is the matter with my turkeys. Their legs first get white spots on them and the turkeys commence to pick these spots so that they finally get very sore and crack nearly to the bone at the knee joint. Their legs also swell badly after they begin to crack. It seems to be contagious, as it is going through the flock.

This is entirely a new disease to the writer. The symptoms are much like those of chicken pox, save that the eruption appears on the legs instead of the head. It is possible that the turkeys have been poisoned in some way by running through weeds and tall grass. At all events, the symptoms show impurities of the blood, and should be treated along that line. Since it seems to be contagious, the ailing fowls should be separated from the others. Put them into coops or pens, and touch each sore spot twice a day with a mixture of one-half ounce carbolic acid, one-half ounce glycerine, and two ounces water. Use a stick or piece of straw for this purpose. Let the feed be light and unstimulating, and in the drinking water mix Epsom salts, a teaspoonful to a pint. Do not give the fowls any other water to drink and let them have this from one to three days as seems necessary. The Epsom salts has a cooling effect on the blood and reduces fever. Carbolic vaseline

is good to use as a healing salve. Disinfect the quarters, and strive for absolute cleanliness.

## Food and Care of Fowls.

To the Editor of The Homestead:

No matter what kind of food may be selected there is no combination suitable for all purposes. First, determine what you intend to do and then feed accordingly. One should not feed as much protein to non-producers as to layers, as the production of the egg demands that the hen should have food rich in protein. The sitting hens, males and hens that show no inclination to begin laying do not require as much protein nor as much food as the layers. It may also be added that the growing chick must be supplied with foods rich in lime (such as bone), as well as with a sufficiently of protein, as growth is evidence that it is producing flesh and bone. The pullet also requires more protein than the matured hen, and there arrives a period when the matured birds will not demand as much food as when younger.

No rules can be formulated for feeding all kinds of fowls, as each flock differs from others. The poultryman must determine for himself which of his hens require special foods, as breeds, egg production, ages and other conditions must be considered. Do not overlook the fact that each hen is an individual and that she must be considered. Do not overlook the fact that each hen is an individual and that she has her likes and dislikes, being profitable or productive according to surroundings and circumstances.

In nine cases out of ten failure in the poultry business is due to carelessness on the part of the care-takers. How many people neglect giving their fowls

sufficient water; have no regular hours for feeding, and keep them starving for hours in the morning, especially if the weather is stormy. Yet they expect the hens to lay the same as if they were well taken care of.

One of the main causes of failure is lack of cleanliness in the hen house. Dirt breeds insects. Clean the hen house daily in winter and empty ashes on the floors. Grit in winter is indispensable. Vegetables, meat, oats, wheat and bran should be fed alternately. Give boiled potatoes for one meal a day. Plan for the comfort of the egg producers and use them so well that they just can't help laying. Keep only active hens. Did you ever stop to think what a wonderful piece of mechanism a hen is? What a tremendous strain there is on that frail looking thing we call a hen! Shouldn't we give them the best care and attention? And if we do this how grateful they are and how hard they try to tell us of it. Subscriber.

## Roup Cures.

To the Editor of The Homestead:

You submit to me the following inquiry received from one of your subscribers living in Dixieland, Texas:

A few weeks ago you published a description of the three allied diseases, namely, roup, chicken pox and diphtheria, and in giving the remedy the statement was made that at the Alabama Experiment Station they found iodoform the best remedy, but did not tell how it was used. I know iodoform is a good disinfectant and a preventive, but is it also the best to use to doctor affected birds and how should one use it? My chickens had been affected with roup in Nebraska and immediately after moving here, although they seemed well when they started, their eyes commenced to swell shut, some one and some both, and I lost several during the early part of last winter. Then I cured some by giving castor oil and using carbolic vaseline on the

eyes, or at least they recovered partly, owing to the fact that I was sure to give them good soft foods which they could eat, as their bills were drawn to one side, thus making it very hard to eat small grains of any kind. During the summer I have had several birds recover and some of them I simply doctored with turpentine, giving the oil to regulate the bowels. However, I hope to get entirely rid of the trouble and therefore come to you for a cure. I am at a loss to know whether it is simply an aggravated form of roup or the chicken pox, or sore head, as the southern people call it.

In answer to the above, we would advise the inquirer to write the Alabama Experiment Station, Auburn, Ala., for information in regard to the use of iodoform in roup. It is a remedy little known in that connection.

Roup cures are legion, but by careful study it appears that certain familiar ingredients are used in most of them. These ingredients are camphor, turpentine, carbolic acid and coal-oil. It may safely be determined, therefore, that these agents are useful in combating roup and its allied diseases, canker and fowl diphtheria.

Since in a "multitude of counsellors there is wisdom," we will quote from expert authority. Dr. Sanborn, well known as a physician and writer on poultry diseases, says:

When you find a bird sneezing, or notice a slight discharge from the nostrils, spray with an atomizer all mucous surfaces you can reach with the following solution: Extract witch hazel, four tablespoonfuls; liquid carbolic acid, three drops; water, two tablespoonfuls. Do this twice a day, squeezing the bulb five times for each nostril and twice for the mouth. If there is any watery eye, give one squeeze for each. The sick birds should be kept from the others to avoid spreading the disease.

Some of the cases of five years ago used to get well under what was called the "coal oil treatment." This consisted in pouring on the surface of a pail of water about a gill of kerosene oil, this floating on the surface. The swelled-head birds were taken one by one and slowly dipped, so the heads were under the surface, held while "one—"

## POULTRY.

## Phillips' Black Langshans.

I HAVE a fine lot of young stock that I wish to dispose of at once and will make the price right if you will write me just what you want in quality. If you want Langshans I have them. FINE, LARGE MAMMOTH BRONZE TURKEYS and Rouen Ducks. J. H. Howarth, Moulton, Iowa.

two—three" was slowly repeated, and then raised, necks and heads wiped. I remember seeing twenty cockerels, so sick that the discharge was thick and exceedingly bad smelling, receive this treatment twice a day for two days, being obliged to take all drink from dishes that had a film of oil always floating on the top, improving from day to day, finally being sold to the butcher in nice condition.

It is one thing to cure all sick birds, and another to get rid of the infection of roup. Disinfect most thoroughly all houses, coops, drinking and feed vessels. Use sulphur and lime freely, and aim for absolute cleanliness. Do not use birds that have been seriously sick with roup as breeders, as they will transmit the tendency to the disease to their progeny. Mrs. S. B. Titterington.  
Hall county, Neb.

#### NUMBER OF TURKEYS TO A TOM.

The following inquiry has been received from one of our subscribers:

Please let me know how many turkey hens should be kept for one gobbler. Would eight be too many?

Authorities differ widely as to this question. The old idea was ten hens to one gobbler. We know of a lady, very successful with turkeys, who, several years ago, put a fine young White Holland tom with nineteen hens. A neighbor, who had raised turkeys in the old-fashioned way for twenty-five years, raised both hands in astonishment at the idea. She said: "I never in all my

life heard of any one keeping more than seven hens to one gobbler, and I always heard that five were better. Don't you think it would be dishonest for you to sell eggs for hatching under such circumstances?"

The lady answered: "No, because I expect to test the first eggs and then I will know." After a time she set 206 eggs, and only seven of them were infertile. When the friend was told how well the eggs hatched, she said: "I never heard of eggs hatching that well, but one is never too old to learn."

So our querist may feel perfectly safe about mating the eight hens to one gobbler. It is always well, if possible, to have a second gobbler obtainable in some way, if needed, for it not infrequently happens that a tom will die in the midst of the breeding season, occasioning much loss and disappointment if no other can be had.

And right here, although not belonging to the answer to this query let us say that if a tom becomes droopy either during or after the breeding season, a two-grain pill or capsule of quinin daily will usually act like magic, and restore the lost vigor. Many a valuable bird has been saved by this bit of simple knowledge.

#### Chicken Pox, or Sore Head.

Sore head, or chicken pox, is very common throughout the South during the early fall and winter months. This disease is supposed to be caused by a tiny mite or germ. The disease is largely local in its effects—that is, it confines its work to the head, comb, eyes, face, and sometimes the neck of the fowl. It is also sometimes found to a small extent on the body of the fowl, but this eruption on the body is caused by the fowl scratching the body with the broken out head and causing that part of the fowl to be affected or diseased. The disease is what its name implies, an eruption or pox. The comb is generally most severely affected and in serious cases the eyes become swollen, often being closed, the inner linings of the mouth break out in eruptions, and the orifices of the nose are also broken out. Sometimes the throat is swollen so as to cause strangulation, but such cases are rare. The bird is sleepy and drowsy, and in severe cases does not eat much. When only the comb and upper part of the head are affected, the bird does not seem so sick as when the mouth and eyes are also involved. The disease is highly contagious and runs as an epidemic. There are said to be two varieties of the disease, the dry or warty, and the mucous or running. The dry kind forms in scabs and the mucous runs water discharges from the pox sores.

A safe and simple remedy is to rub well the affected parts of the head, face and comb with a mixture containing common lard or vaseline, and carbolic acid or some disinfectant. There should be enough disinfectant used to color the lard a deep brown. This mixture should be applied every day to all fowls affected. Where the sores are severe about the eyes and mouth, the affected parts can be washed with water so as to remove all scabs, etc., so the mixture may be gotten down to the seat of trouble the more readily. The birds in the same runs or near by and exposed runs should have their heads dipped in a disinfectant made of water and carbolic acid, or some standard disinfectant.

It is hardly worth while to remove afflicted birds from well ones, as the disease will likely spread of its own accord more or less through the entire flock. If not fatal it is not sufficient to cause great alarm, but if the fowls are not treated, the flock will prove profitless for some time and some deaths will occur.—(Poultry Journal.)

#### Make Conditions Favorable.

To the Editor of The Homestead:

As a practical farmer and dairyman I take it that every farmer should have as much pride in his poultry as in any other stock upon his premises, and bestow upon it the necessary attention to produce from it best results.

With most, the days of cross breeds or no breeds in cattle, horses, hogs and sheep have passed and they have properly equipped themselves for the successful rearing of the pure-breeds. The same attention should be given the poultry house and its occupants. The farmer should be the successful poultryman. His surroundings are such that he has every advantage over the poultryman

You can positively make hens lay the year around if you will give Dr. Hess Poultry Pan-a-ce-a with the regular feed. During this season of the year many valuable layers are idle. In other words, the egg factories are closed down on account of impaired machinery. Poultry Pan-a-ce-a contains the best tonics known to medicine for increasing digestion, which is the all important function in egg production. This superior poultry tonic supplies iron for the blood, cleanses the liver, arouses the egg producing organs, reddens the comb and brightens the feathers.

## DR. HESS Poultry PAN-A-CE-A

Is the prescription of Dr. Hess (M.D., D.V.S.), and in addition to increasing egg production, it cures cholera, rump, indigestion and many other poultry diseases due to digestive difficulties and infection. It has a property peculiar to itself—that of destroying bacteria, the cause of so much poultry disease, and throwing off impurities through the skin. Dr. Hess Poultry Pan-a-ce-a has the indorsement of leading poultry associations in the United States and Canada, costs but a penny a day for about 30 fowls, and is sold on a written guarantee.

1-2 lbs. 25c., mail or express, 40c. } Except in Canada  
5 lbs. 60c., 12 lbs. \$1.25. } and extreme  
25 lb. pack \$2.50. } West and South.

## Sure Hatch is the Incubator that Hatches Most Chicks

This is an actual fact—and we'll PROVE it to you, just as we have done to the 110,000 users of the Sure Hatch, practical chicken men who are in the chicken business because it PAYS.

Those men had to be shown. We didn't talk. We sent a Sure Hatch to them for 60 days' trial—as we'll send it to you—paid the freight and offered to pay it back again—as we do now to you. Those 110,000 Sure Hatches proved themselves, and now we are working overtime in the biggest incubator factory in the world, at Fremont, Neb., to supply the practical neighbors of those men and such men and women as you.

We send you a Sure Hatch Incubator Outfit all ready to put the eggs into. Take off two hatches and try it out. In sixty days, if you don't like it, chuck it back at our expense. You get your money back without argument. It's low priced because we deal direct with you, but it's the best made, most convenient incubator in the world every way. We guarantee it 5 years.

It's always made of Redwood—costly, and warp, shrink and split-proof—without knots. Double walled, double doors, asbestos lined. The 1907 model has our new Multiple Lever Regulator, that records the slightest change of temperature, and the Controllable Ventilator System, which also works automatically as set. Our FREE Illustrated Catalog tells all this and hundreds of other points. Write for it NOW.

**Sure Hatch Incubator Co., Box 16, Fremont, Neb.; Dept. 16 Indianapolis, Ind.**

## HATCH ALL Incubators Will Hatch Your Eggs

It beats the hen every time in any climate. No experience needed, because its regulator never fails to control the heat. One hatch of early chicks will pay for both incubator and brooder. Freight prepaid. Guaranteed to work.

### OUR HOT WATER, EASY TO CLEAN, BROODER

Is just the thing for the farmer's wife. It stays right out in the cold back yard and keeps warm, too. As easy to clean as the top of your table. That is why it saves and raises the chicks.

Don't buy anybody's machine until you have read our new catalog. It is full of pictures and poultry talk and free to you. The finest thing out. Write now.

**HEBRON INCUBATOR CO., BOX 8, HEBRON, NEB.**

**Save 2/3 Expense**

More than  $\frac{2}{3}$  saved in oil and time by using the X-Ray Incubator. One filling of lamp makes the entire hatch. Egg tray not removed during the hatch. Glass top, and thermometer in plain sight. Lamp need not be removed during the hatch. Automatic wick trimmer, chimney need not be removed. Flame is turned down automatically when hot enough. Eggs aired and turned by simply lifting the lid. The X-Ray Incubator is entirely different from other incubators. You should know about this before buying. Catalogue free.

**THE X-RAY INCUBATOR CO.**  
28th St., Wayne, Nebraska

situated in town who attempts to rear chickens in the confinement of a city lot, and who must procure all of his feed by purchase, and if his eggs are sold on the open market in many instances the balance is on the wrong side

of the ledger. Now any business to be successful must yield an income above the cost of conducting it. Our city poultry raisers do succeed and purchase every ounce of feed given their fowls, thereby teaching our rural friends a les-

son in economics. If they can and do succeed, should not the farmer be pre-eminently the successful poulturer?

Let us look at the conditions by which he is surrounded—ample range for large flocks; an abundance of feed at the cost of production; grain, grass, grit and the meat that is so much talked of is easily supplied by milk, sweet or sour, and an abundance of cottage cheese. The farmer who is not successful with poultry has no one to blame but himself, and perhaps has failed to see that he need not send his egg money to some far-away advertiser for a patent egg-producing food, but simply make intelligent use of what he has at hand. B. F. W.

### POINTERS.

—Mr. D. C. Ross, of Audubon, Iowa, desires to close out his stock of Partridge Cochins. His advertisement appears on this page of The Homestead.

—Anyone desiring White Wyandotte cockerels can obtain them from Mrs. A. G. Huffman, of Audubon, Iowa. Her advertisement will be found on this page.

THOROUGHbred fox, wolf and coon hounds. Puppies to trained dogs for sale at all times. Low prices and guaranteed. S. A. Smith, Keosauqua, Ia.

ers can order from this list and get what they want. Orders taken for eggs at \$2 per fifteen." See his advertisement on this page.

—Mr. Wm. Miller, of the Rush Park Stock Farm, of Independence, Iowa, is offering White Wyandottes for sale in his advertisement found on this page. He has 300 young birds of the choicest strains and will sell them cheap, as he is in need of the room.

—Mr. C. A. Steele, of Ogden, Iowa, can supply Homestead readers with White Plymouth Rock cockerels from Canada's pedigree laying strain. He has fifty of them that are large and strong and of the true Rock shape. His advertisement appears on this page.

—Mrs. E. H. Dancer, of Lamoni, Iowa, offers Mammoth Bronze and White Holland turkeys for sale, both toms and hens. Also some choice Barred Plymouth Rock and Silver Laced Wyandotte cockerels and pullets. She will be pleased to hear from any of The Homestead readers.

—We start the advertisement in this issue of Mr. M. S. Helland, of Slater, Iowa, who is offering Single Comb Buff Orpingtons for sale at very attractive prices. He can furnish eggs from scored birds and is now booking orders. He has scored stock for sale. Write him for circular.

—Mr. J. H. Faris, of New Providence, Iowa, is offering a grand lot of Barred Plymouth Rock cockerels for sale in his advertisement that appears on this page. Those of our readers who desire to purchase stock of the four leading strains mentioned in Mr. Faris' advertisement will be pleased with the stock if they favor him with an order.

—Mr. Grant Gallaher, of Spencer, Iowa, in furnishing copy for his advertisement on this page, writes: "My big Bronze turkeys are from heavy weights on both sides. The Barred Plymouth Rocks that I am offering are from yards that were headed by first and second cock and first and second cockerel at the Northern Iowa Poultry Show."

—The Wisconsin Incubator Company, of Racine, Wis., in their advertisement that appears on this page, are making a very liberal offer to those of our readers who will order one of their 125-egg incubators and brooders. They are selling both for \$10 and paying the freight. They also will send a free catalog describing their brooders and incubators.

—Forty monstrous Mammoth Bronze turkeys, winners at the recent Iowa State Poultry Show, and fifty Barred Plymouth Rock cockerels, and thirty Pekin ducks are offered for sale in the advertisement on this page of Mr. G. M. Grinstead, of Mitchellville, Iowa. Those of our readers who want some first-class stock should order at once from this gentleman.

—Mrs. Silas Cobbs, breeder of Barred Plymouth Rocks, Marathon, Iowa, in furnishing copy for her advertisement on this page, writes: "I have a fine lot of birds for sale, the best I ever had. Last year I won several first prizes on my birds. I have 200 and will sell at prices that will move them quick. My birds have size and weight as well as fine marking."

—Mr. D. A. Good, of Ogden, Iowa, is a well known breeder of White Plymouth Rocks. In his advertisement that appears on this page he is quoting prices on cockerels that is surprising for the kind of birds he is offering, unscored stock at \$1 each and scored stock at \$2 each, scored by Anderson. These birds are all well bred, large size and good shape. Anyone wishing White Rocks, write him and get prompt reply.

—We call the attention of our readers to the advertisement of Mr. Jasper Lacy, of Neoga, Ill., that appears on this page, in which there is being offered for sale fine young Mammoth Bronze turkeys sired by the first-prize winner at the St. Louis poultry show. He was mated to hens scoring from 95 to 97 points. Here is an excellent opportunity for Homestead readers to get something choice in Mammoth Bronze turkeys.

—In their new advertisement which appears on this page of The Homestead, Messrs. Strater Bros., of Monroe, Iowa, are offering 300 head of Barred Plymouth Rocks for sale at reasonable prices. Messrs. Strater Bros. have been breeding Barred Plymouth Rocks exclusively for twenty-seven years and at the recent Central Poultry Show, held at Monroe, they won twelve prizes, there being 118 Barred Plymouth Rocks competing.

—In furnishing copy for his advertisement found on this page, Mr. J. M. Detwiler, of Dunlap, Iowa, writes as follows in regard to his Barred Plymouth Rocks: "I have over 100 cockerels to supply Homestead readers. They are big-boned, fine-shaped and colored, and are bred from our blue-ribbon winners. They have been raised on free range, hence are vigorous. My Barred Plymouth Rocks are bred for laying as well as standard points. At the last Dunlap show I won the \$15 silver cup and a bulk of other premiums. I will ship stock."

—Mrs. D. C. Molsberry, of Plymouth, Iowa, in furnishing copy for her advertisement on this page, writes: "I have as fine a lot of young turkeys as I ever raised. They are large-boned and finely marked. I took first and second on turkey toms, and first, second and third on pullets this month at the Albert Lea, Minn., Poultry Show. My Black Cochins and Silver Laced Wyandottes are extra good birds. My Mammoth Bronze toms weigh twenty-five to thirty-one pounds, pullets fifteen to twenty pounds. I am able to offer my patrons better stock this year than ever before."

—Mrs. H. J. Hess, of Waterloo, Iowa, in furnishing copy for her advertisement on this page, writes: "The Mammoth Bronze turkeys I am offering are of the celebrated World's Fair strain, large heavy boned and finely marked. They are raised from prize-winning stock. My turkeys have been winners for both my customers and myself in the leading shows of the state in former years, and are equally as good this year. I have some very choice toms of early hatch to offer that weigh twenty-four to thirty pounds, also hens and pullets weighing fourteen to twenty-four pounds. The Rose Comb Brown Leghorns are choice, well-marked ones; the cockerels are large and vigorous and hens and pullets are fine. I can spare some in dozen lots if desired at very reasonable prices. Also have some White Wyandotte cockerels that are fine in plumage, heavy boned and of good shape and will be priced right."

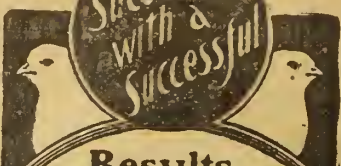

**125 Egg Incubator and Brooder** Both For **\$10**

If ordered together we send both for \$10 and pay freight. Hot water, copper tanks, double walls, double glass doors. Free catalog describes them.

Scheme. A Safe, Conservative,  
Manufacturing Enterprise.

## The Crude Oil Power Company

Strongly Endorsed by the Manu-  
facturers and Merchants' As-  
sociation of Kansas City, U. S. A.

**A MANUFACTURING INDUSTRY THAT CANNOT BE SURPASSED AS A DIVIDEND EARNER.**

The Crude Oil Power Co. is incorporated under the laws of the District of Columbia, under Federal Supervision for \$1,000,000, divided into 1,000,000 NONASSESSABLE shares, par value of \$1 each.

The Company is now building two great factories, one in Kansas City, Mo., and the other in Sour Lake, Texas. The Kansas City plant alone covers 5½ acres of ground. These factories will be in operation by January 1st. They represent today an outlay and value of \$235,000. There is not a cent of incumbrance on the property.

This mammoth steel and iron casting foundry will be the only one for the manufacture of iron and steel in the Southwest. All orders for steel and iron castings have to be placed in the East. The factories there are about nine months behind with their orders.

The Crude Oil Power Co., turning out at the very start 30,000 pounds of steel and malleable iron castings per day will be without competition in the entire Southwest.

This Company controls, furthermore, all rights to manufacture the new Crude Oil Engine and Portable Refiner and Generator. This engine will be manufactured at a very minimum cost and will be sold at a very large profit. As it can be operated from the crude oil it will absolutely displace the gasoline engine.

The Portable Refiner will refine crude oil at the wells. This will effect a revolution in the oil business, as the independent producers can cut down 50 per cent of the cost of refining.

The profits from the casting foundries alone will reach \$200,000 a year. With no fuel bills, no waste natural gas is developed at the Company's own plant, this Company can drive the eastern producer out of the Southwest. It has the field to itself. The demand for steel and malleable iron castings is limitless. Now, look; sit up and take notice that the Crude Oil Power Co., WITH ITS FACTORIES ALMOST COMPLETED, makes the following remarkable offer:

To procure additional funds for the development of the company's properties, and to complete its work, the company is now offering an issue of 100,000 shares of stock. THIS ISSUE IS OFFERED AT 33 1-3 CENTS PER SHARE, PAR VALUE \$1.00. The subscriptions of careful investors is invited to this issue. The stock will earn at least 90 per cent from the foundry department alone, making at present prices a profit of 60 per cent on the investment.

In this estimate no account is made of the profits accrued by the sale of the crude oil engine and portable refiner. This department alone will add vastly to the financial possibilities of the company.

The high character, business ability and integrity of the personnel of the officers and directors of the CRUDE OIL POWER CO. could not be excelled. They are as follows:

President, G. W. Fitzpatrick, M. D., physician and capitalist; vice-president, E. E. Richardson, secretary-treasurer K. C. Stock Yards Company; treasurer, W. C. Howe, president S. W. Oil & Mineral Co.; secretary, A. A. Oshorn, inventor and constructing engineer, all of Kansas City, Mo. The Company most cheerfully invites and urges full inquiry as to the character and standing of the above-named gentlemen.

We refer you by permission to the Interstate National Bank, Kansas City, Kan., and State Bank of Kansas City, Kan.

### IMPORTANT NOTICE.

As our 33 1-3c allotment of stock is almost subscribed for, it is important that I should have your subscription immediately if you want stock before the price advances. Everybody who has investigated this company has either bought stock or reserved name. Another opportunity equaling this will probably never be offered you. I earnestly advise you to let me hear from you by return mail or by telegram. F. C. VINCENT, Fiscal Agent, 425 Gibraltar Building, Kansas City, Mo.

**\$235,000 ALREADY EXPENDED ON THE COMPANY'S PLANTS.**

**A Practical Illustration of the Two Mammoth Plants of the Crude Oil Power Co. at Kansas City and Sour Lake, Texas, as They Will Appear When Completed. Invest in a Sure Thing.**

### THIS IS IMPORTANT

Why invest in risky or gambling, mining, oil or land schemes, when you can participate in the assured immense earnings of a safe, conservative manufacturing industry? This company is a sure winner. It will positively earn you big profits.

I desire to particularly impress on you the fact that it is absolutely necessary that you should carefully read and fully grasp and understand the following features:

First—That 15 per cent profits assured in our advertising and other matter comes from our Foundry and Steel and Malleable Iron and Casting Department alone.

Second—Absolutely no mention is made anywhere in any of our literature of the vast profits that will POSITIVELY accrue from our Portable Refiner or Generator, our Crude Oil Engine and our Crude Oil Burner for steaming and domestic use.

Third—We have already several hundred orders for our Crude Oil Burners and more are pouring in every day. These burners are not an experiment. A large number of them have been in use for a long time; they have given most perfect satisfaction, and this Company is in possession of many unsolicited testimonials from those who are using them that we will be glad to send you should you so desire. The profit on these burners exceeds 300 per cent. Over 3,000 can be sold annually.

Fourth—That more orders are already assured us for our Foundry and Casting Department than we can possibly fill, if we run day and night, next year, and double our capacity in the bargain. This should occasion no surprise, as all other factories of like character are from nine to twelve months behind with their orders and ours are the only two factories of this kind in the entire Southwest. You can easily verify this upon proper inquiry.

Fifth—That our Crude Oil Generator or Refiner is no experiment, as a number of them are today, and have been for a long period, in use in the California oil fields and are giving unqualified satisfaction.

Sixth—That this company has already purchased and paid for in full the following equipment, which, as soon as our buildings are completed, will be installed, viz.: A Complete Foundry outfit, including Crucibles, Cupola, Flasks, etc., capacity 30,000 pounds daily; a Traveling Crane, capacity 30,000 pounds, and 120 feet of track; a full Blacksmithing outfit, including a 50 H. P. gas engine, air compressor, forges and all necessary tools, anvils, etc.; a 500 light Dynamo and Equipment; a full equipment for Drilling oil and gas wells, complete with a vast quantity of casing, etc.; a metal Lathe and several other valuable metal working machines for the machine shop equipment. There is no indebtedness on the foregoing whatsoever.

Seventh—Our Plants will positively be in full operation by January 1, 1907.

Eighth—We most confidently expect to pay a semi-annual dividend of at least 7 1-2 per cent by July 1, 1907.

Ninth—The work on the plants is being pushed forward expeditiously and it is the purpose of the company to keep all stockholders notified of the progress of the Company.

Tenth—That by purchasing this Company's securities at 33 1-3 cents on the dollar you will earn at least 60 per cent on your investment the first year.

The earnings will probably double that amount.

### THIS COMPANY

is building TWO GREAT FACTORIES, one at Kansas City, the other at Sour Lake, Texas. Both plants will have the same initial capacity, and both will have the advantage of natural gas for fuel and splendid transportation facilities. The Company's purpose in both plants will be

First—A Steel and Malleable Iron Casting Foundry—to manufacture Malleable Iron and Steel Castings at a larger net profit than by any other known process. THIS WILL BE THE ONLY PLANT OF THIS CHARACTER IN KANSAS CITY, and we are already assured of orders that will tax the full capacity of this department. This department alone will pay big returns on the total investment.

Second—A Portable Crude Oil Refiner and Burner—to manufacture Special Machinery for Refining Crude Oil at the wells. These machines can be manufactured at a nominal price for great profit, and they will REVOLUTIONIZE the Refining of Crude Oils. The use of this machine makes it possible to refine crude oil at 50 per cent less than by present methods. The Burner is the only satisfactory one invented.

Third—A Crude Oil Engine—to manufacture a Crude Oil Engine which is destined to SUPERSEDE the present gasoline engine, because the same initial horse power can be developed at one-half the present fuel cost. These engines can be used wherever the gasoline or steam engine is used. The special Crude Oil Burner manufactured by this Company can be affixed to any stove, furnace, or boiler at low cost and large profit. The use of this Burner will make it possible to heat, cook, and steam at less cost than by using natural gas, gasoline, kerosene, wood, or coal. Just think of an engine that will develop the same horse power at half the cost. No need to use gasoline, coal, or even denatured alcohol; just crude oil at less than 60c per barrel, instead of gasoline at \$6.30 per barrel.

### Our Monthly Payment Plan

Gives everyone, rich or poor, an opportunity to become a stockholder in one of the big industries of the country. The proposition is up to you. If you neglect to investigate it and learn for yourself what an investment in this stock means to your future you have yourself to blame.

You can buy stock now at 33 1-3 cents per share and have several months' time to pay for it. It will pay you to buy all you can carry before the advance, as stock with such value behind it cannot remain long at such a low price.

\$12 pays for 36 shares of stock, payable \$5 down, \$2.50 per month.

\$25 pays for 75 shares of stock, payable \$6.25 down, \$3.75 per month.

\$30 pays for 150 shares of stock, payable \$12.50 down, \$7.50 per month.

\$100 pays for 300 shares of stock, payable \$25 down, \$15 per month.

\$200 pays for 600 shares of stock, payable \$50 down, \$30 per month.

\$400 pays for 1200 shares of stock, payable \$80 down, \$60 per month.

\$800 pays for 2400 shares of stock, payable \$160 down, \$100 per month.

\$1000 pays for 3000 shares of stock, payable \$200 down, \$100 per month.

## VETERINARY MATTERS.

**PROFESSIONAL** Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### WORMS.

I have a sorrel colt that is coming two years old. It ran in good pasture all summer, but did not do well, is very thin and does not seem to have much energy. I notice it discharges some worms. Is that the trouble and what will kill them?

Worms are sufficient to cause the symptoms described. Give one ounce of turpentine in half a pint of raw linseed oil and follow with half a teaspoonful of dried sulphate of iron in the feed night and morning for a week; then skip ten days and repeat the treatment. Do not feed hay from low, wet ground. Feed well on oats, bran, carrots and tame hay or upland prairie hay.

#### QUITTOR.

We have a seven-year-old gray mare that was cut in the foot by barbed wire four years ago. The cut healed up nicely, but one-half of the foot does not seem thrifty and about six months ago she went lame. Pus and blood exudes above the hoof on the lame side. What can I do? Would shoeing help?

In a case of this sort we do not think it possible for you to succeed in home treatment, as the first thing necessary is a crucial operation for removal of diseased cartilage. If you cannot have this done, remove the hair, scrape out the wound and inject a saturated solution of corrosive sublimate; then poultice with hot flaxseed meal for a week and each time the poultice is changed (once daily) inject a little of the solution of twenty drops of formaldehyde in half a pint of water. At end of week inject again with the corrosive sublimate; then blister the hoof head with cerate of cantharides and in one week inject and poultice as before. Alternate these treatments until case is well or you see that treatment is not going to succeed. It would, of course, be best to place the horse in the care of a graduate veterinarian.

#### STIFLE LAMENESS.

I have a brown horse colt three months old that has something the matter with its stifle joints. It commenced to get lame when about one month old. It has a lump about the size of a hen's egg on the point of the joint on one side. On the other one there is a shrinkage of the muscle on the outside of the stifle. It is quite stiff and seems to be getting worse. I have not done anything for it. The veterinarian said it was caused by a leakage from the navel; that the navel cord had not healed properly. He did not see the colt. I never saw anything wrong with its navel. I tied the colt up, however, when about a week old and it pulled hard on the halter, which was hard on its hind legs, and it was young and those joints were soft. I thought perhaps this caused the trouble. The colt is fat and growing.

The veterinarian is right that such conditions of the stifle joints may come from infection of the navel just after birth, but similar conditions sometimes follow an injury and this would seem to be the case in the present instance. Rub the enlargement every other day with iodine ointment and blister the shrunken side of joint with cerate of cantharides if you can keep colt tied up for a week. If not, then rub the part once daily with a liniment composed of one ounce of aqua ammonia and turpentine, four ounces of druggists' soap liniment and water to make a pint. It would be safest to try the liniment first.

#### TUBERCULOSIS.

Will you please answer the following inquiry through your paper? Last spring we purchased a pure-bred five-year-old bull. He seemed to be all right, but shortly after bringing him home he commenced to be stiff and somewhat lame. He also began to lose flesh and kept getting thinner and weaker until at the end of about five or six months we were obliged to kill him. He had a good appetite all of the time and drank as usual. His droppings also appeared all right. We always supposed in tuberculosis the breathing was affected. His breathing seemed to be all right, even in hot weather. Do you think this is a case of tuberculosis? Please tell us what you can about tuberculosis, its symptoms, etc. Is it very contagious in a drove? Is it ever cured?

We certainly would suspect tuberculosis in this case, but the only way of being sure would have been to make a post mortem examination. The disease may affect almost any part or organ of the body and does not necessarily cause cough or labored breathing. Cough is present when the glands of the throat or the lungs are affected. The disease is slowly contagious, but spreads with considerable rapidity when cattle are shut up in a badly ventilated stable

# Why Don't You Ride When You Harrow?

No Use Walking When You Can Buy a

## Rock Island Harrow Cart

Delivered at your R. R. Station For..... **\$8**

If Your Dealer Can't Supply You Send to Us.

## REAL HARROW COMFORT

**PLOWING** is about the easiest work on the farm, but how many successful Farmers to-day use *Walking* plows? You don't—do you? No; horses are too cheap and life too short to wear your legs out following a plow all day.

You ride when you plow; you ride when you plant; you ride when you cultivate. Well, then, why don't you ride when you harrow?

Is there any reason on earth why you should continue to make this work the hardest kind of drudgery by *walking* over plowed ground?

Or riding one of those crude carts that twist and turn and jerk you about until you wish you *had* walked?

No, sir—there is no longer any excuse for saying that "harrowing is the hardest work on the farm."

The new Rock Island Two-Wheel Cart has changed all that!

It offers you a pleasure you never enjoyed before—a ride behind a drag harrow that is just as comfortable as a ride on your Sulky or Gang Plow or your Cultivator.

**LOOK** at the man in the picture above. He's riding a Rock Island Cart, and he doesn't look a bit more comfortable and easy than he feels.

The feature that adds most to his comfort is the fact that he always faces the horses, no matter which way the wheels may be angled. Think what *that* means!

The swinging back and forth of the axle doesn't affect the driver a bit.

This is why: The platform for the seat is made of two circular plates, lower plate being bolted solidly to the axle.

Seat and foot-rest are both fastened to the upper plate which can turn on the lower plate.

An automatic locking device, similar to that used on the rear wheel of a Sulky Plow, holds the parts in position while the cart is being drawn straight ahead.

But permits the wheels to angle either way while making a turn, or when either of them strikes an obstruction, without disturbing the driver in the least.

This feature is exclusive with the Rock Island Cart. No other harrow cart has it.

## AN IMPORTANT IMPROVEMENT

One serious trouble with two-wheel carts is that in striking an obstruction which throws one wheel behind the other, the wheels do not quickly return to their correct position but frequently slide along for quite a distance. This is why nothing of this kind can possibly happen with the Rock Island Cart:

The draw-bars are crossed and pivoted at the axle. While the axle can swing freely when one wheel of the cart strikes an obstruction, or when making a short turn, the axle and wheels are always perfectly controlled by the draw-bars in the same manner as the front wheels of a wagon are controlled by the tongue.

## SAVES YOU HIRED HELP

A boy at \$8.00 or \$10.00 a month with a Rock Island Two Wheel Cart will do as much harrowing as a man at \$25.00 or \$30.00 will do without the cart. You, therefore, actually save the price of this useful implement two or three times over in a single month.

And when you consider that the Rock Island Cart will last ten or fifteen years, you see that the price, \$8.00, means an investment of 50 to 75 cents a year. Can you point to any other labor saving implement on your farm that pays you as big a dividend as this?

Think it over, Neighbor!

## WE'LL DO THIS FOR YOU

We are manufacturers of all kinds of Farm Implements, selling only through **REGULAR IMPLEMENT DEALERS**. But we want you to have a chance to buy this Harrow Cart, and if your dealer won't get one for you, just send us \$8.00 and we will ship you a cart. We will pay the freight on it to your nearest R. R. Station ourselves. Send the price, \$8.00, at once, or if you want to know more about the Rock Island Two-Wheel Harrow Cart, before you decide to buy, we will be glad to send you a

## DESCRIPTIVE BOOKLET FREE

All levers within easy reach. Easy riding, lightest draft. Write for free description.

Strongest and simplest construction, deepest penetration, lightest draft. Description free.

We are spending thousands of dollars telling the Farmers about the Rock Island Two-Wheel Cart, and we want every one of them to know just how good it is. Ask us questions. Let us hear from you. Write today. If your dealer can't show you the cart. Full information about the cart is absolutely **FREE**. If, in addition to information about the cart, you would like to have a pretty watch charm, enclose 6 cents in stamps to pay postage and always mention this paper.

## ROCK ISLAND PLOW CO., ROCK ISLAND, ILL.

MAKERS OF A GENERAL LINE OF FARM IMPLEMENTS.

Including Plows, Disk Harrows, Planters, Cultivators, Hay-Loaders, Etc.

along with one or more tuberculous animals. The proper course would be to have all of your cattle tested with tuberculin, which will inside of forty-eight hours prove conclusively whether the disease is or is not present. See that government tuberculin is used unless you can obtain imported or thoroughly guaranteed tuberculin, as it re-

cently has been discovered that some commercial tuberculin is wholly worthless.

### Best by Test.

The Combination Oil Cure for Cancer and Tumor has its imitators. Beware of them. Write today to the Originator for his free books. **Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.**

## ADDITIONAL FIELD NOTES.

On page 14 of this week's issue will be found the Plymouth Rock advertisement of Mrs. E. F. Escher, Manning, Iowa, who is offering seventy-five cockerels of the Bradley, Ringlet and Eclipse strains at from \$1.00 up. Mrs. Escher is an up-to-date chicken woman and she is offering some decided bargains in cockerels. Her birds are well marked and are worth more money than she is asking. Write her at once if you want Plymouth Rock cockerels.

Mr. J. T. Prim, of New Providence, Iowa, is offering Barred Plymouth Rocks and Mammoth Bronze turkeys for sale. He writes: "I am offering in turkeys my last year's breeding stock, the hens weighing twenty-two to twenty-six pounds. I showed seven turkeys last year at the Union Iowa, show and won seven prizes, scoring up to ninety-six points. I have young hens that weigh eighteen pounds, toms twenty-eight pounds. My strain of turkeys are descendants of the World's Fair first-prize tom, Columbus, held in Chicago in 1893. In Barred Rocks I have the Gardner and Dunning, Wayne McAllister strains. I will sell cockerels for the next two weeks at a bargain, quality considered." See advertisement on page 14.

Mr. W. J. Applegate, of New Sharon, Iowa, has used the columns of The Homestead to sell his stock for the past twelve years, and his advertisement will be found on page 14. The following is what Judge J. L. Todd has to say of Mr. Applegate and his stock: "Mr. Applegate has been a breeder of Barred Plymouth Rocks exclusively for the past fifteen years. He has good poultry, the best average flock I have seen this year, especially in cockerels. He is a good substantial farmer with 160 acres, raises only the one breed and keeps the breeding up in good shape. He is perfectly reliable and I take pleasure in recommending men like Mr. W. J. Applegate, feeling sure he is worthy of confidence and that orders placed with him will please."

Mr. J. W. Wagner, of Monroe, Iowa, breeder of Barred Plymouth Rocks and Mammoth Bronze turkeys, writes: "I am sold out of turkey pullets, but have some extra fine toms yet for sale. They score 95½ to 97 points. I also have a yearling tom for sale weighing forty pounds. In Barred Plymouth Rocks I have 100 good pullets yet for sale and 200 cockerels. A lot of them are narrow, close-harred fellows, the kind it takes to win at fairs. At the late Newton fair my birds won six first prizes and two seconds. At the Monroe poultry show they won three first prizes and one second, two thirds and one fifth. Also got the special prize for the best pen of turkeys. I have a dark sable colored Scotch Collie male that I will exchange for a good Barred Plymouth Rock cockerel."

## LAST CALL FOR PEEK &amp; PUTMAN'S CLOSING OUT SALE.

We wish to call the attention of our many readers for the last time to the closing out sale, January 23d, of Messrs. Peek & Putman, of Tecumseh, Neb. We regret very much that they are going out of the business, as they were very particular in selecting their breeding stock, and had built up one of the very good herds of the state. Their reason for dispersing their herd is that Mr. Peek has decided to move away and it required a closing out sale to get a proper division of the exact value of the herd. There are many animals in the herd that should be of much interest to good breeders of Nebraska and Kansas, as they are of the choicest breeding and are extra good individuals. Every one of the old, tried brood sows will be sold and they are good producers, as you will see when you look over the very growthy bunch of gilts that will be run through the sale ring on this date. They have been raised on protein food, not overfatted and are in the proper condition to do the purchaser a world of good. The boars that these sows are bred to are worthy of special note. One of the good young boars in this herd, Lincoln Top, as he is called, is surely a good one. Look him over sale day and we think it will be hard to fault him. He has a wonderfully strong, arched back with good ham, good side lines and stands on extra good feet. Other boars in use are Crimson Jim, a grandson of Crimson Wonder; Young Hanley, by Hanley, the pig that topped the Thomas & Hog-

sett sale last fall; Beautiful Joe, by Big I Am; also Tip Top Notcher Jr., by Tip Top Notcher. There is a combination of breeding that is rarely found in any herd in the business. The sows are an especially good lot and are properly mated to this string of good boars to the best of these breeders' knowledge. We consider this one of the best opportunities to get some good sows that will be put before the breeders of Nebraska this year. Catalogs are now ready and if you will send for one you will have a chance to look over the breeding of this good stuff. Free entertainment and free conveyance to and from the farm can be had on sale day. Arrange to attend this sale, as it will be a great opportunity. Write for catalog and mention The Homestead. See page 40.

## DELANEY'S SEED CORN SORTER.

This is a day and age of advancement and improvement in every line, whether in the factory or on the farm. During the past two or three years great advancement has been made, not only in the quality of the seed corn that has been planted by the farmer, but in the method of grading or sorting the seed corn so as to secure uniform and perfect dropping. There is probably no seed corn sorter made that fills the bills so completely as does the Delaney Seed Corn Sorter, manufactured by Mr. J. F. Delaney, of Colona, Ill. This year this sorter has been further improved by being attached to a little stand, so that the sorter is operated with a small crank about like a grind-stone crank. Every farmer who used one of the old-time shakers or sorters

will readily testify that in its use the arms soon became very weary, so much so that oftentimes the corn was not sorted as it should have been. To meet this objection, the little crank motion has been devised by Mr. Delaney and now a three-year-old child can sort in a short time all of the corn necessary to plant a very large field. The cost of this sorter is also very moderate. A little descriptive circular will be mailed free to every Homestead reader who asks for it, which explains everything in connection with this sorter, and also gives the price list f. o. b. the factory at Moline, Ill. The manufacturers are entirely reliable financially and in every other way and The Homestead takes pleasure in recommending them to its readers. Their sorter is certainly a boon to farmers who intend to adopt up-to-date methods in corn culture.

## A NOTED HERD OF DUROC JERSEYS.

We wish to call the attention of our readers to the advertisement on page 34 of this issue of one of the best Duroc Jersey herds in America, owned by Messrs. Amos W. Harris & Son, of Waverly, Ky. This herd, known as Pennyrite herd, was established in 1883 by the senior member of the present firm. There have been many changes in the breed since that time, but this herd has at all times been in the front rank. At the head of their herd they have one of the greatest Duroc boars in America, Commodore 13381. There have been several good boars that have contributed to the success of the breed, and in Commodore another great boar has come into prominence. Both as a show animal and as a breeding boar, Commodore is well worthy of the credit which has been given him by some of the best breeders of Durocs in this country. At the Illinois State Fair this year Commodore was first in class and headed first-prize aged herd. He also won the same honors at the Kentucky and Tennessee State Fairs, and the writer representing this paper wishes to state that there were other state fairs which he visited where this great boar would have changed the awards had he been shown. Commodore individually is a boar of great promise. He

## This Frost Proof Gasoline Engine

will work for you all the year 'round—in all kinds of weather. It can't freeze, so you'll have no frozen pipes causing expensive delays and heavy repair bills.

We can prove to you that it is the most reliable, easily operated and economical gasoline engine built. And it has a guarantee back of it that absolutely protects you.

## The Fuller &amp; Johnson FROST PROOF Engine

water cooled or oil cooled, is built expressly for use on the farm—with the inexperienced man in mind.

It is mechanically perfect and is unequalled for simplicity of construction.

You can operate it—you can understand it—you can control it perfectly.

If we didn't know that, we certainly wouldn't guarantee you satisfaction.

Fuller & Johnson's guarantee has to be lived up to.

Gasoline costs money and the fact that our engine will do most work with least fuel must appeal to you. It never uses a drop more of gasoline than the load demands. Therefore, it develops more power per gallon of gasoline used than other engines.

It runs smooth and steady all the time, whether it's carrying half a load or a full load. Oils itself all over every time the crank shaft goes round.

Our engines are made in all styles and sizes and you can select one that will meet your requirements exactly.

But before buying any engine, send for our free booklet—

"Helpful Hints on Farm Power." It will protect you from loss and disappointment and help to solve your power problem.

\*\*\*

If you are in need of any other farm implements and want to be safe on quality, investigate

## The Fuller &amp; Johnson

**OUR HOME DEPARTMENT.**

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

**WITH THE EDITOR.**

Since I began talking about social customs and proprieties here With the Editor, a variety of questions have been asked, a number of problems propounded. Some of them have been of little interest to the general public. These I have answered privately or consigned to the waste basket. Others, as will be seen from the letter which follows, are of profound public importance. In answering this letter editorially I hope to serve society at large as well as the individuals more intimately concerned.

You will pardon me for writing you, but your good, sound sense, as displayed in the Home Department, causes me to write you about something that worries me, and if you will kindly tell me what you think of such conduct you will do me a favor that I have no words to express. I know a married man—one who professes to be a Christian—who goes into the home of his neighbor, when the neighbor's wife is alone, and kisses her and has her with her head on his shoulder, maintaining that there is no harm in it. Now, I want your opinion about it and it will help me so much. I cannot help but think it is just here that the terrible affairs start which break up happy homes and make sad, broken hearts.

Let us squarely face the situation here described and endeavor to discuss it dispassionately, but first let us think a little about marriage and its ethics.

Through the long ages civilized peoples have evolved that idea of marriage which gives one wife to a man, one husband to a woman. From the pit of promiscuity, of polyandry, of polygamy, slowly, but surely the race has climbed to the plane of monogamy. Around this ideal of monogamous marriage there cluster some of the most beautiful things of life—it is the very foundation of society as at present constituted. To preserve it inviolate some of the noblest souls the world has ever known have drained Gethsemane's cup of anguish. It is a racial possession, a precious heritage entrusted to one generation to be passed on to the next. And it is at our peril, whether as individuals or as a nation, that we mar, defame or in any way de-face the sacred institution.

Monogamous marriage implies that there shall be absolute fidelity within the marriage relation. As Helena Ritchie learned with breaking heart, "When personal happiness conflicts with this ideal the right to claim such happiness is as nothing compared to the privilege of resigning it." Moreover the Great Teacher, He who saw to the very heart of things, dared to say in the hearing of all men:

Ye have heard it said by them of old time, that thou shalt not commit adultery. But I say unto you, that whosoever looketh upon a woman to lust after her hath committed adultery already with her in his heart.

Here is a married man (A), professedly a Christian (!) taking advantage of the absence from home of his neighbor (B), to visit his wife and kiss her as might a lover. Apparently Mrs. B. protests, whereupon A assures her that "there is no harm in it."

At first glance there would seem to be but two persons primarily concerned in this affair. In reality there are four, and indirectly it is of profound interest to the whole body politic.

When a man and woman enter the estate of matrimony they assume the most solemn obligations toward each other. Henceforth, through poverty or wealth or good or ill "until death do them part" they are pledged to love and serve and cherish each the other. So close is this union that it is written "They twain shall be one flesh." Mr. A's life is interwoven with that of Mrs. A. Mrs. B's with that of Mr. B's; the success and the failure, the happiness and the misery, the honor and the shame of the one are those of the other also.

Sometimes the most effective method of considering a moral problem is to take a prosaic, material view of it. Suppose just as A was kissing Mrs. B he should see Mrs. A looking in at the window and at the same instant Mr. B should walk into the room! The scene may be better imagined than described. Of one thing we may be very sure, two seconds after B's entrance A would not have breath enough left to protest "there is no harm in it," and if he did not limp away as sore as was Falstaff after Ford's cudgel had been laid about him it would be because A choked him out into insensibility and then kicked him out. It may be laid down as an absolute

**GIVEN THIS 31-PIECE BREAKFAST SET AWAY**

Box 778, Adrian, Mich.

rule that conduct which a husband or wife would prefer the other should not know of is wrong for them whether or not it be wrong in itself. In this case the wrong is unquestionable. A husband's lips belong to his wife. When he secretly kisses another woman he robs her and at the same time sins against himself. A woman's lips belong to her husband. When she yields them to the touch of another man—as does the woman of our letter—she robs her husband and commits a crime against herself; and the whole fabric of society is jarred by the secret falling away of the disloyal couple.

It may be said that these two are not bad, consciously bad at least. They may be unhappily mated, heart hungry and disappointed. God pity them and save them from the abyss towards which they are surely drifting.

**HOME AND HOMEMAKING.**

**LITTLE HELPS BY THE WAY.**

Build as thou wilt, unspoiled by praise or blame;  
Build as thou wilt, and as thy light is given;  
Then if at last the airy structure fall,  
Dissolve and vanish, take thyself no shame.  
They fall, and they alone, who have not striven.

—Thos. Bailey Aldrich.

Harbors of beautiful achievement are never reached by those who drift carelessly and indifferently. The worthy ports of life are reached only by captained lives. No man can safely trust himself to the shifting

Order 20 pieces and when sold send us the \$2.00 and we will positively send you the watch and ring; also a chain, Ladies or Gents style. **ALTON WATCH CO., Dept. 181, Chicago.**

breezes unruddered or unplotted. Life's grandest havens are possible only to those who will study the charts of life and keep a firm hand on the helm of their purpose.

**CULTIVATE YOUR LUCK.**

To all men and women seeking for positions of any kind let me say this: Sit and walk erect, with your shoulders and hips and head in a line and your solar plexus lifted. Keep your chin away from your throat. Look squarely at life.

Walk with a firm, quick step. I do not mean that you should hurry, but do not let your feet drag or remain long on the ground.

When you sit down sit in an expectant and hopeful attitude. When you listen, listen with eyes and ears. Look interested. When you start to go, act as though you had a goal before you. When you begin any task, no matter how trivial or temporary, go about it as if it were the most important thing on earth. Get it done. When you talk try and put some life and force into your voice. Speak from the chest.

All these efforts will help you to success. All these habits will help your mind. It is a curious thing how the body and mind react one on the other. If you sit before the mirror and frown for ten minutes you will begin to feel croak. If you sit and smile you will soon feel your heart growing merry. Train your body and your face to be

alert, hopeful and energetic, and luck will come to you ten times where it would come once to the despondent and drooping-visaged mortal.

I heard of a young girl who came to New York to find work and had a most remarkable run of good fortune befall her. Her first effort was successful and she left that position to fill another that offered twice the salary.

"Born to luck," a friend said to me. Afterward I met the girl. She came on an errand. It was a day of rain and wind, but she blew into the room like a sunbeam and a summer breeze in one. She walked as if there were springs under her soles. She radiated light and cheer. She went directly to the object of her visit, made her errand known in a few concise, clearly spoken words, and went away, leaving me with the feeling that some vital part of the world's mechanism had passed before me. No wonder she is lucky. But her luck lies in herself. If we are not born with it, let us

cultivate it. We can.—Ella Wheeler Wilcox.

Mrs. Slimson—"Here, Willie; while I am away I am going to give you the key to the pantry just to show you I can trust you."

Willie (proudly)—"I don't need it, mamma; I can pick that lock any day."

A mother told her little boy, who had been naughty, that she would have to punish him, but that she would consider how until next morning. Then she talked to him of God and said that God would punish him, too. She did not know how, but the punishment was sure to come. The boy, in a conciliatory tone, replied:

"I'll tell you what, mamma! Never mind about punishing me. Leave it all to God."

#### THE COOK.

In summer or in winter  
It's always just the same,  
The honest cook's entitled  
To praises and to fame.  
She makes such fluffy pancakes,  
And fries potatoes down  
In butter till they're crispy,  
The most delicious brown.  
Her juicy steaks are tender,  
The raisined rice is done,  
And if you watch her system  
You'll think that cooking's fun.  
Fresh fruit is served in season.  
The fish is rich and sweet;  
To dine beside her table  
Is indeed a wholesome treat.  
Wife of cross, ill-natured husband,  
Would you change his scornful look?  
Come and take a course of lessons  
From this honest skillful cook.  
—Irene Davis.

#### HOUSEHOLD NOTES.

Keep a small box filled with quicklime in a pantry and cellar; it will keep the air dry and pure.

In order to have potatoes, always white, the kettle in which they are cooked should never be used for any other purpose.

The waxed lining paper to cracker boxes is excellent to wrap lunches in. It is very good to clean flat irons with also.

If salt is sprinkled over the range before frying is commenced there will be no disagreeable odor if the fat spatters over.

A teaspoonful of sugar added to the water for basting roast beef will give a rich brown color as well as a fine flavor.

If cooked meat is ready for table before it is required, place it on a dish ready to be served and set this over a pan of boiling water, says Tit-Bits. Put a dish over the meat and a cloth over all. The steam will keep the meat hot for a long time and does not draw the gravy out or dry it up, as would happen if it were set in an oven.

If a lamp should be overturned, do not attempt to put out the flame with water, for it will simply spread it. Instead, throw down flour, sand, garden earth or salt, any of which will have the desired effect.

If the upper inside edge of the pan is well greased with butter, chocolate, milk, cocoa, or anything of the kind will never boil over.

Make a pad of double-faced cotton-flannel a little larger than the dining table and use under the table cloth. The cloth will look better, wear longer and the sound of the dishes be deadened.

#### AMONG OURSELVES.

It always pleases me when someone brings something a little out of the ordinary for the good of this circle. I have great pleasure in introducing Miss DeVaul:

I enjoy the meetings Among Ourselves very much. I think they are growing better every week. There are so many subjects under discussion that I am almost afraid to suggest something new, but we need variety, and as mine is something entirely different from what we have ever had I will venture to lay these suggestions before the circle. Now, why can't we have a poetry meeting? Let everyone that will send in some good piece of poetry and comment upon it. Surely, everyone can find some little piece of poetry that would be helpful to us. Couldn't we devote an entire meeting to this? I send a poem, "The Two Seekers," which Mrs. Walker may use if my suggestions meet with the approval of the circle.

#### THE TWO SEEKERS.

Two men went seeking happiness—  
One walked the roadside way  
And looked with all his longing eyes  
Within each garden gay.  
Where'er he saw it growing  
He tried to grasp its flower,  
But always in his clutching hand  
It died before an hour.  
Till, angry and despairing,  
In bitterness he cried:  
"Others are given happiness.  
To me it is denied!"

The other looked around him.  
"Since happiness is found  
In other people's gardens,  
Why not within my ground?"  
He dug, and plowed, and planted,  
And with a careful toll,  
Where it was rough and stony,  
Enriched each inch of soil,  
Until with crowded blossoms  
The little plot o'er ran.  
"How simple 'tis," the owner cried,  
"To be a happy man!"

I have read of a picture in the art museum in Berlin entitled "The Chase After Happiness." A rider rode upon a bridge which led to happiness in the distance, pictured upon a soap bubble. Happiness was depicted as a beautiful, sensual woman from whose vesture fell gold pieces. She held a crown in her hand upon which the rider's eyes were fixed. But not his eyes alone; his whole reaching figure, the outstretched right arm, the eager, extended hand, the far-reaching horse, all representing a picture of fearful, consuming passion. A noble, womanly figure had thrown herself in the way, in vain! He did not heed her, but rushed on madly in pursuit of deceiving "Happiness." But the wild man shall not attain it. Beside him, distant but a few inches, rides Death, whose grasping hand will more certainly seize the hunter than he the distant prize.

### Sharpened Tools

Ever buy a hatchet that would sharpen a pencil? If you did, it was a Keen Kutter, for every Keen Kutter edged tool is sharpened at the shop. On the other hand—did you ever buy a hatchet that you had to grind before using, and in grinding find a flaw or soft spot? That is the reason that most manufacturers do not give you a hand sharpened tool. They let you take the risk.

## KEEN KUTTER QUALITY TOOLS

are offered you with every risk of quality or temper removed. Edges are keen and perfect—temper and quality are tested and every tool is stamped with the name and trade mark for identification and guarantee. You don't need to be a tool expert to buy the best tool of any kind. Just ask for a Keen Kutter if you want a Saw, Chisel, Bit, Drill, Gimlet, Awl, Plane, Hammer, Hatchet, Axe, Drawing-knife, Pocket-knife, Screw-driver, File, Glass-cutter, Ice-pick, or any tool for bench, home, garden or farm.

Sold for 37 years under this mark and motto:

"The Recollection of Quality Remains Long After the Price is Forgotten." Trade Mark Registered. If your dealer does not keep Keen Kutter Tools, write us. Tool Booklet on request.

SIMMONS HARDWARE COMPANY, St. Louis and New York, U. S. A.

JACOB HOLZ, 1003 No. 16th St., Omaha, Neb.

One step farther, the bridge ends in a trail  
rather; horse and rider will be plunged into  
the abyss. Smiling "Happiness," however,  
remains calm, only to allure many others  
to venture and to lose.

The verse and the story of the picture  
complement each other very nicely and  
convey a lesson we all need more or less.  
Our thanks are certainly due Miss De  
Vaul for introducing what should be a  
pleasant and profitable innovation. Who  
comes next?

Matters pertaining to the heart and  
the home are the peculiar province of  
this circle. Many of them we have dis-  
cussed time and again. The one June  
Bug brings for our consideration has not  
received attention heretofore:

As the editor invites us American-Canadi-  
ans to write I thought I would just bring  
up a subject. What do the sisters think  
about young girls marrying old men? For  
me I say no, under any circumstances, no.  
Young girls, take heed from one who speaks  
from experience. Don't marry a man, say  
ten years older than yourself. You will  
perhaps say, "Why?" Well, for this reason:  
He does not see things in the same light  
you do. He has had his day and thinks  
your ideas and thoughts are childish. I have  
heard it said years ago, "Better an old man's  
darling than a young man's slave," but,  
girls, don't let that turn your head, for  
nine out of every ten of those old men  
marry to get a housekeeper and chore boy, or

full line of engines and seven different  
sizes of mills. The engines are shipped  
all set up and ready to run.

The O. S. KELLY WESTERN MFG. CO.  
DEPT. B, IOWA CITY, IOWA.

chore girl. I, for one, would rather see my  
girls in their coffins than married to old  
men. Now, one thing more: Would someone

give a remedy for what is called a chronic crank—one that would find fault with the angel Gabriel, if he got the chance? I say "Amen" to Mother Matilda in regard to children being kept out of school; keep them in school all you can. It is nothing but robbery to take children's school time from them.

Well, what do you think, friends? In your judgment, is it well that June and December should wed? Is ten years too much difference between the ages of husband and wife?

The subject of child training is one of perennial interest. We discuss and discuss and yet so many-sided is the subject that there seems always something more to be said. Mrs. S. S. P. brings some thoughts for parents today as does also "A Young Mother":

I wish to speak of children's early training. We cannot begin too soon to teach them obedience and the keeping of themselves neat and clean. When they come in from play and remove their wraps, see that they hang them up instead of throwing them on a chair or the floor; also that they put their playthings in their proper places when through with them. Nothing sounds sweeter from little lips than "If you please," "Thank you," "Yes, ma'am," etc. Another thing—I think the care and responsibility of raising a family should rest as much with the father as with the mother, which is not always the case.

It means work to bring up children. They will dirty up the floor when they eat lunch, but train them to sit down while they eat, and never to eat in the best room. Teach them it is their home. My little darling, who is not three years old, will wipe up water if she spills it. I give her a cloth and show her how. She sweeps up the crumbs she scatters, with her little broom. I help her and show her how to clean up her own mess. She likes to cut up paper. I let her sit on her stool beside the wood box or some such sort of thing and let her cut it in the box. If she gets any on the floor she must pick it up. Of course if she makes a fuss and has very much on the floor I help her some and encourage her to keep at it until it is all up. So she finds it easier to sit beside the box and cut paper in the box than picking it up. Teach them to like clean clothes and keep them clean. Save yourself all the work you can by preventing the cause. How

shall we correct children? How I have wondered about it myself. When I come to occasions when I know not just what is best I take my darling in my arms, talk to her, and pray as never before for wisdom. We have God's promise for wisdom if we ask Him for it.

What Mrs. S. S. P. says about the father's duty and responsibility is something which should be said oftener. In the city where fathers leave home early and return late they are more or less compelled to depute some of their duties to the mother. It is different in the country and there the father should do his share if the children are to be adequately trained.

During the years that I have been hostess in this Home I have come into very friendly relations with some of its members. The letter which we are to have from "A Young Kansan" bears evidence of this personal friendliness. Usually writing to a newspaper circle the writer is more or less restrained and self expression is to that extent limited. In this letter I fancy we get the full, frank and free opinions of the writer:

I was much interested in the letter of "A Bachelor," but I was also much amused thereat. I don't believe, between me and thee, or rather thee and me, that he has had much experience with girls. I do not pose as a judge or anything of that sort, but you know that when a girl is with him, no matter how much she has broken over the bars of the correct attitude, she will be as stiff and proper as his heart could wish. Like you, I am more puzzled with the "way of a maid with a man." I, as you know, live in a southern neighborhood. The girls are as pretty and well behaved as one could wish for, but yet their natures are of a warm, passionate cast, and they do not stop to think, or rather do not think, that it is anything out of the way to allow the young men who are waiting on them to kiss them or to return the salutation. While I do not think it is right, I must confess that not one of them since coming here has ever gotten into trouble, nor do the young men object to marrying girls that have received the embraces of their previous suitors. Indeed they take it as a matter of course. One cause of these actions is the current fiction that is read. They pose as being opposed to this sort of thing and yet our stories are full of the kissed heroines. These same girls make the best of wives, true, self-sacrificing, hospitable. I don't know what we would do with chaperones down here. Banish them, most likely. We think nothing of taking a girl three, five or even ten miles alone after night.

The state of affairs alluded to by our young friend is, I fear, not as uncommon as might be wished and this fact makes it a little hard for those who wish to observe the proprieties. If Mrs. Smith allows her young daughter to take night drives alone with a young man and to occupy the parlor without other company until the wee sma' hours, Mrs. Jones' young daughter is apt to feel abused if she is denied similar privileges; and Little Miss who declines to grant good-night kisses to all and sundry is not unlikely to be dubbed Miss Propriety or "Prunes and Prisms" by Miss Free-and-Easy and also by young men who ought to respect her for her good breeding.

But, as Oklahoma Girl comes to say, there is more than good taste involved in these things:

I wish to add a few words on the subject of "fallen girls," which has been up for discussion Among Ourselves for the past few weeks. I agree with Miss Modesty as to men being more to blame in most cases than girls. If men had to bear their share of the disgrace there would be fewer fallen girls. And if girls took "Illinois Bachelor's" advice there would be fewer still. But I do not think "Illinois Bachelor" does just right in tempting girls to permit him to kiss them. I think there are other ways in which to determine a girl's character; if there were not, his models would be all hopeless old maids, for they would not wish to marry a man that would request them to kiss him. An "Iowa Maiden" says that "a kiss is often the first step to destruction." I think that is right. If a young lady permits a young man to kiss her once she will permit him to be more familiar next time, so she sinks lower and lower. Some girls will say, "Oh, it will make him mad if I don't kiss him." Well, just let him get mad and go. There are other men who will respect you more for so doing and will not require such a thing as a good-night kiss when in company with you.

Next week we shall have further discussion along this line. One of those taking part will be "A Twentieth Century Bachelor."

#### Dressmaking and Millinery. No. 552.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

In looking after the necessities of the wardrobe for the various members of the family one item must never be overlooked, and, in fact, it is an item that needs to be many times multiplied, and that is the matter of aprons. It seems one can hardly provide too many of these, and they must be for the various ages and sizes of the members of

## We Sell You Doors 80¢ AND AT HALF YOUR LOCAL DEALER'S PRICES Windows 62¢

If you have any use for Doors, Windows, Storm Sash, Stair Posts, Mouldings, Porch Brackets, Columns or any kind of Millwork for your own buildings or as a contractor, don't buy elsewhere until you write us for our illustrated catalog. It quotes you at least 50 per cent lower prices than your local dealer or any retailer or "mail-order" house possibly could, as we are manufacturers with the largest mill in the world.

We sell our Millwork only direct to the user. We ship anywhere in the United States and guarantee to make you a clean saving, freight included, of from 25 to 50 per cent on anything you order.

Just send us a postal with your name and address and we'll promptly send, postpaid,

**Our Grand Illustrated Millwork Catalog**

Modern \$3.90 Front Door Regular price \$8.50

showing everything in the latest styles of High Grade Millwork at lower prices than you have ever thought possible.

You can get an idea by the few illustrations and prices in this small space of what a saving you can make by buying from our catalog, but you must see the catalog to fully appreciate this selling plan of ours direct to you.

Do not think of buying until you get our estimate.

Our work is all Guaranteed strictly up to the Official Grades adopted by the

**GORDON VAN TINE & CO., Station B46, DAVENPORT, I.A.**

Sash, Door and Blind Manufacturers' Association of the Northwest, and if not exactly as represented in every particular, you can ship your order back at our expense.

Our lumber is first air-dried and then put through a scientific drying process. Joints are made with heavy hardwood dowel pins, glued with imported glue, pressed together by heavy steam-power press. There is no "come apart" to our work.

Remember, you save 50 per cent, freight included, on your Local Dealer's prices.

We operate the largest mill in the world—163,000 feet of floor space (four acres)—have been in business since 1855—own our timberlands, saw-mills and lumber yards.

We carry a large stock and can therefore ship promptly.

We have no traveling men—sell only for cash. We are the only large manufacturers of sash, doors and blinds selling direct to the consumer. Our prices will astonish you. Don't buy anything in our line until you get our catalog, the grandest wood-work catalog published.

Your banker, or any banker in Davenport, Iowa, or home, will satisfy you that we are thoroughly responsible. Our catalog will explain everything to you. Write for it today. You will receive it by return mail, postpaid.

**The Famous "SPLIT HICKORY"**

the family who wear them, and also they must be in the various modes and of a variety of materials, such as will adapt them to the requirements.

The all-over apron is a universal favorite and needs no "good word" said for it. It is recognized as a necessity, and there remains only the question of pleasing or suitable designs. Quite a new one in this line for the women of the household is that pictured in No. 5470. This is a square-yoked work apron, having full-length sleeves finished with deep cuffs. The yoke may be cut square at the neck or it may be finished to fit up closely and have turn-over collar. There is only slight fullness in the skirt, as superfluous material in such a garment would make it a burden in the wearing as well as in the laundering. Usually the material selected for such an apron will be calico, percale or gingham, but even

lighter weight fabrics may be used with equally good results, and with a semi-dressy effect. Some simple changes may be made in the garment, as the lengthening of the sleeve so that only a wristband finishes it at the bottom, or even a casing having elastic cord run in may adjust it. If it is liked the fullness at the back may be held in by means of a band that crosses from the under-arm seams, or, in fact, the band may encircle the waist, being slipped through openings at the under-arm seams, passing beneath the front of the apron, and buttoning at the center back outside of the backs of the apron. In this case the band should be stitched in place at the openings. Pattern No. 5470 is cut in sizes for a 32, 34, 36, 38, 40 and 42-inch bust measure. Give size when ordering pattern.

For the wee tots and the girls of school age I have seen nothing nobbler, and at the

same time more serviceable, than the one-piece apron shown in No. 5463. There is but one seam in the garment, and that is at the

[5470—Square Yoke Work Apron, 32 to 42 bust]

under-arm. It is such a plain and simple little design, and yet one can readily see how it may be elaborated by the use of trim-

[5463—Girl's One-Piece Apron, 4 to 10 years.]

ming, or even by varying the shape. Frills of the material or of lace or embroidery may be used about all the edges. Bands of insertion or of contrasting material may be applied, and when the latter is used,

## Sell 10% More Hogs and Sheep

**WANTED** Men to travel, deliver samples and advertise our goods locally. Salary \$91 per month, expenses advanced.  
Beezley Co., Dept. 5, Monon Block, Chicago.

stitching will add to its effectiveness. There are fancy cotton braids that may be used and these may be put on plain or in a design. For a very dressy apron in white in some sheer material apply bands of open-work embroidery or lace insertion a little space from all the edges, and cut away the material from beneath. Then edge with lace or embroidery to correspond. For colored aprons for home or school wear a bias band of plaid on a plain material or even one that has small figures is effective and this, you know, is one of the most fashionable trimmings. Pattern No. 5463 is cut in sizes for girls of 2, 4, 6, 8, 10 and 12 years of age, (although 2 and 12 are not given in the sizes beneath the picture). Give age when ordering the pattern.  
Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

### FOUR YEARS OF AGONY.

Whole Foot Nothing But Proud Flesh—  
Had to Use Cuticura—“Cuticura  
Remedies the Best on Earth.”

“In the year 1899 the side of my right foot was cut off from the little toe down to the heel, and the physician who had charge of me was trying to sew up the side of my foot, but with no success. At last my whole foot and way up above my calf was nothing but proud flesh. I suffered untold agonies for four years, and tried different physicians and all kinds of ointments. I could walk only with crutches. In two weeks afterwards I saw a change in my limb. Then I began using Cuticura Soap and Ointment often during the day and kept it up for seven months, when my limb was healed up just the same as if I never had trouble. It is eight months now since I stopped using Cuticura Remedies, the best on God's earth. I am working at the present day, after five years of suffering. The cost of Cuticura Ointment and Soap was only \$6; but the doctors' bills were more like \$600. John M. Lloyd, 718 S. Arch Ave., Alliance, Ohio, June 27, 1905.”

### A MAMMOTH NEW INDUSTRY FOR KANSAS CITY—ITS OUTPUT TAKEN A YEAR IN ADVANCE.

This periodical takes pleasure in calling the attention of its readers to the full page advertisement of the Crude Oil Power Company, which appears on page 15 of this issue. A reporter for this paper, in order to verify the statements of this company, visited its offices and lands and finds that located at the junction of the Missouri Pacific and Mexico & Orient belt line railways on a five and one-half acre tract of land in Kansas City, Kan., a company called the Crude Oil Power Company is, by the expenditure of upward of \$200,000, establishing in

E. E. RICHARDSON.

Well known to every stock raiser and dealer and almost every farmer in the middle West. Vice-president and the active manager of the Crude Oil Power Company. For thirty-two years he has been the secretary-treasurer of Kansas City's most successful institution, the Kansas City Stock Yards Co.

Kansas City an industry that will prove a most valuable acquisition to the large number of manufacturing industries already located here. The Crude Oil Power Company will, however, occupy among them a unique place, as the company proposes to manufacture an engine that will eventually supersede all engines now operated by gasoline, alcohol, naphtha, and in some instances by steam. This remarkable invention uses, as the name of the company implies, ordinary crude oil as fuel. The company claims to

produce as much power from a barrel of crude oil as can be produced from a barrel of gasoline. Inasmuch as a barrel of

MAJOR F. C. VINCENT.

Fiscal agent of the Crude Oil Power Company, formerly officer of the United States Army, and successful organizer and financier of many of the largest industrial propositions in the middle West.

gasoline costs about \$6.50 and crude oil only about sixty cents per barrel, power can be

generated by this crude oil engine for about 10 per cent of the cost of operating a gasoline engine. Another, and perhaps more important invention will be manufactured by this company. It is called the portable refiner. Its inventor and the company claim for it that it can be attached to the pumping apparatus at the oil well, no matter how great or small the flow of oil, and that it will refine the crude oil as it flows from the well. This latter invention should prove a veritable boon to the independent operator, for it will enable him to refine his own product and market it, the company says, at 50 per cent less cost than by any other method of refining oils. At present Kansas City has no manufacturers of cast steel and malleable iron castings. Heretofore all such products were purchased in Chicago or St. Louis and as the eastern factories were generally from six to eight months behind with their orders, Kansas City users of this material have been greatly inconvenienced and forced to pay extraordinary large prices for same. The Crude Oil Power Company is building an up-to-date, first-class foundry for the manufacture of cast steel and malleable iron castings and by so doing is filling a long-felt want in this community. The company is already assured of orders that will tax the full capacity of this department of its works. The Crude Oil Power Company will undoubtedly be of great benefit to this community. Kansas City needs industries of this character. The officers of the company are: President, G. W. Fitzpatrick; vice-president, E. E. Richardson; treasurer, W. C. Howe; secretary, A. A. Oshorn. Mr. F. C. Vincent is acting as financial agent for the company, and is in charge of the offices. When this paper goes to press the company's Kansas City plant will probably have commenced operation. In justice to its readers it is the policy of this paper not to accept advertising of this character, without first thoroughly investigating the legitimacy of the enterprise. This paper is personally acquainted with the officials of the Crude Oil Power Company, and does not hesitate to give this enterprise its fullest endorsement and co-operation.

## ADDITIONAL FIELD NOTES.

## LAST CALL FOR ROWE'S BRED SOW SALE.

We wish at this time to call special attention to the bred sow sale of Mr. J. E. Rowe, of Stockham, Neb., on January 21st. Mr. Rowe, although a very young breeder, has produced some of the very good show stuff that has been exhibited at the state fair in the last two years. We can say that we have just recently had the pleasure of visiting this good herd and found a very top-notch bunch of sows to go in this auction. There will be included in this sale three daughters of Middle Rose Lady, the first and sweepstakes sow at the Nebraska State Fair this last fall. She is surely a grand individual and her produce in the sale bids fair to make as good individuals as their dam, one of them being a winner at the last Nebraska State Fair and bred to Billy Medoc for an early March litter. There are also three daughters of Rose Bud Queen, she by Proud Advance. The gilts in this sale are mostly of early farrow and bred to J. P. Advance, a son of Jumbo Paymaster and Billy Boy by Billy Medoc, two very promising young boars. Among the gilts are six daughters of Banker Lady, the sow that produced two of Mr. Rowe's show sows this fall, both of them being winners at the Nebraska State Fair last fall. Most of the aged and yearling sows are bred to Sir Leicester, the hog that has produced a greater part of Mr. Rowe's show herd, others are bred to Billy Medoc by Medoc. This hog is one of the most promising young sires doing service today, and you will surely like his produce when you see them sale day. Parties wishing to attend this sale can easily reach Stockham from Hastings or Harvard on morning of the sale, or go to Aurora on Sunday evening, where you will be taken care of and find free conveyance to the sale on Monday morning. Send for a catalog and arrange to attend the sale. When writing, please mention The Homestead. See advertisement on page 42.

## BUDDY K. IV. SELLS AT AUCTION FEBRUARY 6TH.

The only reason that Ed. A. Baxter would ever part with Buddy K. IV. is that he is going to quit breeding Duroc Jerseys. The writer, representing this paper recently inspected the herd of Mr. Baxter at Pawnee, Ill., and wishes to state for the benefit of our readers that the lot which will be offered to the public is one of the best that the breeders will see this season. There are many sows which would not be priced, let alone sold, were it not for the fact that Mr. Baxter is absolutely closing out his herd. There have been sales that were advertised as closing out sales where the breeders had no idea of quitting the business, but this is not the case with Mr. Baxter. He has assured the proprietor of this paper that he means to sell everything he owns in the Duroc line, and told a representative of this paper that his breeding crates, self feeders, of which he has four, and other property connected with his hogs would be for sale. Sixty-five head have been cataloged. They include twenty-two brood sows from one to three years old that have been regular producers, many of them having raised two litters. The spring gilts are good ones and those not related have been bred to Buddy K. IV. This is the case with all the sows in the herd. Those not related have been bred to Buddy K. IV. This noted sire and show-yard winner will be sold at auction to the highest bidder without reserve of any kind. No matter at what price he sells he goes. The breeder in search of a herd boar, one that has given to the breed hogs and sows fit to win ribbons in the strongest shows, and to be used at the head of some of the best herds of the breed, cannot afford to miss being present on sale day. The man who is fortunate enough to secure this boar will never regret it. The catalog which Mr. Baxter has just issued, will show the breeding and families represented in this offering. It should be in the hands of every breeder of Durocs and will be sent free to those who write for it as per the announcement on page 25 of this issue. Plan to be present at Pawnee on Wednesday, February 6th. Those coming from the sale of Messrs. Fagan Browning & McCahe, stop at St. Nicholas' Hotel, Springfield, Ill., at Mr. Baxter's expense. Can leave in the morning and be in plenty of time for the sale. Kindly mention this paper when writing.

## GRIFFITHS' DUROCS AT AUCTION.

Every breeder of Duroc Jerseys is invited to be present on January 31st at the Duroc Jersey sale of Mr. H. B. Griffiths, of Bowen, Ill. The offering which Mr. Griffiths is making on the above date should attract the attention of every breeder who is in search of well bred stock. Those who have paid attention to the reports of the fall sales have no doubt noticed that Mr. Griffiths has been a liberal buyer of the best sorts. Individually and in point of breeding the offering is a superior one. The three herd boars in service at Suburban farm are Top Notcher Chief, Fancy Orion Chief, and Helen's Tip Top Notcher 2d. Top Notcher Chief was sired by Top Notcher Again and was Junior Champion boar at the World's Fair. He was used with much success in the herd of Messrs. Johnston Bros. & Newkirk, from whom Mr. Griffiths purchased him at a long price. His get have been good producers and have elicited favorable comment in many herds. Several of the sows which go into the sale are bred to this noted boar. Fancy Orion Chief is an exceptionally good rearing son of Orion II, he by Orion and his dam was a daughter of Chief Surprise, he by Chief of Ohio, a litter brother to Ohio Chief. At eighteen months of age Fancy Orion Chief tipped the beam at 700 pounds. The breeder who wishes to add size with quality to his herd should secure one of the good sows bred to this boar. Helen's Tip Top Notcher 2d is a litter brother to Helen's Tip Top Notcher, the highest priced Duroc Jersey boar ever sold at public auction, now owned by Messrs. McNeill Bros., of Bowen, Ill. This boar is out of Helen Blazes, the dam of the highest priced litter ever sold at auction, and his sire is Tip Top Notcher, the grand champion boar at the World's Fair. We wish to call attention to the splendid blood lines represented in the offering. Daughters of

## LANDS AND HOMES FOR SALE

## 44,000 ACRES—A CERTAINTY

THAT the principal in an investment is absolutely secure is of supreme importance. A certainty that you will gain by the investment is very agreeable. I offer both certainties. I will sell 44,000 acres of land in South Missouri, at \$1 an acre. Every acre in blue stem prairie grass from knee to waist high. Some scrub corn, wheat, oats, timothy or clover in great abundance, and can be cultivated to best advantage. There are 19,000 acres too rolling to plow, but is best grass and fruit land. In its present condition, if fenced, it will pasture 15,000 head of cattle. Near to county seat and railroad station. Abundantly watered by limestone springs and branches. An extraordinary investment for a cattle company. One acre of this land will grow as much grass as ten acres in Western Kansas or Western Texas, and it is in a better climate. The best chance for any investor. It will enhance in value 500 per cent in less than ten years. Why is it man with money gets the good things. He will take this.

J. H. LIPSCOMB,

306 Fidelity Trust Bldg.,

KANSAS CITY, MO.

## FOR SALE.

A "JO DANDY" farm, as good as there is in the state of Iowa; located in Kearsage Township in Monona County, five miles from Onawa, the county seat, two from Turin, both good railroad towns. Good farm house, about six rooms, brick foundation, cement cellar; large barn, nearly new, with brick foundation; ample cribs, bins, sheds, hay scales, good wells, windmill, etc. All buildings well painted and in good condition; the soil is a very rich and dark loam, no rocks, no sand, lies nearly level, and is easily worked. About 300 acres are under cultivation, and except 15 acres in good timber along the Little Sioux river on west boundary line, the remainder is splendid land; all told there are 667 acres. For stock or grain the farm has no superior. It is well fenced and will sub-divide nicely. Will sell 300 acres, including the improvements, at \$75 per acre. On balance of the tract, 267 acres, partly cultivated and partly raw land, will make fair price. Terms reasonable. Photographs of the buildings sent on request. Address the owner.

Z. T. LINDSEY, - Omaha, Neb.

FOR SALE—437 acres improved land in Bottineau county, North Dakota. For particulars inquire of J. A. Horne, Penn, N. Dak.

Top Notcher Chief, Kant Be Beat, Advancer, Hanley, Big I Am, Tip Top Notcher, Ambition, Buddy K. IV., Gold Cloud, Mayor Jr., II Climax, C. E.'s Colonel and High Chief, one of the best sons of Ohio Chief are to be found in the offering. Every sire mentioned above has been a first prize winner at some of the leading shows of this country. What offering of recent months represents the blood of such noted boars as does this one? The females are bred to such noted boars as Commodore, Top Notcher Chief, Fancy Orion Chief, Helen's Tip Top Notcher II, Proud Advance, Buddy K. IV. and Hanley. In our next issue we will have something to say of the offering individually. The catalogs are now ready and will be sent to all who write as per the advertisement on page 24 of this issue. This is one of the most important sales of the year and should attract the attention of every breeder in search of good breeding and individuality. Parties coming from a distance should keep in mind the fact that this is the opening sale of a series of sales beginning at Bowen, Ill., and extending to Macon, Ill., and that all of them can be made at little expense. The stock listed will suit the most discriminating buyers and represents the leading families of the breed. Plan to be present at Suburban Farm, the home of Mr. H. B. Griffiths, on Thursday, January 31st and spend the remainder of the two weeks with them. You will be royally treated and well pleased with the stock offered for sale. Write for catalogs at once, kindly mentioning this paper. If you cannot be present sale day bids sent to Mr. D. M. Pierce, representing this paper in care of the consignors to this sale circuit will be properly handled. See advertisement on page 24 of this issue.

A field of cabbage in the gulf coast country near Falfurrias, Texas. Cabbage is a very profitable crop in the Falfurrias district. Hundreds of northern farmers have settled there in the past year. Land is now \$15 to \$25 an acre. This is said to be a better country than California, where land is worth \$300 to \$500 per acre, and the gulf coast country is a thousand miles nearer market, which is another big advantage. See the advertisement of the Falfurrias Immigration Company, of Kansas City, on page 23.

## 3 REASONS WHY YOU SHOULD BUY SOUTH DAKOTA LANDS OF THE BIG SIOUX VALLEY LAND CO. SIOUX FALLS, S. D.

1st. S. E. part of our state is in the great fertile Mississippi Valley. Formation of soil is the same as that of Iowa and Illinois, black vegetable mould to a depth of 24 to 36 in., with a porous clay sub-soil. We sell good land cheap, \$25 to \$50 per acre according to location and improvements.  
2d. We have the same climatic conditions and rainfall, as Northern Iowa and Illinois, where land that does not produce any more corn per acre, sells at \$75 to \$125, per acre. South Dakota's acreage to corn in 1906, was 1,978,466 acres; production was 77,414,351 bushels; average production of the state, \$6.7 bu. per acre.  
3d. Our Agency covers the 16 S. E. counties of the State, which produce over 80 per cent. of the State's corn crop. We are prepared to show you actual production values, as our lands are time-tried and crop-tested, proving its ability to produce abundantly: Corn, Oats, Red Clover, Alfalfa, Blue Grass and Timothy. The crops essential to mature the great American Steer.  
Write to-day for list and descriptive literature, BIG SIOUX VALLEY LAND CO. (Inc.) Ramsey Bldg., Sioux Falls, So. Dak.

## SOUTH TEXAS LANDS.

HAVE you heard of the Gulf Coast Country of South Texas? Do you know of the tide of immigration setting into that country? Are you seeking an investment in real estate in a locality where land values will double within twelve months owing to the rapid settlement of the country? We own 57,000 acres of fine land in South Texas, 70% fine agricultural land, balance good pasture. Railroad runs through the tract, with a town site and station already located thereon. 10,000 acres of the land already surveyed ready for settlement. This tract is located fifty miles from the gulf, and the climate is ideal. Oranges, lemons, figs, grapes and peaches grow in perfection. The ranch is watered by 14 wells of pure, sweet water that cannot be exhausted; average annual rainfall 30 inches. Similar lands in the same section are now selling for \$12 to \$30 per acre in small tracts. Will sell this ranch in tracts from 20 acres upwards, or will sell as a whole. We also have 50,000 acres of level prairie land, free from brush, within 60 miles of the coast, and within two miles of railroad, in the proven arid belt, at from \$6 to \$7 per acre, which can be sold in tracts from 1,000 to 10,000 acres. This property is a very attractive colonization proposition. The land will retail at from \$10 to \$15 per acre. For further particulars address,

THE GULF COAST LAND &amp; TOWNSITE CO., Guthrie, Oklahoma

## A SPLENDID HOME AT A BARGAIN.

174 ACRES of fine land in Bates County, Mo. 1 1/2 miles from small town and railroad station, 154 acres under cultivation, 40 acres of which is meadow land, 20 acres in pasture, balance in wheat and corn ground; is located in a first-class neighborhood. There is a 4-room frame house, surrounded by shade trees, granary about 18 by 18 feet, double corn crib with driveway between. Barn 18 by 24 with loft above, small orchard, one well and one spring, on rural route, telephone in house, a fine tract for a home. Three good gas wells have just lately been struck on adjoining land. Owner not able to look after it and offers it at a bargain price of \$40 an acre. \$2,500 of this amount can remain on the land for a term of years at 5 1/2% if desired. Write,

JAS. H. LITTLE, Owner, LaCrosse, Kansas

## WILL SAVE YOU \$1.00 PER ACRE ON COLORADO DRY LANDS.

THEY will double in value in the next six months. Have some of the best bargains ever offered in the state. Also have a fine list of improved farms. Write for list, it is free.

ANDREW &amp; PALMER, 308 McPhee Building, Denver, Colorado

## LAND BARGAINS

Next excursion Feb. 5. You can buy land in our Locksburg colony, near Locksburg, Sevier county, Arkansas, at \$4 to \$6 per acre that will rent for one-fourth to one-half the cost each acre; write us for free pamphlet and map. E. N. Brown, president Kansas City Southern Land and Immigration Co., Room 708, Heals Bldg., Kansas City, Mo.

## IMPROVED FARMS

Wild lands, general merchandise stocks, hardware stocks, and city property for sale and exchange. Write me, Fremont S. Gibson, Agent, Mason City, Iowa.

FARMS FOR RENT: Send for our list of Iowa, Missouri, Kansas, Nebraska, and Wisconsin farms. Cash or grain rent. Northern Iowa Land Co., Independence, Iowa.

# LANDS AND HOMES FOR SALE

## Falfurrias,

In the Gulf Coast Country—The "California of Texas."

Reasons why you should go to Falfurrias:

**Climate**—We have as good a climate as southern California. We enjoy the most invigorating Gulf Breeze 365 days in the year.

**Rainfall**—We have twenty-six inches of rainfall against California's ten to fifteen inches.

You can raise all crops without irrigation.

We are 1,000 miles closer than California, to the great consuming markets.

We are from two to three weeks sooner with crops than California—giving us top prices for our products.

Land in California is worth from \$300 to \$500 per acre. In the Gulf Coast country from \$15 to \$25 per acre.

The farmers in California are dependent on the large irrigation companies and must pay from \$10 to \$15 per year per acre for water. In Falfurrias district every one can have their own irrigation plant by boring an artesian well, which flows sufficient water to irrigate 80 acres of land.

Through the building of the Panama canal the Gulf Coast country will become one of the most important in the United States. Large cities will spring up just as they have on the Pacific coast; splendid harbors will be created, and it will become the doorway to China and India, as it is the last point and closest to the canal.

**Go to Falfurrias NOW.**  
Make ten times the money on land that costs less.

Write today for literature and Latest Map of Texas, Free.

**Falfurrias Immigration Co.,**  
No. 3 West 10th St., KANSAS CITY, MO.

W. F. Smith Realty Co., Kearney, Neb.

**TO EXCHANGE:** TWO registered draft and one standard bred stallion and 50 head registered Polled Angus cattle. Will exchange, separate or together for land or city property. Address, Box 148, Independence, Iowa.

## A Fortune in Cuban Acres

This sounds, and is unusual, but it's a fact. A ten-acre farm in Cuba will produce more than one hundred and sixty acres in the north, because the growing season is continuous. Cuba out-classes Southern California in producing fruits and vegetables, often growing from three to five crops a year—and it's nearer eastern markets. Gen. Leonard Wood, ex-Governor General of Cuba, says: "If I were called upon at this time to designate a place where a young man of America could find the greatest opportunity, I would name the island of Cuba."

The Turiguano Land Co. have a clear and absolute title to the finest plantation on the island. The location is particularly favorable for both rail and water transportation. They are offering small tracts of land for sale at a price which makes it easy for a man of small means to own a profitable farm in Cuba. Write for booklet, etc.

TURIGUANO LAND CO., Majestic Bldg., Chicago.

## CHOICE VIRGINIA FARMS

From 25 to 2,000 acres with buildings, timber fruit, good water etc. \$8 per acre and up. Lands level, with enough slope for natural drainage. Annual yield per acre—more than the cost of the land. Many men from the level western country settling here. Prices advancing steadily. Good opportunities for general farming, stock raising, dairy, poultry etc. Unsurpassed climate, fertile soil, fine markets and near to churches and schools. Excellent rail and water transportation. Sell your high priced land and buy cheap but equally productive land in a climate where you can enjoy life. Landed investments are sure to prove profitable here.

Write today for our Real Estate Herald containing full account of the advantages of Southside Virginia and descriptions of desirable farms.

PLYE & CO., Inc., Petersburg, Va.

## GULF COAST, TEXAS

LANDS are the best in the world. We own and control 1,000,000 acres in best part of Gulf Coast country. Fine, level prairie. Black, waxy and chocolate loam, one to six feet deep, clay subsoil. Rainfall 40 inches annually. Will sell 50 acres and up at \$8 to \$18 per acre, according to size of tract and location. All within 2 to 6 miles railroads, schools, churches, rural mail delivery. Farms adjoining net \$50 to \$100 per acre a year in staple crops and up to \$800 an acre in oranges, figs, etc. Alfalfa, corn, oats, cotton, sugar cane, all kinds of vegetables and fruits without irrigation. Flowing artesian wells for rice culture. Some crop can be grown every month in the year. Write today for free book, "Opportunity," tells all about it. Cheap rates first and third Tuesday each month.

PICKETT-HAMMOND LAND CO.,  
Brazos Hotel Building, HOUSTON, TEXAS

**H. B. GRIFFITTS, BOWEN, ILL.**

Thursday, Jan. 31st, Mr. H. B. Griffiths, Bowen, Ill., proprietor Suburban Stock Farm, will offer sows sired by Top Notcher Chief, Tip Top Notcher, Kan't Be Beat, Advancer, Hanley, Big I Am, Ambition, Buddy K. IV., Gold Cloud, Mayor Jr., II Climax and C. E. Col., every one a first prize winner, and bred to Top Notcher Chief, Fancy Orion Chief, Helen's Tip Top Notcher II., Proud Advance, Buddy K. IV. and Hanley. Don't forget that Helen Blazes V., sister of the \$1,000 Helen Blazes III., and Queen Dotie, a daughter of the grand champion sow, will be two of them. Send for catalog.

**Friday, February 1st**

**Manlove Bros. & J. H. Norris, Bowen, Ill.**

**50 Head to be sold at Maple  
Lawn Stock Farm**

This stuff is all selected as tops from the two great herds having the quality and blood to qualify them for the highest honors. There are 16 tried sows, 13 fall yearlings, 21 spring gilts that are hard to fault, the pick of the crop. Also "Remington Queen," the sensational young show sow with 5 firsts to her credit. We invite all breeders and good farmers to attend our sale and we can guarantee you will not be disappointed in the character of the stuff. The noted boar, Hambletonian, and the sensational yearling, Illinois Chief, both prize winners, are in service for this offering. We should be pleased to have you see this stuff and will appreciate your attendance or your bids. Bids sent to the auctioneers or the paper representatives in our care will be properly treated. Write either of us for catalog.

**Saturday, February 2d**

**THOMAS & HOGSETT, GOLDEN, ILL.**

There will be a number of yearlings and two-year-old sows sired by Big I Am, Tip Top Notcher and other noted sires. And there will be a lot of those beautiful Ambition gilts that so many of the breeders have been admiring, several of them bred to Tip Top Notcher and some to Golden Orion. Then we have quite a herd bred to Ambition, and if his breeding does as well next year as it has in the past and his get does as well for other breeders as it has for us, no will buy them too high. We confidently believe that Ambition has sired more prize-winning and high-class stuff than any other pig of his age. Will have 10 or 15 in the sale bred to the old champion, Tip Top Notcher. Come to Golden on the 2d of February and you will be well taken care of till the following sale, February 5th. We will show you some of the best gilts and sows that will go through a sale ring this season.

**Catalogs for each of these noted  
sales will be sent to all who  
write, kindly mentioning  
this paper.**

**IMPORTANT:**

**Those who cannot attend send  
bids to Mr. D. M. Pierce, repre-  
senting this paper, in care of  
parties holding sales.**

**Tuesday, Feb**

**Fagan, Browning & McCabe, Hersman,**

Many sired by and bred to Tip Top Notcher, pronounced by most breeders the king of the breed, grand champion boar at the World's Fair, St. Louis, 1904. He is sire of state fair winners and class prize winner, also sire of highest-priced boar ever sold at auction and third highest priced sow. If you want the kind of pigs that sell high, buy a show sow in our sale bred to the world's champion.

## ILLINOIS

January 31st to February 8th Inclusive

sey Sows Sired by and Bred  
g Boars of National Reputation

**350 HEAD**

**Wed., Feb. 6th, Ed. A. Baxter, Pawnee, Ill.**

The closing out sale of Pawnee herd of Durocs. This is absolutely a closing out sale of 70 head of as good boars and sows as can be found anywhere. The boars are three herd boars now in use—Buddy K. IV. 20861, a champion hog and a hog renowned as a breeder; Kruger Again 39315, a young hog that will bear inspection anywhere, and Major A. 44567, farrowed March, 1905. They will all be sold unless Major A. is sold before sale, but the other two will positively go through the sale ring. Twenty tried sows, such as Tip Top Notcher's Baby 71202, West No. 5 105806, Choice Goods You Bet 120804, Bianca 62220, Mo. Girl 119296, Red Rover 96692 and others equally as good. Six Buddy K. IV. fall sows, two Proud Advance sows, three Tip Top Notcher sows, one Lafollette, fall yearling bred to Tip Top Notcher, Buddy K. IV., Kruger Again, Hanley and Gold Cloud with about 50 spring gilts, the very best that could be bought in ten or twelve sales last fall, all bred and in fine condition to do any man good. Stop at St. Nicholas Hotel, Springfield, Ill., night before sale at my expense.

**Thursday, February 7th**

**Fred Kraschel & Son, Macon, Ill.** 40 Head from the Tops of Our Herd

and the top of five different herds, including Perfection Maid, the dam of the two gilts that sold for \$395, and Buddy T.'s Belle, the dam of the five gilts that sold for \$655. Bred to such noted boars as Gold Cloud, champion at Illinois State Fair and sire of champions, Mayor Jr., first in class in Illinois State Fair '05, first at Indiana 1904; High Notcher, sire of Red Express and other noted hogs, and a son of old Top Notcher 8803a; also a few bred to Gold Standard, a winner in strong competition.

Sale will be held in heated pavilion and everybody will be made comfortable.

**Friday, Feb. 8th. T. W. Stoner & Son, HENRY, ILLINOIS.** 45 Head Bred Sows

Yearlings, fall-yearlings, gilts and three or four two-year-old sows of fashionable families. Our motto has always been "Individuals as well as Pedigrees." Our hogs when properly fitted have ranked second to none. This will be an opportunity to get bargains. This offering is sired by and bred to such boars as Advancer Col., a litter brother to Proud Lady that sold in Manley & Co.'s sale last winter for \$1,275. Also Stoner's Improver, Ohio Ben and Dandy Joe. The breeding of these boars is too well known to need any comment here. You will see their produce in this sale. Mr. J. W. Remley, of Lacon, Ill., will sell ten head of splendid sows, two or three two-year-old sows sired by None Such. The others are sired by Choice Goods and J. I. C. Choice Goods, one of the best sons of Echo King. J. I. C. is sired by Kan't Be Beat 28067, dam Cedar Vale Queen VIII. 70898, first in class and junior champion at the World's Fair, St. Louis. We will welcome you all. Come to the sale and bring your friends.

**February 5th**

**Ill. Banner Bred Sow Sale, 50 Head**

We will sell you the seed of champions. Every sow in our sale bred to Tip Top Notcher is a show sow. Show sows by Kan't Be Beat. Quality and breeding bred to Tip Top Notcher cannot fail to win out. Many good ones will be sold. They won't all sell high. One of the finest catalogs printed free for the asking. Farm three-quarters of a mile from depot. Address Fagan, Browning & McCabe.

**Cols. McGowan,  
Reppert and  
Keil, Auctioneers.**

Everyone interested in Durocs is invited to be present at each of these sales. You will be well entertained and the offerings are of the high standard which please discriminating buyers.

**WRITE AT ONCE FOR CATALOGS.**

## ADVERTISING NOTES.

There is offered for sale by Mr. G. L. Crookham, of Kearney, Neb., in his advertisement that appears on page 22 of this issue, 4,590 acres of alfalfa, corn and wheat land, which is located forty miles north-west of Kearney and all in one body. This will be sold, either as a whole, or in part, for what it is worth. For further particulars read the advertisement and write Mr. G. L. Crookham, Kearney, Neb.

In southwestern North Dakota there are 80,000 acres of land which the Wm. H. Brown Company, of Mandan, N. D., or 131 LaSalle St., Chicago, Ill., desire to sell. It will be disposed of at \$17 an acre and reliable agents and up-to-date farmers are wanted to help sell these lands. Maps and other information can be obtained from either of the addresses given above. The advertisement appears on page 22 of this issue.

The McMillan Fur & Wool Co., of Minneapolis, have mailed us their new circular, which we have on file for reference. This house has been established some twenty-eight years and on account of their extensive business, which minimizes the proportion of fixed expenses, are in a position to pay high prices. They make a specialty of receiving goods through shipments, and shippers find returns very satisfactory. See advertisement on page 16.

The U. S. Buggy & Cart Co., of Cincinnati, Ohio, have 250 styles of buggies which they are selling at \$23.50 and up, on a two-year guarantee. They also have 150 different styles of harness which they sell at \$4.50 and up on the same guarantee. They sell direct from the factory to the consumer. They build all their own vehicles. They consider that their National Leader, which is sold at \$49.50, is the best top buggy known and made. Write them for their catalog as per advertisement on page 16 of this issue.

The Greenville Implement Company, of Greenville, Mich., have an advertisement on page 5 of this issue of the Peerless Cooker with Smith's Easy Mixer, which they are selling at a very low price. Every cooker is absolutely guaranteed and will be sent out for thirty days on approval test. They have a special fire device which they say saves 50 per cent in fuel. The kettle is warranted solid and they state that these cookers are unequalled in efficiency, durability and low price. Write them for their catalog and special book, "How to Cook and What to Cook for Stock."

Special attention is called to the advertisement of the Smith Bros.' Loan & Trust Co., of Beatrice, Neb., in this issue. They are proposing to sell a tract of land—1,520 acres—all of which, with the exception of about 200 acres, is native prairie, located in Jefferson county, Neb., seven miles from the county seat and only three miles from another railroad town. It is quite unusual to find in eastern Nebraska, at this time, so large a tract of uncultivated land in a solid body. It is, on this account, particularly attractive as a grazing proposition for either sheep or cattle. The soil is well adapted to alfalfa. See advertisement on page 23.

There has been an advance of 10 per cent on mink and muskrats since January 1st, and one-fourth to one-half cent decline on cattle hides. Both furs and hides are extremely high. Do our readers keep posted on the markets or do they sell at home at one-half or two-thirds the real value of their furs and hides? It pays to keep posted on the big market prices and it is a very easy matter to ship your goods. To prospective shippers or buyers who mention this paper and who have not already received them, the Northwestern Hide & Fur Co., of Minneapolis, will send, on request, late prices, complete instructions, shipping tags and a beautiful little combination calendar and barometer. See advertisement on page 19.

To the man seeking an investment nothing better offers itself than good land. The justly famous Big Bend county of eastern Washington is not alone a country for the investor, but is the ideal country for the homeseeker. The soil formation is a volcanic ash, and experience has proven to those who have tilled the soil for years that the longer it is farmed the more productive it becomes. Heavy crops of wheat, oats, and barley are raised. Root crops give especially large yields, especially potatoes. Apples, pears, cherries, prunes, apricots, and small fruits do well without irrigation. The climate is exceptionally fine. No destructive summer storms and no severe winters. These lands are bound to nearly double in value in a few years and for the farmer looking for a productive country, no more desirable

place can be found. We suggest that our readers write to the Big Bend Land Company, Dept. 1, Wilbur, Wash., for literature and other information of interest. See advertisement on page 23.

The attention of Homestead readers is called this week to a remarkable book mentioned in the Legal Department, the only work of the kind published in the world—the laws of the land. It is called the "Encyclopedia of Iowa Law." The Homestead was the first farm journal in Iowa to bring the work before the readers. Last year thousands of Iowa people ordered this work and have been using it with great satisfaction. It is as interesting as a novel to read. Every active or retired farmer owning or renting property of any description should have this book. Hon. H. E. Deemer, judge supreme court, says: "Everyone should have some familiarity with the laws of his commonwealth. They touch him at every point and regulate his private and public relations. He is presumed to know the law, and cannot plead ignorance as an excuse. Your book is the only one I have seen on

which he can place any reliance." "No fifty volumes, and I might safely say, not even 100 volumes in my library could be selected that would be to me of so much practical use what the law is in Iowa on a given question, or advising others as to the law.—Judge C. B. Bradshaw." Sample pages, consisting of the work itself, the Iowa Law Dictionary, of about 108,976 words defining legal terms and phrases. This is the first law dictionary ever published in Iowa, and a great many people will look into this law dictionary for the first time. Write to the Iowa Law Book Company, Marshalltown, Iowa, and mention The Homestead and they will send you some sample pages.

When one has anything to sell he naturally feels that he wants to get into touch with an agent of unquestioned ability—one upon whose integrity he can depend. Then again, there is everything in the "know how" on the part of the agent in approaching or connecting with a purchaser. Some agents can sell to a man just once—and that is the end of it. Others give continuous satisfaction; purchasers return again and again. Such a one is Mr. A. Edgar Davis, of Lincoln, Neb. Mr. Davis has earned the name of National Real Estate Broker. With 1,500 agents under his control it is easy to see how he is in position to sell anyone's real estate no matter where it may be. If you wish to buy or sell real estate or property we suggest that you write to Mr. A. Edgar Davis, Box 412, Lincoln, Neb.

During the last few years there has been an endless amount of talk about breeding seed corn. Many farmers have tried to breed corn and have failed because they do not realize that the improvement of any kind of grain is an exact science that requires an endless amount of study. The person who has probably made the greatest success of corn breeding is Mr. W. W. Vansant, of Farragut, Iowa. Mr. Vansant has made a study of the corn question for over thirty years. During that time he has gradually improved the production of certain grades until they are now yielding ninety to 100 bushels per acre, whereas they produced but thirty-five to forty bushels when he first began improving them. Not only has there been a vast increase in the amount of corn produced, but the quality has also been greatly strengthened—one bushel of the high-grade Vansant corn is worth almost two bushels of the average corn produced by haphazard methods for feeding purposes. Mr. Vansant with his sons' assistance produces every bushel of seed corn he offers for sale. Seven farms are used on which to raise pure bred corn of seven varieties—one variety on each farm. In this way there is positively no chance of the different breeds becoming mixed. The best proof of the purity and quality of the Vansant seed is the fact that his neighbors buy from him year after year their supply of seed and each one of them knows that the buying of his seed corn is the best investment he

makes, for he has seen the gradual improvement going on year after year in the corn raised on the Vansant farms. If you are interested in improving the quality and yield of your corn you should write to Messrs. W. W. Vansant & Sons, Box 14, Farragut, Iowa. They will be glad to give you much valuable information regarding the best method of improving your corn crop.

## GOOD KANSAS FARM FOR SALE.

Don't fail to read the advertisement of the Howell Realty Company, of Kansas City. They are offering a good Kansas farm at \$15 per acre. See Lands and Homes department.

## GOOD LAND AT LOW PRICES.

If you want to go south, where climate is fine and where you can buy good land at \$4 to \$6 an acre, be sure to read the advertisement of the Kansas City Southern Land & Immigration Company, of Kansas City, in the Lands and Homes Department and write them for full particulars.

## BEST EXTRACTOR FREE.

We desire to call attention of all owners of cows to the remarkably liberal offer made in the advertisement of the People's Supply Company, of Kansas City, Mo. If you are interested in cream extractors by all means get a copy of the book, "Cash From Cream," by sending your name and address on a postal card to the People's Supply Company, Dept. 150, Kansas City, Mo. The People's Cream Extractor makes an absolutely perfect separation in from thirty to sixty minutes. Best of all, it does the work automatically.

## UP TO DATE METHODS OF SELLING.

The Glenn Realty Company, of Kansas City, Mo., have inaugurated up-to-date methods in buying and selling property which are fully explained in a neat booklet they issue and is possibly the most ideal way of selling any kind of property usually handled by real estate agents. In fact, it has become the ideal way of making quick sales in the shortest possible time at the best prices the market affords. Their advertisements appear in the leading publications of the country and have won for them a reputation of reliability that proves their worth. See advertisement on page 23.

## LEARN DRESSMAKING AT HOME.

How often one hears the expression, "I wish I could make my own clothes," and now we have found a way by which the women in the house can learn in a very short time how to make their own dresses and, in fact, all there is to learn about dressmaking. The National Correspondence School of Dressmaking, of Des Moines, Iowa, is conducting a most successful school in this line of teaching. All the teachings of this school are easily learned by mail. The terms of tuition are very reasonable, and any ambitious woman can improve her position quite materially by taking a course in

## Plowing in January in the Southwest.

The farmer in the Southwest is plowing in January and February, while you are hugging the stove and trying to keep your family and stock from freezing. He lives an out-door life the entire year and is never shut in by blizzards and the like. Snow is almost unknown and it is seldom cold enough to freeze. He has none of the hardships of winter to bear. He does not have to build expensive barns for his stock, nor does he have to feed and shelter them all winter. Neither does he have to remain idle half the year.

The Southwestern farmer has all the best of you. Besides avoiding all the discomforts and expenses of winter he has bought his land for a small part of what yours cost, and he can often raise two and three good crops on it, while you are lucky to get one good one.

Why don't you leave the cold winters and become a Southwestern farmer yourself? You can get a big farm in the Southwest for what a small farm costs in your state. In a few short years this cheap Southwestern farm will become a high-priced farm in a highly prosperous, closely settled community.

Now is the very best time for you to move to the Southwest. Two or three years hence you will have to pay much more for your land.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines

1413 La Salle Street Station, Chicago

#### MONEY MADE IN BUYING COLORADO LANDS NOW.

Messrs. Andrew & Palmer, of 308 McPhee Building, Denver, Colorado, have an advertisement on page 22 that will prove of value to those of our readers who contemplate investing in Colorado land within the next six months. These gentlemen believe that within that time land values in that state will double. They now have some of the best bargains that have ever been offered in the state and will send to the interested reader a list of improved farms which they have for sale.

#### A SPLENDID MISSOURI FARM FOR SALE.

There is offered for sale, in an advertisement on page 22 of this issue, 174 acres of fine land located in Bates county, Mo. This farm is one and one-half miles from a small town and railroad station and there are 150 acres under cultivation, forty acres in meadow land, twenty acres in pasture, the balance wheat and corn ground. This farm is located in the gas section of Missouri and gas has lately been found on adjoining land. The owner is not able to look after it and offers it at a bargain price. For further information read the advertisement and address the owner, Mr. James H. Little, of LaCrosse, Kan.

#### OWNS TOO MUCH LAND.

It is a well-known fact that Cedar county, southwest Missouri, is one of the best counties in that state. It is considered a splendid country for corn and small grain, and it is a splendid country for blue grass, clover, etc. Twenty dollars an acre is bed-rock price for land in this locality. In this issue Mr. George H. Gallup, of 1420 Grand avenue, Kansas City, Mo., is offering nine farms in Cedar county, your choice at \$20 per acre. He is quoting this price to sell the farms. He has too much land and is absolutely offering these places at two-thirds their actual value. Read his advertisement in the Lands and Homes department and write him if you want a farm.

#### OUR FUTURE ORCHARDS.

Ten years from now every farmer who sets out fruit trees this spring will congratulate himself on his wisdom in selection if he listens to and seeks the advice of experienced fruit and nursery men. A veteran among nursery men is Mr. Carl Sonderegger, at Beatrice, Neb. Any farmer who contemplates setting out a new orchard or just a few trees, a new fruit farm, or just a little patch, or is planning to reforest any part of his holdings, or wants just a few shade trees, will get dollars added to his bank account and years of experience added to his knowledge if he would write Mr. Sonderegger for counsel. This is free. But because it is free, don't think for a moment that it is not valuable. Mr. Sonderegger is offering a big line of nursery stock, field, garden and flower seeds, etc. The seeds are all tested before shipping; all fresh, clean and vigorous. His prices are attractively low. For instance, apple trees are four cents, peach five cents, plum twelve cents, cherry fifteen cents. These trees are not seedlings, but are grafted stock. Concord grapes are two cents. Forest tree seedlings a thousand for \$1. Mr. Sonderegger gives for this season a packet of a new variety of head lettuce called "May King"

to every person who writes for his large, illustrated catalog and asks for sample packet. See advertisement on page 11.

#### SAYS AUTO-FEEDER IS BEST MADE.

If you are interested in a hay press, read below the opinion of men who are capable of judging what a press is: "Kansas City, Mo., May 1, 1906. The Auto-Feeder Hay Press in our opinion is absolutely the best hay baler in the market. We have had all kinds of presses at work for us in the Indian Territory, but this one puts up the neatest and most even bales of them all. Its bales are of a dimension that load nicely in cars and sell to advantage on our open market. From our experience and the experience of others, we know of no press that has given better satisfaction. Yours truly, E. W. Taylor & Co., Receivers and Shippers of Hay." Read the advertisement on page 8 of this issue and write the company.

#### A THIRTY-ONE PIECE BREAKFAST SET GIVEN AWAY.

On page 18 of this issue of The Homestead will be found the advertisement of Mr. A. M. Phillips, of Elgin, Ill., in which is the announcement that they are giving away a thirty-one piece breakfast set to advertise their house. The set will consist of six plates, six cups, six saucers, six fruit or oatmeal dishes, six butter plates and one meat platter. They announce that every piece will be full size and the complete set will be given to anyone who will sell twelve of their large handsome 16-28 pictures at twenty-five cents each. They ask that no money be sent in advance and that subscribers of The Homestead write at once and they will be told exactly what to do to secure this set.

#### A BRONZE MEDAL CALENDAR.

The 1907 calendar of N. W. Ayer & Son, the Philadelphia advertising agents, is just out, and as usual it is one of the season's best office calendars. They have followed the same design used in 1906, but their famous medal and motto, "Keeping Everlastingly At It Brings Success," appear on a bronzed background, which gives it an exceedingly rich appearance. While the calendar is arranged with a month on each flap the figures are clearly legible across a large room. The blank spaces on the flaps are filled with new and pointed epigrams on advertising and business-building in general. The calendar is too expensive for general distribution, but while they last Ayer & Son will mail a copy to any address upon receipt of twenty-five cents.

#### MAKING MONEY ON THE FARM.

The money-making farmer is the one who knows where to get good seeds, seeds from which he can get big crops. The John A. Salzer Seed Company, of La Crosse, Wis., always has something new, something attractive, something valuable to offer in the seed line that no wide-awake, money-making farmer can afford to be without. Here's something to think about: 310 bushels Salzer's New National oats per acre, 1,000 bushels Pedigree potatoes per acre, fourteen tons Billion Dollar grass and Teosinte per acre, 300 bushels Home Builder corn per acre. These are not extravagant statements, but sober, solid facts about what can be grown from Salzer's seeds "that never fail," that you, Mr. Farmer, ought to think seriously about before planting time. These seeds, as well as every kind of seed for the garden or farm, are listed in "Salzer's Seed Book," and the farmer who has any desire

## Do You Buy Kiln-Dried or MOLINE Wagons?

TAKE a long, slender piece of Hickory that has been air-seasoned from 3 to 5 years.

Bring the two ends together—you can do it *without breaking or cracking the stick.*

Then take a similar piece of kiln-dried Hickory and try it.

CRACK! You've broken it!

This simple test tells why we store millions of feet of Hickory and White Oak in our vast drying sheds for 3 to 5 years before making it up into Moline Wagons.

It tells why we are willing to have many thousands of dollars tied up in this reserve stock for years, paying taxes, insurance and other costs, until it becomes thoroughly weather seasoned, with the wear of iron in it.

We have the largest stock of Hardwoods in the United States, yet today we're buying green timber right and left, for our 1911 output of Moline.

If you know of any large tract of Oak or Hickory, we'll thank you for telling us. We want it.

#### Air-Seasoning vs. Kiln-Drying

Lumber preserves itself in its own sap, if you give it a few years time, out in the open air. Just let nature alone—that's all. The resinous portion of the sap does the work. It fills and toughens the fibers—makes lumber live, resilient, with practically no limit to its life.

Kiln-drying drives out all the resinous sap—leaves the fibers porous, dead, the prey of quick decay. Kiln-dried lumber absorbs moisture into the empty fiber-pores. Paint can't prevent it! Hence, a Kiln-Dried Wagon will warp, crack, shrink or swell. Just as a poor horse soon "eats its head off," so a Kiln-Dried Wagon eats up money in repairs.

There are many more wagon facts you ought to have before buying your new wagon. Get the whole story in our FREE WAGON BOOK. Write for it NOW. We pay postage. The Dealer who is particular about the kind of wagon his name is painted on, sells the Moline, the Ironclad.

MOLINE WAGON CO., MOLINE, ILL.

## I Make Harness and Sell It Direct to You

This Heavy Team Harness Would Cost You \$35 at Your Dealers'. I Sell It For \$24

All Shipments on Approval.

The way to get a dollar's worth of harness for every dollar you pay is to buy direct from the makers. A \$35 harness at your dealers' is no better than it was when the manufacturer sold it to the wholesaler for \$24. Because the wholesaler's profit and the retailer's profit bring the price up to \$35 to you, doesn't make the harness one bit better.

It's the long way around that costs so much. If you went from Omaha to Chicago by way of St. Louis, it would cost you more than if you went direct, wouldn't it?

Why buy harness in the round-about way? Even the big mail-order houses charge you one profit more than I do.

I make my harness and am satisfied with a fair profit. Big sales and small profits are better for me than small sales and big profits because every new sale means a new friend and then I sell to his friends. Those who buy my harness say I save them about a third—sometimes a half.

I make 50 styles of good harness. My line is complete. Each set that leaves my shop is the product of workmen highly skilled in harness making, and is guaranteed to be from the best oak tanned leather—the only kind that ever gets into my factory.

I save you 30 to 50%, because I sell direct,—no agents, salesmen dealers nor middlemen of any kind stand between

you and my goods; you get better harness, greater selection, and the maker's guarantee of perfect satisfaction or your money back.

And you take no risk dealing with me, because my word is good, and the Company of which I am President, is responsible for any promise I make; look them up in the Commercial Agency books, or ask any bank or express company where we are best known here in our home town.

Now, about my "leader,"—the \$35 set for \$24. The cut gives you a fair idea of it. This is a genuine bargain—a splendidly made 1½-in. team harness, strong, stylish in appearance, and made of the very best grade oak tanned leather.

And it is actually worth more today than it was when we made it up, because leather is advancing in price, as you know.

So, if you want this special harness value, please order promptly, as I shall probably not be able to advertise the set again at \$24. Just send me the money and the harness will go to you at once with the distinct understanding that I will refund the price and pay charges both ways if you are not perfectly satisfied.

My big, free Harness book is full of money-saving offers. Send for it and compare our prices, styles and qualities with what your dealer offers. Write me today. Address, R. M. Knox, Pres., Western Harness & Supply Co., 613 Main St., Waterloo, Iowa.

to be a money-maker will not miss the opportunity to secure a copy of this book free of charge and learn for himself about the wonderful bargains Salzer has to offer in Northern Grown Pedigree Seeds. Don't fail to write today to the John A. Salzer Seed Company, La Crosse, Wis. See advertisement on page 11.

#### A PROFITABLE NEW BUSINESS.

One of the latest and most profitable arts which our readers are taking up is the study of taxidermy or the stuffing and mounting of all kinds of birds and animals and the tanning of skins. This is a most fascinating business and can now be learned very easily in one's own home. Every hunter and nature-lover should know how to mount specimens and to make skins into beautiful rugs. If you would like to learn this art, we would recommend that you write to the Northwestern School of Taxidermy 8 H. St., Omaha, Neb., for their catalog, which fully explains how they teach the subject by mail. They have thousands of students, and we understand that they are giving the best of satisfaction. Read their advertisement on page 16 and write them today.

#### CAMPBELL'S DRY FARMING SYSTEM IN COLORADO.

In the heart of sunny Colorado lies perhaps some of the finest farming land in the world. It has everything to its advantage—location, climate and soil. It was formerly thought by farmers that this land could be farmed only by irrigation, since the supply of water in the soil was not always sufficient to mature the crop. In some years there was no scarcity of water in the soil. Under such circumstances the crop matured well without being irrigated. The fact that much of this land could be farmed the greater part of the time without irrigation led investigators to attempt to work at some plan whereby the water already contained in the soil could be conserved and excessive evaporation thus prevented. Professor Campbell, an earnest western investigator, was one of the first to discover a system of conserving the soil moisture of these lands. In general, this system advances the theory that by keeping a dust mulch on the surface of the land at all times the pores of the soil will be closed and the moisture contained in the soil will not be able to escape into the atmosphere. At first this scheme did not seem well adapted to all crops, as it is not always possible to cultivate some crops throughout the summer. The plan, however, proved so successful with the crops that it was tried on that farmers in this land have devised different means of maintaining a mulch on nearly every crop, and now a great deal of this Colorado land in the vicinity of Greeley may be farmed without being irrigated. Greeley is right in the heart of the most beautiful country; it is in the vicinity of the famous potato and sugar beet growing section. While these two crops are per-

haps the principal ones on some farms, there are other crops which grow equally as well; in fact, most anything can be raised on this soil successfully. Those of our readers who might be interested in this country will do well to write for map and information to Mr. J. S. Grable, of Greeley, Colo. Visitors to this country are shown the finest kind of accommodations at the hands of this gentleman. When writing kindly mention this paper. See page 23.

#### BIG TRACT OF LAND CHEAP.

In this issue will be found one of the greatest offers in the way of a large body of cheap land that has ever been advertised in The Homestead columns—44,000 acres in south Missouri at \$4 per acre. The owner says that every acre of this land is in blue stem prairie grass, from knee to waist high. There is some timber on this land, but no underbrush. The soil is of the rich limestone variety and 25,000 acres of the tract is tillable and will grow corn, wheat, oats, timothy or clover in abundance. About 19,000 acres is rolling, but is splendid grass and fruit land. This tract is near a county seat and railroad station, and is watered by living springs and branches. This tract is offered by Mr. J. H. Lipscomb, of Fidelity Trust Building, Kansas City, Mo. See the advertisement in the Lands and Homes department and write Mr. Lipscomb for further particulars.

#### A RELIABLE INSTITUTION, ESTABLISHED THIRTY YEARS.

Drs. Thornton & Minor, of Kansas City, specialists in rectal diseases and diseases of women, have established a reputation during their thirty years of practice that certainly stands the test. Men and women from almost every part of the country testify as to their ability in the lines in which they specialize. This institution has become as much a part of Kansas City as any bank in the city. The building which the doctors own has been fitted up with every modern convenience, and sufferers who go there will be treated exactly as represented by the literature sent out. Read the following: "Kansas City, Mo., April 20, 1906. Drs. Thornton & Minor, Gentlemen:—In 1886 or '87 I was afflicted with a very bad case of piles, with which I had been annoyed for several years. I called upon you for treatment and was relieved within a few weeks, to my entire satisfaction, and at a reasonable cost. I have not been subject to a subsequent attack. Very truly yours, Thomas T. Crittenden." The above testimonial is certainly worthy of comment, as it comes from Mr. Crittenden, ex-governor of Missouri, and now referee in United States court in Kansas City. However, this is nothing unusual, as Drs. Thornton & Minor have thousands of testimonials from satisfied patients in all parts of the central states. The doctors have recently established a branch office at St. Louis to accommodate the many patients who come from the East. Notice the announcement

of these physicians in this paper, and if you are troubled with any of the diseases which they treat, do not fail to write them or fail to visit their institution.

#### THE KALAMAZOO STOVE.

It would take a page of this paper to enumerate the points of the superiority of the Kalamazoo stoves and ranges over the common kind. They save fuel, have lasting qualities, they are easily operated and the company stands back of everything that is put out. In other words, your money will be returned if everything connected with the Kalamazoo stoves and ranges is not as represented. These stoves are sold direct to people who use them, and consequently buyers are saved the dealer's profit of from 20 to 40 per cent. The matter of saving \$10, \$15 or \$20 on a range is worth considering by all persons who have to purchase in the near future. This is especially true when you consider that Kalamazoo goods are high-class in every way. They are not made to sell, but to use, and they will do a lifetime. Send for catalog No. 165 to the Kalamazoo Stove Company, Kalamazoo, Mich., and mention The Homestead when you write.

#### FIFTY-SEVEN THOUSAND ACRES OF SOUTH TEXAS LAND FOR SALE.

The reader of The Homestead who is seeking for an investment in real estate in a locality where land values are liable to double within the next twelve months, should read the advertisement that appears on page 22 of this issue of the Gulf Coast Land & Townsite Co., of Guthrie, Okla. This company owns 57,000 acres of land in southern Texas, 70 per cent of which they claim is fine agricultural land, the balance good pasture. There is a railroad running through the tract with a town site and station already located thereon. Ten thousand acres of this land has already been surveyed and is now ready for settlement. The tract is located fifty miles from the gulf and in an ideal climate, where oranges, lemons, figs, grapes and peaches grow to perfection. They also have 50,000 acres of level prairie land, free from brush, within sixty miles of the coast and within two miles of a railroad. The cost at which they are selling the land can be found by a perusal of the advertisement. For further particulars address the company as above. Their advertisement appears on page 22 of The Homestead.

#### A PROSPEROUS BUSINESS THAT IS NOW A QUARTER OF A CENTURY OLD.

It is only in recent years that business firms in this country have been able to point backwards to any considerable period of existence in the commercial world. We now have some firms, however, that can rightly claim prestige by reason of having faithfully catered to public needs during a long period of time. Such a firm is the Reliable Incubator and Brooder Company, of Quincy, Ill. The year 1907 marks the twenty-fifth anniversary of the establishment of their business. The estimate placed by the public upon the product of this firm is evident by the constant patronage and increasing trade which they have enjoyed during the past twenty-five years. Their trade has grown to such extensive proportions that the name "Reliable" in connection with incubators, brooders and poultry supplies is known all over the world; in fact, their goods have come to be recognized among poultry producers as a standard for excellence and reliability. It has been the constant aim of this concern to keep abreast with the times and to manufacture a strictly high-grade line of goods. Their catalog this year they have styled their silver jubilee edition. It is an interesting book of 136 pages. Those desiring it should address Reliable Incubator and Brooder Company, Quincy, Ill., mentioning The Homestead.

#### HEALTH, WEALTH AND HAPPINESS AT FALFURIAS, IN THE GULF COAST COUNTRY.

Three things that man wants most are health, wealth and happiness. There is no happiness without health, and very little happiness without some wealth. While the people of the North were shivering around their stoves at Christmas time, the people in the Falfurias district in the Texas Gulf Coast country were gathering strawberries, oranges and other fruits. One man who went to the coast country with a view of buying land, told the writer that there were fourteen different kinds of vegetables on the table where he took his Christmas dinner. This is certainly remarkable, and surely has a tendency to create health. Speaking of wealth, it would seem that where land is \$100 to \$150 per acre and crops pay 5 per cent on the investment, or at most 10 per cent, it would seem pretty hard to become very wealthy. Furthermore, it would take all the energy the farmers have to make in summer enough to keep them through the winter. In the Falfurias district you can buy land for one-tenth of the above amounts and make ten times as much per acre. Why will you work six months simply to live the other half of the year? Why not go to Falfurias and live every day in the year and still make money. What will the farmer do who has a big family and who has the welfare of his boys and girls at heart, with his 160-acre farm? Can he cut it up and give each one a small tract and

I put MACBETH on my lamp-chimneys as I am satisfied to be known as the maker of the only good lamp-chimney.

There are other lamp-chimneys, but their makers fail to own them. It's no wonder.

My Index is useful to everyone who owns a lamp, and it's free.

Address, MACBETH, Pittsburgh.

## These Are Facts It Pays To Remember When You Buy a Manure Spreader.

**I N I. H. C. SPREADERS—Corn King and Cloverleaf**—one lever controls every operation. Operator can remain seated from time he leaves the barnyard until he returns.

Self-adjusting, vibrating rake levels the load and brings the manure up squarely to the cylinder.

Cylinder is large and runs easily, and the teeth are long, square, high carbon steel.

Apron is equipped with three sets of rollers attached to slats, running on steel tracks. Is driven from both sides and cannot bind.

Apron drive clutch is automatically thrown out of gear when load is fed out and again when apron has returned. No attention required.

Range of feed is three to thirty tons per acre with ten speeds.

Ends of apron slats are protected so that no manure can work in and bind or clamp the apron.

Driving axle is extra large—made of cold-rolled steel.

Front axle is attached to frame by means of ball and socket joint.

Chain drive, direct from rear axle to cylinder, gives easy transmission of power.

The wheels are steel with staggered spokes. Both rear wheels are fitted with lugs, affording ample traction in wet or frozen fields.

Seat is hinged so it can be turned forward and kept clean while loading.

Box is attached to frame by means of heavy steel cleats.

Frame is made of carefully selected lumber re-enforced at corners by metal braces.

That's a good deal to say of a manure spreader, and yet that is by no means all you should know about I. H. C. Corn King and Cloverleaf Spreaders before you buy.

Those are the main points, and they are sufficient to indicate the superiority of the I. H. C. line. They tell you not to buy a spreader until you have seen the Corn King and Cloverleaf Spreaders.

The key-note in the I. H. C. line is strength and simplicity of construction. Strength in every part means much, for a manure spreader has hard work to do. Simple construction means that it will not get out of order, that it will have light draft and be easily operated. Those are the things you want in a manure spreader.

I. H. C. spreaders are made in two styles, Cloverleaf, an Endless Apron machine, and Corn King, a Return Apron machine; each is made in three sizes.

Call on the Local Agent or write for catalogues.

**INTERNATIONAL HARVESTER COMPANY OF AMERICA, Chicago, U. S. A.**  
(INCORPORATED)

tell them to make a living? No; they would become paupers in a short time. Shall he send his boys and girls to the city to struggle and be ruined, or shall he keep them in the clean, elevating atmosphere of rural life? Why not sell the 160 acres, take the money and buy five times the amount of land in the gulf coast country, and with the balance, which he will have left, improve and cultivate the land? Ten acres in the coast country will make each family of his children and grand children a good living. Now is the time to take care of this opportunity. There is not a great deal of this land left. It will all be sold in a year or two and those that hesitate will be too late. Read the advertisement of the Falfurias Immigration Company, of Kansas City, in this issue and write for full particulars. They will send you literature about this wonderful country with its rich alluvial soil where crops pay from \$50 to \$300 per acre on land that you can now buy for \$15 to \$25 per acre.

#### A \$500 FARM.

Yes, a real farm and a house to live in, for only \$500, and good, tillable land that produces abundant crops in a section close to large markets. Perhaps this is not possible anywhere except in "Old Virginia," but it's a sure enough fact there. Not a large farm, of course, but twenty-five acres is enough for one man if he tends it properly. And the tendency today is to smaller tracts, worked "intensively," as they say at the agricultural colleges. There are thousands of men today working for wages, in shops and offices, who would be better off to look up this proposition and get to work for themselves, and their families would be infinitely better off. Nor is it necessary to have the entire amount in hand when purchasing, as easy terms of payment can be arranged to suit the circumstances of each purchaser. Any of our readers who are interested in this paragraph should write to Mr. F. H. La Baume, agricultural and in-

dustrial agent, N. & W. Ry., Box E H, Roanoke, Va., for the two pamphlets, "Back to the Country" and "What \$500 Will Do in Virginia." They contain full description of these lands, maps, etc., and are gladly mailed to anyone who will ask for them. When writing, please mention The Homestead.

#### HIGHLAND PARK COLLEGE

has grown to be one of the very largest institutions of learning in the West, purely through excellent business management. It is not under state or church control, but is a purely business enterprise. It was organized seventeen years ago by President O. H. Longwell and a company of wealthy citizens of Des Moines, Iowa, and almost \$700,000 has been expended in building it up. President Longwell has demonstrated that a great educational institution can be built up on business principles without state or church

aid. The school has nine large buildings and is as thoroughly equipped as any of the state schools. Besides doing regular college work, the institution maintains a department of education for the training of teachers; a college of pharmacy, which is now the largest college of pharmacy in the United States; a college of engineering, rapidly becoming one of the largest and best-equipped engineering colleges in the country; a business college, a college of shorthand and typewriting, a college of telegraphy, a thoroughly-equipped college of music with eleven teachers, a college of oratory and a college of penmanship and drawing. The present daily attendance, we are advised, is about 1,500 students, with an attendance annually of something over 2,000. This is certainly a record of which to be proud. The spring quarter opens February 19th, but students are admitted any day they wish to enter. Young people interested in obtain-

#### THE OLD RELIABLE ..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.

TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.

Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our famous Iowa No. 2 for \$12.50. Send for free catalog.

Bovee Grinder & Furnace Works, Waterloo, Ia.

Ruberta, first-prize yearling sow at the Iowa State Fair, 1906. She is a daughter of Tlentsln, a half brother to Crimson Wonder. Ruberta is one of the greatest sows that was out last year and she is one of the greatest Duroc Jersey sows that will be sold this season. Bred to the \$5,000 boar, Junior Jim, she should be one of the great attractions of the year. Will be sold in the F. E. Garrett sale at Lohrville, Iowa, January 25th.

ing a practical education at a thoroughly reliable institution should address President O. H. Longwell, Des Moines, Iowa, for a catalog giving full and complete information.

#### CHOICE IOWA FARMS FOR SALE.

There is advertised for sale (by the owner) on page 22 of this issue, a choice Iowa farm containing 567 acres. It is located in Kennebeck township, Monona county, and is five miles from Onawa, the county seat, and two miles from Turin, both being good railroad towns. The improvements consist of a good house (about six rooms) with brick foundation and cement cellar; large barn, nearly new with brick foundation; ample cribs, bins, sheds, hay shed, good well, windmill, etc. The buildings are well painted and in good condition and the soil is a very rich and dark loam, no rocks or sand, lies nearly level and is easily worked. About 300 acres are under cultivation and except fifteen acres, which is in good timber along the Little Sioux river on the west boundary line, the remainder is splendid farm land. As a stock and grain farm it has no superior. It is well fenced and will sub-divide nicely. The owner, Mr. Z. T. Lindsey, of Omaha, Neb., states in the advertisement that he will sell 300 acres, including the improvements, at \$75 per acre and will make a reasonable price on the remaining 267 acres which are partly cultivated and partly raw land. If interested write him for photographs of buildings which will be sent on request.

#### FARM HARNESS SOLD DIRECT TO YOU.

The way to get a dollar's worth of harness for every dollar you pay out nowadays is to buy direct from the makers. This plan of selling direct is the great business policy of the day. The wholesaler's profit and the retailer's profit bring the price of a harness far above what it should be. It is absolutely too long a way of connecting the user with the maker. Why buy harness in such a round-about way when you can buy it direct from Mr. R. M. Knox, president of the Western Harness & Supply Co., of Waterloo, Iowa? This firm ship their harness only on approval. They have perfected their system of selling direct so that they can save from one-third to one-half the price which you ordinarily pay for this line of goods. With every harness which they put out they include a guarantee of perfect satisfaction or your money back. Remember when you deal with this company that you are dealing with its president and that he is responsible for every promise that is made. Look them up the commercial agency books or ask any bank or express company about them. Now if you want a first-class harness just send in your order according to their advertisement on page 27. They will also be glad to send you a free harness hook which is full of money-saving offers. Write before you forget to this firm and kindly mention this paper when writing.

#### ARE THE CHILDREN STUDYING.

When the little bundle of books is unstrapped or hauled out of the bag and spread on the sitting room table in the evening, and the hard-thinking little heads are bending over tomorrow's lessons, do you ever see the eyes begin to blink and look tired and sleepy before it is really bed time? Yes, surely you see this sometimes. And of course the lessons are not very interesting and the little students, tired of school, would rather read a thrilling story, but, nine times out of ten, there is another reason—the light they are working by. If you have a kerosene or coal oil lamp on the table you have the right quality of light, but perhaps not enough light, and in any case it is in the wrong place. Science and practical use have proven that the light from oil lamps is more restful and healthful to the eyes than any other kind. But it has also been demonstrated, and it is only natural when you stop to think of it, that the light should be thrown downward from above, and not on a level or below the eyes of the one reading, sewing or working at anything else. It is the close, direct rays of the light that strain the eyes, makes the wearing of glasses necessary years before they would have had to be worn if proper care had been taken. Furthermore, the lamp

## Increase Your Corn Yield

### By sorting your seed corn

A uniform stand can never be obtained unless your planter drops the same number of kernels in every hill. If it is set to drop three kernels it should drop three, not two, four or any number but three **everytime**. Almost any good planter will do it if the seeds are of a uniform size but **no planter has ever been made that will adjust its plates to fit the kernels—the kernels must fit the plates. Seed corn cannot be properly sorted by hand—this is demonstrated by the fact that four, five and sometimes more stalks appear where there should only be three. The result is stunted stalks and stunted corn and therefore a waste of your good ground. There is only one possible way of securing seed corn of a uniform size—to use a**

### Morecorn Sorter

which will sort **every** kernel for length, width, and thickness—every kernel will fit the plates of your planter. After your corn is sorted by the "Morecorn Sorter" if your planter is set to drop three kernels it will drop three, 100 times out of every 100. What does this mean to you—three healthy stalks in every hill—an **increase in your corn yield of from five to eighteen bushels per acre**. Doesn't this mean enough to you to write for our catalogue and know more about this wonderful new sorter? Write for it today.

The "Morecorn Sorter" is doing away entirely with hand sorting. It is not a complicated, expensive machine, just a simple well-made sorter that will last a lifetime. Your increase in yield will pay for the sorter twice over, the first year. Many farmers make considerable extra money by sorting their neighbors' corn.

Send for the booklet. Better do it today.

### The Monarch Self Feeder Co.

95 Main Street

Cedar Falls, Iowa

5 TO 18 MORE BUSHELS  
TO EVERY ACRE

on the table is always in the way, throws off too much heat for one to remain close to it in comfort, and doesn't shed a bright light for any distance. These are unnecessary discomforts and inconveniences that the father reading his paper of an evening and the mother doing her sewing must feel just as keenly as the children over their studies. We say unnecessary, because we know of one way, at least, that our readers can overcome these difficulties, add to the appearance and coziness of their homes and still save money in the long run by doing so. It is not often that one can save money and add to their comfort at the same time, but as this clearly seems to be the case in the use of the Angle Lamp we want to advise our readers to investigate this popular method of lighting. It is constructed upon an entirely new principle, its great advantage being that it is suspended from the ceiling or attached to the side wall and throws a bright, warm, restful light downward, without any under-shadow. It gives a light which is just the opposite of those white, glaring, penetrating lights so fatal to the eyes. Yet it is fully as bright, more convenient, safer and less expensive. The Angle Lamp may be turned on or off the same as a gas jet, and no matter how long or how high it is turned it will never smoke or smell. It appears to be a wonderful contrivance, and we understand that the manufacturers are so confident of its giving complete satisfaction that they send it out on thirty days' free trial. Its money-saving feature lies in the fact that it economizes oil, a quart lasting for sixteen hours when burning full height. Our experience with ordinary lamps has been that they use a quart of oil in four or five hours' steady use. This means a big saving in a year. If our readers are interested they may write to the Angle Manufacturing Company, 78-80 Murray St., New York City, and ask for their interesting and instructive booklet "33" on the lighting question. We are sure they will be well repaid for the trouble. See advertisement on page 6.

#### THE BEST OF RIDING MACHINERY.

Walking behind farm machinery of any kind is a thing of the past and if our readers will turn to page 16 of this issue they will there see illustrated a most conven-

## DEFORMITIES CURED!

ALL PERSONS CRIPPLED OR DEFORMED, LAME OR PARALYZED, SHOULD INVESTIGATE AND SEE WHAT IS BEING ACCOMPLISHED AT THIS INSTITUTION FOR THESE CASES.

**CROOKED OR CLUB FEET** of any variety, and at any reasonable age, can be made straight, natural and useful. The methods used are mild; no cutting, no plaster paris, no severe or painful treatment of any kind, and the result is guaranteed.

**POTT'S DISEASE**, when treated in time at this Institution, will result in no deformity; paralysis will always be prevented; the health and strength of the patient is at once improved; the growth not interfered with. Plaster paris is never used.

**SPINAL CURVATURE**, even in long standing cases can be perfectly corrected by the new and improved methods in use here; plaster paris, felt or leather jackets are never employed. Names of patients recently cured, after all ordinary methods and doctors had failed to afford relief, will be furnished on application.

**HIP DISEASE** can be cured without surgical operations or confining the patient to bed. Abscesses, shortening deformity and loss of motion can always be prevented, and, if already present, can be cured. The methods used here in the cure of Hip Disease in all its stages are radically different and more successful than those generally employed. Write for information.

**PARALYSIS AND RESULTING DEFORMITIES**. For no class of afflictions has greater preparation for successful treatment been made. Deformities of the limbs, joints or feet, resulting from Paralysis, can always be corrected without surgical operations or severe treatment. Paralysis should never be neglected; children never outgrow it; it is not incurable.

**CROOKED AND DISEASED KNEES, HIPS, HANDS, LIMBS** and deformities resulting from Rheumatism are successfully treated without pain.

This is the only thoroughly equipped institution devoted to the cure and correction of deformities. Examination and consultation by mail or in person, free of all charge. References furnished on application. Pamphlets sent on request.

THE L. C. McLAIN ORTHOPEDIC SANITARIUM, 3100 PINE STREET, ST. LOUIS, MO.

ient cart which is attached to a harrow. This will be found in the advertisement of the Rock Island Plow Company, Rock Island, Ill. This cart sells delivered at the buyer's railroad station for \$8. With four horses on a sixteen-foot harrow and one of these carts attached, one man can get over thirty and forty acres a day and he just

as fresh for the evening chores as he was when he started the day's work. A man nowadays is behind the times who walks while harrowing. Now, if you decide to cut out walking, you cannot do better than write the Rock Island Company for their descriptive booklet, which is sent free. Of course, every man in the corn belt knows that this Company makes plows of all kinds; disk harrows, planters, cultivators, hay loaders, etc. A riding plow made by this company is so planned as to place all levers within easy reach of the driver and the power of all levers is so multiplied as to make it mere child's play to plow well. Our suggestion is that each subscriber who is contemplating the purchase of new machinery of any kind should read the advertisement of the Rock Island Company carefully and send for booklet relating to the line of machinery that each are especially interested in. Address Rock Island Plow Company, Rock Island, Ill., and please mention this paper when you write.

#### GASOLINE ENGINES FOR COLD WEATHER WORK.

If any of our readers are puzzling over the use of powers we respectfully direct their attention to the Fuller & Johnson Frost-Proof gasoline engines, manufactured at Madison, Wis. We are inclined to believe all the really essential features of any gasoline engine are to be found in the Fuller & Johnson engines, and in addition we know that the manufacturers have made a special study of the matter of frost proofing. That is a most important matter to consider when a farmer is installing a power. A mechanic's work is indoors, at least his power can be, where it can be protected in freezing weather by artificial heating. Not so with the farmer. He wants a power to go wherever his work is, in the yard, the field, lot, the well, in the woods, etc. He must have an engine that is not affected by weather conditions. It can readily be seen that an engine that might be considered first class for shop work would be of very little use to the farmer, at least in certain seasons. The Fuller & Johnson people have made a very nice solution of the matter of cooling and protection in cold weather. It makes their engines specially valuable for farm work. See their advertisement on page 17 and get their catalog for particulars before making up your mind about a farm power.

The word "honest" has been shuffled around the world and looked at from so many viewpoints that it is a rather hard proposition sometimes to tell just what it actually does mean. "Honest Construction" is the subject of the Litchfield story this week on page 5. Read it.

Top Notcher's Last, the last son of Top Notcher, one of the most noted Duroc boars the breed ever produced. This boar was first in class at the Ohio State Fair, 1905, second at same fair in 1906, and first at New York State Fair, 1906. A number of gilts sired by this noted boar are included in the forthcoming sale of Messrs. Watt & Foust, of Cedarville and Xenia, Ohio.

## DELANY'S IMPROVED SEED CORN SORTER

Is cheap, easy to operate, makes positive separations and has large capacity.  
 It removes all dirt and chaff which tend to clog the planter, thus enabling the latter to do its best work.  
 It holds the corn until a perfect grade is established and does not allow good seed to fall over with the bad.  
 The time saved in planting will more than pay for it, not counting the increased yield caused by its use.  
 Hundreds of machines in successful operation.  
 Send for free Seed Corn Booklet C, showing our line of Sorters. Get your orders in early.

## FIELD NOTES.

Mr. Grant Summers, of Malvern, Iowa, is offering a few good Duroc Jersey boars for sale.

Chester White boars and bred sows and gilts are offered for sale by Mr. J. M. Janssen, of Sibley, Iowa.

Mr. E. O. Wolcott, of Gilmore City, Iowa, in sending change for his advertisement found on page 43 of this issue, writes as follows: "The Poland China bred sows I am offering for sale range in age from gilts to two

years old. They are of good size and quality and will be priced to sell."

Mr. Jas. A. Polley, of Adaza, Iowa, claims February 13th as a date on which to hold a public sale of Ohio Improved Chester White hogs.

Mr. E. N. Bergren, of Stanton, Iowa, claims February 22d as a date on which to hold a public sale of Poland China brood sows.

Mr. Clyde H. Smith, breeder of Duroc Jersey swine, Riceville, Iowa, reports that all of his Duroc Jersey boars are sold. He is offering for sale in his advertisement on page 45 of this issue a few choice gilts sired by well bred and popular boars.

Messrs. Norrish & Bevington, of Kingsley, Iowa, breeders of Duroc Jersey swine, announce in their new advertisement on page 35 that all their boars are sold and that they wish Homestead readers to write for their catalog for their bred sow sale which takes place January 31st.

Mr. D. M. Norton, of Sanborn, Iowa, writes: "I am all sold out of Shropshire ewes, but am expecting a new importation from Canada about February 1st. Perhaps it would be well to discontinue my advertisement for a time, as I am tired of answering letters. The Homestead brings results."

Mr. George Karchner, of Wilcox, writes us January 1st the following: "My Durocs are all doing fine. I have disposed of all my male pigs and could have sold many more. I am getting inquiries right along for gilts, but am holding them for my spring brood sow sale, which will be held February 25th."

Mr. A. Latimer Wilson, importer, of Creston, Iowa, writes that he will have twenty black Percheron stallions to land on the steamship "Minneapolis," January 20th at New York, and will be in his stables by January 26th. One of these stallions will be reserved and he will sell the choice of the balance at \$1,000.

On February 6th, Mr. George H. Miller, of Harlan, Iowa, will make a public sale of forty-two head of Short-horn cattle at the sale pavilion, at which time he will sell a splendid lot of cows and heifers and an extra good bunch of bulls. Just ask Mr. Miller to send you a catalog if you are interested in Short-horns.

Don't forget the Duroc Jersey sale of Mr. August Voigt, at Portsmouth, Iowa, on January 19th. If you want a sow bred to the great boar, Kruger Lad, the first-prize state fair winner, you will have to go to his sale. One of the sensational Duroc sows of the season will be a daughter of Lafollette, bred to Kruger Lad, in this sale.

Messrs. McKeever Bros., breeders of purebred Short-horn cattle, of Farley, Iowa, write: "We wish to report the sale of a very superior young bull by Victoria's President of M. V. to Mr. Ed. Warren, of Curlew, Iowa. Mr. Warren said: 'Victoria's President is the best bull I have seen since I left the old country, and the young bulls were so much alike a man might shut his eyes and pick a good one.' We predict a scarcity of

Lady Cruger 39754a, first-prize under year sow Illinois State Fair, 1906, included in the Duroc sale of Messrs. Reil & Cooper, at Ferris, Ill. See field notes.

good young bulls and much higher prices later in the season."

The Adams Seed Company, of Decorah, Iowa, are offering re-cleaned and selected clover seed for sale in their advertisement on page 17 of this issue. They can furnish Homestead readers with medium red, mammoth alfalfa, white timothy and blue grass seed. Interested readers send to them for their catalog of garden seeds.

Mr. W. R. Webb, of central Clay county, Iowa, breeder of O. L. C. swine, is offering March gilts for sale in his advertisement that appears on page 40 of this issue. Mr. Webb in sending in his copy says: "I have thirty healthy O. L. C. bred gilts that I would like to sell to start new herds. These are bred right in every way and are right up near the top."

Mr. M. W. Savage, proprietor of the International Stock Food Company, has purchased the Angora buck that captured the first premium at the Minnesota State Fair, and also the Angora buck taking the second premium at the same fair. Mr. Savage has seventy-five Angora does on his International Stock Food Farm, located a short distance from Minneapolis.

We call attention to the advertisement of C. L. Percival Company, who handle a line of ice plows and ice tools made by Wm. T. Wood & Co., who have the reputation of making the highest grade ice-tools made in this country. A postal will bring you their descriptive circular and prices. We can recommend Messrs. Percival Company as a responsible and reliable company.

Mr. W. I. Toop, of Auburn, Iowa, has a few very choice Short-horn bulls for sale. Most of these are sired by Gondolier, the well-known Scotch bull that formerly headed the herd of Mr. C. S. Buckley, at Holstein, Iowa. Mr. Toop is pricing these bulls very low, considering their quality. If any of our readers want a good young bull they should write him at once.

A good grain and stock farm consisting of 193 acres within one mile of Macon, Mo., a town of 6,000 inhabitants, is offered for sale by Messrs. W. P. and P. A. Blackford, of Hillsboro, Iowa, in their advertisement that will be found on page 22 of this issue. There are good improvements and the farm will be disposed of at a bargain if sold before February 1st. Long time will be given and easy terms.

Mr. J. T. Scarff, of Salem, Iowa, breeder of Ohio Improved Chester White swine, whose advertisement is found on page 40 of this issue, writes: "I wish to say that I have had a splendid trade and think The Homestead the best advertising medium I have ever tried. I have sold all of my boars, but have a few good gilts left that are bred to an extra heavy-boned, lengthy, hog. I am pricing them at \$20, safe in pig."

Mr. John Weighton, of Audubon, Iowa, will sell forty head of choice brood sows in the Claremont bred sow sale on January 22d. These sows are sired by the well-known Duroc Jersey boars, Orion, Proud Advance, Ohio Chief, Improver's 2d, Top Notcher and Sensation blood lines; they are bred to Audubon, Proud Advance, Claremont's Prince and Claremont's Model. Send to Mr. Weighton for catalog and arrange to attend this sale.

Mr. James P. Spearman, of Papillion, Neb., one of the very best young live stock auctioneers in the West, has a few February dates left and will be pleased to hear from anyone wishing a first-class auctioneer. Mr. Spearman's services have given good satisfaction and he is being employed by some of our best western breeders. Any of our readers who have not already secured their auctioneer should write Mr. Spearman at once.

On January 26th Messrs. O. R. Stevenson and Lee Cantine will offer forty head of choicely-bred sows and gilts for sale. This offering is rich in the blood of Tolstoy, the sire of Crimson Wonder, Glendale Critic, Crimson Wonder Jr. and scores of others, mingled with the blood of Pericles, the hog that made Orion famous. It is the best offering they have ever made. They have always purchased the best at the sales they attended. See advertisement on page 44.

Mr. Grant White, of Afton, Iowa, breeder of Duroc Jersey swine, will hold a public sale on February 20th. At that time he will have sows for sale bred to Proud Advance 23549, Ohio Chief 2d 41607, and Proud Crimson I Am 53653, and sired by Proud Advance, Ohio Chief, and Crimson Wonder I Am, Orion and Buddy K. IV. Mr. White writes us that he will have the best offering that he has ever put through the sale ring. His advertisement in its new form appears on page 45 of this issue.

A 240-acre sheep farm, situated five miles west of Chariton, Iowa, the county seat of Lucas county, is offered for sale by Mr. W. S. Long, its owner, in the advertisement that will be found on page 22 of this issue. The farm is all newly fenced, sheep and hog tight and is principally rolling land, excepting fifty or sixty acres of bottom land. Forty acres was in corn the past year and the balance is in timothy and clover, principally clover. The farm is offered at a very low price and on reasonable terms.

Messrs. Ruebel Bros., of Rockwell City, Iowa, will hold their third annual sale of Poland China bred sows on February 12th. At that time they propose to sell sixty head consisting of matured sows, fall gilts and spring gilts. They will be bred to R's Keep On, one of the great sons of the noted Keep On 61015, and Iowa Chief by Ed Klever's Thickset. Iowa Chief is considered by them the best Thickset boar in Iowa. Some of the sows are bred to Moderator, the great young boar that Messrs. Ruebel Bros. purchased of Mr. Jno. Blain, of Pawnee City, Neb. He is an extra large, smooth hog, selected after visiting twenty-five of the best herds in Nebraska and Iowa. There will be

sows in this sale sired by Chief Perfection 2d, Keep On, Mischief Maker, Chief Tee, 3d and other noted boars. Homestead readers wanting size, breeding and quality can get it at this sale. Catalogs will soon be ready. Write for one today. See page 35.

Messrs. David Hood & Son, of Perry, Iowa, in an advertisement on page 34 of this issue, are offering Columbus 55th 134103 for sale. He was sired by Columbus 51875; is five years old and weighs 2,200 pounds. He was bred by Mr. Beuton Gabbert, of Dearborn, Mo. In writing in regard to this animal, Messrs. Hood say: "The reason we want to sell Columbus 55th is that we have so many of his heifers. He is a splendid bull and a half brother to the celebrated Dale. His dam is Crickett 41558. He is a grand animal."

Messrs. Rhea Bros., of Arlington, Neb., have a grand lot of Percheron stallions for sale in their barns. They have imported and home-bred horses and they can make prices on these that cannot be duplicated elsewhere. They sell their own horses and raise many of them, and consequently buyers get the benefit of their labors by getting them much cheaper than the same horse can be bought for elsewhere. It will pay any of our readers to go and see their stallions. They have some of the very best home-bred stallions we know of.

On Saturday, February 2d, Mr. Ernest Babcock, of Manning, Iowa, will make a public sale of fifty head of Poland China brood sows at the new sale pavilion. Mr. Babcock writes: "Forty big sows go into my sale all safe in pig to Brookline's Express (Illinois interstate prize winner) and the massive Long John. These sows are the best I have ever owned or seen put in one sale. Thirty head are yearlings and will weigh from 300 to 700 pounds." Write Mr. Babcock for catalog of his sale at once and mention The Homestead when doing so.

Mr. T. A. Stevenson, proprietor of the Grand View Stock Farm, Shannon City, Iowa, writes us that he still has a few choice Chester White males that he will sell at "bed rock" prices to early buyers, most of them will weigh from 225 to 250 pounds. He also has a few choicely-bred gilts, bred to Dandy Boy, one of the best sons of the champion boar, Prescott Boy, bred mostly to farrow in April. If you want to buy Angus cattle, either sex, calves or yearlings, write him for prices. He is offering some good ones at prices that cannot help but please you when you take into consideration the individuality and breeding. Four dollars buys one of his extra choice Mammoth Bronze tom turkeys, and good Barred Plymouth Rock cockerels are worth from \$1 to \$3. You can order good, all-round farm birds from him for \$1 or six for \$5 if you will order by return mail. You cannot do better than to sit down today and order your cockerels you will need this spring. He writes: "I consider The Homestead one of the best advertising mediums west of

I Not Only Say I Can Cure Catarrh, But I Have the Living Proof.

Of hundreds of cured patients who will gladly write you all about their own cases. Why experiment with so-called cures that have never demonstrated their ability to cure, when you have within your reach a treatment that for twenty-five years has been curing cases just like yours?

F. C. Stofferahn, Lake Park, Iowa, writes under date of Dec. 5, 1906: "I do not think it will be necessary for me to use any more medicine, for I am entirely cured. I thank you ever so much, for I feel as good and strong as I ever did in the past six years."

Morgan Ford, Hamburg, Pa., writes under date of Dec. 30, 1906: "I feel as though I were renewed. I am so grateful to you, as I have had a very heavy burden to carry; my head is better, my nose is always open and I can hear again. I will always recommend your medicine to my afflicted friends."

William Beckett, Sharpsburg, Iowa, writes

under date of Dec. 4, 1906: "I am feeling so well that I am sure I do not need any more medicine. Your treatment has benefited me so much that I know I am cured. I will always recommend your treatment to all who have catarrh."

Mrs. J. W. Rowland, Arkansas Flats, Sharp county, Ark., writes under date of Dec. 22, 1906: "I had catarrh so bad that I was almost dead. My hearing is now good and eye sight much improved. I thank God for the medicine He has permitted you to prepare. I feel like a new woman and bless you for the great favor you have done me."

Rev. C. W. Turner, Columbus, Sabine Parish, La., writes under date of Dec. 9, 1906: "I cannot tell you with pen and ink how much I thank you for your treatment. I feel like a new man. I have gained eight pounds in twenty days. I feel as well as I did ten years ago. Can do more work and do not get as tired."

Chicago. Its proprietor always aims to give "value received" and to treat others as he wishes to be treated himself." See Mr. Stevenson's advertisement on page 40 and write for what you want in his line.

On February 5th, Mr. Henry Dorf, of Remsen, Iowa, one of the best-known Poland China breeders in northwest Iowa, will make a public sale of brood sows at his home farm, seven miles from town. He certainly is offering a grand lot of sows and gilts in this sale, and he invites all his old customers, as well as the new ones, to be present on that occasion. Readers of The Homestead should write at once for his catalog, as it will contain some of the real things in the way of up-to-date Poland China breeding. Just drop Mr. Dorf a card and ask him to send you a catalog of his sale.

Messrs. Maasdam & Wheeler, of Fairfield, Iowa, whose advertisement appears on page 46 of this issue writes: "We are receiving numerous inquiries for Percheron stallions and mares from readers of your paper in different parts of the United States. We have made a few sales in the past six weeks, but have not sold out. We still have a very choice selection of stallions and mares on our farm, from weanlings to eight-year-olds, that we offer for sale. We still have our dark gray imported four-year-old stallion sired by Besique; this horse has made quite a gain since we got him home. He is certainly a wonder in conformation, style and action. A black imported four-year-old that we have is now weighing a little better than a ton. A very richly-bred horse and good enough to go at the head of any stud of pure-bred mares. Among our home-bred stallions we have one of our own breeding, a black five-year-old, that weighs 2,040 pounds. We have used this horse the past two seasons on some of our own mares. He has all the quality one could expect to see in any draft horse. This stallion is sound and we have found him to be a first-class breeder. He is well broke and we feel that whoever is fortunate enough to get him will be pleased. We are certain that our mares, three years old and over, are safe in foal. They have

the bone and size that is needed in the draft horse and so hard to obtain. Most of the mares are broke and are steady, kind, gentle workers. They have been used in all kinds of farm work. We can sell a first-class stallion or mare from our farm more reasonable than most dealers can, quality and breeding of the animal considered."

Mr. J. D. Vorhees, breeder of Poland China hogs, Charles City, Iowa, reports in sending in his new advertisement found on page 43 of this issue, that his males are all sold and among recent sales of males he sold one to Mr. August Hartman and Mr. Emanuel Krumrey, of Bassett, Iowa; one to Mr. T. L. Hanson, of Clear Lake, Iowa; one to Mr. Ed McNamara, of Grafton, Iowa, and a bred gilt to Mr. J. W. Wagner, of Hull, Iowa. In speaking in regard to the gilts he is offering for sale, Mr. Vorhees says: "The gilts are growthy, heavy-boned, weighing 200 to 225 pounds and are sure to please. Satisfaction will be guaranteed." Prospective purchasers can reach Mr. Vorhees by long distance phone.

Mr. M. G. Arnold, breeder of Poland China swine, Strawberry Point, Iowa, in furnishing copy for advertisement which will be found on page 43 of this issue, writes: "Our males are all sold. Sales the past month were never better. Our offering now is twenty-five bred sows due to farrow in March and April. They are sired by the Great Mischief Maker, High Looker and Justice, and are bred and safe in pig to Justice and On Up. These sows will weigh from 200 to 300 pounds. They have extra fine coats, smooth and big, and are roomy sows from a pure, prolific strain and are sure to please wherever they go. They will be sold at bargain prices. We have many letters from those who have bought from us and our customers have all been well pleased. These sows were mostly grown on oats and grass, are not loaded down with fat but are very thrifty and just the kind that always produce good strong litters and raise them, too."

When the name of "McLay" is spoken, the mind involuntarily turns to the Clydesdale and all that partakes of the super-excellence in the Clydesdale. Especially is this the case with those who have attended the leading shows for the last ten years. Messrs. McLay announce in their advertisement on page 46 that they have led all others in the numbers of prizes won, at the recent International, alone winning no less than twenty-eight prizes, considerably more, so they advise us, than double that of any competitor. This would seem proof positive that the general average and high quality of their horses is unsurpassed and that anyone who selects a stallion from their stud cannot well go wrong. Everyone interested should send for their new catalog. The name of "McLay," also, as it has become better and better known, has stood more and more for that which is open and above board in all matters, and we can heartily recommend them and their horses to our readers.

On February 20th, Mr. W. J. Crow, of Webb, Iowa, will make his annual Poland China sale of the great big, rangy, deep-bodied brood sows, and he has selected the best he has for this occasion. Mr. Crow breeds the "big ones" and is making a reputation for himself along this line. These sows will be mostly sired by his three herd boars, Crow's Model, Up To Date and Look Here, and out of large, heavy-boned, prolific brood sows. These sows will be bred to the above boars and also to Corrector 2d, a son of old Corrector and out of the \$305 sow, Coro Dook, also the dam of U. S. Express, that won first and sweepstakes at the Illinois State Fair and afterwards sold to Mr. Ed Klever for \$2,500. Mr. Crow is one of the best and most practical hogmen in northwestern Iowa and he breeds the type of hog that wins over the scales. He will offer an excellent lot of the big, roomy, lengthy and prolific brood sows, and those of our readers who want his kind should arrange to be with him on sale day.

Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., write: "We are getting ready for our seventh annual Short-horn sale, to be held at our farm near Kirksville, Adair county, Mo., on February 26th, at which time we will offer the best lot of Cruickshank or Scotch bulls we ever raised. We have twenty of them and twelve are pure Cruickshank or Scotch. Now this will be a choice offering in individuality as well as in breeding. We have some very select herd bulls in this lot and feel confident that any breeder who will want a herd bull next spring had better make up his mind to attend our sale. We will also offer some select females that are pure Scotch which would look well in the most select herds of our country. This has been a very open winter so far and our herd has done remarkably well. We are shipping some of our fine Mammoth Bronze turkeys every few days, but we still have some very select, large, well-marked, big-boned young toms for sale; also a few hens. Please mention this paper when writing us." See advertisement on page 42.

THE LAST CALL FOR THE AUGUST VOGEL DUROC JERSEY SOW SALE.

On January 19th, Mr. August Vogel, of Portsmouth, Iowa, makes his annual Duroc Jersey brood sow sale. Those breeders who want a sow bred to the great boar, Kruger Lad, will be able to get them in this sale. He also sells a number of daughters of Tip Top Notcher and Crimson Wonder I Am 2d, the third-prize boar at Des Moines. The star attraction of his sale, however, is a daughter of Lafollette, bred to the great boar, Kruger Lad. It will interest breeders to go and see her sell. By all means,

#### A FEW GOOD DUROC BOARS.

Anyone wanting a good Duroc Jersey boar should write at once to Mr. Grant Summers, of Malvern, Iowa. He has sons of Crusion Wonder Again, the Iowa State Fair sweepstakes boar, and Lottie's Top Notcher, a son of Top Notcher Again. He is making the price right on these and if any of our readers want one they should write him at once.

#### HEREFORD BULLS.

The well-known Hereford breeders, Messrs. Edmonds, Shade & Co., of Kingsley, Iowa, are offering a splendid lot of young hulls for sale sired by Imp. Passport, Sir Albany 9th, King Passport and Sir Hesiod by Corrector. These are all yearlings and they are pricing these right. If any of The Homestead readers want Hereford hulls they should write the above firm or go and see these hulls.

#### MILLER'S SHROPSHIRE.

Readers of this paper who are wanting Shropshire rams or ewes should write that old-time breeder Mr. Willard Miller, of Anita, Iowa. He has been breeding Shropshires for fifteen years and he has one of the good flocks in the state of Iowa, headed by an imported ram. He also has imported ewes, and he is selling lamb rams and ewes from these at reasonable prices. If you want a ram or a ewe write him at once.

#### HOLSTEIN-FRIESIANS AT AUCTION.

On Tuesday, February 12th, there will be sold at public auction at the sale pavilion at the Union Stock Yards, South Omaha, Neb., forty head of registered Holstein-Friesian cattle. The offering will consist of thirty cows and heifers and ten hulls. The Rock Brook Farm, Mr. H. C. Glissman, proprietor, announce that there is no better blood anywhere than that which will be offered in this sale. For catalog and other information address Rock Brook Farm, Station B, Omaha, Neb.

#### PETER HOPLEY'S STALLIONS AND MARES.

If you want a Shire, Percheron, Suffolk, Belgian or German coach stallion, write Messrs. Peter Hopley & Son, of Lewis, Iowa, or go and see their horses. If you want a few choice Suffolk fillies they have them, and they are "rip-nailing" good ones, and they are pricing them right. It will pay any of our readers to go and see them. They handle all their horses right on their farm and no man goes away from there without a horse if he really wants one. Go and see some of the best horses in the state of Iowa and he convinced.

#### BOYD'S RED POLLS.

Mr. Otho Boyd, of Virginia, Neb., wishes to announce to the readers of The Homestead that he has five extra good Red Polled hulls for sale. They are extra large, heavy-boned fellows and just the right age to go into service. This is one of the good herds of Nebraska and one can do no better if in the market for a hull than to write him for prices. The herd is headed by Richard Boy 17th by Richard Boy 5th, the first-prize bull two years in succession at the Chicago International show. These young hulls are sired by such noted hulls as Actor and Trusty and are extra good individuals. Write Mr. Boyd at once and mention The Homestead.

#### POLLED DURHAM BULLS.

On page 34 of this week's Homestead will be found the Polled Durham advertisement of Messrs. James Wilson & Son, of Avoca, Iowa, one of the leading Polled Durham firms in the West. In fact they have one of the best herds of Polled Durham cattle in the United States, and they are now offering a splendid bunch of young hulls for sale ranging in age from twelve months to two years. Their herd is headed by one of the very best double-standard Polled Durham hulls and they have some of the choice cows of the breed. Any of The Homestead readers who are looking for a good Polled Durham bull will be able to get one of this reliable firm. Kindly write them at once and mention The Homestead when doing so.

#### DUROC JERSEY BOARS AND GILTS.

In Mr. J. C. Porter's swine advertisement on page 34 our readers will find some very good young stock of both sexes of this breed offered. Mr. Porter still has a few herds of recognized breeding and he has been holding them till they were a little better grown. They are of later litters than the gilts, but are coming along nicely and those wishing to buy a boar should make it a point to see this lot, as nearly every breeder is sold out. The gilts are well grown and will undoubtedly make a profitable investment for their purchaser. There are also a few tried sows which have proven useful animals for their present owner and are safe in pig to farrow early by Duroc Challenger II. As this herd has been fed with a view of increasing its prolificacy and breeding qualities its members should prove especially good producers. The farm is right at the edge of town and fellow breeders are always welcome.

#### SMITH'S DUROC SALE.

We wish to direct the attention of our readers to the forthcoming Duroc sale of Mr. J. A. Smith, of Sciota, Ill., as advertised on page 45 of this issue. Mr. Smith has been breeding Duroc Jerseys for a number of years and has selected the tops of the season's crop, together with a number of yearling and aged sows that are a credit to any herd for this sale. This stock is not hurried up with corn, but is in excellent condition to do the breeder and farmer much good. Thirty-five head have been selected for this occasion, and they represent the get of Long Notcher by Tip Top Notcher; J. I. C., a son of the noted sow and breeding boar, Kant Be Beat, and Cedarvale Queen VIII., first-prize and junior champion sow at the World's Fair; Major R., Tip Top Notcher, Stoner's Improver, and others of equal merit. The sows are bred to Conway 55395 and Hanley S., 55399, a son of the show and breeding boar, Hanley. The breeder and farmer will find in this offering stock that is bred right, fed right and will be profitable if reasonably cared for. The catalogs are now ready and will be sent to those who write for same, kindly mentioning The Homestead as per the advertisement on page 45 of this issue. Those who cannot be present should send bids to Mr. D. M. Pierce, representing this paper, in

care of Mr. Smith. Such bids will be properly handled. Plan to be present sale day. P. W. PERFECTION FOR SALE.

On page 34 of this week's Homestead will be found the advertisement of Mr. H. Fessenden, of Clarinda, Iowa, who offers his well-known herd boar, P. W. Perfection 28577, for sale, or he will trade him for a No. 1 good bred sow of the large type. He is a son of Chief Perfection 2d and is out of a Chief Tecumseh 2d dam. He guarantees him a sure breeder. He was the sire of a great deal of the Rood-Fessenden sale stuff that made an average of \$50.30 last November. He also has eight boar pigs by him and out of his two noted sows, Giantess 2d and Nelson Superior, farrowed last August. He says they are growthy and heavy-boned fellows and will make good herd boars. Write him at once about these.

VRTISKA SELLS BRED SOWS, JANUARY 23TH.

On January 29th, Mr. Frank Vrtiska, of Pawnee City, Neb., will hold his first annual sale of Duroc Jersey bred sows, and he is offering the very best he has in his herd. There will be thirty-five head of matured sows, yearlings and gilts, all of extra good size. They are bred to a son of Proud Advance 23349, one of the highest-priced Duroc Jersey boars ever sold. Some of them are bred to Chief Kant Be Beat, a grandson of Kant Be Beat, the \$2,500 boar. There are sows in this sale that are extra good and are of the most noted strains of the breed. Mr. Vrtiska has used six different boars this fall and has quite a combination of good breeding. The gilts are a very uniform lot and in nice condition. Mr. Vrtiska extends a very cordial invitation to those interested in this breed to attend his sale and he hopes to show them a bunch of sows that are worthy of their inspection. Write him for a catalog and mention The Homestead.

STANSELL & MATERN SELL DUROCS JANUARY 23TH.

We wish to call the attention of our readers to the forthcoming Duroc Jersey sale to be held at McNabb, Ill., on January 23th, by Messrs. Stansell & Matern. These two breeders need no introduction to the Duroc fraternity for they have been breeding and selling good Durocs for several years. They have been liberal patrons at some of the most important sales and have secured some of the best of the offerings presented to the public. At the head of their herd they are using Chief of All, he by Chief of Ohio, a litter brother to Ohio Chief. This boar is three years old and is one of the smoothest boars seen by the writer in his travels. Not only is he a good individual, but he is a good breeder as well. He is assisted by Kant Bee, one of the best sons of Kant Be Beat and his dam is by Top Notcher. Breeders should realize that this breeding is as fashionable as the breed has produced, and the nick which will result when the get of one of these boars is bred to the other cannot result in any-

The Eddystone Mfg. Co. (Sole Makers) Philadelphia.

that would be attractive in any good herd. Some of the best sows are bred to him. Others are bred to the old herd boar, Sir Lester, a son of Higgins' Model, that has sired most of the good stuff Mr. Rowe has been able to produce the last two years. A number of the gilts are bred to J. P. Advance, a son of Jumbo Paymaster, others to Billy Boy by Billy Medoc. If you are looking for a show sow or some good, useful brood sows, you can't afford to miss this sale, as they can be found here. Catalogs are now ready and will be sent to anyone who wishes one. Col. T. C. Callahan will do the selling, and mail bids may be sent to him or to Mr. Ray Page, of The Homestead. Parties may reach this sale by the way of Aurora or drive from Sutton, which is on the main line of the B. & M. Those coming from the west can reach these over the Northwestern from Hastings or Harvard, arriving at Stockham at 11 o'clock. Don't miss this sale. Mr. G. W. Post sells the day following. See page 42.

THE M. S. MOATS PERCHERON HORSE AND MULE SALE.

On Friday, January 25th, Mr. M. S. Moats, one of the best-known horsemen in northeast Nebraska, will make a public sale of Percheron-hred horses and mares at his home farm near Randolph, Neb. A large per cent of the mares in the sale will be sired by McMahon 23340, a son of the well-known Percheron stallion, McMahon 23340, and out of one of the greatest mares ever used in the state of Iowa—Maid of Orleans. This horse was formerly at the head of the Moats stud, and after using him for seven or eight years he was sold at public sale for \$1,200. We will say to readers of The Homestead that there never was a stallion in northern Nebraska that left as many good colts as did McMahon. The McMahon mares that go into the sale will all be bred to his present stallion, Blackbird 33756, a coal black stallion bought of Mr. M. L. Ayres. He is a topky fellow, with lots of style and action and a

part with him for they know the worth of this boar as a breeder. His sire was Echo King, and his dam was by Corrector, a boar which did much for the good herd of Mr. J. D. Nidlinger. Stoner's Improver is more than a half brother to Wilda, the sow which topped Mr. Nidlinger's 1905 sale at \$385. A number of very good gilts go into this sale bred to Stoner's Improver. They have plenty of scale and bone and stand on the best of feet and legs. Another boar in use in this herd is Advance Colonel. This boar was sired by Proud Advance and his dam was by Orion. He is a litter brother to Proud Lady, the sow which topped the Manley sale last winter, going to Mr. R. J. Harding at the record breaking price of \$1275. A nice lot of gilts by this boar also go into this sale. The get of another boar of unusual merit are those by Ohio Ben. Messrs. Stoner secured this boar from Mr. Ira Jackson. He was sired by Chief Surprise by Chief of Ohio, he a full brother to Ohio Chief. Ohio Ben is a litter mate to the sows which Mr. Jackson showed at the Illinois State Fair 1905, that won first and second in the under year class. Mr. Remley's stock is bred to J. I. C., one of the best sons of Kant Be Beat and out of Cedarvale Queen VIII., junior champion sow at the World's Fair. Both of these consignments are of the high class which breeders have always had the opportunity of hiding on at this place. Those interested in good Durocs should write at once for catalog as per the announcement on page 25 of this issue. Further particulars regarding the offering will be found in these columns next week. Parties who cannot be present on sale day may send bids to Mr. D. M. Pierce, in care of Messrs. Stoner. Kindly mention The Homestead when writing.

#### KRASCHER'S DUROC JERSEY SALE.

When Messrs. Fred Kraschel & Son, of Macon, Ill., invite breeders to come to one of their sales they can rest assured that the offering will be of the very best. These gentlemen have been breeding Durocs for a number of years and have been showing Durocs at the leading state fairs east of the Mississippi river for the past five years. They have been among the leading breeders of Illinois, and have done much to put the breed into the high place it now occupies in that state. This result has not been brought about by letting the other fellow do the pushing and then claim the credit, for in that case nothing would be accomplished, but by breeding good hogs and supporting their fellow breeders in their endeavors to succeed. Messrs. Kraschel have built up a clientele that will always stay with them. Their principal herd boar is Gold Cloud. He was first and champion at the Illinois State Fair in 1904, and is the sire of much good stuff to be found in the central West. The other boar in service is Mayor Jr. He was first in class at the Illinois State Fair in 1905 and was only defeated for championship honors by Buddy K. IV., a hog that needs no introduction to readers of this paper, and one bred by Messrs. Kraschel. A man's work is his best recommendation. So it is with Messrs. Kraschel. Their stock is of the sort that goes out and does something for the purchaser. These gentlemen never have any difficulty in disposing of their surplus stock and in many cases they are compelled to go out and buy to supply the demand. Last winter they topped several of the good sales of the year, and have made it a rule that the question of price was not to be considered when the individual was of the right type and the breeding was of the high sort which these gentlemen demand. We wish to recommend this firm and their stock to our readers, and are sure that no one will be disappointed in the offering. Parties attending the Baxter sale the day before can easily reach this sale, and will be well cared for. The catalogs are now ready and will be sent to all who write for same mentioning this paper. Look up the announcement on page 25 of this issue, and write for further particulars kindly mentioning this paper. Those who cannot be present sale day send bids to Mr. D. M. Pierce in care of Messrs. Kraschel. They will be properly handled. Plan to be present at Macon, Ill., on Thursday, February 7th.

GEO. REGENNITTER'S POLAND CHINA SOW SALE.

At Bennett, in Cedar county, Iowa, Mr. Geo. Regennitter will hold his annual sale of bred sows, yearlings and gilts. Tuesday, January 29, 1907, is the date chosen and as there are no other conflicting sales and railroad connections are good the attendance at this sale should suffer no inconvenience whatever. Mr. Regennitter has made it a point to breed for size and good quality of bone. He believes these to be the first essentials in the best type of this breed. This is not saying, however, that the members of this herd do not mature early. Some of the tried sows will weigh in fair flesh 500 pounds. They are sold for no fault whatever, but have made their owner money and will do likewise for those into whose hands they are taken on sale day. The gilt offering is better than last year and number exactly a dozen head. Some of these are of March litters, while a number were yearlings in September and should be one of the strong attractions of the sale. They are chiefly bred to Iowa Perfection and Young Wonder 117033, a boar bred by Mr. Peter Mouw, of Orange City, Iowa. Come out to

## SMALL POULTRY ADVERTISEMENT BRINGS A MULTITUDE OF INQUIRIES AND ORDERS.

WELL PLEASED CUSTOMERS ATTEST THE EFFICACY OF HOMESTEAD ADVERTISING SPACE.

Mr. J. H. Howarth, breeder of Hampshire-Down Sheep, M. B. Turkeys and Rouen Ducks, who has a three-line advertisement in The Homestead, writes of his results as follows:

Homestead Co., Des Moines, Ia., Jan. 3, 1907. Gentlemen:—Our small advertisement in The Homestead is bringing us many inquiries and we are also receiving our share of orders for both ducks and turkeys. The fact that our customers are well pleased speaks well for the stock we are offering. We still have a dozen of our best Mammoth Bronze turkey toms and as many nice young hens for sale as breeders. The young toms weigh now 24 or 25 pounds and are good ones. We have also about 25 good Rouen drakes, but have sold every female Rouen duck we can spare. We appreciate The Homestead as an advertising medium. Yours truly, J. H. Howarth.

thing but something good. The individual merit of the offering is in keeping with the breeding. The sows have not been hurried up with corn, but are in good breeding conditions, so that they will farrow their pigs well and be good mothers. Another boar that has been used in the herd is Peace-maker. He is a son of the state fair winner, Perfection Chief, now in service at the head of Messrs. E. M. Castle & Son's herd at Joy, Ill. A son of Hanley is doing good service. He is called Red Gift and bred to gilts by Chief of All, or Kant Bee should produce something good. In our next issue we will have more to say regarding the offering individually but would urge our readers to write at once for catalogs, kindly mentioning this paper, and plan to be present sale day. Bids sent to Mr. D. M. Pierce will be properly handled. See announcement on page 35 of this issue and mention this paper when writing.

ROWE'S SALE OF BRED SOWS, JANUARY 21ST.

One of the Duroc bred sow sales to be held shortly, that should attract much attention among breeders of the corn belt, is that of Mr. J. E. Rowe, of Stockham, Neb., January 21st. He is offering forty head of strictly high-class sows bred to three as good boars as you seldom see in one herd. He is offering for an attraction to this sale the great sow, Middle Rose Lady, first and sweepstakes sow at the Nebraska State Fair last fall. This we consider one of the best sows of the breed. She is not only a show sow, but has proven a wonderful breeder by producing sows that are as capable of winning the ribbons, as she is the dam of Proud Miss, the fifth-prize sow at Nebraska last fall in the under one year class, that will be included in this sale, and she bids fair to make as good a sow as her mother. The great yearling, Billy's Sister, will also be sold. She was good enough to win fourth in her class at the Nebraska State Fair this fall, and many competent judges thought she should have been placed higher. We wish to say right here that these are three as good sows as will be sold in one sale this winter. The offering as a whole is extra good, there being ten aged sows and thirty gilts and yearlings of much quality, bred to such boars as Billy Medoc, a son of Medoc, that was good enough to win fourth at Nebraska State Fair in a class of twenty-four good yearlings. He is a large, broad-backed, high-boned fellow, with good quality, and a boar

great breeder. There will be mares, horse colts and geldings in the sale, and a better bunch has never been sold in the state. Many of these will weigh from 1,300 to 1,600 pounds. No. 1 of catalog is the registered mare, Juliet 2362, and she will weigh 1,800 pounds. This mare is a daughter of Nubian 17467 and was bred by Mr. H. G. McMillan. She is one of the best mares in the Moats herd and he puts her in because he knows they will all want her. She is bred to Blackbird 33756 and any breeder can well afford to make a trip after her. Colie is a black mare and will weigh 1,600 pounds. Her half sister, Pet, weight 1,500 pounds, will also be sold, and both of these are bred to the black stallion, Blackbird. Jenny is a bay mare and will weigh 1,600 pounds. She was bred by the late Mr. Thos. Moser, and she is safe in foal to the registered Percheron stallion owned by Messrs. John Eason and Loyd W. Prouty. Mollie is an excellent gray mare, a daughter of old McMahon. She is a five-year-old and is bred to Blackbird. Some of the horse colts that go into this sale will be sired by Blackbird and the most of the geldings will be sired by old McMahon. Among these are horses that will make great big, spanking teams, good either for farmers or express companies. They can be mated and sold in pairs, just as the buyers want. There are also some extra fine fillies in the sale. Besides the horses he will also sell twenty head of yearling and two-year-old mules. These are all solid colors and will be in good condition. They are a thrifty lot and will make big, high-headed fellows and will make good money for those who buy them. If any of our readers want Percheron-bred mares, fillies, horse colts or geldings, or if they are looking for some cracking good young mules they should attend the M. S. Moats sale at Randolph, Neb., on Friday, January 25th. Write him at once for his nicely-printed catalog and kindly mention The Homestead when doing so. See page 43.

#### STONER'S DUROC SALE.

The last day of the Grand Champion Duroc Sale Circuit is taken by Messrs. T. W. Stoner & Son, of Henry, Ill., well known breeders of Duroc Jerseys. Mr. J. W. Remley, also contributes ten head of choicely bred females from his herd, so that the offering gives an opportunity to Duroc breeders to select from the two herds. Messrs. Stoner still have at the head of their herd the good boar Stoner's Improver. He has been in service in this herd for the past three years and Messrs. Stoner would not

this sale whether you expect to buy or not. You will see some good Polands. Catalogs are now out and a postal will bring one. Kindly mention The Homestead when writing.

BARBER'S CHESTER WHITES.

Readers of The Homestead who are on the market for good Chester White sows or gilts should read the advertisement of Mr. J. L. Barber, of Harlan, Iowa. Mr. Barber has one of the best herds in the West, and his boars are all leading prize winners and also many of his sows. If any of our readers want a well-bred sow, safe in pig to a prize-winning boar, they should write Mr. Barber at once. His prices are within the reach of all and his stock is A No. 1 in every particular. He has issued a nice private catalog, giving the breeding of all his boars and most of the sows in the herd, and if you will only send for it and read it you will be convinced that the Barber herd is a good place in which to place an order for a bred sow.

DUROC BROOD SOW SALE AT HUBBARD, IOWA.

On February 12th, at Hubbard, Iowa, Mr. Leslie Sheldon will sell forty head of selected brood sows and gilts. Our readers will find further announcement of this sale on page 34 of this issue, and we would advise those who are expecting to make purchases in this breed this spring to write for catalog and acquaint themselves with some of the numbers that are offered therein. Mr. Sheldon tells us that his offering represents such breeding as Tientsin, Hiram Chief, College Lad, Eldora's King, Nother Boy, Imperial, and others. Some of this, as will be seen, represents the blood of prize winners and there will undoubtedly be some good bargains offered. All the stock has been mated to Imperial, Indiana Chief, Advancer 2d and Iowa Top. When writing for catalog kindly mention The Homestead.

DISPERSION SALE OF POLAND BRED SOWS.

At the farm of Mr. C. A. Steele, seven miles south of Ogden, Boone county, Iowa, will be held a closing out sale of thirty-five head of bred sows and gilts on Wednesday, January 30, 1907. The sale is being held to close out the business, as Mr. Steele intends to go East. The breeding will be seen to be right, in looking over the advertisement on page 34. This stock is sold for no fault whatever, but has proved very useful in the present owner's hands. The foundation of this herd was secured from the best herds and new blood has been added at different times, so that this offering should contain some very good well-bred stock. Here is a chance to get something that will make money and probably get it at very reasonable prices. Write for catalog and plan to attend. Col. F. A. Wildman will conduct the sale and stock will be sold as represented. When writing for catalog kindly mention The Homestead.

THE HARDING DUROC SALE.

All lovers of Durocs will be interested in the sale of Mr. R. J. Harding, at Carson, Iowa, on January 31st. From the home of the great Ohio Chief, Nebraska Belle, Proud Lady and other great hogs will again come a very high class of sows and his sale will again be one of the most attractive of the year. He is selling forty head and fifteen of these will be bred to Ohio Chief. Six of these are granddaughters of the noted sow, Nebraska Belle, and they will all be bred to Ohio Chief, a cross that should prove a winner. Twenty-one are yearling and matured sows. These will be bred to Ohio Chief, R. J.'s Proud Orion, Belle's Chief I Am and Keep On Perfection. Among the good tugs is Proud Peach, an August sow by Proud Advance and bred to Ohio Chief. Dixie Bell, a two-year-old daughter of Orion Dandellon will be sold. She is bred to Ohio Chief for March farrow. In this sale Mr. Harding is selling his three-year-old sow, Pottawattamie Belle by Advance, also bred to Ohio Chief. In the past three years he has sold \$1,650 worth of pigs from her and still has twenty-three of her get on the place. He will offer six head of Proud Advance sows, three yearlings and three spring gilts, all bred to Ohio Chief. Two daughters of Nebraska Belle go in and they are bred to Keep On. He also includes Queen Perfection by the prize-winning boar, Perfection Chief. She is the dam of the good Proud Advance litter, four of which sold in his fall sale for \$286. She is bred to Ohio Chief and here is a great brood sow for the man that will take care of her and her pigs.

Mr. Harding is offering a great variety of breeding in this sale, and bred as they are should command the attention of all the best Duroc Jersey breeders. Write Mr. Harding at once for catalog and arrange to be present on sale day. If you cannot, then send your bids to the auctioneer or to Mr. M. T. White, a Homestead representative, who will attend the sale. Kindly mention The Homestead when writing.

SUPERIOR NORTHERN ANGORA GOATS.

The Northern Angora Goat & Live Stock Co., of Helena, Mont., are, perhaps, the largest breeders and shippers of Angora goats in America. It is generally known that Montana is one of the great centers for the raising of Angoras. These attractive little animals are becoming very popular, due to the fact that they are so useful in many ways. They are not only very valuable to keep the weeds and brush down on the farm, but their fleece makes very fine rugs, robes, coats and children's furs. This company is now offering a pair of these little animals at only \$10. This guarantees safe delivery. At this price they allow only one pair to a purchaser. If you have been wanting to get started in the Angora goat business for some time, now is your chance. Do not delay, but write at once to these people for their catalog and have a pair of these valuable little farm animals. When writing, kindly mention The Homestead. See advertisement on page 17.

KENTUCKY BRED JACKS.

Messrs. J. F. Cook & Co., of Lexington, Ky., importers and breeders of jacks and jennets, have opened a branch barn at Newton, Kan., in charge of Mr. J. C. Kerr. Lexington, Ky., is in the heart of the blue grass district, and the greatest jack state in the union. Two colts of their own raising, won the past season first and second at all of the principal blue grass fairs. This firm is in a position to furnish a better jack for the money than any firm in the business. Their herd jack, General Wood 950, won first in three-year-old class and sweepstakes at the Blue Grass Fair at Lexington, Ky., September 17th to 23d, 1906. Their imported Catalona and Malyorca jacks which arrived September 25th on the White Star steamer Georgia, was the largest importation ever brought to the United States. Among them was a number of premium winners, both in Catalona and on the Malyorca island. The writer is informed that this was the first importation of Malyorca jacks to this country in the past fifteen years and were selected by Mr. J. F. Cook, who spent three months in Spain and made his own selection, buying them direct and paying no

General view of buildings on the 430-acre alfalfa, wheat and stock farm—not all the buildings shown—offered for sale by Mr. W. H. Grassmeyer, of Riverdale, Neb., who will send terms and full description on request. See advertisement on page 22.

commissions. Turn to page 21 and you will find their advertisement, a part of which says that "We have more good jacks than any two firms in the United States." Write for descriptive catalog and mention this paper.

CHESTER WHITE GILTS FOR SALE.

Mr. W. H. Swan, of Atlantic, Iowa, has a choice lot of heavy-boned Chester White gilts of April farrow which he is offering for sale in his advertisement that appears on page 34 of this issue. These pigs were sired by His Majesty 15923 and are safe in pig to Captain 2d 16169. Mr. Swan writes: "The dams of these gilts took first and second at the Cass County Fair in strong competition, and the gilts took second and third. We will give everyone a strictly first-class deal, no misrepresentation. We have numerous letters from our customers saying they are well satisfied with the boars we have shipped. We will not ship a pig, under any circumstances, unless true in every particular to description. I consider my herd boar, Captain 2d, the best Chester White male in the state. He weighs 600 pounds, very

The four Poland China gilts shown in the above illustration which will be included in the public sale of Mr. R. G. Sweet, of Le Grand, Iowa, on January 22d, were sired by Iowa Boy 98403, a full brother to Lady Lucile, the champion sow at St. Louis in 1904. He was also a full brother to the champion sweepstakes boar at the Iowa State Fair, 1906. Their dam was Dude's Dutch Girl 277280, that topped Metzger's 1905 closing out sale. Two of these gilts were alternate in first and second place in under six months' class at a circuit of five county fairs last fall.

heavy boned, lengthy, broad back and these gilts, being bred to him and out of fine large sows which promise from ten to fifteen at a litter, surely ought to produce something extra good."

DUROC BROOD SOWS AND SHROPSHIRE SHEEP.

At Gosport, Ind., on Wednesday, January 30th, Mr. S. R. Quick & Sons will sell fifty head of choice Duroc Jersey sows and gilts. These have been bred to their best herd boar, a \$3,000 animal. Ten head of these are consigned by Mr. J. R. Rothrock, of Centerton, Ind. As the offering is a large one the sale will start as soon as all the trains are in, which will be prior to dinner. In the afternoon eighty head of Shropshires will be sold. They include forty bred ewes,

with plenty of size and lots of bone, bred for March and April farrow, write Mr. Escher or go and see what he offers for sale. Kindly mention The Homestead when writing him.

PERCHERON, SHIRE, BELGIAN AND HACKNEY STALLIONS.

Messrs. Taylor & Jones, importers and breeders of Percheron, Shire, Belgian and Coach horses and Short-horn cattle, of Williamsburg, Ill., write: "We recently had the honor of selling one of the very best Shire stallions we have ever imported to Mr. Sherman Luttrell, of Waverly, Ill., and what is more than that Mr. Luttrell went to England last summer to buy himself a Shire stallion and after visiting many of the Shire districts of England found he could not import such a horse as he wanted as cheap as he could buy him of us; besides he has Taylor & Jones' guarantee now backing his horse, or in other words, he saved the great bother and worry of importing a horse, saved some money and has his guarantee free. It goes to show that good horses in the old country are costing a great deal more money than many people think and also bears out our advertisement that we are selling the good stallions cheaper than others and that our buying facilities and manner of doing business is not unequal. We also sold today to Messrs. Junkens & O'Neal, of Homer, Ill., an imported Shire, an imported Percheron and an imported Belgian stallion that will make their neighbors look at good ones when they unload them. Mr. W. G. Joslin, of Nebo, Ill., has just closed a deal with us for an American-bred Percheron stallion that he is well proud of." See advertisement on page 47.

SCHWAB & SONS' RED POLLS.

One of the good herds of Red Polled cattle in Nebraska is to be found on the farm of Messrs. George P. Schwab & Sons, of Clay Center, Neb. At this place breeders will find a first-class collection of cattle, including many world's fair and international winners, besides a number of choice imported stock. At the last Nebraska State Fair these breeders made a record to be especially proud of. They now have at the head of their herd Falstaff 5th 11566. He is a massive fellow, coming four years old and tips the scale at 2,600 pounds. In color he is of the rich dark red, which, together with his excellent proportions, makes him a very attractive sire. He has been undefeated at the last three Nebraska State Fairs. In produce of cow his dam's calves won first at the World's Fair and also at the International three years. He is also related to some of the International prize-winners, as his brother has been taking the International championship for three years. Falstaff's dam and grandam are owned in this herd. Another good bull now in use is Commander 15408. He and his dam won first in their respective classes at the last Nebraska Fair. At this fair last fall, in perhaps as strong a showing of cows as ever lined up west of the Mississippi, Messrs. Schwab & Sons won first and second. They have been winning a lion's share of prizes wherever they have exhibited. At the present time they have some very choice young stock for sale, principally bull calves. In any correspondence which you have with these breeders kindly mention this paper.

TRUMANS' PIONEER STUD FARM.

For many years there has appeared in these columns the advertisement of Trumans' Pioneer Stud Farm, Mr. J. G. Truman, manager, of Bushnell, Ill. It is with pleasure that we call the attention of our readers to their advertisement on page 47 of this issue, for this firm, as the name indicates, was the pioneer firm in the importing of Shire horses in America. Mr. J. H. Truman, the senior member of this firm, now residing at Whittlesea, England, in the center of the Shire district, imported Shire horses to this country in 1878, and every year since that time Pioneer Stud Farm have made importations to this country. The fact that the senior member of the firm resides in England gives this firm an advantage enjoyed by no other firm, in that the best horses the year round come under the personal observation of Mr. J. H. Truman. It is not surprising, therefore, that Messrs. Truman have been so successful in the show rings of this country. It is not necessary to go into detail regarding these winnings, for year after year at the various shows of the country the name of Truman appears in the prize list. Another very strong recommendation that this firm enjoys is the fact that they keep their old customers. They treat people right, and give them value received for every dollar spent with them. In our next issue we will have more to say regarding the horses which

A sample of some of the mares and colts that will be sold in the Percheron-bred sale of M. S. Moats at Randolph, Neb., on January 25th. Included in this sale will also be twenty head of yearling and two-year-old mules. Send for catalog at once.

ESCHER OFFERS BIG POLAND CHINA SOWS FOR SALE.

On page 35 of this week's issue will be found the Poland China advertisement of Mr. E. F. Escher, of Manning, Iowa. He is offering fifty head of sows at private sale. These are sired by Gay Monarch, his 1,000-pound boar; Perfect Chief 2d, Winsome Dude and Monarch Jr., a boar that will weigh over 900 pounds in his every-day clothes. He will sell fall yearlings, aged sows and spring gilts. Some of these are bred to the above-named boars and also to Expansion Perfection, a son of Expansion King. Mr. Escher is breeding the big kind, and his sows invariably have plenty of size and bone. One of the best sows in his herd is Wild Rose Standard by Standard Chief 2d. He sold two litters for \$727.70 and has three of her gilts now for sale. Three of her boars went to head herds. He has one fall yearling and two spring gilts out of her for sale yet, and these are all sired by Gay Monarch. Rose Monarch, out of this sow, is by old Gay Monarch and she is one of his most profitable sows. He has some of her gilts for sale also. If you want a good, practical Poland China sow, one

Messrs. Truman have in their barns at Bushnell. They keep no staid horses, for as fast as room will permit another shipment arrives from England, consequently the horses are always fresh. A beautifully illustrated catalog has just been issued and will be sent free to all who write for it as per the advertisement, kindly mentioning this paper.

#### THE X-RAY INCUBATOR.

It appears to us that in the claims made by the X-Ray Incubator Company, of Wayne, Neb., in their advertisement that appears on page 13 of this issue, there is much of interest to those of our readers who are contemplating the purchase of an incubator. The fact that two-thirds of the oil and time can be saved by using the X-Ray Incubator is no small matter when it is taken into consideration that time is a great item of expense in almost every undertaking. One filling of the lamp makes the entire hatch and the egg trays need not be moved during that time. The company have issued a catalog which they will send free and it tells all about the X-Ray incubator. We advise those interested to write for this catalog at once.

#### LAST CALL FOR THE CEDARBANK DISPERSION POLAND CHINA SALE.

One of the greatest Poland China herds that has ever been in the West will be dispersed at Fullerton, Neb., on January 25th. This sale marks the finale of the noted Cedarbank herd, whose manager has been Mr. Thomas F. Miller, as good a Poland China man as has ever raised a pig. It is with regret that such a herd will be sold, because it contained some excellent brood sows, some of which have never been offered for sale at any price. The famous old boar, Peter Sterling, one of the best sons of old Chief Tecumseh 3d, that has stood at the head of this herd, will also be sold, and as a brood sow boar we doubt if he ever had a superior in Nebraska. But he goes with the rest, and it is going to be a great place to buy the kind of hogs that have made Nebraska famous. The sows that will be sold are bred to Peter Sterling, Thickset Perfection, a son of the great Thickset, and Mischief Maker 2d, a son of the great Mischief Maker. There will be about ten of the very best Peter Sterling sows in the sale, and he will be bred to the most of the sows not related to him. A sow bred to him will be good enough to go into any herd. In Starlight he offers one of the most fancy sows that will be sold in the West. She is fancy, and is bred in the purple.

#### TOO LATE TO CLASSIFY.

## CHOICE DUROC GILTS

I AM offering a choice collection of Duroc gilts for private treaty. Some are by Roby's Crimson 44081, by Crimmon Wonder I Am 34597, and are bred to Roby's Duke O 44073, by Duke of Ohio and he by Old Kn't Be Beat 28067. Also a nice lot of choice ones bred to Roby's Crimson. This will be the best chance you'll have to get some of this famous Crimmon Wonder I Am breeding at prices that will make you open your eyes wide, quality considered. Write me your wants, brother breeders.

W. E. ROBY, TRURO, IOWA.

#### J. C. PORTER, OGDEN, IOWA

**Duroc Jersey Boars, Gilts and Trid Sows**  
OF the prominent lines of blood and of good individual merit. I have a few young boars of May litters carrying the blood of Old Advance and Orion. They are in nice shape and will go at moderate prices. Also some gilts of March and February litters, bred to a very good grandson of Tip Top Notcher, the St. Louis champion. They will farrow in March and April. Also a few yearlings and trid sows that should prove a good investment. I feed with a view to prolificacy. Farm in edge of town. Call or write.

#### DISPERSION SALE JAN. 30, 1907

**35 Poland China Bred Sows and Gilts**  
HERD is headed by Defender 88447, sired by Cor- pector 26466. The sows are sired by Perf. Perfection, L's Keep On, Top Chieftain, Mahaska and others. The gilts are a nice, clean bunch representing some excellent breeding. We have bred this stock to a Perfection boar, a litter mate of Perfection E. R. The individuality of my herd is as good as its breeding. Farm seven miles south of town. Write for catalog. Address, C. A. STEELE, Prop., Ogdén, Iowa Col. F. A. Willman, Auctioneer.

#### DUROC JERSEY BROOD SOW SALE

I Will Sell 40 Head at Hubbard, Iowa, Feb. 12, 1907.

THEY are selected brood sows and gilts representing such great boars as Nother Boy, Eldora's King, Imperial, Hiram Chief, College Lad, Tientsin and West Side, litter brother to Crimmon Wonder. They are bred to Imperial Indiana Chief, Advancer II and Iowa Top, which are all good individuals. Write for catalog. Address,

LESLIE SHELTON, Hubbard, Iowa

## COLUMBUS

55-134103

For sale Hereford sire Columbus 51875, 5 years old, weight, 2200 lbs. bred by Benton Gahbert, Dearborn, Mo. David Hood & Son, R. 4, Perry, Iowa.

#### HEDGE LANE HERD OF RED POLLED CATTLE.

I HAVE five extra good large-boned Red Polled bulls for sale now. I breed for size and bone with quality. Write me at once. OTHO BOYD, Virginia, Neb.

#### P. W. Perfection 28577 For Sale

BY Chief Perfection 2d, out of a Chief Tecumseh 2d dam. The sire of the gilts that averaged \$50.30 in my sale. Also have eight good young boars for sale. Address, H. FESSEMEYER, - Clarinda, Iowa

She is a daughter of the mighty Lamplighter and out of a Proud Perfection dam. She is full of quality; is a great breeder, and is bred to Peter Sterling. She always produces well with him. Orange Girl is a daughter of Orange Chief, one of the big kind of the Peter Mouw type. She is bred to Thickset Perfection for early farrow. This sow is as big as a box car and is a great breeder. The Peter Sterling sows are a grand lot of big, smooth animals, and they are great brood sows. The catalog will tell you all about them. You had better write for it at once. If you cannot be there in person, send your bids to Mr. M. T. White, representative of The Homestead, and they will be attended to. Write for catalog and mention this paper.

#### THE CANTINE-STEVENSON DUROC SALE

On January 25th Messrs. Lee Cantine and O. R. Stevenson will offer forty head of well bred Duroc Jersey brood sows at the famous Cherokee farm near Quimby, Iowa. The fact that from this farm came the great Crimmon Wonder, and for years the well known boars, Tolstoy and old Pericles, were monarch of these herds, it is only fair to presume that they will again have some good things to sell. Ohio Anna, the dam of Crimmon Wonder, left some good ancestors behind her, and their present offering has the blood of all the good ones. They are selling four choice gilts by the Great Keep On, their dam being Lucy Advance, a full sister to Proud Advance. They also sell a Top Notcher Chief gilt, bred to Crimmon Wonder Jr., that is a good one, and she will not go begging when the boys see her. There are two nice gilts by old Pericles out of an Ohio Chief sow that are choice and both of these are bred to Crimmon Wonder Jr. There are a lot more good things in this sale that would look good in any herd. The fact that so much good stuff has come from this same source is a sufficient guarantee that the boys are offering some of their best sows. Write Mr. Lee Cantine or Mr. O. R. Stevenson, Quimby, Iowa, for catalog and kindly mention Iowa Homestead.

#### SOL FRANK'S DUROC SALE.

On January 24th Sol Frank, one of the best known and most popular breeders in Northern Iowa, will hold a brood sow sale at his farm adjoining the town of Sioux City, Iowa. In this sale he will also be associated with the Messrs. Julch Brothers, who have much the same breeding, having purchased a lot of their foundation from Mr. Frank and other northern herds. There will be forty head to sell. Mr. Frank is selling his first prize interstate fair sow, Marie Antoinette. This sow was one of the greatest sows shown last fall, and she defeated both the first prize yearlings at Iowa and Minnesota state fairs. She is bred to King Solomon 41513, one of the best young boars in the state. He comes from a litter of five, all of which are heading pure-bred herds. He has also used a son of Top Notcher Chief and a son of Lottie's Top Notcher on these sows. He is putting in some of his best sows. There will be daughters of Cedar Lawn Prince, the second prize yearling boar at Interstate fair; Royal Plummer, Brighton Warder, Pericles and Waneta Hub 2d. Mr. Frank is putting in the very best he has. The Messrs. Julch Brothers' offering are daughters of American Royal, Cedar Lawn Prince, King Solomon, King James and other good boars. These will be bred to Prince James 2d 56371 and Colonel Royal 56369, a son of American Royal. Both these offerings deserve the patronage of breeders and farmers, and their sale will be a splendid place to buy. Write Mr. Sol Frank, Sioux City, Iowa, for catalog and mention Iowa Homestead.

#### LAST CALL FOR THE G. W. POST BRED SOW SALE.

With this issue we make the last report of the bred sow sale of Mr. G. W. Post, of York, Neb., on January 22d. The sale will be held at the York fair grounds, right in town, and as York is a good railroad point it will be of easy access to all who wish to attend this sale. The offering is a very good, uniform lot, consisting of forty head, mostly spring gilts by Top Notch, he by Tip Top Notcher, and conceded one of the best sons of Tip Top Notcher in the business. This hog weighed 640 pounds at twenty-two months of age and is an extra good individual. His dam was Goldie O. XXXX., the producer of more prize winners than any sow living. The gilts are a good, uniform, useful lot, and are bred to Ohio Chief I Am, a son of Ohio Chief, and surely no better cross could be expected than this. The aged and yearling sows include some of the best brood sows on the farm, one of them being the great sow, Brigg's Choice, one of the good sows of the breed, and bred to Top Notch for an early litter. She has few equals as a brood sow and anyone wishing to make a profitable addition to their herd can do no better than send a long bid on her. Mr. Post is putting in some of his very best sows, as he wishes to make this an attractive sale. This sale is the day following Mr. J. E. Rowe's, of Stockham, and is an easy railroad point. Send for catalog and arrange to attend. Send bids to Ray Page, representative of The Homestead. See page 42.

#### N. B. CUTLER OFFERS DUROCS AT AUCTION.

Some men look upon a public sale as an opportunity given them to sell their medium stock, and breeders are many times disappointed in the offerings after traveling great distances to attend some sale. The writer representing The Homestead is pleased to recommend the offering of Mr. N. B. Cutler, of Carthage, Ill. This gentleman has selected as good stock as he owns for this sale. The breeders present sale day will find upon comparison that the stock which Mr. Cutler has put into the sale includes as good a lot as he is keeping. This means much, for the prize lists at the various state fairs have included the name of Mr. N. B. Cutler many times in recent years. Eighteen fall yearlings and aged sows and seventeen gilts make up the offering. They are bred to Wonder Boy, first prize boar pig under six months and headed the first prize litter at Illinois State Fair, 1906. This boar pigs was sired by Pilot Boy, he by Pilot Wonder, and his dam was Miss Watt by Top Notcher by Orion II. The breeding cannot be excelled, and as an individual this spring boar was one of the best out at any of the fairs this season. Others

## PUBLIC SALE

### Duroc Brood Sows and Shropshire Sheep

Wednesday, Jan. 30, 1907,

In Hoghouse on Farm, One Mile S. E. of Gosport Indiana.

**50 Duroc** Sows and gilts, all bred to our best herd boars, ten to Beat Him If You Can, the \$3,000 boar. Will commence selling at 10 o'clock, as soon as trains are in.  
Mr. J. Rothrock, of Centerton, Ind., will consign 10 head.

**80 Shropshires** Forty bred ewes, some imported; thirty ewe lambs, the older ones bred for May lambs; eight young rams and two flock rams. A closing out sale, as our farm is too much bottom for sheep. We regret to discontinue sheep, as we have been breeding Shropshires profitably for a quarter of a century. Send bids to D. M. Pierce, representing this paper.

### 35 Head DUROC JERSEY SOWS AT AUCTION 35 Head

PAWNEE CITY, NEBRASKA, JANUARY 29, 1907

Representing the blood of Kan't Be Beat, Proud Advance, Ohio Chief, Improver II, Belle's Chief and other leading sires. Sale at farm two miles west and two miles north of Pawnee City, Nebraska. Write for catalog.

Aucts. Col. L. W. Leonard & Son. FRANK VRTISKA, PROP., PAWNEE CITY, NEB.

### RUEBEL BROS.' THIRD ANNUAL SALE

FEBRUARY 12, 1907.

60 POLAND CHINA BRED SOWS.

Consisting of matured sows, fall gilts and spring gilts. Bred to R.'s Keep On, one of the great sons of the noted Keep On 61015, and Iowa Chief, by Ed. Klever's Thickset. Iowa Chief is the best Thickset boar in Iowa—twenty are bred to Moderator, the great young boar we purchased of John Blain, Pawnee City, Nebraska. This was the best extra large smooth pig that Mr. Blain was able to find after visiting twenty-five or thirty of the best herds in Nebraska and Iowa. There will be sows in this sale sired by Chief Perfection 2d, Keep On, Mischief Maker, Chief Tecumseh 3d and other noted boars. If you want size, breeding and quality you can get it here. Get your name on our mailing list for a catalog.

### Mt. Ayr Herd Of Chester Whites

WE have a choice lot of heavy boned, large gilts. April farrow, will weigh 250 to 275 pounds, for sale. Sired by His Majesty 15923, and are safe in pig, bred to Capt. 2d 16169, he by Enterprise 11545. Capt. 2d is a heavy boned hog, a splendid animal, weighs 600 pounds. Gilts are good ones; good on their feet. Will ship subject to inspection. Correspondence solicited. W. H. Swan, 910 Spruce St., Atlantic, Iowa

### KENTUCKY'S NOTED DUROC HERD

COMMODORE 13381, first and champion and headed first prize aged herd at Illinois, Kentucky and Tennessee State Fairs, 1906, heads herd, assisted by Top Notcher 10th, Kentucky Col. 2d, Sensation 9th and Commodore 3d. Brood sow sale, Louisville, Ky., February 22. Write for catalog at once.

Amos W. Harris & Sons, - - - Waverly, Ky.

are bred to Peter the Great, one of the best sons of Big I Am. He is a boar of wonderful size and will make a good cross on the gilts he has been bred to. A few sows are bred to Chief O., he by Illinois Chief, a state fair winner, by Long Notcher by Top Notcher. Particular attention is called to the good sow, Iowa Queen. She has been a winner at a number of the state fairs and has produced some very good litters, which have won firsts in both pig classes and as litter at the Iowa State Fair. This sow goes into the sale bred to Wonder Boy, and the breeder who is looking for a good brood sow should not overlook this one. A very good daughter of Iowa Queen also goes in the sale bred to Wonder Boy, and the breeders present sale day will have an opportunity to see how this good sow breeds. Red Lady, third-prize junior yearling sow at the Illinois State Fair,

and a litter sister to Red Carnation, the sow which topped the brood sow sale of Mr. E. H. Deal last spring and again topped the sale at Ed A. Baxter's in the fall, is included in the offering. She is bred to Wonder Boy. This sow raised a fine litter of pigs the past season, and breeders realize that this sort of sows are not sold only as attractions. Mr. Cutler has made a liberal division with the public in this respect, putting into this sale his good ones, so that none will be disappointed. A March gilt by Tip Top Notcher and out of Golden Hatty by Major R., goes into the sale bred to Hanley. She should go into some good herd. A fall sow by Milton Orion, he by Orion II. and out of an Ohio Chief dam, goes into the sale bred to Buddy K. IV. The combination of winning blood found in this pedigree will not be disappointing to anyone and will be a welcome addition to

any herd. The offering throughout is a very good one and Mr. Cutler is deserving of the support of all breeders. If you cannot be present on sale day bids sent to Mr. D. M. Pierce in care of Mr. Cutler will be properly handled. Write for catalog at once, kindly mentioning The Homestead as per the advertisement on page 45 of this issue.

#### LAST CALL FOR THE WEHR DUROC JERSEY SALE.

On January 24th Mr. J. E. Wehr will make his annual brood sow sale at Portsmouth, Iowa. This is an event that never fails to attract in that part of the state, and the forty head that he is selling is superior in every way to anything he has sold heretofore. Fifteen are fall yearlings and aged sows, mostly sired by Munson's Perfection, the first prize boar pig at the Iowa State Fair in 1904; Bryan M., a grandson of old Duroc Challenger, and Orion's Model, by Teddy Orion. They will be bred to Proud Advance Jr., Orion's Model (a winner at Des Moines) and Minnesota Chief, a winner last fall at many of the Minnesota fairs. He is selling some good Munson Perfection gilts. One of these is a March 5th gilt out of Tessie Orion and bred to Proud Advance, Jr. She is an exceptionally good gilt, being nice in color, very growthy, with excellent bone, and is one of the best things in his gilt offering. There are two nice gilts in the sale out of Lady Wheeler and a couple out of Luella Advance (the dam of Proud Advance Jr.) He sells Perfection Belle by old King Perfection, and she is bred to Proud Advance Jr. This sow won first prize as a gilt at Des Moines in 1904, and was also in the first prize young herd at the same show. Mr. Wehr is offering a good, useful lot of sows and he deserves a good sale. He has been a good buyer himself and never fails to give a fellow-breeder a lift when he needs it. It is to be hoped that the boys will turn out to his sale and make it one of the good ones of the series. Write for his catalog and mention The Homestead when doing so.

#### THE OSBORN DUROC SALE.

On January 30th, Mr. O. E. Osborn, of Weston, Iowa, will hold his great Ohio Chief brood sow sale, which promises to be one of the best sales of the season. Never before has he offered as good a lot of sows as he has selected for this sale. Included in the sale will be six Ohio Chief spring gilts, and they are good ones. Then he also

lines represented in the pedigrees of these two animals have given to the Duroc breed some of its greatest show and breeding animals. Other sows in the offering are bred to Wonder Boy, Wonder Lad (full brother to Wonder Boy), Ambition 2d (a son of Messrs. Thomas & Hogsett's sensational yearling, Ambition), Chief C., and Peter the Great. Every one of the boars just mentioned is sired by a first-prize boar at the leading state fairs of the middle West. The offering is in nice breeding condition and will be appreciated by those present sale day. The catalogs are now ready and will be sent to all who write for same, kindly mentioning this paper. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled. Your attendance on sale day will be appreciated.

#### THE GARRETT DUROC JERSEY SALE.

If the F. E. Garrett Duroc Jersey brood sow sale does not attract breeders to Lohrville, Iowa, on January 25th, it won't be because he is not offering some of the best things that will be sold this year. The great sow, Ruberta, winner of first-prize at the Iowa State Fair this year, and considered one of the greatest sows ever shown at Des Moines, will go into his sale, bred to the \$5,000 boar, Junior Jim. If she don't go some it won't be her fault, as she is one of the greatest sows that will go through any sale ring. Just make it a point to go to the sale and see her sell and it will do you good. He is also selling a daughter of Crimson Wonder I Am, the sweepstakes boar at Des Moines, and she is a show proposition for some enterprising breeder next year. She is bred to American Lad, a son of Iowa Wonder. Two daughters of Iowa Wonder, bred to the sweepstakes boar, Crimson Wonder, will also be sold, and as this family seems to produce the sweepstakes winners, it will not be a bad idea to secure one of these for what they are likely to do. There will be one yearling daughter and five gilts, all sired by the great Orion, and all bred to the \$5,000 boar, Junior Jim, in the sale, and they ought to go some. There will be eleven yearling sows in the sale and all have raised litters. One yearling daughter of Proud Advance and four choice gilts, bred to Junior Jim and I Am a Wonder, all go in. Four of the gilts that go in are sired by I Am a Wonder; two by Tientsin (the sire of Ruberta) bred to Junior Jim and Orion's son will be among the good ones. Ten head that go into the sale will be bred to

A sample of some of the mares and colts that will be sold in the Percheron-bred sale of M. S. Moats at Randolph, Neb., on January 25th. Included in this sale will also be twenty head of yearling and two-year-old mules. Send for catalog at once.

sells the noted brood sow Allen's Maid, bred to the great Ohio Chief, and he also sells a rip-nailing good Proud Advance yearling bred to the same boar. He has also used Brigg's Prince and Baxter's Buddy K., two splendid young boars. There will be some good daughters of old Indicator in this sale and many of these will be bred to Ohio Chief. Mr. Osborn is selling some good aged sows and some of his best yearling sows. We want to say to all Duroc breeders that they will miss a great sale if they fail to be present at the Osborn sale on January 30th. In writing about his forthcoming sale, he says: "I don't think I ever offered as good a bunch as I am selling this year. I am cataloging sows in my sale that I regret to part with, but I know that sows bred to Ohio Chief and my other boars should be of the very best, and I have therefore selected the best I have in the herd. No breeder in the land that wants high-class sows need hesitate coming to my sale. I hope to again see the best breeders in attendance, and I will not disappoint them in the offering that I will send through the ring on this occasion." We know the truth of the above letter and we request every Duroc breeder to write at once for catalog and mention The Homestead when doing so.

#### AN IMPORTANT DUROC SALE.

Thursday, January 24th, is the date selected by Messrs. Reil & Cooper, of Ferris, Ill., as the date on which they will hold their annual brood sow sale. These gentlemen have been liberal buyers of Durocs from the best herds. They have produced and shown prize winning stock at the Illinois, Iowa and Minnesota State Fairs this year, and a number of the offering are related to prize-winning stock. One of the leading attractions to be found in this offering is Lady Kruger, the first-prize under year sow at the Illinois State Fair this past year. This sow is a very good prospect to hold for the shows of the coming fall. The under year sow class was one of the strongest ever seen at the Illinois State Fair, and it is only as an attraction that this sow has been included in the offering. She is safe in pig to the first-prize boar pig at the same show, Wonder Boy. This cross should result in something extra good, as the blood

Junior Jim. Two Proud Advance gilts that he sells are out of the \$1,060 sow, S. E.'s Model, and both are bred to Junior Jim. He sells a litter sister to Ruberta, bred to Junior Jim. She raised him seventeen pigs last year. Write him at once for catalog and mention The Homestead.

#### McKEEVER'S BIG POLANDS AT AUCTION JANUARY 31ST.

One of the coming sale events that should attract attention of all lovers of the large type of Poland China hogs is that of Messrs. McKeever & Sons, of Hubbell, Neb., on January 31st. Those who are familiar with Poland China history have noted that for the past few years Messrs. McKeever & Sons have been among the leaders in placing the Poland China hog back to its present size and quality. We feel that we cannot say too much about these gentlemen, as they are to be complimented on being able to offer such a choice lot as they will run through the sale ring on this date. It will be remembered that this is the home of the large show boar, Expansion See 37198, the hog that weighed 1,125 pounds at the Nebraska State Fair in 1906. His sire was Expansion, conceded the sire of more of the good, large type of Poland than any boar living. His dam, Bess Corwin by Black Jumbo, was a producer of prize winners. Expansion See has proved a valuable sire and his get are the kind sought for by the most discriminating buyers. This fall Messrs. McKeever & Sons were in the need of a good boar to cross on the Expansion See sows and after carefully inspecting many good herds and the boars on exhibition at the leading fairs they purchased a one-third interest in the great yearling hog, Grand Look, first-prize under eighteen months at the Nebraska State Fair, also first and sweepstakes at Hutchinson and St. Joseph Interstate Fairs. Such breeding and individuality as this boar possesses are indeed rare. There will be six of the best daughters of Expansion See bred to this hog, and there surely can be no better combination of good breeding put in one sale than this. This offering that you are invited to inspect and buy at your own price consists of twenty head of aged and yearling sows, some of them the very best in the herd, twenty spring gilts that are ex-

Col. Pat McGuire, Auct. KINGSLEY, IA.

## A. L. MOSSMAN'S BROOD SOW SALE, JANUARY 29, 1907 40 BROOD SOWS, RICHLY BRED 40

A. L. Mossman of Radcliffe, one of the Reliable Duroc Breeders of Iowa, will sell at auction on his farm, one-half mile east and 2½ miles north of Radcliffe, Iowa, under sealed and beated tent, 40 richly bred Duroc sows and gilts. Ten tried brood sows of the cream of his herd, which have proven themselves to be breeders and good mothers, no deformities, no cripples, but all useful, fine individuals with good dispositions, being gentle and kind and daughters of Tientsin 17261, the boar that sired the champion junior yearling sow at State Fair 1906. Some of these yearling sows are half sisters to this fine sow and bred to A. L.'s Chief, one of the best yearling boars of the breed. The boars used on the sows are A. L.'s Chief 43327n, 15723a, by I. J.'s Chief 12445a, L. J. taking first at Indiana State Fair 1905, weighing 1,000 lbs. and as smooth as a peach. A. L. Chief has proven himself a great breeder, as will be seen on sale day in gilts in the sale. 2d Iowa 48659 by Ohio Chief 41419n is one of the good ones. King of Radcliffe 55871 by Corroctor, the J. D. Nidlinger show and breeding hog, King of Radcliffe, is a very promising boar, his dam being Decatur Belle M 112288, Mr. Nidlinger's show gilt at Indiana State Fair, Ohio State Fair, Illinois State Fair and other shows, always winning first. J. Wonder 43881 by West Side 23983, is a litter brother to Crimson Wonder and a good individual. Promotor Chief by Chief Promotor by Top Notcher Again 10787a. Now these sows and gilts have been handled and fed so we believe they will do the purchaser and myself good. All breeders and neighbors and others are cordially invited to attend this sale to be held on farm 2½ miles north and one-half mile east of Radcliffe on the C. & N. W. R. R. and 2½ miles west of Sherman on the Des Moines, Iowa Falls & Northern R. R. Parties from a distance will be entertained at hotel in Radcliffe or at farm, and conveyed to and from sale free of charge. Catalogs are now ready and being mailed. If you have not received one, write to A. L. Mossman, Radcliffe, Iowa, mention Mossman or W. F. Stratton in my care and will receive honorable treatment.

A. L. MOSSMAN,

C. G. WERNER, Clerk.

## Gus. A. Pederson's Duroc Jersey Sale

OCHEYEDAN, IOWA, JANUARY 24, 1907.

I Will Sell 40 Head of Sows and Gilts.

THERE will be 34 gilts, 2 fall yearlings and 4 aged sows. They are bred to three of the best boars in Iowa, G. P.'s Model, Sunny Jim and Osceola Chief, and the sows will be safe in pig on day of sale. These gilts are sired by Osceola Chief, Proud Perfection, Gruver's Orion and More Wonder. I am offering the best bunch of Duroc Jersey sows that have ever been offered for sale in northern Iowa. Write me for catalog at once. If you cannot be present, send bids to my auctioneer. Address,

**GUS. A. PEDERSON,** - **OCHEYEDAN, IOWA**  
Col. J. L. Luther, Auctioneer.

## 50 BIG POLAND CHINA SOWS AT PRIVATE SALE

Sired by Gay Monarch, My 1,000-lb. Boar, Perfect Chief 2d, Winsome Dude and Monarch Jr.

SOME CRACKING good fall yearlings, aged sows and spring gilts bred to the above boars. Size, bone, finish and prolificacy is our standard. Send for my illustrated private catalog, and mention Iowa Homestead. Address,

**E. F. ESCHER,**  
Manning, Iowa

GAY MONARCH, The 1,000 lb. Boar.

tra large, with much smoothness and quality. They represent the blood of Highland Chief Jr., Mogul, Expansion, Ontier, a son of On and On, and many other boars of showyard fame. These sows are bred to three as good boars as is generally found in any one herd and the guarantee Messrs. McKeever & Sons put on every head is

the strongest that could possibly be put on a bred sow. Arrange to be on hand at this sale if you want the big ones that are smooth and also have the quality. Write at once for a catalog and mention this paper. Bids can be sent to Ray Page, representative of this paper, in care of McKeever & Sons, and they will be properly handled.

## ANNUAL SALE POLAND CHINA

**60 BRED SOWS, 60**  
Yearlings and Gilts

At Bennett, Cedar County, Iowa, January 29, 1907,

I will sell on the above date, in the Bennett Sale Barn, 47 head of yearlings and tried sows, bred to the several boars, Iowa Perfection 102717, Young Wonder 117033 and Chief Price 4th 118007. The result of this combination of breeding should prove a good one. I also offer 12 head of gilts of spring farrow, sired by King Perfection 89209, and bred to the above named sires. Scale and bone are my specialties. I also offer one good breeding boar, Iowa Perfection 102717. Send for catalog. Bids will be cared for by the auctioneer, Ira Cottingham, Eden, Illinois.

**GEORGE REGENNITTER, PROP.**

### Dr. Downs' Duroc Jersey Sale.

Few sales this year will possess any better breeding than will go through Dr. J. A. Downs' sale ring at Glidden, Iowa, on January 26th. The doctor has been one of the most enthusiastic hogmen in the state and has been a liberal and a most critical buyer. He is offering for sale daughters of Orion, Proud Advance, American Royal, Peerless, Parnell Bannan, Belle's King, Clovercroft King and Clovercroft Tip Top Notcher. Many of these sows are bred to the famous old boar, Long John, that formerly headed the herd of Messrs. E. H. Manley & Co., of Lyons, Neb. He is the sire of the great sow, Kruger Maid, and she was the dam of the sweepstakes sow, Alix II. Long John sows have always been good brood sows, and they invariably have great length, depth of body and plenty of bone, something that Duroc Jersey breeders will be prone to look more closely to in future years. Dr. Downs is also using Clovercroft King and Clovercroft Orion's Son, and Clovercroft Advance, as good a Proud Advance pig as we have ever seen. He is putting in a splendid bunch of gilts in the sale, and a most excellent lot of yearling and matured sows. Clovercroft Princess is a yearling daughter of Clovercroft King out of a Carroll Jumbo dam. She is a good sow in every way, being particularly nice in head and ear, a good back and a well-sprung rib, and an excellent ham. She is bred to Long John for early farrow, and we look for something good in this mating. She carries more of the blood of Ohio Chief and old Protection than any other sow that will be sold in the spring sales, and some enterprising breeder can make some good money by buying her. Peerless Beauty is a three-year-old, a daughter of old Peerless out of Lady Allison II. by Long John. This hog, Peerless, was one of the best boars ever used in the Manley herd, and they let him go before they knew how good he was. Many well-known western winners carried the blood of Peerless in their veins, and he got some of the best producers. This sow is one of the largest in Dr. Downs' herd, and she is a typical brood sow. Clovercroft Orion's Son, one of the boars now used in the herd, is one of her sons and she has produced others just as good. She is bred to Clovercroft King for March farrow. Manley's Pride is a daughter of Belle's King, out of Ella Orion. The blood of old Echo King, Nebraska Belle, Orion and Ella Roberts is all tied up in one package in this sow, and she was bred to Long John, ostensibly for a prize litter next year. Manley's Rose is a yearling daughter of the undefeated sweepstakes boar, American Royal. She was the second highest-priced gilt in the Manley sale last winter where an average of \$111 was made. She is a half sister to the Iowa and Minnesota State Fair sweepstakes sow, Royal Blossom 5th, also at the Interstate Fair at Sioux City. She is bred to Clovercroft Or-

ion's Son for March farrow. There will be two or three other good American Royal sows in the sale, also one good Parnell Bannan sow, two by Clovercroft King and two by Carroll Jumbo. There are some extra good gilts in the sale. They are excellent in color, are growthy and carry the same line of breeding. Three of these are by the great Orion out of an American Royal sow, two are by Proud Advance, and several are by Adjuster and Clovercroft King. There will not be a poor gilt in the sale. No offering of the season will carry any more of the blood of the winners than will that of Dr. Downs' on January 26th. He extends a special invitation to all the breeders and farmers to be with him on sale day. Write for catalog and mention The Homestead.

### Thomas & Hogsett Sell Durocs on February 2d.

It takes nerve for a man to go out and pay \$2,500 cash for one-half interest in a boar. This is what the firm of Thomas & Hogsett did when they purchased one-half interest in Tip Top Notcher, grand champion boar at the World's Fair. It is only an illustration of what these men have done since they began the breeding of Durocs. The best has been none too good. The offering which they have selected for their coming brood sow sale is composed of the best to be found in their herd and includes many of the tops of other sales. They have always used good boars. Big I Am was used in this herd, and breeders thought it was a serious mistake when Messrs. Thomas & Hogsett let him go, but these gentlemen had not taken snap judgment, but had in mind a boar which they felt sure would make a profitable cross upon Big I Am gilts. In Ambition they found such a boar. The get of this boar which have been included in this sale are worthy a place in any herd, and some of them have been passed upon by the judge at the Illinois State Fair and found good enough to go into first and second places in the under six months class the past season. These prize-winning gilts have been included in the sale and will prove good property in the hands of discriminating buyers who wish to add both good blood and excellent individuals to their herds. Ambition was first-prize boar pig at the Illinois State Fair in 1905, and second-prize boar in the junior yearling class the past season, although breeders' choice for first. More of his get won ribbons at the Illinois State Fair in 1906, than any other boar. In Ambition is found size with quality and smoothness and a pedigree which could not be improved. If Ambition meets with no accident he will be shown again at the leading state fairs the coming season. Fifty head have been cataloged. They represent the blood of many

## DISPERSION SALE Of G. W. Fink's Glenmar Herd of ABERDEEN ANGUS

At Gray's Sale Pavilion, Maryville, Mo., Monday, February 4, '07

**35 Head - 27 Cows and Heifers and 8 Bulls.**

BLACK MONARCH 7682, my double Blackbird herd bull, got by Black Monarch of Emerson, should suit any breeder looking for a herd bull. Two grand sons of Prince Ito, both Blackbirds, two Pride bulls and a Queen Mother will be found desirable. My herd of cows represents such families as the Prides, Blackbirds, Queen Mothers, and Ericas. When laying the foundation for my herd I bought animals that in my estimation were best suited for one wishing to sell to the general public, animals that would be a credit to any herd large or small—the so-called fashionable kind. I have never lost an opportunity to better their condition, always using the best bulls at my command. They are all prolific, every one a regular breeder, of the beefy type. You are cordially invited to be my guest sale day. Write for catalog.

**G. W. FINK, MARYVILLE, MO.**

Maryville, Mo.

prize-winning families and crossed with such sires as Tip Top Notcher, Ambition, Red Jacket, one of the good sons of Tip Top Notcher, Golden Orion by Orion, should produce something good for the purchaser. In our next issue we will have more to say regarding this offering individually, and we would advise our readers to write for catalog at once as per the advertisement on page 24 of this issue. Messrs. Thomas & Hogsett invite breeders to be their guests from the time they get off the cars until the following sale, that of Messrs. Fagan, Browning & McCabe, at Hersman, Ill., on Tuesday, February 5th. Every breeder will be well cared for and at absolutely no expense over Sunday and Monday. There are many Duroc herds in this vicinity so that an unexcelled opportunity will be given those who attend the grand champion circuit of sales to inspect them at no expense. Plan to be present at Golden on Saturday, February 2d. You will be more than pleased with the offering. Those who cannot be present sale day send bids to Mr. D. M. Pierce, representing this paper, who will handle them in a satisfactory manner. See announcement on page 24 of this issue, and in writing kindly mention The Homestead.

### Weighton and his Duroc Winners.

No breeder along the line deserves a better sale than does Mr. John Weighton, of Audubon, Iowa. He sells at his farm right close to town, on January 22d, and he is offering the best bunch of Duroc Jersey brood sows that has ever gone through a sale ring in his neck of the woods. There are some things that deserve more than a passing mention in the Weighton sale, and that is the richness of blood lines and the winners that will be offered. Of the forty head that he will sell, twelve are yearlings and three are aged sows, and there are none better than some of these. One of the best of these is Queen Orion by Orand, he by Orion out of Audubon Queen by Roycroft Sensation. She is one of the best yearlings that will be sold and is bred to Clearmont's

Model, the first-prize pig at Des Moines. Three of her sisters will also be sold, and they are all good. One of the best aged sows that will be sold is Oriol by Orion. She is good all over and is bred to Clearmont's Model, and the man that buys her and cares for her litter is going to have something that will make him a lot of money. Other fall and spring yearlings will be sired by the sweepstakes boar, Audubon, Peerless Orion, Oran and Oreal. In the gilt line he will sell Clearmont's Empress, one of the sensations of the year, and two of her sisters. Clearmont's Empress was first-prize gilt last fall at Des Moines in one of the strongest classes ever shown at that fair. To describe her is unnecessary. Her winnings speak louder than we can in her behalf. She is bred to Clearmont's Model, the first-prize boar at the same show, and if she don't sell it won't be her fault. No man can afford to limit his bid on this gilt. Her two sisters are also very good and the three were in the litter that won second at the same show. They are all bred to the same boar. Another well-bred gilt that he offers is a daughter of Proud Advance and out of the great sow, S. E.'s Model, that topped the Sheldon sale at \$1,060. He is keeping her full sister to show next year. Bred to Clearmont's Model she should be one of the desirable things in his offering. There will be a number of gilts in the sale sired by Proud Advance, the sire of Clearmont's Empress, and also the second-prize litter, and he will also be bred to many of the sows in the sale. The Weighton offering should draw the very best breeders, because it is an offering that is just as good as will be sold this year. Write him at once for catalog, and be sure that you attend his sale. Mention The Homestead when sending for catalog.

The Karans Cleaner cleans patent and russet shoes and leather goods, straw hats, silverware, and there is said to be nothing better for the toilet. In the advertisement of the Myland Company, Philadelphia, Pa., appearing on page 17 of this issue, further particulars in regard to this cleaner may be obtained.

# TWO GREAT OHIO CHIEF SOW SALES

TWO OF THE GREATEST DUROC JERSEY SALES EVER HELD

WESTON, IOWA, JANUARY 30, 1907.

Included in my sale will be Allen's Maid, first-prize sow at Iowa State Fair, 1906, and bred to the great Ohio Chief. There will be forty head in my sale, and they will be bred to Ohio Chief, Briggs' Prince, and Baxter's Buddy K.; daughters of my splendid boar, Indicator, and daughters and granddaughters of Orion, Proud Advance, Red Chief I Am, and other noted sires. I never sold as good an offering as I sell in this sale. About fifteen head bred to Ohio Chief. Write at once for catalog. Address.

O. E. Osborne,

Weston, Iowa.

Bids sent to Mr. M. T. White, representative of The Homestead, or to Colonel Luther, in care of either breeder, will be properly cared for. Kindly mention The Homestead when writing for catalog.

CARSON, IOWA, JANUARY 31, 1907.

"The Home of Winners." Forty head of high-class sows, daughters of Proud Advance, Orion, Dandelion, Advance, Perfection Chief, and grand daughters of the great Nebraska Belle bred to Ohio Chief. There will be sixteen head bred to Ohio Chief in this sale. Others bred to R. J. Proud Orion, by old Orion, and out of Proud Lady, the \$1,275 sow; also to my great young boar, Keep On Perfection. Nothing but the tops go into my sale. Write at once for catalog. Address

R. J. Harding,

Macedonia, Iowa.

## Auction Sale of Bluffview Short-horns.

Mr. F. A. Edwards, of Webster City, Iowa, the genial proprietor of Bluffview herd of Short-horn cattle, announces his thirteenth annual sale to be held at his Bluffview Farm, Tuesday, January 29, 1907. For more than a quarter of a century Mr. Edwards has pinned his faith to the Short-horns. He believes that they are equal to any breed of beef cattle on earth, and as a general-purpose breed that they have no competitors. Unquestionably this is one of Mr. Edwards' star offerings. As has been previously stated in The Homestead, considerable Short-horn history has been made and recorded at Bluffview. While it is not expected that this will be a record-breaking sale, it is a sale of good, clean, useful, practical Short-horns, whose breeding cannot be excelled and from an individual standpoint Mr. Edwards regards it in its entirety the best lot that he has ever offered the public. Aside from the imported Scotch cattle in the offering, a very large per cent of the residue is of Mr. Edwards' own breeding on his Bluffview Farm. The show record of Bluffview, while not on an extensive scale, is an enviable one. The present Scotch herd bull, Secret Viscount, was shown in the open class at Des Moines, 1906, and won third honors without special fitting, having been in heavy service up to the time of his exhibition. The choice string of ribbons won by Mr. Edwards at the Iowa State Fair in 1905-6 are on exhibition in his office and are a creditable lot, both in the Iowa special and in the class open to the world. We wish to say a word concerning the present herd bull, Secret Viscount. The writer has been familiar with this bull since a calf and remembers distinctly the splendid quality Imp. Sorrel, the beautiful daughter of Roan Gauntlet and the granddam of this bull. Secret Viscount was sired by Orange Viscount, a bull that won second at the American Royal at Kansas City in 1904 and was sired by the grand champion, Lavender Viscount. Orange Viscount's dam was Orange Belle by Master of the Rolls, one of the two imported bulls selected by Mr. Amos Cruickshank for Col. W. A. Harris. Orange Belle traces to Imp. Orange Blossom 31st, also by Roan Gauntlet, the bull which by common consent was considered the nearest peer to Champion of England of any of the Aberdeenshire bulls. Secret Viscount's own dam is Sunshine by Imp. Craven Knight. This bull was perhaps the choicest at the time of his importation of all the bulls brought out by Mr. Luther Adams from Sittytton that year. He was sired by the great bull, Cumberland, and has dam was Golden Autumn by Barmpton, the sire of Baron Victor, Imp. Confessor, Spartan Hero and a host of other noted Cruickshank herd bulls, the best in America in their day. Secret Viscount has been wisely selected by Mr. Edwards to perform a great duty, that of following the celebrated Duke of Oakland 2d, which was conceded the best bull ever used at Bluffview. The Homestead is pleased to go on record as say-

ing that the thirty odd calves now at Bluffview sired by Secret Viscount have every promise of outstripping any other bunch of calves of like number ever on the farm. Hence we mention this bull and his great breeding qualities at length for the reason that a very large per cent of this offering is bred to him or has calves by him. We recognize that breeders in sending forth a choice array of well-bred cattle are disposed to say that this is the best lot, they have ever sold. Mr. Edwards in all candor and respect to all previous great offerings from Bluffview, thoroughly believes that in this thirteenth consignment that he is putting forth the best bunch of cattle that it has been his good pleasure to offer the breeders of America. In No. 1 of the catalog, Imp. Fair Duchess, Mr. Edwards believes that he is selling the best Short-horn cow that he ever owned. Mr. Edwards paid \$1,550 for this cow at the W. D. Platt first Chicago sale in 1900. She is a very deep, thick-fleshed roan cow, calved Jan. 6, 1898. She was sired by Watchfire, winner of first prize at the Highland Society's show at Glasgow in 1897. Mr. Edwards has already sold three bull calves from this cow for \$1,250, and there are six head in this sale. She belongs to Mr. Amos Cruickshank's celebrated Broadhooks family. This family was founded on Lady Elizabeth Fairfax, her sire being Prince Edward Fairfax. Both this cow and her sire were bred by Mr. Amos Cruickshank himself, and it was seldom that Mr. Cruickshank would part with one of this family. The great bull, Imp. Lovat Champion, first-prize winner at Perth and purchased from Lord Lovat by Mr. Wm. Duthie for \$1,000, was of this same family. This great bull is now owned at the Flynn Farm, at Des Moines, Iowa. Imp. Fair Duchess has at foot at the present time, dropped November 20th, a bull calf by Secret Viscount, that Mr. Edwards thoroughly believes to be by far the best bull calf that she has ever had. This cow will be a bargain to any breeder of Short-horns at any price that she may bring at this sale. While it is true that she is eight years old, she looks as fresh as a four-year-old. Lot 2 of the sale catalog is Imp. Fair Duchess of Bluffview, a daughter of the cow just described and sired by Grand Duke of Ruddington. This bull was bred by Mr. Philo Mills and was sired by the great champion bull, Marengo. Fair Duchess of Bluffview is a worthy daughter of an illustrious and celebrated dam. One of the very best bull calves ever produced at Bluffview was a daughter of this cow, and to show the rapidity with which she reproduces, she has a roan bull calf at foot, dropped October 14th, by Secret Viscount, and was rebred to the same bull November 11th. Lot 3 of the sale catalog is Heather Bell by that grand old bull, Duke of Oakland 2d and out of Imp. Fair Duchess herself. Mr. Edwards considers Heather Bell the choicest female that he ever bred. She is a typical Short-horn from every point of view, whose breeding cannot be surpassed and is a cow that if properly fitted would be hard to defeat in the show ring. She gives every promise of

## Rankin's Great Duroc Jersey Sale

CARSON, IOWA, FRIDAY, FEBRUARY 1, 1907

"THE QUEENS OF MY HERD" ARE CATALOGED FOR MY SALE.

FORTY HEAD

### LOOK AT THE LIST:

Three Daughters of Glendale Critic.  
Eight Granddaughters of Gold Dust Jim.  
Several Granddaughters of Crimson Wonder.  
Great Granddaughters of Orion, Higgins' Model.  
Twelve Fall Yearlings Bred to a son of the great Crimson Wonder.

One of the greatest daughters of old Orion will be one of the sensations of my sale. She is bred to Ohio Chief for early farrow and she is a grand sow.

There are no better blood lines and no better individuals than I am offering in my sale. If you want the GOOD ONES, you will be compelled to be at my sale.

When writing for catalog, please mention Iowa Homestead. Address,

W. A. Rankin, Carson, Ia.

COL. LUTHER, AUCTIONEER  
Send bids to auctioneer, or to M. T. White, representing this paper, in care of Mr. Rankin.

being as good a breeder as her dam and will undoubtedly be her superior as an individual. She was bred November 6th to Scottish Count. Lot 4 is another daughter of Duke of Oakland 2d and her dam is Imp. Fair Duchess of Bluffview. Here is another splendid Broadhooks heifer that promises to keep up the reputation of this illustrious family. Lot 5 is Imp. Queen Bess 32d, a daughter of Count St. Clair. Her dam, Queen Bess, was by Cash Box and out of Queen Bess 24th by Spice Box. The three above sires were all bred by Mr. Wm. Duthie. Imp. Queen Bess is a beautiful Scotch cow, five years old and is a splendid breeder. She was bred July 4th to Viscount Secret. Such imported cows as this are seldom found in an auction sale, but she, like all of the Broadhooks family, and some other choice ones in the offering, is consigned by Mr. Edwards only for the purpose of maintaining his reputation as a breeder of Short-horns and offering a class of cattle that should attract the attention of Short-horn breeders from coast to coast. To those who attended Mr. Edwards' last sale we can say that this offering is so far superior that there is no comparison, and no one will be disappointed in the quality of this offering who will take the time to come to Webster City on January 29th. The sale will be held in a frame structure, heated by stoves, so that buyers will be made as comfortable as possible. The offering comprises some forty head, thirty-four of which are females, in-

cluding a number of choice daughters of Duke of Oakland 2d. The Bluffview catalog is now ready to mail to all Homestead readers who apply for it, mentioning this paper. Some rich sample pedigrees will be found on page 38.

## Fagan, Browning & McCabes Duroc Sale.

The first day, Tuesday, February 5th, of the second week, of the Grand Champlon Sale Circuit, is devoted to the sale of Messrs. Fagan, Browning & McCabe. This firm purchased a half interest in Tip Top Notcher, the past season, this grand show and breeding boar now being owned by this firm and Messrs. Thomas & Hogsett of Golden, Ill. No one knew better what was in the old champion than did Mr. Harry E. Browning who successfully fitted and showed him for Mr. Geo. W. Seckman. Tip Top Notcher stands today as one of the noted boars of the breed and it is only in the sales of Messrs. Fagan, Browning & McCabe, and Thomas & Hogsett, that sows bred to him will be sold, with the exception of a few which have been sent to these parties to be bred. In our next issue we will give further information in regard to this great boar, but those familiar with Duroc history do not need further information on the subject. We wish to call the attention of our readers to one fact that is not well understood. The previous sales of this firm have been record breakers, but there have been numerous bargains. The breeder who is afraid the stock is going too high need not stay at home on that account. There have been many bargains secured in these sales, and the offering of fifty head this coming month contains many females which any breeder or farmer can well afford to own. The character of the offering is unsurpassed. The champion sow at the Illinois State Fair in 1905 and 1906, Foust's Pride, is included in the offering. The last living daughter of the World's Fair winner, Lucy Wonder, likewise has been listed. S. E.'s Model VIII., litter sister to S. E.'s Model IX., that sold for \$1,000 in the sale of Messrs. H. C. Sheldon & Sons' last year goes into the sale bred to Tip Top Notcher. Both of the sows mentioned above are bred to Tip Top Notcher. A few very good sows by Kant Be Beat are included in the offering. These are bred to Tip Top Notcher. In our issue of next week we will have more to say regarding this noted offering. We want, however, to assure our readers who are interested in Durocs that this sale includes representatives of some of the most noted families of the breed, and the produce of such noted boars as Buddy K. IV., Ohio Chief, Mayor Jr., Gold Cloud, Tip Top Notcher, Model Chief, Advancer, Tip Top Notcher, High Notcher, S. S.'s Success, one of the good sons of Ohio Chief, Kant Be Beat, Hanley and other sires of equal note make the offering one of the most prominent of the season. These sows are bred to Tip Top Notcher, Proud Advance, Buddy K. IV., Grand Chief by Ohio Chief, Red Express, Golden Echo, one of the best sons of the noted Gold Cloud, Oakwood Pilot Wonder and Royal Orion, one of the last litter ever sired by Orion. In both breeding and individuality this offering is far superior to any made heretofore from this herd and breeders should not be slow to appreciate it. The catalogs are now ready and will be sent to all who write as per the advertisement on page 24 of this issue, kindly mentioning The Homestead. The writer representing this paper is pleased to assure the readers that they will be well taken care of, and the stock will come up to their expectations. Plan to be present on Tuesday, February 5th.

Duroc Jersey boar. Commodore 13381, first and champion and headed 1st Prize Aged Herd at Illinois, Kentucky and Tennessee State Fairs 1906. Owned by Messrs. Amos W. Harris & Sons, of Waverly, Kentucky. See field notes.

In the quarter of a century that I have been breeding Short-horns I have never offered a more useful or more valuable lot of cattle. Nearly one-half are pure Scotch, of the very choicest breeding. Three of them are among the best imported cows ever brought from Scotland, one of them being my great Cruickshank Broadhook's cow, Fair Duchess, the best cow in Bluffview herd. She sells with a show bull calf at foot, sired by the royally bred Cruickshank Secret bull, Secret Viscount 212705. Her daughter, Imp. Fair Duchess of Bluffview, and bull calf, together with a choice two-year-old daughter by Duke of Oakland 2d, are other attractions of this very prolific and profitable family. I am selling the best cow I ever owned and the best heifer I ever bred. Also an unusually good lot of daughters and granddaughters of Duke of Oakland 2d, bred to Secret Viscount. The bull offering includes five pure Scotch, two of them out of imported dams and by an imported sire. They are a top lot and afford a good selection for herd headers.

I hope to meet all my former patrons and all lovers of good cattle who can be with me on sale day. Catalog on application.

Cols. Geo. P. Bellows and  
M. L. McCulloch, Auctioneers.

F. A. EDWARDS, Webster City, Iowa.

## Norrish & Bevington Great Duroc Sale.

On Thursday, January 31st, Messrs. Norrish & Bevington, of Kingsley, Iowa, will make their annual Duroc Jersey brood sow sale. This well-known firm have made some good sales before, but they never have put up such an offering as they are selling this year. A representative of The Homestead, after critically inspecting their offering, says unhesitatingly that it is one of the exceptionally good Duroc Jersey offerings of the year. Buyers who attend their sale are not going to be disappointed when they see the sows that they are selling. They are putting forty head in the sale and twenty of these are yearlings. The yearlings and the aged sows are particularly attractive, and some of these have been, and other will be, good show sows. They are selling a daughter of Proud Advance, Duroc King and Iowa Banker, and several by Defiance, Pericles H. and King James. Quite a number of the gilts will be sired by Cedarlawn Model, their second-prize yearling boar at the Interstate fair last fall. Fashion Queen is a two-year-old and her sire is Iowa Banker by Reed's Banker, dam Fashion Queen by Advance. This sow won in under six months class at St. Louis and has been raising two litters a year. She has never farrowed less than fourteen. She is fancy in head and ear and is bred to Cedarlawn Model for March farrow. Jem Advance is a daughter of Proud Advance and is out of an Orton sow and she is also bred to Cedarlawn Model. Lady West is a daughter of the famous old Duroc King and she has been one of the mainstays of the herd. She is bred for early farrow. Many of the leading winners of late years carried the blood of old Duroc King through their dams. One of the extra choice yearlings is Callis O., a daughter of Iron Clad. This sow is a show proposition for some man. She is good in head and ear, with good feet and deep body and nice length. She is well sprung in the rib, has a nice coat of hair and no man will make a mistake in sending a good stiff bid on her. She is also bred for early farrow. Some of the yearlings are sired by Pericles H., a son of old Pericles, and Defiance, a son of Reed's Model. Many of the gilts are sired by their prize-winning boar, Cedarlawn Model and by King James, a son of the sweepstakes sow, W's Choice. The two last boars will also be bred to many of the sows, and they have also used a young boar called Sir Riley by Advancer out of a Duroc Challenger sow. The offering is high class and we can recommend this sale to any of our readers who want some good Duroc Jersey sows. They have issued a nice catalog which will be sent on application. Write for it and kindly mention The Homestead.

## The Harlan Hereford Sale.

One of the best Hereford sales that will be held in western Iowa this year will be pulled off at the Harlan sale pavilion, on February 1st. Messrs. F. W. Hann and J. S. Mayne, two of the best-known breeders in Shelby county, will make the sale and they will sell fifty head. They will offer sixteen bulls and the rest will be cows and heifers. Mr. Hann will sell twenty-one head

of cows and heifers and seven young bulls. All the young cows and heifers are sired by Ike 77284, a noted show and breeding bull that formerly headed the Hann herd. He was a winner of first prize and sweepstakes at the New York and Michigan State Fairs, and the noted cow, Dollie 2d, was bred to him when she sold at Chicago for \$5,000. Nearly all of these cows and heifers are bred to Spartan Grove 2d 153707, a first-prize and sweepstakes bull two years in succession at the Nebraska State Fair. Mr. Hann will also put this bull in the sale, and any man who is looking for a herd bull will find in him a good one. He is low to the ground, of the very beefy, blocky type of Hereford, is a good breeder, has an excellent disposition and is all right every way. Mr. Hann has a lot of his heifers and therefore is ready to dispose of him. He also offers a splendid bunch of young bulls, all sired by Ike. They are well developed, are in good condition and should sell well. There is not a bad-headed bull in the lot, are well quartered and are all right. Mr. J. S. Mayne is one of the oldest breeders in Shelby county. He is practically dispersing his herd. He got his foundation for a herd from the late Ben Hershey, and for the past thirteen years he has been a staunch believer in Hereford cattle. Advanced years is the only reason that he now lets go. He will sell his herd bull, Earl of Lakeview 6th, a grandson of old Corrector, and the most of the Mayne cows will be bred to this animal. Mr. Mayne is putting in all his breeding cows, some of which he has paid long money for. Besides, there are a splendid lot of heifers and as he is closing out the buyers will get the benefit of his years of experience. If any of The Homestead readers want some good Hereford cattle, either herd bulls or young bulls, or cows or heifers, it behooves them to be at this Harlan sale on February 1st. Write Mr. F. W. Hann, Harlan, Iowa, for catalog and kindly mention The Homestead when doing so.

## G. W. Fink to Disperse His Glenmar Herd of Doddies.

On Monday, February 4, 1907, at Gray's sale pavilion, Maryville, Mo., Mr. G. W. Fink, of Maryville, Mo., will disperse his select herd of Aberdeen Angus cattle. Mr. Fink has never maintained a large herd, preferring to make his herd one of the select ones of the country. When buying foundation stock some years ago Mr. Fink evidently bought with discretion, selecting animals of individual merit, also animals that were well bred—by many they are what is termed fashionably bred. The best bulls to be had have been used and as a result at this his dispersion sale Mr. Fink will sell thirty-five head of cattle that should attract the attention of breeders who want choice individuals to add to their herds. Blackbirds, Prides, straight Blackbirds, Queen Mothers and Ericas predominate in Mr. Fink's herd. The opening number of the catalog, Lot 1, is the double Blackbird herd bull, Black Monarchist 7682, that was got by that champion of sires, Black Monarch of Emerson. Black Lassie Belle, his dam, was by Bell's Eclipse, sire of Advance, also the International champion

and one of the greatest sires of the day, Black Woodlawn. Black Monarchist's pedigree is one to which any breeder can point with pride. As an individual he is one that will please the critical buyer, he being of the beefy type with scale, a good strong back, a breezy head and the best of bone. His calves show him to be a breeding bull of unusual merit. Lot 30 of the catalog, First Choice F., is a youngster that has for his grandsire the great Prince Ito and is out of a daughter of Moon Eclipse. Some critical buyer should look after this young Blackbird bull. A young Pride bull is listed as Lot 31. The two grandsires of this young bull, Prieno and Juba of Morlich, and his two grandams, Endora of Eccleshall and Pride of Aberdeen 164th, are all imported stock. This youngster will not be a disappointment to his future owner, as he is promising and should make a good sire. Mr. Fink has other good bulls listed and the man hunting bull material should be on hand. In cows Mr. Fink has a number that should and undoubtedly will please buyers very much. They are not only an exceptionally well-bred lot, but will be found a grand lot of individuals. Not a shy breeder is found in Mr. Fink's herd, several will sell with calves at foot and all of breeding age will be in calf to the double Blackbird bull, Black Monarchist. The man hunting some heifers will find in Mr. Fink's sale a bunch that will make an excellent foundation herd. In next week's issue more will be said of the females that go in the sale. Mr. Fink is not reserving a cow of any description and this is worthy of consideration, as buyers will get all his good ones that have been the source of so much satisfaction to Mr. Fink in his breeding operations. The initial announcement will be found on page 36. Write either Mr. Fink or Mr. Hal T. Hooker, manager of the sale, for a catalog and kindly mention The Homestead when doing so.

## Schmieder's Poland China Sale.

On January 29th, at his farm near Remsen, Iowa, Mr. John Schmieder, one of the most reliable and painstaking breeders in northwestern Iowa, will make a public sale of Poland China brood sows. Mr. Schmieder is one of the old-time breeders, and he is endeavoring to breed a practical Poland China hog. He always has had a leaning toward a lengthy, big-boned type of hog, but has never sacrificed quality in maintaining it. In this sale he will sell forty-five head of spring gilts, and two brood sows. The most of the gilts are sired by his present herd boar, Winning Perfection 105015, the boar that sired the first-prize boar pig under six months at the Interstate Fair last fall. Five of the gilts are sired by Keep On 3d, a grandson of old Keep On, and one gilt is sired by Grand Chief Tecumseh 2d, the sweepstakes Nebraska State Fair boar. The latter gilt is out of Lady Moss by Moss Chief, and she is bred to Winning Perfection for early farrow. Four of the Winning Perfection gilts, Nos. 1, 2, 3 and 4 of catalog, are full sisters to the first-prize pig, and they are bred to Large Dude and All Dude 2d, grandsons of Nemo L's Dude. There are the making of some

good brood sows among the bunch. Four of the best gilts are out of Remaen Beauty, the sow that raised him nineteen pigs this year, and these are all sired by Winning Perfection. He is offering as good a lot of gilts, everything considered, as has been sold in northwestern Iowa in a long while, and they have plenty of size and lots of bone, together with plenty of finish. He sells Whiteface Beauty, a good yearling sow bred to Winning Perfection, and he also sells the two-year-old brood sow, Lady Moss by Moss Chief. She is bred to Winning Perfection for early farrow. Mr. Schmieder sells his ten months old boar, All Dude 2d 116967, a son of All Dude, he by Nemo L's Dude, in this sale. He is a very promising young boar and he has plenty of length and lots of bone. Some good breeder who wants a herd boar for next year had better buy this fellow. He retains his full brother in the herd. If any of our readers want to see a good bunch of Poland China brood sows they will find them in the John Schmieder sale. Write for catalog and mention The Homestead.

## A Good Northern Iowa Duroc Sale.

On January 24th, Mr. Gus A. Pederson will make his second annual Duroc Jersey brood sow sale at his farm, five miles from Ocheyedan, Iowa. This offering will consist of forty head of as good Durocs as will go through the ring this year, including aged sows, fall yearlings and young March and April gilts. They are the get of Osceola Chief, Proud Perfection, More Wonder, Gruver's Orion, Royal Jumbo and Red Ribbon. They are rebred to Osceola Chief, G. P. Model and Sunny Jim. The great breeding boar, Osceola Chief, stands at the head of his herd and he has proved himself one of the best breeders in the state. Lovers of good Duroc hogs should surely attend this sale, as it will afford them an opportunity to purchase something strictly first class. Colonel Luther will be the auctioneer. The sale will be held in a heated tent, a lunch will be served at noon and free accommodation will be given all visitors between Ocheyedan and the farm. For catalog address Mr. Gus A. Pederson, Ocheyedan, Iowa, and you are requested to mention The Homestead when writing.

## There is Herd Bull Material at W. A. Forsythe's.

Mr. W. A. Forsythe, of Greenwood, Mo., breeder of Short-horns, both Scotch and Scotch topped, can furnish the man wanting a first-class Scotch herd bull with a bull that is bred right and is right individually. Several of these are bulls of great promise and are in such condition as to show their worth. Mr. Forsythe has also a number of Scotch-topped fellows that descend from the most reliable American-bred families. With a herd of 125 head Mr. Forsythe is in position to furnish foundation herds of females and few, if any, better places to buy can be found. On a bunch Mr. Forsythe will make an attractive price. See page 42 for his advertisement and when writing kindly mention this paper.

## The Red Oak Short-horn Sale.

On Monday, January 21st, at Red Oak, Iowa, will be held one of the best Short-horn sales that has ever been held in that section of the state. It will be a combination sale and will be under the management of Mr. John M. Bixler, of Corning, Iowa. The contributors to the sale have selected some of their very best cattle and they are putting in a liberal number of Scotch into this sale. Mr. C. E. Shoemaker, of Corning, Iowa, sells three young bulls in this sale. One of these is a pure Cruickshank, being a son of Imp. Bapton Admiral, and his dam is Cinderella, the heifer that topped the all-Scotch sale in Chicago a couple of years ago. She is a daughter of Banker's Victor and her dam was Pine Grove Clipper 4th by the great Marquis of Zenda. He is a Cruickshank Clipper and will be one of the best-bred bulls in the sale. Mr. Shoemaker is putting in a most excellent young bull, a son of Royal Sharon out of a daughter of The Professor. He is a nice red in color, good in his lines and has been a winner at several of the county fairs in that part of the state. He also sells a yearling son of the Scotch bull, Double Lavender in this sale. Mr. George H. Mahr, of Corning, Iowa, sells eight head. One of his best-bred things is a yearling Duchess of Gloster bull, a red in color and tracing to the 17th Duchess of Gloster by Red Duke, the well-known Miller-bred bull. Mr. Mahr is also selling some useful cows and heifers and all of these that are old enough will be safe in calf. Messrs. O. L. Lecklighter and George A. Robinson, of Prescott, Iowa, are sending some good cattle to this sale. Mr. Robinson is selling seven head—five cows and heifers and two young bulls. Mr. Lecklighter is selling four head, one of which is a red two-year-old bull, a son of the Scotch bull, Col. Carvel and out of a daughter of Linwood Pride. He is a Scotch-topped Young Mary and a very good bull. He also sells some good useful cows and heifers. Mr. John M. Bixler is selling nine head and some of the best things that go into the sale are from his herd. He is selling Sunlight 5th, a six-year-old Scotch cow, and she is certainly a good one. She is a daughter of the well-known Norton show bull, Golden Victor, and her dam was by the Harris-bred bull, Lochinvar. She is a Cruickshank Secret and has a heifer calf at foot by the Scotch bull, Diamond Rex, a son of Imp. Cock Robin, and she is bred again to the same bull. This cow is good enough to go into any of the good herds of this country. Velvet Rose is a splendid Diamond Rex heifer consigned by Mr. Bixler. She is a Scotch-topped Wild Eyes and an exceptionally good one. Another nice heifer that he sells is Lady Grace by Diamond Rex. She is a roan in color and a good one. She is one of the nicest young things in the sale and belongs to the Cruickshank Generosity family. He sells three young bulls, one of which is a straight Scotch. His name is Gold Standard and he is a yearling son of Diamond Rex, out of a daughter of Vermont. He is a Cruickshank Secret, a red in color and is a bull that could head any herd. The other two are both Diamond Rex bulls, one a roan and one a red. The roan is one of the thickest young bulls in the sale and would make an excellent steer bull. In the heifer line possibly the best thing in the sale will be Lady Stamford 2d by Diamond Rex and out of Imp. Lorraine by Aberdeen of Markham. She is one of the very best Scotch heifers that will be sold this season. She is a roan in color and is hard to beat. Her dam is a 1,600-pound cow, and one of the best in the Bixler herd. Mr. Bixler also sells two other heifers and one young bull. The Harden Bros. sell three young bulls and one cow with calf at foot. One of the bulls is sired by Good Enough, a straight Nonpareil bull, and the other two by Newton, a son of Hillsdale Commander. The cow that they sell is a three-year-old and is bred to the Scotch bull, Colonel Dalmeny, the bull that topped the Villisca sale last year. Prospective buyers will find some very good cattle in this Red Oak sale. Write Mr. John M. Bixler, Corning, Iowa, for catalog and then make it a point to be at the sale. Kindly mention Homestead when writing.

## The Shenandoah Short-horn Sale.

On Wednesday, January 30th, at Shenandoah, Iowa, will be held the combination Short-horn sale with Mr. C. F. Mitchell, of Farragut, Iowa, as manager. There will be forty-two head of cattle in the sale consigned by Messrs. C. F. Mitchell & Son, W. B. Clark and John S. Dickey, Farragut, Iowa; George H. White, Emerson, Iowa, and the entire herd owned by the Spears Estate, Shenandoah, Iowa, will be dispersed. The late Mr. Spears was one of the well-known breeders in southwestern Iowa and his herd was made up of some particularly good individuals. Many of the Spears cows will weigh from 1,200 to 1,600 pounds, and as the entire herd will be dispersed there will therefore be some good bargains offered. No. 1 of the catalog is a two-year-old Scotch bull, consigned by the Spears Estate. His name is Victor's Royal Pride and he is a son of the well-known Scotch bull, Victor Archer, that formerly headed the Woodford herd. His dam is Imp. Cluny Flora 7th, one of the best Scotch cows today in the state of Iowa. He is a very promising young bull and a richly-bred fellow. Messrs. Mitchell & Son will sell two young bulls, both sired by Pride's Lavender, a son of Imp. Scottish Pride. This bull was used in the Mitchell herd with much success and was afterwards sold at South Omaha for \$300. Both of these bulls are very nice youngsters and will make some one herd bulls. Mr. George H. White sells seven or eight head, including his two-year-old prize-winning bull, Contractor's Banner Bearer. This bull was shown at both the Iowa and Nebraska State Fairs last season and was winner at both shows. He is a particularly nice roan bull, a wonderful flesh carrier and one that is far ahead of most bulls that now head herds in his country. Bud White, a three-year-old brother of his, won third at the International last fall. The man that wants a herd bull cannot well afford to not go after this bull, because he is a good one. Mr. White also sells some good young bulls and some nice cows and heifers. One of these is a six-year-old cow, Fancy Lady 3d, a daughter of the Westrope bull, Royal Prince. This

cow is a good breeder and has had four nice bull calves. Mr. John S. Dickey sells three head, two bulls, both sired by the Scotch bull, Bampton King, and a yearling heifer, a daughter of Royal Crown. There are a nice lot of cattle in this sale of the well-known American families. It is a sale of particularly good individuals and there will be some good bargains in this offering. Write Mr. C. F. Mitchell, Shenandoah, Iowa, for catalog and be kind enough to mention The Homestead.

## Forty Brood Sows at Public Auction.

On January 29th, Mr. A. L. Mossman, of Radcliffe, Iowa, who is one of the reliable Duroc Jersey breeders of Iowa, will hold his sale at his farm one-half mile east and two and one-half miles north of Radcliffe, in a seated and heated tent. The offering will consist of ten tried brood sows and the tops of his herd which have proved themselves to be breeders and good mothers. Hazel D., one of the sows, is a daughter of Tientsin 17261, the sire of the champion junior yearling sow at the state fair in 1906. Some of the yearling sows are half sisters to this sow and are bred to A. L.'s Chief. A list of the boars bred to these sows will be found in the advertisement on page 45 of this issue, as well as other information that will be of value to those of our readers who want to buy good Duroc Jersey sows. The catalogs are now ready and will be mailed to those who write for them. Mr. Mossman, in the introduction to his catalog, says: "We have been blessed with an abundant crop of Durocs on the Prairie Glenn Farm. I desire to announce to my friends and brother breeders that I am going to offer the best lot of gilts and bred brood sows, on January 29, 1907, I have ever had the privilege of offering, not only of great growth and plenty of quality, but examine the blood lines of this offering and see the richness of which the herd is composed. Tientsin 17261, a sire of prize winners; Ohio Chief 41419, the king of Durocs; A. L.'s Chief 43327, a demonstrated sire of great growth and quality; J. Wonder 43861, a splendid sire—here is more Crimson Wonder blood—and the gilts and sows will show for themselves on sale day. They have been fed and handled to do both the purchaser and myself good. Be it remembered, I have the honor of breeding the junior yearling sow taking first at our last state fair and I think I have just as good to go into this offering, so let me cordially invite all to attend in person and if impossible in person, by proxy. Most of the sows carry their own guarantee. All sows are guaranteed to be safe in pig. Should any prove not to be safe in pig and so reported within thirty days of sale, one-fifth of purchase price will be refunded."

## The Rankin Duroc Sale.

February 1, 1907, the day following the Harding sale, at the same place, Carson, Iowa, is where Mr. W. A. Rankin will again sell Duroc Jersey brood sows. "Bilty" Rankin, as he is familiarly known, is selling forty head of his tops and there are some good ones in his offering. He is selling eight granddaughters of old Gold Dust Jim, several granddaughters of Crimson Wonder and three daughters of Glendale Critic. Lady Orion, one of the best daughters of the mighty Orion, bred to the great Ohio Chief, will be one of the great attractions of his sale, and she is entitled to a place in the best herd in this country. He is selling one great-granddaughter of Ohio Chief, mated to Proud Lady's Orion, a son of the noted \$1,275 sow, Proud Lady. Twelve of his fall yearlings are bred to Miss Bob's Wonder, a son of Crimson Wonder. He is also using a son of Ohio Chief, and let us say that he is a good one. We have known the Rankin herd ever since he has started to breed Durocs and we have never seen as good a lot of sows coming from his farm as he will put through this sale. The sale will be held at the sale pavilion, Carson, Iowa, and every attention will be paid those in attendance. Arrangements will be made to care for the hold over from the Harding sale the day before, and the boys will all have a good opportunity to inspect his offering before the sale. The blood of all the leading winners will be found in the Rankin offering. Be sure that you make your arrangement to be with him on sale day. Write for catalog, mentioning The Homestead, and if you cannot be there in person, send your bid to the auctioneer or to Mr. M. T. White, Homestead representative, in care of Mr. Rankin.

## Pederson's Duroc Jersey Sale.

On January 24th, at his farm near Ocheyedan, Iowa, Mr. Gus A. Pederson will sell forty head of Duroc Jersey brood sows and spring gilts. Mr. Pederson is one of the most progressive breeders in northern Iowa and he is selling the best bunch of sows that he has ever owned. These are sired by his old herd boar, Osceola Chief (a Van Patten-bred boar), Gruver's Orion, Proud Perfection and More Wonder. These are bred to G. P.'s Model, Sunny Jim and Osceola Chief. Mr. Pederson says of these sows: "My offering is doing nicely and I have cataloged the best lot that has ever gone through my sale ring. I am breeding these to three of the best boars that can be found in the Northwest and those who attend my sale will find as growthy a bunch of gilts, with more growth than is usually found in one sale. They are all good cherry reds, and they are fed in a way that will insure a good litter for the man who buys them." Write Mr. Pederson, at once for catalog and mention The Homestead. Ocheyedan is on the C., R. I. & P. railroad, the second station east of Sibley, Iowa, in the northern part of the state.

Mr. J. C. Hardman, of Brayton, Iowa, the well-known Poland China breeder, writes: "I am going to hold a brood sow sale at Council Bluffs, Iowa, on February 8th in connection with Mr. Lon Hamilton. We will sell fifty head and in my consignment I am selling every one a good one. I am going to put in a fall gilt that I think is the largest thing of her age with quality that I have seen. She sells safe in pig to the big boar I purchased of Mr. George White and she certainly should do someone a lot of good."

## RED LETTER

## BROOD SOW SALE

At my farm, 3 1-2 miles from LeGrand, Iowa, on January 22, I will sell

**36 Registered Poland China Bred Sows, -- 17 Matured Sows and 19 Gilts---of the Most Fashionable and Approved Breeding; also 6 Poland China Boars. 6 Very Select Chester White Bred Sows. 7 Duroc Jersey Bred Sows, the Cream of the Breed.**

The Poland China sows are bred to such noted boars as R. G.'s Perfection, Perfection E. L. Again, and Rowdy S. Chester White sows are bred to Romeo, Young President, and Grove's Choice. The Durocs are all bred to the sensational boar, Senator W. No better lot of bred sows ever went under the auctioneer's hammer in Iowa. Rich in the blood of Chief Perfection 2d, One Price, Chief Tecumseh 2d, Wilkes, and other aristocratic Poland China blood lines. The Durocs and Chester Whites are unsurpassed in breeding. I defy any one breeder to present six better individuals, or better-bred ones, in the sale ring. Will also sell at same place and time, four choice Short-horn bulls, registered. This advertisement will not appear again, hence, write at once for catalog of this all-important sale, mentioning The Homestead.

Auctioneers:  
J. H. McElrath,  
W. P. Mausherry,  
R. N. Donhowe,

# Dispersion Sale of the Cedarbank Herd Poland Chinas

## THE BIG KIND—THE KIND THAT MADE NEBRASKA FAMOUS

TO BE HELD AT  
**FULLERTON,  
NEB.,**  
**Jan. 25**

THIS is a public sale of the entire herd and includes some that have heretofore never been priced, and sired by the most noted hogs living. Fifteen daughters and six granddaughters of PETER, STERLING 63535, the best living son of Chief Tecumseh 3d. These are all sows of great scale and wonderful bone, and are grand, good brood sows, always farrowing large litters and raising them. If you are interested in the big kind, the kind that make the most pork for the least money, then send for my catalog and come to the sale.

**HANN AND MAYNE PUBLIC SALE OF**

**HEREFORD CATTLE**

TO BE HELD AT  
**HARLAN, IOWA, FRIDAY, FEB. 1, '07**

**50** HEAD. A GRANDLY BRED LOT OF COWS  
AND HEIFERS AND ABOUT SIXTEEN EX-  
CELLENT YOUNG BULLS IN THE SALE **50**

MR. HANN sells twenty-one head of cows and heifers and seven young bulls. All of the young cows and heifers are sired by the great show and breeding bull IKE 77284, a 1st prize and sweepstakes winner at the New York and Michigan state fair. Dolly the 2d was in calf to IKE when she sold at the Chicago sale for \$5,000. All of the daughters of IKE are bred to SPARTAN GROVE 2d 153707, a 1st prize and sweepstakes bull at the Nebraska State Fair in 1903, and 1st prize bull at same fair in 1904. This bull will be sold in the sale and he is a great herd bull. Mr. Hann has sold his 240-acre farm and therefore must sell these cattle in order to reduce his herd. Some of the young bulls that Mr. Hann is offering for sale are exceptionally good ones.

MR. J. S. MAYNE, HARLAN, IOWA, is practically closing out his entire herd. He is one of the oldest breeders in Shelby county, and got most of his foundation stock from the herd of the late Ben Hershey. The Mayne herd has been for the past thirteen years one of the best known Hereford herds in Shelby county, and as he is disposing of his entire herd he will therefore offer some splendid bargains in females and bulls.

No postponement on account of weather. Sale in new heated pavilion. For catalog address,

**F. W. HANN, Mgr., HARLAN, IA.**

**COL. GEO. P. BELLOWES, AUCTIONEER**

Harlan is on the Chicago, Great Western, Chicago & North-Western and Rock Island railroads; one hour's ride from Omaha.

### COMBINATION SALE OF REGISTERED

**SHORT-HORN CATTLE**

To Be Held at Sale Pavilion on Fair Grounds

**SHENANDOAH, IOWA, JANUARY 30, 1907.**

**40 Head---26 Females and 14 Bulls---40 Head**

From the herds of Geo. H. White, Emerson, Iowa; W. B. Clark, Farragut, Iowa; John S. Dickey, Farragut, Iowa; C. F. Mitchell & Son, Farragut, Iowa; and the executors of the estate of the late Samuel Spears, Shenandoah, Iowa.

The above breeders are selling some of their best cattle. Among the bulls are several strong, vigorous yearlings of outstanding merit. The females are a good lot and comprise the tops of these herds. The Spears herd will be closed out in this sale, and they are selling some splendid cattle, their herd being noted as one of the best in southwest Iowa. There will be show bulls that were prize winners at the Iowa and Nebraska State Fairs, as well as at some of the best county and district fairs in the state. Mr. White sells Contractor's Banner Bearer, second-prize bull at Nebraska and one of the leading prize winners at the Iowa State Fair. This will be one of the best Short-horn sales ever held in southwest Iowa. The cattle are an exceptionally good lot individually and many of the cows will have calf at foot. Write for catalog and kindly mention The Homestead. Address,

**C. F. MITCHELL, MANAGER, FARRAGUT, IOWA.**  
Col. Geo. P. Bellows, Auct.

# MOATS' GREAT PERCHERON HORSE AND MULE SALE

**33** RANDOLPH, NEBRASKA, FRIDAY, JANUARY 25, '07 **20** MULES  
**MARES, FILLIES, HORSE COLTS AND GELDINGS AND**

In this sale will be a lot of daughters of the well known horse McMahon 23340, considered the greatest Percheron stallion ever used in northeast Nebraska. Many of these will be safe in foal to BLACKBIRD 33756, a ton horse and now at the head of my stud. One of the best mares I am offering is JULIET 22862, a black mare, bred by H. G. McMillan, and will weigh 1800 pounds. She was sired by Nubian 17467. She is one of the BEST REGISTERED MARES in the state and is safe in foal to Blackbird 33756. There will be some great Percheron geldings in this sale weighing from 1300 to 1600 pounds.

## 20 Head Yearling and Two-year-old Mules.

These are good solid colors and in fair flesh. A nice thrifty lot that will make good, big headed fellows and will be good money-makers for those that buy them. If you want PERCHERON BRED horses and mares or good mules you should come to my sale. It will be the greatest horse sale ever held in northeastern Nebraska. Write for catalog at once. Address,

COL. GEO. P. BELLOWS,  
AUCTIONEER

# GREAT WESTERN DUROC JERSEY SALE CIRCUIT

THE CREAM OF SIX OF THE BEST HERDS IN THE STATE OF IOWA

**250**

Including daughters and granddaughters of Ohio Chief, Junior Jim, Crimson Wonder, Proud Advance, Tolstoy and other noted sires. Some of these were leading winners at the Iowa State Fair, including the first prize sow at Des Moines.

**250**

THE MOST UNIFORM LOT OF DUROC JERSEY SOWS THAT WILL BE SOLD THIS YEAR.

**JANUARY 19, 1907**

Aug. Voge, Portsmouth, Ia., will sell at his farm

**40 Head** Eighteen fall yearlings and aged sows and 22 spring gilts. Three daughters of the World's Fair sweepstakes boar, *Tip Top Notcher* in sale; 8 daughters of *Crimson Wonder I Am 2d*, the third-prize boar at Des Moines; one *Junior Jim* gilt, and a daughter of *Lafollette*, considered one of the most sensational gilts of the year, bred to the first-prize Iowa State Fair boar, *Kruger Lad*, will also be sold. A big per cent of the offering will be bred to *Kruger Lad* and *Crimson Wonder I Am 2d*. If you want prize-winning blood come to my sale. Write at once for catalog. Address,

Aug. Voge, - Portsmouth, Iowa.  
Col. L. L. Luther, Auct.

**JANUARY 21, 1907**

Grant Hockett, Manning, Iowa, will sell at his farm

**40 Head** Sixteen aged sows and spring and fall yearlings, rest spring gilts. Daughters of the great *Orion*, *Model Chief*, *Crimson W.*, *Rural* and *Hector*, and are bred to

**I AM ADVANCE**

one of the greatest boars today in the state of Iowa; also to *Crimson W.*, *E. L. Perfecto* and a son of the great *Tolstoy*. I can show more uniformity and more size than has ever gone through an Iowa sale ring. Write me for catalog. Address,

G. W. Hockett, - Manning, Iowa.  
Col. L. L. Luther, Auct.

**JANUARY 22, 1907**

Claremont's Bred Sow Sale, Audubon, Iowa.

**40 Head** of the best sows in the herd go at your own price. This sale includes *Claremont's Empress*, the first-prize gilt at Iowa in 1906, her litter sister, the gilts of the second-prize litter at Iowa, 1906, *Queen Orion*, the famous granddaughter of *Orion*, one of S. E.'s *Model's* best gilts and many others of great merit. This sale is made up of prize winners and sows of prize-winning blood.

**HERD BOARS.**

*Claremont's Model*, first-prize boar at Iowa, 1906; *Proud Advancer*, sire of the first-prize gilt and second-prize gilt at Iowa, 1906; *Audubon*, twice champion over all breeds at Audubon County Fair, and *Claremont's Prince*, a grandson of *Proud Advance* and *Orion*. Write for catalog. Address,

JOHN WEIGHTON, - AUDUBON, IOWA.  
Col. L. L. Luther, Auct.

**JANUARY 24, 1907**

J. E. Wehr, Portsmouth, Ia., sells the cream of his herd.

**40 Head** Fifteen yearlings and aged sows, rest spring gilts. Sired by *Munson's Perfection*, first-prize boar at Des Moines; *Bryan M.*, a grandson of *Duroc Challenger*; *King Perfection*, sweepstakes boar at Des Moines, and other noted sires. Bred to *Proud Advance Jr.*, *Orion's Model*, *Young Surprise* and *Minnesota Chief*, first-prize boar Minnesota, 1906. I never offered for sale such a lot as will go through my sale ring this year. Write me for catalog.

J. E. Wehr, - Portsmouth, Iowa.  
Col. L. L. Luther, Auct.

**JANUARY 25, 1907**

**Public Sale of Duroc Bred Sows.**

On January 25, 1907, I will sell fifty head of sows, six by the old hog, *Orion 5293*, six by *Proud Advance*, three by the sweepstakes hog, *Crimson Wonder I Am*, including one full sister to the sweepstakes boar, *Crimson Wonder Again*, others by *Junior Jim*, *I Am a Wonder*, *Young Advance*, *Tienstin* and other boars. I will also include the great yearling sow, *Ruberta*, winner of first prize at Iowa State Fair last year. They will be bred to the \$5,000 boar, *Junior Jim*, *I Am a Wonder*, *Orion's Son* and *Tienstin*, sire of *Ruberta*. Write for catalog and mention *The Homestead*.

F. E. GARRETT, - LOHRVILLE, IA.

**JANUARY 26, 1907**

Clovercroft Durocs at Public Auction at Glidden, Iowa.

**40 Head** Fourteen tried brood sows and yearlings, balance gilts. Daughters of *Clovercroft King*, *Clovercroft Tip Notcher*, *Adjuster*, *Peerless*, *American Royal*, *Belle's King*, *Advance* and the great *Orion*. They are bred to the great *Long John*, *Clovercroft Orion*, *Clovercroft King* and *Adjuster*. Write at once for catalog.

Dr. J. A. Downs, Glidden, Ia.  
Col. L. L. Luther, Auct.

ADDRESS ANY OF THE ABOVE BREEDERS FOR CATALOG AND KINDLY MENTION IOWA HOMESTEAD.

**N. B. CUTLER,**  
CARTHAGE, ILLINOIS.  
Proprietor of Bonny Mede Farm

**35**  
**HEAD**

Offers to the public thirty-five head of choicely-bred Durocs. The offering is made up of eighteen yearling and aged sows and seventeen gilts bred to Wonder Boy, first-prize boar pig Illinois State Fair, 1906, and headed first-prize litter same show. Several to Peter the Great, he by Big I Am. The best lot ever offered from Bonny Mede herd. Each animal a useful one and many sows of rich breeding and show-yard individuality. Among the best is the show sow, Iona Queen, always a prize winner at leading state fairs. An attractive gilt is offered in a full sister to Wonder Boy, one by Milton Orion, a full sister to Red Carnation, the sow which has topped two noted sales. Catalogs sent free.

Breeders and Farmers are invited to be present at the week's sales, the offerings being of the richest breeding and individual merit. Parties who cannot be present, send bids to Mr. D. M. Pierce, representing this paper. Cols. McGowan, Reppert and Duncan, Aucts, Mention this paper when writing.

### DUROC JERSEY HOGS.

**Thos. Bennett,**  
Rossville, Ill.

HOME again and find 143 spring pigs, the best Duroc Jerseys I ever saw. 5 full boars for sale. Bred gilts all sold. Write for prices, mentioning Homestead.

**GOLDEN HERD DUROCS**

WE OWN one-half interest in World's Fair champion boar Tip Top Notcher. Have a fine lot of spring boars by Ambition, 1st prize boar Ill. State Fair 1905, and Big I Am, 1st prize boar Ill. State Fair 1904. Write for prices. Inspection invited.

**Thomas & Hogsett,** Golden, Ill.

**Maple and Lawnsdale Herds**  
DUROC JERSEYS.

Will sell a few Spring gilts bred to Illinois Chief, the sensational boar recently purchased by us. Also will breed a few sows to Illinois Chief and the noted boar, Hambletonian, at a reasonable fee. A few fall pigs for sale. Address either

**MANLOVE BROS. or J. H. NORRIS,**  
Bowen, Illinois.

**Choice Duroc Gilts.**

I AM offering a choice collection of Duroc gilts for private treaty. Some are by Roby's Crimson 44081, by Crimson Wonder I Am 34697, and are bred to Roby's Duke O, 44079, by Duke of Ohio and he by Old Kan't Be Beat 28067. Also a nice lot of choice ones bred to Roby's Crimson. This will be the best chance you'll have to get some of this famous Crimson Wonder I Am breeding at prices that will make you open your eyes wide, quality considered. Write me your wants, brother breeders.

**W. E. ROBY,** TRURO, IOWA.

**J. LORTON.** Union City, Ind., proprietor of the Clover Blossom Herd of Durocs. I. J.'s Chief 12445 (A) 45747 (N) 1st in class at Indiana state fair, '05, at head of herd. Spring pigs of either sex of the large, growthy, smooth type, for sale. Orders for bred gilts booked. All stock guaranteed as represented. I. J. Lorton, R. R. 35, Union City, Indiana.

**GOLDEN HERD DUROC JERSEYS**

WE are now offering a few very good boars mostly of April farrow of the kind that pleases, also a few open mature sows, one a noted prize winner. Farmers' prices on boars.

**Rood Bros.,** (Swine Specialists), Lake Park, Ia.

A ETHEL RUD 28069 for sale. The best pig ever sired by Tip Top Notcher. He was 4th prize boar at Nebraska as well as siring 3d prize sow at same show in 1905. "The best Tip Top Notcher pig I ever saw," B. J. Harding. "He should have borne blue ribbon," S. R. McKelvie, Twentieth Century Farmer. Price \$1,000. A. Wilson, Bethany, Neb.

### DUROC JERSEY HOGS.

**Prairie Glen Herd of Duroc Jerseys.**

I AM now offering the best lot of Duroc Jersey boars I have ever bred; large, growthy, mellow, smooth fellows, with lots of bone and plenty of quality. Good enough to head the good herds and do the breeder good. Sired by such boars as Al's Chief 43327 N, 15723 A, he by J. J.'s Chief 12445 A; first at Indiana state fair last year, a thousand-pound hog, he by Winchester Chief 10077, he by Morton's King 8725, Tientsin 17261. Imp. Wonder 43561, A. L. Advance 4331, Odebolt Chief 33271, a son of Perfection Chief 425 hog, Pleasant Hill Advance No. 44251, and other good sires; last, but not least, Ohio Chief, two sons of this great sire and show boar. Tientsin No. 17261 for sale, sire of some of my best. Satisfaction guaranteed. Come and inspect, or write me. Prices reasonable; quality best. Address, P. S.—Eight November males of rare quality; three Top Notcher bred. **A. L. MOSSMAN,** TELEPHONE 88-3, **RADCLIFFE, IA.**

**CRIMSON WONDER I AM 34697** Heads the American Herd

BOARS sold from this herd made sensational winnings at Des Moines this fall. I have boars now ready to go out that equal their illustrious relations in style and quality. If you are looking for a show boar or herd header, come and see me. Choice gilts also for sale. Will breed sows of quality and reputation to Crimson Wonder I Am for \$100 service fee. Address, **U. G. DAVIDSON,** **MANSON, IOWA.**

**POLK COUNTY HERD DUROC JERSEY SWINE**

50 choice gilts from the following strains: Proud Orion, Mauley Orion, Granddaughters of Proud Advance, Billi K. Malcolm's Model, Improver 2d, Echo King and King Perfection blood. Bred to one of these noted boars: a son of Tip Top Notcher \$5,000 hog, first and grand champion World's Fair; a son of Can't Be Beat \$2,500 individual; first in class World's Fair, a son of Old Orion. The sire of more prize winners than any Duroc and also some bred to a grandson of Ohio Chief. Write for prices.

**Grand Sow Sale February 4, 1907.**

**ROY WEST - - - - - BONDURANT IOWA.**

**PUBLIC SALE OF DUROC JERSEY BRED SOWS**

### DUROC JERSEY HOGS.

**DUROC JERSEYS AT PRIVATE SALE.**

HAVING decided not to hold a winter brood sow sale I now offer for sale gilts of superior breeding, many of which will weigh 200 lbs. They are from the Crimson Wonder, Gold Dust Jim and Proud Advance families. Also a few choice boars for sale. Two by Ohio Chief; one by Tientsin, a half brother to the sow that took first in Junior yearling class at Iowa State Fair, 1906; one by Chief Perfection, out of Lady Orion by Orion, the best thing I have seen this year. Will weigh 230 lbs. Write or call on me. **O. L. MOSSMAN, POLK CITY, IOWA.**

**HANLEY BOARS**

**FOR SALE AT REASONABLE PRICES**

WE have a number of boars sired by Tip Top Notcher and other noted boars at reasonable figures which are herd headers. Write at once if wanting a boar.

**McNeil Bros. - Bowen, Illinois.**

**IOWA HERD OF DUROC JERSEYS.**

(Successor to Wm. Roberts & Son.)

I AM offering eight fall boars by Lord Roberts 17329, my herd boar and Sundell's Fancy. These boars are extra good in back and foot, with desirable length. Am now booking orders for spring pigs. A nice lot by King West 26163, assistant herd boar. Write me for good ones.

**A. T. Sundell, - Paton, Iowa.**

**WHITE OAK HERD**

OF Recorded Duroc Jersey Swine. We have a number of well selected males of March and April farrow; sired by Top Notcher Model 37663; he is the same breeding as Top Notcher Chief, that won first in class and first as grand champion at St. Louis in 1904. Our sows are the blood of Reed's Banker and Advancer and Advance and Top Notcher Chief. Write, phone or come and see them. Satisfaction guaranteed. Prices way down for quality and breeding. We can ship over the C. R. I. & P. or Northwestern R. R.

**J. W. Troy & Bros. Props., Rosehill, Mahaska Co., Ia.**

**INDIVIDUALITY and breeding combined.** About 70 Duroc pigs sired by Luther H., by Hambletonian (winner at Neb. and St. Louis), Malcolm Model, Belle Echo, Morrison Bell Top and Won't Be Beat by the great Kan't Be Beat. Pigs are doing nicely. Good colors and plenty of size. Inquiries answered promptly. **E. K. Young & Son, Havelock, Neb.**

**Prolific Herd of Duroc Jerseys**

I AM offering some very promising male and female pigs sired by Billy K., Medoc, Forty Kings, Billy K. Jr., and Frank's Choice by Belle's Echo. Can give you good herd headers at prices to suit purchasers. Address, **G. Van Patten, Sutton, Nebraska.**

**Fashion Improver Jr. at Head of Herd.**

I HAVE several choice spring male pigs that will be priced to sell. I sell at private sale and these must go. Sired by Fashion Improver, winner at Nebraska State Fair '05. Will make good price on young gilts as well. Write today. **F. A. Kruse, Waco, Neb.**

HORSES.

# His Majesty, King Edward VII, of England, and Lord Rothschild's Exhibit of Stallions Were Purchased by ROBERT BURGESS & SON at the International Exposition at Chicago, 1906.

Winnings 1906 Demonstrating to the Public the Superior Quality of Our Stud:

Champion Percheron Stallion at the Kansas state fair.  
Champion Belgian Stallion at the Kansas state fair.  
Champion Shire Stallion at the Illinois state fair.  
Champion Shire Stallion at the American Royal, Kansas City.  
Champion American-Bred Percheron Stallion at the American Royal.  
First Best Five Percheron Stallions at the Kansas state fair.  
First Best Five Belgian Stallions at the Kansas state fair.  
First Best Five Shire Stallions at the Illinois state fair.

Second Five Best Belgian Stallions at the Illinois state fair.  
First Best Five Shire Stallions at the American Royal, Kansas City.  
Second Best Five Belgian Stallions at the American Royal, Kansas City.  
Second Best Five Percheron Stallions at the American Royal, Kansas City.  
Champion Shire Stallion at the Chicago International.  
Best Imported Shire Stallion at the Chicago International.  
Best Five Shire Stallions at the Chicago International.  
Reserve Champion Belgian Stallion at the Chicago International.

Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper who is assisting in placing the stallion in your neighborhood, who usually is one of your own neighbors (the most influential man of the neighborhood), whose influence is obtained by a large commission paid to him by the seller placing the stallion. The long-time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. WE KNOW WE CAN SAVE YOU AT LEAST 50 PER CENT. IF YOU HAVE TO HAVE A COMPANY TO HAVE A HORSE IN YOUR NEIGHBORHOOD, FORM YOUR OWN COMPANY and come to the barns. BE CONVINCED THAT YOU CAN SAVE FROM \$1,000 to \$1,500 which has to be paid to this influential neighbor or neighbors to sell you a horse.

Good American-bred stallions, \$800 to \$1,000. First-class imported stallions, \$1,200 to \$1,600. Choicest stallions a little higher.

We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from—SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS. Come to Wenona and deal with Bob Burgess, who has been in the business over thirty-two years—longer than any one man in the stallion trade—and we guarantee to make every deal satisfactory to you. Get your guaranty and insurance direct from headquarters. Visit our barns and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and has the quality of stock that will suit the people, is perfectly good for the guaranties and will sell to you more good horse quality for less money than anyone. Come to the barns and get the most reasonable terms that can be offered.

Send for illustrated catalog and calendar.

**Wenona, Ill.**

**Wichita, Kan. Apply Rosberry & Coon.  
Dawson, Neb. Apply Leroy Judd.**

## PETERSON'S BLACK PERCHERONS.

FOR \$700 to \$1,000 you can buy of me the best Percheron Stallion that can be bought anywhere. Proven breeders can show colts. Come and see the horses and you will never go away without buying. Good colors, extra bone, and not an unsound horse in the lot.

H. E. PETERSON,

LYONS, NEBRASKA

## Percheron Stallions and Mares For Sale

HORSES.

# FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND," Iams' "HORSE SHOW" at Nebraska, Iowa and Illinois State Fairs WAS the "TALK" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE," "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 168 Percherons, Belgians and Coachers 168

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." All REGISTERED and APPROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES," they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He huys, owns and sells more stallions than any man in United States; saves THOUSANDS of DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000 SAVED AT IAMS \$1,000

KEY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "huts in," sells more stallions each year. He makes every statement good. George, dear! Buy a stallion of Iams. His 1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. REFERENCES: St. Paul State Bank and Citizen's National Bank.

## ST. PAUL, - NEBRASKA

**PINE RIDGE STOCK FARM**  
Has the biggest and best barn in the United States and it contains the BIGGEST and BEST lot of Percheron and French Draft Horses.  
The last chance to obtain a colt by SAMSON 27238, as his last colts are now yearlings. Over 150 head of horses showing more bone, size and quality than any similar number in America. TAVERNIER P. 35719 and F. D. 12810 now at head of the stud. Prices below competition.

**A FEW CHOICE SUFFOLK FILLIES FOR SALE.**

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

**H. LEFEBURE'S BELGIANS.** The Best and Largest Collection of Belgian Draft Horses in AMERICA. BELGIANS EXCLUSIVELY. FAIRFAX, LINN COUNTY, IOWA. FAIRFAX is eight miles west of Cedar Rapids on two railroads and is the greatest Belgian horse market in America. Cedar Rapids and Iowa City electric car passes near farm every 45 minutes.

## HORSES.

# Watson, Woods Bros. & Kelly Co. Lincoln, Neb.

One of the oldest importing firms in America have in their stables, at Lincoln, Nebraska, 60 head of the best Percheron, English Shire, Belgian and Hackney stallions. ### Our Own New, Personally Selected, Direct Importation.

A GREAT NUMBER OF PRIZE WINNERS from the leading horse shows of Europe. If you have not seen OUR HORSES, you have NOT seen the best. YOU want a FIRST-CLASS stallion. Come to our superb new, up-to-date stables and SEE for yourself—just what you want. Write about transportation here and return. ON OUR PLAN you can make a first-class horse pay for himself. No money required.

### OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another Judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percheron and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftsrat O. V. Oltmann, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANN BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

## S. J. MILLER, KIRKSVILLE, MO.

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

25 Percheron stallions, among which are prize winners in France, coming threes and fours, weighing 1,900 pounds, all dark colors. 25

No importer can sell you a better horse at from \$700 to \$1,400 than I am offering, for they were not brought over this year. Among my French coachers you will find a four-time winner in France. To the man wanting a first-class mammoth jack or jennet, will say I have them. Come to my barns and let me show you, or write me, telling what you want. Barns in town. Kirksville is on the Wabash and Burlington railroads.

## M. L. AYERS - SHENANDOAH, IOWA.

## TRUMANS' PIONEER STUD FARM

BUSHNELL, ILLINOIS.

## TAYLOR & JONES,

IMPORTERS AND BREEDERS OF  
PERCHERON, SHIRE, HACKNEY AND  
BELGIAN STALLIONS.

We are selling our Stallions direct from our barns and are selling better horses at from \$700 to \$1,400 than any firm in America. We have a few sensational show horses that will come a little higher. Special prices to dealers wishing to buy from 3 to 15 stallions.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

We are located on main line of the Chicago & Alton R'y., 12 miles north of Springfield, Illinois, also on new Interurban railroad that is now running cars every hour between Lincoln and Springfield, connecting with lines from St. Louis, Edwardsville, Carlinville and Decatur. Handsome illustrated catalog free. Address,

## TAYLOR & JONES,

WILLIAMSVILLE, BOX 68, ILLINOIS.

## THE Lafayette Stock Farm

Lafayette, Ind.

Largest Importers in America of Oldenburg German Coach, Percheron and Belgian stallions and this no man can dispute. Our importation of 1906 arrived November 15th. We have won more blue ribbons in 1906 than all other importers combined.

At the great Illinois State Fair at Springfield we won, out of fourteen shows, twelve blue ribbons in the Percheron, Belgian and German Coach classes. We won the championship offered for the five best Percheron stallions owned by one firm and also the same championship offered for the best five Belgian stallions. We won the championship for best Belgian stallion and second, third and fourth in that class. At all other fairs we have done as well and we can show buyers more good, serviceable draft and coach stallions than ever before.

Our exhibition in 1906 at the great International surprised the hundreds of thousands of visitors that attended. We can and do sell our stallions as low as they can be sold at any place in America.

# Let Me Send You a "KNODIG" Pitless Scale on 30 Days Trial.

H. C. GUMBEL

The man who stands back of the "KNODIG" PITLESS SCALE.

## My New Direct-From-Factory Selling Plan

### Saves You All Jobber's and Dealer's Profits

No Deposit—No Notes to Sign—No Obligations of Any Kind

### You Have Nothing to Pay Until Satisfied

The Only Scale  
Guaranteed by  
the Maker  
for 10  
Years

your own premises before you pay me one penny. It isn't one of those sham "free offers," where you pay first and then take your chances on getting your money back, if the article you buy is not satisfactory.

No, sir! I mean just what I say. My "KNODIG" Pitless Scale, with the Protected Bearings, is the best scale ever put on the market. I know all about it because I make the "Knodig," and I know it is good enough to put out on a genuine free basis.

I will send a set to you or any other honest man on 30 days' trial. You have nothing to pay me, no notes to sign, nothing to do but make a fair test of the "KNODIG," entirely at my risk. If it fails to satisfy you, return it at my expense, and I will pay freight both ways.

You can't afford to buy one of those inaccurate, cheaply constructed Pitless Scales which will do poor work and get out of whack in a month or two,—nor a high-priced, old style Pit Scale which runs up big repair bills and can not be moved about on your place.

What you need is a KNODIG PITLESS SCALE which costs you a little more at the start than the "cheap" scales sold by the mail-order houses, but is the best investment in the long run, because it lasts a lifetime. The "KNODIG" costs you from \$30 to \$50 less than a Pit Scale, and is as good as any scale made at any price. It is the only scale backed by an unlimited iron-clad 10-year guarantee.

As a matter of fact, you positively can't afford to buy any scale until you have seen my big, illustrated catalog showing the new models A and B "KNODIG" PITLESS with Protected Bearings. They are the only scales ready for instant use when you want them. No ice nor snow to cut away from the bearings in winter—no dirt nor dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "KNODIG" PROTECTED BEARINGS.

Fully covered by patents. Sold only direct from factory at lowest wholesale factory prices. Cost about half the price of a Pit Scale and have no expensive pit with rotting timbers, rusting parts and big repair bills.

The KNODIG PITLESS can be removed anywhere on your land, wherever the work happens to be. It is personal property. Should

**My "Knodig Pitless" Scale is the only scale with patented protected bearings.**

you sell your farm, the "KNODIG," unlike the Pit Scale, does not go with the land. Absolutely accurate because tested according to U. S. Standard of Weights. The U. S. Government has selected the "KNODIG" for use in the Kansas City Postoffice. Also in use exclusively at the U. S. Experiment Station, North Platte, Neb.

Here's how I save you money on scales of high quality. Other scales, including the high-priced pit scales, are sold through Jobbers, Dealers, Agents and Salesmen, who all take their profits out of the scale by the time it reaches you, the user. My new Direct-from-Factory Selling Plan now saves you all these middlemen's profits, because I have cut out absolutely everyone who stands between you and me in the sale. You now pay only one small profit on the "KNODIG" over and above the actual cost of labor and materials in producing it.

No other scale in the world is sold this way. If you question this statement, just write to any scale manufacturer and see how quickly he will turn you over to some agent or dealer. But why should you pay MORE for the privilege of buying scales through a third party? That isn't good common sense,—is it?

Does it make the scales you buy any better to pay this extra profit? Is there a single reason why you should NOT deal directly with the factory? You buy Stoves, Incubators, Organs, Buggies and a hundred other things that way, and save money by doing it. Then, why not—Scales?

In adopting this policy of direct selling, I realize that I am making many powerful enemies for the "Knodig" Scale. For I am antagonizing every scale jobber, mail-order concern, dealer, agent and salesman in the country, who will naturally, in self-defense, talk against the "KNODIG" and in favor of the scale that gives them, instead of you, the extra profit.

So, you see, I must rely solely upon you, the man who pays for and uses the scale, and I ask you to decide for yourself where your REAL interest as a scale buyer lies—whether with the scale that comes to you burdened with a "rake-off" for the middlemen or the "KNODIG," which you can now buy direct at a saving of one-third to one-half? Just sit down and think the matter over carefully before you decide. Figure it out for yourself, before giving up any of your good money for anybody's scale. Consult your own interest. Consider your own pocket-book, that's all I ask you to do, Friend.

Am I right about it?

At the  
Royal  
American  
Live Stock Show,  
Kansas City,  
"Knodig" was selected as the official scale.

This Scale is Used and Approved by the U. S. Government, which proves that it must be right.

## Send for My Big Free Scale Book

The "KNODIG" must satisfy you, or no sale, remember! No buying a "pig in a poke" when you deal with me. You try BEFORE you buy my scale. The new "KNODIG" Scale Catalog gives full details of my wonderfully liberal Free Trial Plan and Guarantee. You ought to see this book whether you expect to buy a scale now or not. It contains over forty fine pictures illustrating scenes from farm life and is chock-full of sound scale sense from cover to cover. Cost me a big lot of money to get up, but I'll be glad to send you a copy—FREE—if you say so. Just address me personally, and write today, before the books are all gone, for I want you to have one.

WHOLE NO. 2584

### GIVING THE FARM BOY RESPONSIBILITY.

The following communication has been received from a Missouri subscriber:

Some years ago there was some excellent advice given in *The Homestead* relating to the question of responsibility in farm affairs as a factor in developing boys and young men. You stated that as a rule farm boys do not have as much experience when they come of age as would be the case if fathers adopted a more liberal policy in the matter of banding over responsibility. I have never read in any paper sounder advice than was given at that time, and I take occasion to open up the subject anew.

I have as good neighbors as can be found in any part of the corn belt, but I think some of them are making grave errors by adopting the plan of taking entire charge of all business matters, and also taking the responsibility of performing those items of labor that call for special skill. It will surprise any man who has never tried it to see how a fourteen or fifteen-year-old boy will respond when he is placed under responsibility. Just how far a father should go in letting the boys conduct business affairs and in letting them perform early in life the kind of labor that calls for special skill is not for me to say, but I would like to see you discuss that topic in the columns of your paper.

There are so many different kinds of fathers and so many different kinds of boys that it's a little difficult for us to lay down rules that will apply in all cases.

No boy will grow very much attached to a farm or its affairs if he is given the

drudgery end at all times. Not that we infer that there is drudgery in any special degree about farm work, but if the labor is not divided so as to call into play the brain as well as the hand a good deal of the labor comes nearly being under that classification.

Where pure-bred stock is kept it is easy to make a start in placing responsibility on the boy. Give him charge, for instance, of keeping the books in which is recorded the items that are necessary in keeping up herd records, and see to it that he makes himself familiar with both ends of the business, namely, the animal end and the pedigree end. If he has become interested in matters of this kind his labor in stables, feed lots and pastures becomes the labor of one who uses both head and hand. His interest will center there, and such a boy will seldom find the time or seek an opportunity to take up work along other lines. Give him the drudgery end only—that of hauling fodder, cleaning out stables, milking, carrying and hauling water, etc., and you will soon find discontent written on his countenance and after that his labor had better be performed elsewhere.

Where only grade stock is kept there are fewer opportunities to rivet the growing boy's interest, but it is there just the same if the right attitude is as-

sumed by the parent. Turn over a heifer calf, a mare colt or a sow pig to him and let this be his own, giving him a business-like share in the increase after deducting expenses for feeding. This will sharpen his business instincts, and it will surprise you how quickly he will be able to share a large part of the responsibility of your business.

In addition, we would say let the boy do the difficult things just as soon as he wants to. Let him shear a few sheep while you do the holding; let him take an important part in the labor involved in putting up the year's meat supply; let him handle some of the more complex machinery, and a thousand other things that are too commonly done by the parent while the boy looks on or simply helps a little. In agriculture as much as in anything else we learn to do by doing, and that is why we are in favor of letting the boy undertake the things that he would like to do at the time when he has the notion for it. That mysterious thing called "knaek" can be acquired much more easily while one is in his teens than later in life. A boy of average development at the age of fourteen or fifteen can be trusted to perform almost any kind of work if he is started out under the sympathetic guidance of a sensible parent. He will not be expert from the start, but the

average boy will acquire skill in a marvelously short time.

### MINERAL MATTER FOR HOGS.

The following communication has been received from a subscriber at Laddonia, Mo.:

Some time ago a subscriber asked, through the columns of your paper, for a pig conditioner consisting of such ingredients as charcoal, sulphur, ashes, etc. In reply you gave what is known as the government formula, but I believe that it can be improved upon. I could name many prominent hog breeders who prefer the following formula to anything that has yet been prepared by the government:

One bushel of charcoal,  
One bushel hard wood ashes,  
One gallon of sulphur,  
One gallon of common salt.

Pulverize and mix carefully so that each time the hog takes a mouthful of the formula he will get the proper proportion of all ingredients. This should be placed in dry quarters where hogs have access to it at all times. My reason for claiming the formula superior to the government's is that the hard wood ashes are preferable to chemicals, also that the government formula does not get enough sulphur into the hog. I have used both and watched the results in every instance, and the one I have given you has always been the most satisfactory.

A mixture of this kind is not expensive and in these days when hogs are necessarily raised under conditions that are somewhat artificial it is but natural that they be provided with mineral matters in some form, additional

IMPORTED AND OWNED BY TRUMAN'S PIONEER STUD FARM, BUSHNELL, ILL.

Prize Winning Shires at Iowa, Illinois and Indiana State Fairs and American Royal 1906, Imported by Trumans' Pioneer Stud Farm, Mr. J. G. Truman, Mgr., Bushnell, Ill. See field notes.

to what is received in the food. Hard wood ashes, where they can be obtained, are in themselves an excellent hog tonic. We have in mind one individual who raises about 150 hogs a year and who goes to the trouble to haul hard wood ashes a distance of nine miles for his hogs. His plan is to place these within reach of his hogs and he scatters over the ash pile some common salt and some oil meal. When this is done it is surprising how much time the hogs will spend around the ash pile.

Sulphur also is excellent for a hog, though we believe in feeding it in conjunction with just such substances as are mentioned by this subscriber. If it is fed alone in slop one has to be a little cautious, especially in cold weather, or the hogs are apt to contract a severe cold. This is especially true if the weather is changeable and rains are followed by cold spells.

### THE GREAT BERKSHIRE MEET.

The first meeting of the American Berkshire Congress, commonly called the Berkshire Love Feast, was held at Kansas City in March, 1906, and attracted the largest number of leading breeders of Berkshire swine ever before assembled at a similar convention.

The program of the Kansas City meeting was worthy of the very complimentary recognition it received, and all in attendance voted the conference the most important and far-reaching in its influence for good of any ever held by breeders of Berkshire swine. The uplift given to the breeding of Berkshires, as a result of the papers and discussions presented at the Kansas City meeting, has had a marked effect in stimulating the breeders of Berkshires to adopt and follow much higher standard in the matter of form, better breeding and greater care, and the giving of more attention to all that tends to the further improvement of the up-to-date Berkshire.

The meeting at Kansas City encouraged not a few to make larger and better exhibits at the late fairs, which gave 1906 the record for the largest exhibit of high-class Berkshires ever shown in any previous season. The most pronounced effect of the Kansas City conference followed the discussion of the generally conceded advantages of public sales, and the very gratifying result gives the sale record to 1906, during which year nineteen public sales of Berkshires were held in six states. The public sales of 1906 included 716 head that sold for \$69,168.00, making an unheard of average of \$96.60 per head. The great momentum given to the advance movement of the Berkshire hosts by the first meeting of the American Berkshire Congress at Kansas City is sure to receive a far greater impetus by the second session, to be held at Springfield, Ill., February 20 and 21, 1907.

The show and public sale of Berkshires to be held in connection with the coming session of the American Berkshire Congress will insure the attendance of a large crowd of representative breeders, from all sections of the United States and Canada. The breeder, new or old, who has or expects to make any considerable investment in Berkshires and desires to keep up with the rapidly advancing procession has doubtless made up his mind to attend the meeting of the Congress at Springfield, Ill., February 20 and 21, 1907. The progressive and enterprising breeder of Berkshires who has not completed his arrangements to attend the next session of the American Berkshire Congress at Springfield will decide to attend the convention after he has examined and duly considered the program of the meeting.

The topics and speakers for this session are as follows:

Address of welcome by W. S. Corsa, president Illinois Berkshire Association.  
Response by N. H. Gentry, president American Berkshire Congress.

**THE BERKSHIRE OUTLOOK.**  
Five minute responses by the presidents of state Berkshire associations, viz.:  
Illinois: W. S. Corsa, White Hall.  
Indiana: E. J. Barker, Thorntown.  
Iowa: Geo. S. Prine, Oskaloosa.  
Kansas: W. H. Rhodes, Tampa.  
Michigan: J. E. Hibbard, Bennington.  
Missouri: Sam. Spellman, Sturgeon.  
Ohio: E. B. Everson, Columbus.  
Nebraska: W. A. Apperson, Tecumseh.

**BERKSHIRE EXHIBITS AT FAIRS OF 1906.**  
Five minute responses by the secretaries of state Berkshire associations, viz.:  
Illinois: Lyman H. Lovejoy, Roscoe.  
Indiana: F. W. Hemingway, Zionville.  
Iowa: H. U. Hainline, Orient.  
Kansas: H. R. Little, Hope.  
Michigan: C. S. Bartlett, Pontiac.

Do you realize the full meaning of the fact that The Homestead now has 100,000 subscribers? One hundred thousand is a number so vast that few, even in these days of large things, grasp its significance, except in a comparative way. It may give you a clearer conception of it to compare our subscription list to a great audience, or a number of them. One of the great national political conventions characteristic of American politics sometimes attracts into an immense convention hall as many as ten thousand delegates and spectators. The sight is inspiring and words fail the reporters in trying to describe the "sea of faces" that stretches like a great expanse of moving waters far from the platform where the convention centers. Well, The Homestead's subscription list would number as many souls as ten such great national gatherings; and, if we rate its entire constituency as five readers to each copy, it would require fifty conclaves of that vast extent to equal them.

Another suggestive comparison is in the extent of the paper used: Last week's Homestead consisted of forty-eight pages of four columns each. If those columns of reading matter and advertisements had been measured in their entire length, they would have extended across this continent, and nearly a thousand miles beyond its limits, the full distance thus expressed being 4,058 miles, without multiplying the fractional inches, which would have run into scores of miles. Full page width the sheets would stretch fully 1,000 miles if printed on one side and 500 miles if printed on both sides. On such a colossal scale is modern agricultural journalism carried, with its beneficent mission of spreading light upon the practical and scientific problems of the greatest of human vocations.

"I have taken The Homestead twenty years," writes Mr. J. S. Smith, of Jewell, Iowa, "and consider it the best farm paper published in the United States. I often find in a single issue information that I regard as paying me for the full time I have taken it." That is the true test—the test to which The Homestead likes to subject its own work. It represents an ideal toward which we are ever striving; for we try to put so much into each issue that the ambitious farmer who reads and thoroughly digests its contents will get a full dollar's worth of information every week. We endeavor to make the paper so valuable that the farmer simply cannot afford to do without it. That is the real reason, coupled with the loyal support of thousands of old friends like Mr. Smith, for The Homestead's growth to 100,000 circulation. It now occupies a foremost place among the world's agricultural journals; and, in its own field, enjoys the remarkable pre-eminence of having a larger circulation in Iowa alone than any other Des Moines agricultural weekly has in all the states of the union combined.

Mr. N. A. Peterson, of Geneseo, Ill., feels that he cannot get along without The Homestead and also writes a word

of commendation for the other excellent papers composing the "Red Letter" combination, which he regards as a remarkably good collection of reading matter for the farmer at a wonderfully low price. This year's orders for the "Red Letter" combination are very much greater in number than those of a year ago. Farmers rightly feel that when they can obtain The Homestead, The Chicago Weekly Inter Ocean, The Kansas City Weekly Star, The Farm Gazette and The Homemaker for \$1.25 a year, there is no longer any reason for failing to supply their homes with an abundance of attractive reading matter.

From Artesia, N. M., comes a highly appreciated letter from Mr. William Crandall, who was a reader of The Homestead for twenty years in Iowa and Nebraska, and finds his good habits so strong that he cannot shake them off, for he writes: "When I moved to New Mexico, I thought I would not need The Homestead any more, but I certainly miss its weekly visits much more than I thought I would. Enclosed, therefore, find money order for your 'Red Letter' combination." Hundreds of others feel the pull of The Homestead on their heartstrings in distant states and countries. They do not realize how much a good farm paper is to them until they try to do without it, and then they discover that it is a power for good beyond estimate.

The veterinary department of The Homestead is of priceless value to the farmer, in the opinion of Mr. John Bradley, of Clare, Iowa, who thinks there could be no more profitable reading to the average farmer than it contains. "The legal department has saved many a hard-earned dollar for the farmer, which would otherwise go to fill the coffers of some lawyer, with little or no benefit. The 'Hints and Devices' are interesting and valuable, giving us knowledge of many labor-saving inventions that would otherwise never be thought of. 'Farm Furrows' is to me the most profitable of all the departments, as it shows us where we are lame and reminds us of various things we have forgotten, but which are too important to overlook. I think The Homestead, bringing as it does the ideas of so many practical farmers before us, should be in every farm house and read by every farmer who desires to make a success of his vocation."

"My whole family are delighted with The Homestead," is the gratifying assurance that comes from Mr. William Downing, of Nora, Neb., who expresses his individual satisfaction with the paper and encloses \$1.25 for the "Red Letter" combination. The Homestead always enjoys such letters as that of this loyal Nebraska friend, because they betoken an attachment broader and deeper than the merely personal. The Homestead loves the American farm home and the American family and likes an expression which comes from them all. It conjures up in our minds the typical scene around the farmer's fireside, where husband and wife, surrounded by their children, read and talk together, entertain-

ing and helping one another and bearing one another's burdens. When the whole family in such a farm home as that approves of a paper, its field of usefulness is vastly multiplied. Such tributes to our home department come in thousands of our letters, and are appreciated in the fullest measure.

Mr. Benjamin Clark, of Munden, Kan., takes eighteen newspapers and magazines, but The Homestead has a prime place in his regard, and if he were "weeding out" some of them, The Homestead would be safe and would continue to be a welcome visitor to his home. "To say that I am pleased with it would be putting it mildly," writes Mr. Clark. "It is filled with plain, practical, common-sense reading all through. I have been a farmer all my life, but there is always room for improvement, and I read your 'Hints, Devices and Suggestions' with profit. In fact, all the departments are excellent. The Homestead is a great paper, published in a splendid city, in one of the best states in the union. May joy, peace and prosperity attend its publishers!"

And here on our table lies a letter that went straight to the publisher's heart, for it told another beautiful story of home life in this good country of ours—a story of unselfish love and sacrifice. Thirteen-year-old Elva Sidwell, daughter of Mr. William Sidwell, of Queen City, Mo., writes of a serious illness which came to her father in 1905, disabling him so that he has since been unable to write. Miss Elva tells us about her day school and her studies; about her Sunday school and, with evident pride, of its good attendance. "Father likes Henry Hatch's articles best," she writes; "mother is most interested in the poultry department, and I like the Sunday school department; but to tell the truth, we hardly know which part of The Homestead to praise the most—it is all so interesting." God bless this brave, unselfish little Missouri girl, who is thus doing her part in life—at home writing her sick father's letters; at Sunday school and day school, keenly interested in her work. To have such friendship as hers is a blessing to any newspaper; and to have such a child is more than blessing to her parents.

Have you sent that little advertisement of yours to our classified department yet? If not, remember our rules: Copy should be in our hands by Saturday of the preceding week. Every word should be clearly written, on one side of the paper. The price is five cents a word, which secures without additional charge, insertion not only in The Homestead, but also in The Farmer and Stockman, of Kansas City, Mo., and The Wisconsin Farmer, the three papers having a combined circulation of 190,000. No single insertion accepted for less than \$1.20, so you might as well have your twenty-four words. Every word, initial letter and abbreviation, including your address, counts as one word. Cash must accompany the order, as we keep no books for this department. Look our classified advertisements over. They will interest you and may suggest some profitable line of advertising for yourself.

Ill., and G. C. Council, Vandalia, Ill., who will give a demonstration on Berkshire type, quality, etc.

Discussion of the topics of the morning session until adjournment.

**THURSDAY AFTERNOON SESSION.**  
(1 O'clock, Sale Pavilion, Illinois State Fair Grounds.)  
Banquet 6 o'clock at the St. Nicholas Hotel.

**THURSDAY EVENING SESSION, 6 O'CLOCK.**  
Address, "The Possibilities of a Sire," by W. S. Corsa, White Hall, Ill.

Address, "The Merits of the American and English Bred Berkshires Compared," by C. I. Hood, Lowell, Mass.

Address, "Berkshires are Prolific Breeders," by Frank S. Springer, Springfield, Ill., secretary American Berkshire Congress.

Address, "What Does the Future Promise for the Berkshire Breeder," by A. J. Lovejoy, Roscoe, Ill.

Address, "Some of the Hindrances to the Improvement and Wider Dissemination of our Chosen Breed," by N. H. Gentry, Sedalia, Mo.

**TO CURE A COLD IN ONE DAY.**  
Take LAXATIVE BROMO Quinine Tablets. Drug stores refund money if it fails to cure. E. W. GROVE'S signature on each box. 2c.

Missouri: J. D. Tuder, Salisbury.  
Nebraska: J. K. Honeywell, Lincoln.  
Ohio: J. B. Schlebach, Millersburg.  
Address, "The American Berkshire Congress as a Promotion Agency," by Col. Charles F. Mills, secretary American Berkshire Congress.

**WEDNESDAY AFTERNOON SESSION—1 O'CLOCK.**  
Address, "Pleasure and Profit in Breeding Berkshires," by W. H. Coffman, Bluefield, W. Va.

Address, "The Buyer and Seller, Their Obligation to Each Other," by C. A. Stannard, Emporia, Kan.

Address, "The Paramount Duty of all Breeders to Exhibit Berkshires at the Fair, as the Most Effective Agency for Increasing the Popularity of our Chosen Breed," by Rueben Gentry, Nashville, Tenn.

Address, "The Exhibitor, His Competitors and the Judge, Their Relations and Duties to Each Other," by G. C. Council, Vandalia, Ill.

Address, "Fitting and Exhibiting Berkshires," by W. D. Fletcher, Lowell, Mass.

Address, "The Trials and Responsibilities of the Berkshire Judge," by W. D. Spicer, Bushnell, Ill.

Address, "The Public Sale of Berkshires, What It Accomplishes for the Breed and the Breeder," by L. E. Frost, Springfield, Ill.

Discussions of topics of the afternoon session until adjournment.

**WEDNESDAY EVENING, 7 O'CLOCK.**  
Address, "Breeding Berkshires as a Business," by F. W. Morgan, Beloit, Wis.

Address, "A Study on In-breeding, the So Generally Condemned," by A. M. Fulford, Bel Air, Md.

Address, "The New Breeder of Berkshires," by William Osborn, Morris, Ill.

Address, "Size and Early Maturity of the Berkshire," by W. H. Durham, Toronto, Can.

Address, "The Berkshire Barrow in the Feed Lot," by Percy G. Stone, Bradford, Ill.

Address, "Are the Breeders of Today Advancing in the Improvement of the Berkshire," by Geo. S. Prine, Oskaloosa, Iowa.

Discussion of the topics of the evening session until adjournment.

**THURSDAY MORNING SESSION.**  
(9 O'clock, Sale Pavilion Illinois State Fair Grounds.)

Address, "Is the Score Card of Any Practical Value, and If So, When?" by George W. Jessup, Rockville, Ind.

Honor, like beauty, is only skin deep in most men

I am not a lover of these stiff stanchions that compel cows to look straight ahead.

When the poor young man finds a rich better half he is also apt to find better quarters.

We are told to love one another, but excuse me when it comes to loving the "smart aleck" chap.

If hay continues to increase in value as it has the past few months I should think it would affect the price of some breakfast foods.

Children get a good deal of their knowledge at school, but real culture is stamped on their character within the four walls of the home.

They say it's an ill wind that blows nobody good, but for me I do not like the uor' westers when I am feeding out a bunch of cattle and hogs.

How does it make you feel to see a \$15 old sow nose around a \$100 fat steer until she puts him out of his snug nest and takes possession herself?

I have no use for the cow of any breed that cannot raise a good calf. She may be a good beef animal, it is true, but she is not the most profitable kind.

I am not a crank on grammar, but it offends my ear to hear high school graduates injecting a grammatical error into almost every statement they make.

Raised a batch of turkeys this year. They roost so high and are so wild when they are on the ground that the only way to get one is to use a shotgun.

There is absolutely no excuse under any circumstances for the use of coarse language in the home. If children are to grow up with refined sensibilities they must live in a refined atmosphere.

I know a man who sent a thousand miles away for some seed corn last year. His crop from that seed was so poor that he came to the conclusion that it wore itself out trying to look as well as the picture in the catalog.

The main fault that I have to find with our stations is that they jump at conclusions without doing enough real experimenting. Anxiety to get something into print frequently leads to the propagation of unsound doctrines.

Straw has been selling around our town for \$5 a ton this winter. Although we had three men in the straw pile at thrashing time, we wish now we had had four or else the three had done a better job. In time we will probably learn to save our straw better.

A subscriber asks the Furrows man to give the weight of the largest hog ever produced. That's a stumper to me. I saw one last year at a state fair that weighed 1,075 pounds. If you know of

THIS IS IT

ELECTRIC

The wagon you are looking for; the wagon folks are all talking about. By every test it is the best—no living man can build a better. Of course you have guessed that it's the

ELECTRIC HANDY WAGON

Low steel wheels; wide tires and durability and good service written all over it. Don't be talked into buying an inferior. Get the wagon that lasts. Or we'll sell you a set of Electric Steel Wheels and make your old wagon new at slight expense. Spokes united with the hub; absolutely impossible to work loose. Sold on a money-back guarantee. Their saving in time, labor, horse flesh and repair bills will pay for them in a single year. More than a million and a quarter in use. All we ask is a chance to tell you more about them. Drop us a line, we'll do the rest. Catalog free.

ELECTRIC WHEEL CO.

Box 43 Quincy, Ill.

a heavier weight than this please drop a line to this paper to that effect. Of course the porcine variety is referred to here and not the two-legged kind.

Sell the cow from your dairy herd that makes you work hard all summer and does not pay for the feed she eats.

It pays to keep stock in the yard so they can be under cover when these cold winter rains come on. A neighbor of mine lost a \$225 gelding the other day, due entirely to exposure to a cold rain.

A pound of good butter would swap even today with a bushel of corn. The former contains no fertility, while the fertility in the latter is worth about fifteen cents. Each man can draw his own conclusions.

In studying to increase the number of bushels of grain raised, study also to increase the number of pounds of butter made per cow. The number of pounds over 120 per year are the ones that help your bank account.

To shout angrily at a horse is to frighten him, and to frighten him is to make him less sure of himself and his master. To lose his confidence is to make him less useful, and since usefulness is almost all horses are kept for one can see how big a mistake it is to shout at a horse.

### THE CURING OF MEAT.

Among the ranks of our readers are to be found a large number who have recently fallen heir to the responsibility of running a home. There are numerous instances where farmers' sons and daughters have had to take some part in the handling of farm meats, but who had to do this with some one else taking the entire responsibility. When these same young people start in for themselves they are obliged to learn the business over again through actual contact or experience.

As pig killing day will soon be here, we have deemed it advisable to present a drawing showing the manner in which the carcass of a hog should be put, and

A GOOD WAY TO CUT.

to give in addition a good method for curing the different parts.

Sometime ago Prof. Andrew Boss of the Minnesota Experiment Station prepared a bulletin on the subject of farm meats for the national department of agriculture, and as we have tried the recipes given by him with unqualified success we have no hesitation in passing them along to our readers.

#### Plain Salt Pork.

Rub each piece of meat with fine common salt and pack closely in a barrel. Let stand over night. The next day weigh out ten pounds of salt and two ounces of saltpeter to each hundred pounds of meat and dissolve in four gallons of boiling water. Pour this brine over the meat when cold, cover and weight down to keep it under the brine. Meat will pack best if cut into pieces about six inches square. The pork should be kept in the brine till used.

#### Sugar-Cured Hams and Bacon.

When the meat is cooled, rub each piece with salt and allow it to drain over night. Then pack it in a barrel with the hams and shoulders in the bottom, using the strips of bacon to fill in between or to put on top. Weigh out for each hundred pounds of meat eight pounds of salt, two pounds of brown sugar, and two ounces of saltpeter. Dissolve all in four gallons of water, and cover the meat with the brine. For summer use it will be safest to boil the brine before using. In that case it should be thoroughly cooled before it is used. For winter curing it is not necessary to boil the brine. Bacon strips should remain in this brine four to six weeks, hams six to eight weeks. This is a standard recipe and has given the best of satisfaction. Hams and bacon cured in the spring will keep right through the summer after they are smoked. The meat will be sweet and palatable if it is properly smoked, and the flavor will be good.

#### Dry-Cured Pork.

For each one hundred pounds of meat

THE Publishers Failure  
IS  
Your Opportunity

Iowa Homestead Readers are Offered an Exceptional Opportunity  
To Place in Your Homes the World-famed Publication

Ridpath's History of the World

Brand new, latest edition, brought right down to date, including Peace Treaty of the Russia-Japan War, beautifully bound in Half-Morocco.

At LESS than even DAMAGED SETS were ever sold

We will name our price only in direct letters to those sending the coupon below. Tear off the coupon, write name and address plainly, and mail now before you forget it. Don't delay, as there are only a few sets remaining. Dr. Ridpath is dead, his work is done, but his family derive an income from his history, and to print our price broadcast for the sake of more quickly selling these few sets would cause great injury to future sales.

EACH VOLUME 10 1-2 INCHES BY 8 INCHES. COMPLETE SET WEIGHS 50 POUNDS.

RIDPATH takes you back to the dawn of history, long before the Pyramids of Egypt were built; down through the romantic, troubled times of Chaldea's grandeur and Assyria's magnificence; of Babylonia's wealth and luxury; of Greek and Roman splendor; of Mohammedan culture and refinement; of French elegance and British power; to the rise of the Western world, including the complete history of the United States and all other nations down to the close of the Russia-Japan war.

RIDPATH'S enviable position as an historian is due to his wonderfully beautiful style, a style no other historian has ever equaled. He pictures the great historical events as though they were happening before your eyes; he carries you with him to see the battles of old; to meet kings and queens and warriors, to sit in the Roman Senate; to march against Saladin and his dark-skinned followers; to sail the southern seas with Drake; to circumnavigate the globe with Magellan; to watch that thin line of Greek spearmen work havoc with the Persian hordes on the field of Marathon; to know Napoleon as you know Roosevelt. He combines absorbing interest with supreme reliability, and makes the heroes of history real living men and women, and about them he weaves the rise and fall of empires in such a fascinating style that history becomes as absorbingly interesting as the greatest of fiction.

RIDPATH'S History will be a household treasure. You'll buy it sometime, anyhow. It's fast getting into all comfortable, well-to-do American homes. Here's a chance to get it for about half what it will cost you, if you let this opportunity slip. Isn't it COMMON SENSE to get it NOW?

Brings the Complete Set, Balance Small Sums Monthly

RIDPATH'S History is strongly endorsed by Presidents Harrison, Cleveland and McKinley, Lew Wallace, Bishop Vincent, Presidents of Ann Arbor, Amherst, Brown, Dartmouth, Tufts, Trinity, Bates, Colby, Smith, Vassar, Yale, and other Colleges, and by the great American People. 200,000 of whom own and love it.

Ridpath is generally conceded the greatest history ever written. It is so beautifully written your children will learn to love it. It is the only general history recognized as an authority. This is your chance to buy it for much less than ever before.

SEND COUPON TO-DAY AND WE WILL MAIL SAMPLE PAGES FREE.

FREE COUPON. 1-24-07

weigh out five pounds of salt, two pounds of granulated sugar, and two ounces of saltpeter, and mix them thoroughly. Rub the meat once every three days with a third of the mixture. While the meat is curing it is best to have it packed in a barrel or tight box. For the sake of convenience it is advisable to have two barrels, and to transfer the meat from one to the other each time it is rubbed. After the last rubbing the meat should lie in the barrel for a week or ten days, when it will be cured and ready to smoke. To cure nicely it is desirable to have a cool and rather moist place in which to keep it. This recipe should not be used where the meat must be kept in a warm and dry place, as the preservatives will not penetrate easily and uniformly.

Headcheese.

Cut a hog's head into four pieces.

Remove the brain, ears, skin, snout and eyes. Cut off the fattest parts for lard. Put the lean and bony parts to soak over night in cold water in order to extract the blood and dirt. When the head is cleaned put it over the fire to boil, using water enough to cover it. Boil until the meat separates readily from the bone. Then remove it from the fire and pick out all of the bones. Drain off the liquor, saving a part of it for future use. Chop the meat up finely with a chopping knife. Return it to the kettle and pour on enough of the liquor to cover the meat. Let it boil slowly from fifteen to thirty minutes. Season to taste with salt and pepper just before removing from the fire. Turn it into a shallow pan or dish. Cover with a piece of cheese cloth and put on a board with a weight to make it solid. When cold it should be sliced thinly and served without further cooking.

## \$4.00 to \$8.00 Per Acre

That's What a Good Spreader Will  
Do If Used as It Should Be

Write Us And  
Let Us Tell You  
How.

## The Great Western

Is Made for the Man Who Wants the Best.

Our 70-bushel Spreader is a great big, heavy machine. The main frame is all oak, oak pole and hickory double-trees. Made in four sizes—35, 50, 70 and 100 bushels.

It has a great big, strong 16-inch malleable iron fifth wheel, double oak bolster, wide front axle; the wheels track.

It has an endless apron that is always ready to load; no reverse gears, trips, springs or contraptions to get out of order. Spreads all kinds of manure.

It has a galvanized steel hood and end gate. Keeps the manure away from the beater when loading. Prevents choking when starting. Acts as wind shield when spreading.

It has light draft, because the load is nearly equally balanced on the front and rear axles; brings the team close to the load. Front and rear wheels track. Beater shaft runs in ball and socket bearings.

It is so simple that a boy can handle it. Ask your dealer about the

## Great Western Spreader

Don't let him sell you a substitute that he says is "just as good"—Because there is no other "just as good" or nearly as good.

There is no other that is as strong and heavy; the Great Western 70-bushel weighs 2250 lbs. No other has a 16-inch oscillating malleable fifth-wheel, all oak frame, oak pole, double oak bolsters.

Most other 70-bushel spreaders weigh 1800 to 1900 lbs.; if you buy a light, cheap machine, don't pay as much for it as you would for the Great Western—insist on having the best and save breakage, expense and trouble.

Write just these words on a postal card or in a letter—Do it now—"Send me your book, Practical Experience with Barnyard Manures, and catalog No. 4372."

50-52 Lake Street, Chicago, Ill.

## The "DEAN" Ear Corn Slicer

Any Farmer or Cattle Raiser should appreciate the advantage of slicing or chopping ear corn for stock. The health of all animals requires it. Feeders today know that grain should be mixed with "crumbs." The cob is the best mixture for calves and steers. "The Dean" Slicer soon saves its price in cob feed alone. Also saves time. Chops ears in 1/2 to 2 1/2 inch slices and cuts from 30 to 40 bushels an hour. Cobs thrive on the small slicing. It's so easily geared that even a boy can run it or any power can be attached. Elevator attachment to bin or wagon. Prices and terms very reasonable. Write today, for your stock's sake.

**Enterprise Wind Mill Co.,** 24 Main St., Sandwich, Ill.

## STEREOSCOPES

FOR NAMES OF FARMERS

The Farm Magazine Co. wants names of farmers likely to be interested in their big, handsomely illustrated farm paper. For 5 names they will allow our readers 25c and a stereoscopic outfit. The subscription price is 50c. Send 5 names and addresses of farmers and 25c. The publishers will enter you as a subscriber fully paid for 1 year. They will mail you FREE a boy's and girl's stereoscope and 50 views. Address: FARM MAGAZINE CO., BOX 307 OMAHA, NEB.

## ANCHOR FIRE INSURANCE CO.

BEST terms for farmers ever offered. Capital stock \$100,000.00. Address, J. S. Clark, president, Des Moines, Iowa.

**AGENTS** PORTRAITS 55c, FRAMES 15c, sheets pictures 1c, stereoscopes 25c, views 1c. 30 days credit. Samples & Catalog Free. Consolidated Portrait Co., 280-126 N. Adams St., Chicago.

## THE HOMESTEAD

A Practical Journal for the Farmer,  
Stockman, Fruit Grower, Poultryman,  
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

**THE HOMESTEAD COMPANY,**  
Des Moines, Iowa.

## SIZE OF EARS AND YIELD OF CORN CROP.

The following communication has been received from a subscriber, Mr. R. O. Converse, of Marion county, Iowa:

I notice that in one department of your paper you state that there are 3,555 hills of corn on an acre that is checked three feet six inches. According to my calculation there are only 3,240 hills. Someone stated not long ago that two ears to the hill would make 100 bushels per acre, but he did not say how big the ears should be to yield that amount. On an average, it takes about 100 ears to make a bushel of corn. Now, two of these to each hill will only give you a yield of sixty-five bushels per acre. If there are three ears to each hill it will take about 125 ears to make a bushel, on an average, and this would only be seventy-seven and two-thirds bushels per acre.

I change my land from corn to clover about every third year and plant just three kernels to each hill, and one year with another, wet and dry, my average is about sixty bushels per acre. Now, if you can tell me where the yield can be increased I will greatly appreciate it and I know that many of your readers will be just as much interested in what you have to say as I am.

As an actual fact there are 3,555 hills of corn on an acre that is planted three feet six inches each way. If 100 ears make a bushel, each ear in this case will average .7 of a pound. One ear per hill of this weight would mean thirty-five and one-half bushels per acre; two, seventy-one bushels, and three, 106 1/2 bushels. Of course when it is increased to three kernels per hill the average of the ears will not be quite as large as in the case of two, and consequently the ratio hardly increases in the proportion given.

Now, if we were called upon to state just why the yield is not larger under circumstances as given by Mr. Converse, when the land is clovered every three years and the seed is good, we would say, in the first place, that there is no doubt some reduction due to insects, to part of the crop being torn out by the cultivator, and, possibly, a slight reduction due to an occasional poor ear of corn the seed of which was planted. Of course there is something in variety, and it might be quite possible to produce only a yield of sixty bushels per acre with certain varieties, while under the same conditions other varieties might yield seventy-five or even eighty bushels per acre. Our experiment stations have found that there is at least this much difference in the yielding ability of varieties of corn.

We know of instances in 1906 where there was a difference of twenty-five bushels per acre in favor of improved varieties as compared with the common kinds, and the stand was practically the same in each case, as the seed was all tested. Of course the highest yielding field produced ears that were slightly larger. A difference of an ounce and three-quarters to each ear would make this difference of twenty-five bushels per acre in the yield.

Then again, we often fall down in the matter of cultivation. It may be that there is an excellent prospect for a ninety or even 100 bushel crop, and yet when we come to harvest it we only have sixty or seventy bushels. This difference might easily be made by plowing too deep or too close to the corn when laying it by. Where a whole field or the corn on a whole farm is laid by with the same implement it is a little difficult to get at an error of this kind, though it may partly account for the difference

## Williams' Shaving Stick

PERHAPS all your life you have used common soap for shaving, and have never known what it was to shave with a real shaving soap—one made just for shaving. Buy a cake of Williams' Shaving Soap or a Williams' Shaving Stick and see what a comfortable, easy thing shaving can become. There is nothing like it.

"The only kind that won't smart or dry on the face."

Send 2c. stamp for a TRIAL CAKE of Williams' Shaving Soap, or 4c. for a Williams' Shaving Stick, trial size, enough for 50 shaves. Address

between what the crop appeared to yield and what it actually produced.

## Increasing Water Movement.

To the Editor of The Homestead:

I will give you my plan of increasing the working capacity of my tile drain. I extend the upper end out to a fence when practical and to the last tile laid I add an elbow sewer the same size as the tile, and to the upper end of this I add enough more to extend above the surface of the ground. This gives it air and causes it to draw faster when it is running full, or nearly so. By having this vent under or near a fence it is out of the way of stock and farming tools.

Another thing to do is to go to the low places in your field directly over the tile, dig to the tile and uncover three or four joints and fill in over the tile with old hay or trash of any kind—cobs are good—and leave it this way through the winter and spring, providing there is no stock to get in it. This will also let the water in much faster. Before farming begins these holes may be filled with dirt, leaving the trash in.

Still another good trick might be mentioned. If you have a natural surface drain underlaid with tile and wish to prevent surface washing, dig down to your tile (where it passes under a fence is the best place) and take out one section of tile and pick a hole in it as large as necessary and replace it with the hole upwards. Then take another section with the same diameter as the hole you made and fit it over the hole as close as possible and cement around it to prevent dirt washing in. On top of this section set another, and so on until your last one extends a few inches above the surface. Fill dirt in carefully, taking care that you do not disturb your stand-pipe. Just below or near this inlet make a bank or dam across the drain so as to back the overflowing surface water up enough to flow into this sink or inlet.

A sink of this kind near a large outlet is very valuable in preventing the washing around the "header" or abutment. These sinks should be made as large as practicable. They can be screened or grated if necessary.

Sangamon county, Ill. C. F. Spicer.

## A Trip to Los Angeles.

The trip to Southern California has come to be regarded as a regular part of the education of the well-to-do farmer, merchant and professional man; and as all good Americans are loyal husbands, their wives are always included when the plans are laid.

To such as are contemplating taking this delightful and interesting journey, a neat volume entitled "Westward the Course of Empire," published by G. P.

## THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, kafir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

**The O. S. KELLY WESTERN MFG. CO.**  
DEPT. E, IOWA CITY, IOWA.

## PATENT YOUR IDEAS

\$100,000 for one invention; another \$5,500. Book "How to Obtain a Patent" & "What to Invent" sent free. Send rough sketch for free report as to patentability. We advertise your patent for sale at our expense. Patent Obtained or Fee Returned.  
**CHANDLER & CHANDLER, Patent Att'ys,**  
956 F. Street, Washington, D. C.

**WANTED:** Men to learn barber trade. We prepare you for positions \$12 to \$20 weekly. Few weeks completes. Scholarship includes tuition, tools and positions. Great demand for barbers. Our 1907 catalog mailed free. Write nearest branch. Moler Barber College, Chicago, Ill., or Omaha, Neb.

**THE STEEL SHOE \$2.50** A pair, express prepaid. Guaranteed to wear one year. FREE booklet, "The Sole of Steel," tells how to save \$5 to \$10 every year on working shoes. American Boot and Shoe Protector Co., Dept. B, Racine, Wis.

## PATENTS

**ORWIG & LANE,**  
DES MOINES, IOWA  
Send sketch or model of invention for free opinion as to patentability. Reference, The Iowa Homestead.

**MAKE** your own fence posts. Write for prices of the Smith Cement Post Machine. Address, Dept. E, W. Smith Grubber Co., La Crosse, Wis.

Putnam's Sons, New York, will prove an invaluable guide and mentor.

The work is by Montgomery Schuyler and is in part a reprint of the correspondence of that writer sent to the New York Times while actually taking the trip. It is breezily written and illustrated with handsome half-tone pictures. The book is dedicated "to Theodore Roosevelt, the typical American of Our Time, who is equally at home in all parts of Our Country."

The trip was taken on the famous "Los Angeles Limited" of the Union Pacific railway, Mr. Schuyler being one of a party of prominent journalists invited to enjoy the hospitalities of the road on the occasion of the first trip made by this justly celebrated train.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

## LAW QUESTIONS CONSIDERED.

## TRESPASS—DAMAGES.

A Subscriber, Odin, Ill.—A and B own adjoining pasture fields. B allowed his part of the partition fence to get out of repair. A notified him of the fact and afterwards A's stock got through the bad fence into B's pasture, and then the stock of both broke into adjoining land owned by C and did damage. Who is liable for the damage to C?

Answer.—Both A and B are liable to C if his fence was a lawful fence.

## TAXATION OF TELEPHONE PROPERTY.

A Subscriber, North English, Iowa.—We have a mutual telephone company here. Does the law require the stock holders to pay taxes on it?

Answer.—The company must, before the first day of May in each year, furnish to the executive council of Iowa, a statement verified by its president or secretary, showing with great particularity of detail, all about the company, its line, operation, receipts, expenses, capital stock, property, value, etc., as provided in section 1328 of the Code of Iowa, which see. The executive council then assesses the property for taxation upon such statement and other information which it may have. The law provides that owners of capital stock of a telephone company, shall not be assessed for taxation.

## PARTITION FENCE—REPAIRS—FIXTURES.

A Subscriber, Solon, Iowa.—(1) A owns sixty-eight acres of land and C owns the land adjoining on the south. There is no partition fence between these lands. A rented his land to B. Who should make the partition fence? (2) Can B compel A and C to put up the partition fence? There was nothing said about fences when A rented the land to B. (3) Can B compel A to keep in repair the fence between the land and the public road? (4) A sold his farm to C and is going to sell his personal property at public sale. Can he sell the rope and hay fork out of the barn, and the water tanks and feed grinder?

Answer.—(1) A and C in equal shares. (2) He cannot. He rented the land as it was, without having any agreement or promise on the part of A to make a fence. He could have required this or refused to rent the land, but he did not. A landlord is not bound to fence land for

a tenant unless he agrees to do so. Either A or C can compel the other to contribute to the construction of a fence, but B cannot without an agreement to that effect. (3) He cannot. (4) Unless the articles you mention are permanently attached to the place, they are merely personal property and may be sold at the public sale.

## HORSES—TAXATION.

A Subscriber, Kellogg, Iowa.—What is the law concerning the taxation of horses? At what age are horses exempt from taxation.

Answer.—Horses, that is, colts under the age of one year, are exempt from taxation. A team of horses belonging to a teamster or drayman, who uses it in the making of a living, is exempt from taxation. All other horses are subject to taxation under the laws of Iowa.

## A RUINED SKIRT.

A Subscriber's Wife, Fairfax, Mo.—A dressmaker who is supposed to be first class, made two dress skirts for me, I furnishing the material. She charged \$5 for making one and as to that one I have no objection to her work. The material of the other cost me \$6.25. She was to make it for \$2.50 and she cut and made it different from what I ordered, and in such an unskillful manner that it does not fit at all, and cannot be made over to fit me. I can prove by several persons to whom I showed the garment, that it is ruined, and the material spoiled by reason of the way in which it was made. (1) Can the dressmaker recover pay for making this skirt? (2) Can I lawfully refuse to pay her the \$5 for making the first-named skirt on account of spoiling the last one?

Answer.—(1) She cannot recover anything by law. (2) You can set off the price of the spoiled material against the dressmakers claim for the first skirt, and the law will sustain you. But why go to law about such a little matter? It would cost you more than both dresses are worth.

## DIVORCE—DESCENT—KANSAS.

A Reader, Prairie View, Kan.—(1) A husband and wife have lived together one year. The husband has no land. Suppose they should be divorced, would the wife be entitled by law to half the husband's property, or could she sue him for wages? (2) If a husband and wife are living together and the wife dies, who is entitled to her property under the laws of Kansas?

Answer.—(1) She would neither get half of the husband's property, nor could she recover wages from him. When husband and wife are divorced in Kansas, the court, after considering all the circumstances, determines the amount of money or property which the husband must turn over to the wife. This is called alimony, and the amount of it rests entirely in the sound discretion of the court that grants the divorce. (2) If the wife has no issue the husband

## What Does It Spell?

## AN ARGUMENT FOR QUALITY

WHEN you see the name of any machine, especially any farm implement, do you ever stop to think what this name spells to you? The Litchfield Spreader is being put before the American people as a machine of quality, and it is building up and sustaining this reputation. The aim of our company is to build this machine so thoroughly and with such care, all based on the most modern ideas and the latest inventive ingenuity, so that when you see the name Litchfield it will spell "quality."

This is why the Litchfield Spreader uses steel wheels. These wheels cost more to build than any ordinary wood wheels, and especially much more than the usual kind of combination-cast iron and wood, but they are stronger and they are better in every general way and are particularly adapted to spreader work.

It is because quality is aimed at rather than cheapness, that the endless, swinging section, hinged conveyor is used, in preference to the ordinary return conveyors, which can be built for half the money. This conveyor gives excellent working results, stands all the varying conditions, including cold weather, and does not find its way daily into the repair shop. Therefore, regardless of cost it is used on this modern spreader.

It is because of this quality that must be maintained in the Litchfield Spreader that the present style of two or three-horse center draft hitch is used. It costs much more to build this kind of a hitch because of the expensive malleable castings and the additional general outlay, but the results justify the expenditure. There has been such a universal criticism of the ordinary three-horse hitch (with two horses on one side of the pole) because of the side draft and other annoyances, that our style of adjustable hitch was designed and placed on the market. It gives absolute perfect draft with all horses working squarely in front of the machine. It must be seen to be appreciated.

Quality, and nothing else, has demanded the largest steel axles used on any spreader, the heaviest self-oiling journal bearings, and the elimination of little tinkering automatic triggers, etc., all with a view of increasing the strength and decreasing the annoyances and repairs. Kindly write us and read the next issue.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

is entitled to all her property; if the wife leaves issue—children or children's children—they get half her property, and her surviving husband gets the other half.

## CONSTRUCTION OF DEED.

▲ Subscriber, King City, Mo.—A husband and wife in this state deeded land to their children, making a reservation as to part of the land. The reservation clause in the deed is as follows: "We reserve full use and control as long as we live, of the above described lands." Can the wife hold the lands for her own use after the death of her husband in case he should die first?

Answer.—It is difficult to answer this question without an examination of the deed itself. The intention of the parents was, of course, to grant a fee simple title to the land to begin when both parents should die; in other words, a remainder after a life estate of both parents. If the deed was carefully drawn it could be made to effect this purpose and very likely the deed you mention does so.

## LEGAL EFFECT OF NOTE.

A Subscriber, Lockport, Iowa.—What does this mean? State fully: "Utica, Iowa, Sept. 17, 1906. One year after date I promised to pay John Doe or order fifty-three dollars and 35-100 with interest at seven per cent if not paid when due. Richard Roe."

Answer.—The matter above set forth appears to have been intended as a promissory note for \$53.35, given by Richard Roe to John Doe, payable one year after date and without interest if paid when due, but with interest at 7 per cent if not paid when due. Such is the legal effect of it. The usual words "for value received" are omitted, but this does not affect the validity of the note, neither does the word "promised" instead of promise change its legal effect. A court would decide it to be a good promissory note nevertheless.

## GOOD CASE FOR DAMAGES?

An Iowa Subscriber.—A sold a mare to B for \$125 and guaranteed her to be sound and all right, and never sick except with distemper early last spring, from which she had fully recovered. Some time after B bought the mare she became sick with spinal disease, from which she recovered in a few days, but on December 8, 1906, she was stricken with another attack of spinal disease and has not yet recovered. B has learned that the mare had the disease while A owned her, and was treated by a veterinarian. Can B recover damages from A for misrepresenting the condition of the mare?

Answer.—This correspondent knows how to ask a question—how to state the facts. He has made a clear-cut, definite statement of the case. It presents good grounds for a lawsuit by B against A

Active and retired farmers, and all persons owning, renting, dealing in real estate or property of any description to send for sample pages of the only work of the kind published in the world.

## "The Encyclopedia of Iowa Law."

"No work like this has ever been published in the English language." From The Homestead.

"Your book is the only one I have seen on which I can place any reliance." The Hon. H. E. Deemer, Judge of Supreme Court.

"I would not take one hundred dollars for it if I could not get another." W. W. Hagin, R. F. D., Union, Ia.

"No fifty volumes, and I might safely say, not even a hundred volumes in my library could be selected that would be to me of so much practical use what the law is in Iowa on a given question, or advising others as to the law." Judge C. B. Bradshaw.

"The laws of Iowa need no longer be a sealed book to the people of Iowa." Register and Farmer.

Sample pages free to those interested.

Address, Iowa Law Book Co., Box 342, Marshalltown, Iowa.

## Ice Plows, Ice Tools

The celebrated Wm. T. Wood & Co. make. We carry Ice Plows and Tools in stock ready for prompt shipment. Write for Ice Tool circular.

C. L. PERCIVAL CO., 1102 Cherry St., - - - DES MOINES, IOWA.

## FOR SALE.

One Peerless 16-Horse Engine, one Peerless Separator, Self-feeder and Wind Stacker, also one Joliet No. 2 Cornsheller.

THIS machinery is good as new. Will sell for half its cost when new. Will sell for cash, or write what you have to trade.

W. R. HAINLINE, Blandinsville, - - - Illinois

for damages, in which B could hardly fail to recover judgment, for the difference between what the mare is actually worth and what she would have been worth, if she had been sound and all right as represented.

## Announcement.

The Originator of the Combination Oil Cure for Cancer and Tumors says that under his present management the chances for a cure are far better than ever before. Write for free book to Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.

## Our SPECIAL TIME PRICE Is What WE Want to Send YOU NOW on a Detroit Tongueless Disc Harrow

YOU can't afford to overlook our Special Time Price. We are making right now on a Detroit Tongueless Disc. The Tongueless Disc is our new horse and man saver, and we had nearly 1463 orders more than we could fill last season. No body else can make or sell you a Detroit Tongueless Disc, as it is our patent. We sell only direct to the user. Our Special Price will surprise you. Let us tell you about it. Write today.

## Easiest on TEAM and DRIVER

Disc Harrowing had always been a horse killer until we made our Detroit Tongueless Disc.

This Light Truck Instead of Tongue is only one of the Great Special Features

Doing away with the tongue saves rubbing and side jamming on your horses—saves weight on their necks—gives perfect balance to the frame and makes the discs roll smoothly. Sharp turns and side hills are easy, as the team always pulls straight ahead on the Eveners. The Detroit Tongueless is altogether the lightest draft harrow made, and will save its cost in horseflesh alone, besides doing your work easier for you, better for you and quicker for you.

## We Allow 30 Days' Test FREE

We want you to order it on our 30-Day Field Test Trial. We want you to be satisfied. We want you to know that the Detroit Tongueless Disc is just exactly what we claim it is before you pay us one dollar

## We Pay Freight—Both Ways If Not As We Claim

We pay the freight direct to you anywhere. You don't send us a dollar until after thirty days, and then you can pay cash or settle on our liberal time terms, if you find that it does just what we say it will. If it doesn't, you can ship it back to us at our expense. A month's work in your fields will

AMERICAN HARROW CO., 142 HASTINGS ST. DETROIT, MICH.

## Organized Agricultural Meetings in Nebraska

It is doubtful if any state in the corn belt can show a superior organization to Nebraska, in so far as the state's agricultural affairs are concerned. Last week something like sixteen agricultural organizations held their annual meetings in Lincoln, a record being made in the matter of interest shown and in the number of those in attendance. Most of the programs were carried out at the agricultural college, the equipment of that institution being placed at the disposal of the agriculturists of the state. The officers of the college and station were utilized to the greatest possible extent by those in the various associations who were responsible for the program, and in each instance the best possible kind of service was rendered by these men.

The experiments along various lines now being conducted at the college and station proved to be of unusual interest to those in attendance, this being the case especially along live stock lines. The college now owns one of the greatest dairy herds in the United States and as nearly every man who attends these conventions is directly or indirectly interested in the milking of cows, it was but natural to find this one of the popular features of the institution during the week.

### State Board of Agriculture.

One of the principal items of business transacted by the Nebraska State Board of Agriculture was the passage of a resolution offered by Secretary Mellor, which directed the board of managers to present a bill to be introduced at the present session of legislature asking that an annual levy of one-eighth of a mill be made for the purpose of defraying expenses for erecting permanent buildings on the state fair grounds. The report of the treasurer showed that there is now on hand in the treasury something like \$37,000. President Youngers in his annual address emphasized the importance of this appropriation. He called attention to the need of having better transportation service to the fair grounds and expressed the belief that transportation companies would do something during the year to improve the situation. In his annual report Secretary Zeller called special attention to the good work that is being done by the agricultural college in behalf of better live stock, and especially in what has been accomplished by way of increasing the acreage of alfalfa in the state.

### Poultry Show.

The Nebraska Dairymen's Association twenty-second exhibition in the auditorium at Lincoln last week. There were between 2,500 and 3,000 birds on exhibition, these being composed of forty-five different varieties. The secretary of the association stated that it was the finest collection of birds that had ever been brought together in the central West. It was not only larger than ever before, but birds of finer quality were on exhibition.

### Horticultural Exhibit.

An unusually fine exhibit of fruit was made by the members of the state horticultural society. If there were those who in the past have doubted Nebraska's ability to produce fruit of superior quality that doubt was in a measure dispelled last week. The noted horticulturist, Mr. Stevens, alone exhibited 450 plates of apples and pears. The preparation of certain charts by Dr. Heald, illustrating the work of the codling moth, added much to the interest of the meeting of the horticulturists.

### Duroc Jersey Breeders.

One of the enthusiastic meetings held during the week was that of the Nebraska Duroc Jersey Association. It was well attended and the interest taken in carrying out the program demonstrated that the Duroc Jersey men of the state are, as they have been in the past, pulling together. Dean Burnett, of the college, in an address of welcome to the Duroc men, pointed out with much force

what had been accomplished by the Duroc association during the last five years, and the showing made by him was indeed complimentary, not only to this great breed, but to all men who are engaged in handling the Duroc. S. R. McKelvie presented an interesting paper on the problems of Duroc Jersey breeders.

### The Dairymen.

The Nebraska Dairymen's Association was well attended and an interesting program was carried out. One of the features of the meeting was the exhibition of the milking machine in use in the college barns. Of the 200 members of the association present few had ever witnessed the actual operation of a machine of this kind, and surprise could be heard expressed on every hand at the seemingly satisfactory manner in which the cows in the dairy herd were milked by mechanical means.

### Short-horn Meeting.

About 200 breeders were present on Friday at the annual meeting of the Nebraska Short-horn Breeders' Association. Prof. H. R. Smith welcomed the Short-horn men in an address packed with information concerning the use of Nebraska roughage. He called attention to the fact that while the hog had been the great money-maker in the past, the time had come when it was necessary to keep more cattle in order to consume the roughage grown in the state and in turn be able to utilize the fertility and the vegetable matter which it contained. By reference to experiments being conducted at the station he showed that as large gains were being obtained on a bunch of steers in feeding only fourteen pounds of corn a day, together with all the alfalfa hay and corn stover that they would eat up clean, as were made in another instance when steers were fed twenty-six pounds of corn and bran a day, but given only corn stover and no alfalfa. The largest gains being made on any lot ran a little over three pounds daily per steer, this being made on a full ration of corn, together with corn stover and alfalfa, half and half.

One of the interesting papers presented before the Short-horn convention was that of Dr. McConnell, representing C. Bischoff & Co., of New York. His subject was "Controlling Bovine Tuberculosis by Vaccination." He cited the results of experiments conducted in Germany and France, as well as in the United States, which indicated conclusively that the von Behring method of inoculation will absolutely prevent a bovine from contracting tuberculosis, even though exposed to tubercular cattle. His paper stirred up considerable discussion, and men on every hand expressed themselves as believing that in the near future this method of immunizing herds in the corn belt would be introduced generally.

### Other Meetings.

There were other important meetings held during the week, of which the mere giving of the program at this time would go beyond the space at our disposal. There was, for example, held an important meeting of the Nebraska Veterinary Medical Association, the swine breeders' association, the improved stock breeders' association, corn improvers' association, the farmers' institute conference, bee keepers' meeting and a meeting of the Nebraska Academy of Sciences.

As said in the beginning, these meetings on the whole were well attended and the programs that were prepared by the various committees and secretaries were carried out in detail with but few omissions. The effective organization of the diversified interests of agriculture on Nebraska is unquestionably doing much the plan that is being worked out in for the state.

### HOW VALUABLE IS THE MANURE SPREADER?

The manure spreader has been in use long enough now to determine whether it is an implement of permanent value or not. During the last ten years there have been thousands of spreaders sold throughout the central West and many of our readers have been purchasers.

For the benefit of those who have never had any experience with the spreader we propose that the title of this article be made the subject of dis-

### THE OLD RELIABLE ..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.  
TWO HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.

Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

(Only plow factory in the United States selling direct to farmers at wholesale prices.)

cussion by our readers who have had experience with the spreader.

Let those who take up this topic keep in mind the two principal claims that are made for the manure spreader, namely, the saving of labor and the saving of fertility which is effected by handling farmyard manure properly. Incidentally, the best time to haul manure comes up under this topic, because that has much to do with the preventing of waste. Also the best place to put the manure.

We know that articles of three or four hundred words from users of the manure spreader will be eagerly read by those who contemplate purchasing.

### Iowa Farmers at School in the Short Course.

Complete figures on the 1907 short course in stock and grain judging at the Iowa Agricultural College have proven it to be the most successful course yet held. Six hundred and twenty-four students were enrolled in the stock and grain judging work, seventy-nine in the dairy course, and thirty-two in the domestic science course, a total of 765 students. Nineteen of the above number combined horticulture with stock or grain judging, so that the figures as given above represent the total enrolment. Of the 654 men, 156 had attended previous courses and a number were present who had attended four or five different times. The constant change in stock and bringing in of new loads, representing the very highest types of pure-bred stock, make it possible for men to return here for several years for their two weeks' work with profit to themselves.

Monday afternoon, Tuesday and Wednesday forenoon were given up to sheep judging, and the interest was keener than ever before displayed, undoubtedly due to the high prices which have prevailed for sheep and wool in recent years. Iowa is far in the rear as a sheep producing state, and only the southeastern part of the state contains any considerable number of these animals. Other portions of the state are far behind, but there is every indication that there will be a marked increase in the number of sheep kept within the state within a few years, particularly as farmers learn how to deal with the parasitic diseases which at present interfere so seriously with profits.

Wednesday afternoon, Thursday, Friday and Saturday were given up to work on cattle, the first three days being devoted entirely to beef cattle, both market types and breeding classes being considered. Saturday was devoted entirely to dairy cattle. The large classes and keen interest manifested indicate an increasing interest in the dairy cow. The college has never been better equipped with cattle for class work than at the present time, as the grand champion steer of the recent International and a number of younger steers that are being carried on for class work next year formed the very best of types. Mr. P. J. Donohoe, of Holbrook, Iowa, furnished two bulls and five females from his show herd of Aberdeen Angus cattle. These furnished excellent types of breeding beef cattle, and the work on these classes was greatly appreciated by the hundreds of

### We Will Pay Men \$85 Per Month to travel, collect names, advertise and give away samples. Expenses advanced. Write today. H. M. Rider Co., Chicago

farmers assembled. Monday, January 7th, was given up to a consideration of the carcasses of the animals that had been slaughtered on the preceding Saturday. The veterinarian, John Gosling, of Kansas City, who, more than any other person, was responsible for these valuable carcass demonstrations, was present and explained the value of the various carcass cuts in his usual happy manner. He was assisted in this work by Mr. Louis Young, an expert cutter from Chicago.

Tuesday morning witnessed the beginning of the horse judging, when a lecture on conformation and soundness was given by Dr. McNeil, of the veterinary college, and for the two days following the classes gave their entire time to the consideration of market types of draft and heavy harness horses, while the advanced class took up the study of the four draft breeds and of the breeds that furnish our other market types of horses. A car load of excellent Percheron and French Coach stallions from the stables of McLaughlin Brothers furnished class work in sires. Chicago was represented by a pair of high steppers from Ellsworth & McNair. The Shire gelding, Tom, exported to this country by King Edward VII., and the champion Clydesdale gelding at last spring's Highland Agricultural Society show, also came out in this shipment, and gave the students an opportunity to realize the extreme massiveness and weight desired in the highest type of draft horse.

The work on Thursday afternoon, Friday and Saturday was devoted entirely to swine, the market types of fat hogs being furnished by the college, and the bacon hogs from the herd of Mr. James Atkinson, of Des Moines, who supplied the college with the Yorkshire barrows.

The work of the animal husbandry department was most effectively supported by daily talks on practical live stock subjects by the members of the faculty of the veterinary college. Dr. McNeil's lectures were especially appreciated by all stockmen present, and his remarks on tuberculosis aroused all those who heard him to a realization of the great danger confronting every family that uses milk. Tuberculosis is undoubtedly the most serious danger to the herds of the state today, and its danger to humanity is being greatly minimized in the state. It is to be hoped that a law can be passed in the near future that will make possible inspection and condemnation of animals affected. Prevention is better than cure, and as the state has recently planned to build an expensive sanitarium for the care of tuberculosis patients, it should certainly take some steps to prevent the wholesale dissemination of the disease through the milk of infected animals.

The enthusiasm shown by the short course students only serves to fix the college more firmly in the affections of the people of the state, and there is no question but that the one week short courses held in different districts of the state will be greatly augmented in number within the next two years.

## SEARS, ROEBUCK & CO., CHICAGO, ILL.

### HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

The problem of making a good feeding floor for the hogs at a reasonable cost is one that confronts many farmers. Victor Wiley, Moultrie county, Ill., has kindly favored us with his plan, which we herewith submit to our readers. The feeding floor proper is of plank

resting on joists which are supported by brick pillars at the corners and as often between as necessary. Floor is about two feet from ground and if it cannot be built in a slope, so as to furnish an approach to two sides, then one is made either of earth or lumber. At one end of feeding floor is a trap door (D), through which the cobs are shoveled onto a rough floor beneath and beside a brick furnace or fireplace. This fireplace extends the full length of the tank above it, which in this case is eight feet long, two feet wide and eight inches deep. This tank is probably covered over partly in cold weather and the flue or smoke pipe is protected by a frame from being displaced by the hogs at feeding time. The plan is to allow the cobs to dry one day and then burn them. The tank is protected on the sides and ends by a two-inch plank and the whole feeding floor may be fenced in to prevent animals and feed from falling off. Mr. Wiley states that when

once the brick is warm and a live bed of coals is established the water will be kept warm night and day. Possibly some may not wish to go to as much expense as would be required to duplicate this platform, in which case its construction might be much simplified. Instead of brick pillars, wooden blocks or logs cut the right length and set on end would do very well. Two sides of the platform could be made to extend into a slope, which would eliminate the need of an approach. The tank idea in itself could be patterned from in many cases.

Mr. J. P. P., of Maquoketa, Iowa, writes: "Enclosed please find a sketch of a tug holder which I find very handy. The object of this device is to hold up the tugs when not in use. Quite often the cast iron hooks on the harness which are made to hold the tugs become broken, while some harnesses have no tug hooks at all. Secure a good, strong piece of whang leather eight inches long and make a slit in each end. One end is then attached to the harness where the tug hooks usually are and the other end is left dangling. On this dangling end a stout wire is attached. Its shape should be such that the tugs can be easily hooked into it."

One of our California subscribers, Mr. F. R. Pollock, advises us that he has found a handy door or gate button in the following described device: Saw a semi-circle out of a six-inch board. This is to be used instead of the ordinary rectangular piece commonly made for a latch. The screw or bolt is placed within an inch of the straight side of the piece in the center. The advantage of this latch is that it always hangs in a position to hold a door closed.

In regard to the cement foundation for a corn crib which appeared in these columns lately, Mr. C. F. Spicer, of Sangamon county, Ill., writes as follows: "We would suggest that the top soil be taken off and replaced with cinders or

tamped clay. Place boards around the outside to form a mold for the concrete. Six-inch boards should be used and should extend nearly their whole width above the surface. Place the concrete and tamp it well, leaving it rounded in the center and at least two inches higher than at the sides. Before filling center place something through to form a gutter six inches wide and two or three inches deep. This may be made four inches deep by placing three pieces of 2x4's edgewise through the center. When concrete is set these are removed. Instead of using a sill as suggested, have a blacksmith cut dowel pins from five-cir. 1 rounded iron eight inches long. Place these around the crib floor four inches from the outer edge and as close together as you wish to place the studing. These are set in concrete, while the same is yet green and are placed four inches deep, leaving four inches to stand above surface of concrete to be inserted in the bottom of the studing, having bored holes in these pieces to fit the pins. After concrete has become thoroughly set lay one-inch slate three feet apart across the gutter and lay a six-inch board on these and you will have your corn well ventilated. More gutters may be made if necessary. The ends of these gutters should be screened to prevent animals from entering."

Those who work with "saw horses" will find in the accompanying illustration

an idea that will save many a tired back and considerable time as well. In-

stead of throwing the hammer or the saw on the ground every time one picks up another tool they are placed in the shallow box formed on top of the "horse" by nailing a good strip to each side of the 2x4 that makes the back of the saw horse. Most "horses" are made with a 2x4 for the back; however, a 2x6 would be preferable in case the "horse" was to be made as illustrated. It would then be of sufficient width to allow a saw to lie flat, as well as holding nails and other tools.

### SORES ON HANDS. Suffered for a Long Time Without Relief—Doctor Was Afraid to Touch Them—Cured by Cuticura.

"For a long time I suffered with sores on the hands which were itching, painful, and disagreeable. I had three doctors and derived no benefit from any of them. One doctor said he was afraid to touch my hands, so you must know how bad they were; another said I never could be cured; and the third said the sores were caused by the dipping of my hands in water in the dye house where I work. I saw in the papers about the wonderful cures of the Cuticura Remedies and procured some of the Cuticura Soap and Cuticura Ointment. In three days after the application of the Cuticura Ointment my hands began to peel and were better. The soreness disappeared, and they are now smooth and clean, and I am still working in the dye-house. Mrs. A. E. Maurer, 2340 State St., Chicago, Ill., July 1, 1905."

We are publishing in this issue on page 5 the latest of the Litchfield Spreader series. If we have any readers who are land owners that are not following these, whether they own a Manure Spreader or not, we can assure them that they are missing valuable information on this timely and modern topic.

## The Biggest Profit for You

- To get the most money from your Live Stock,
- To make them yield the biggest profit,
- To maintain the best conditions at the least expense, use

### Standard Stock Food "It Makes Stock Thrive."

You know without our telling you that stock out of condition or "off feed" cannot make money for you.

You know that the modern farm animal needs help in the digestion and assimilation of its ration.

We can prove to you and we will guarantee you that Standard Stock Food will give your stock this help, with better results and at less cost than will any other means you can employ.

We ask you to try Standard Stock Food on that guaranty, and whether you buy it of the dealer or from us, we hereby promise to refund to you your money if Standard Stock Food does not do everything we claim it will do.

And remember this, it costs you less to use Standard Stock Food than any other stock food because so little of it is required.

Just compare Standard Stock Food with any other stock food made and you can see, smell and taste the superiority of the Standard. It is stronger, better and more concentrated. That is why you need use so little of it.

That's why a dollar's worth of it will last you longer, go farther and do more good than a dollar's worth of any other stock food.

**GO TO YOUR DEALER.** Insist upon having the Standard Stock Food. If he can't supply you do not take a substitute but send us direct. Send us his name and address. Tell us how much stock you keep and we will send you our big Live Stock book "The Standard Feeder," 160 pages, 200 illustrations, 12 special chapters on the feeding, care and handling of Live Stock of all kinds.

Standard Stock Food Company,  
1516 Howard St., Omaha, Neb.

CONSULTING VETERINARIAN. Advice and prescription by mail, \$1.00.

## Cancer Cured No Knife, No Pain

People I have cured of cancer prove the astonishing results of my treatment. Peter Keegan, Galesburg, Ill., writes: "It is only a question of time—I must die." Doctors said "no hope." My new method was used and to-day Mr. Keegan's cancer of the throat is healed, and he is well. I have made wonderful cures without pain, operations, sticky balms, oils or plasters. My treatment is clean and wholesome. It gives instant relief from the smarting, itching and terrible burning pain, destroys the offensive odor and has cured cases given up by the family physician and specialists. If you have cancer or have a friend who has cancer, write me to-day. Full information, proofs and advice given without charge. Address: DR. RUPERT WELLS, 3165 Badol Bldg., St. Louis, Missouri.

**SORE EYES** Strained, inflamed or diseased eyes, granulated lids, ulcers, cataract, bloodshot eyes, weak, tired or watery eyes, and eyes that ache, use Schlegel's magic eye lotion, a soothing remedy that cures quickly. **\$7.00** Daily Av. selling Only Pump Equalizers  
Make all pumps work Easy. Wind-mills run in slightest wind. Fits all Pumps. Merit sells them. Fully Warranted. Exclusive territory. Write Equalizer Mfg. Co., Waseca, Minn. Dept. 19

When writing please mention this paper.

## VETERINARY MATTERS.

**PROFESSIONAL** Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### WARTS.

I have two yearling mules that have what I think are blood warts. One has a red bunch about the size of a hickory nut which looks as though it is scabbed over part of the time and part of the time it is blood color. It is about half way between the fetlock and hoof. The other one is on the stifle joint and is about as big around as a dollar and flat. Part of the time it is red and part of the time there is a scab on it. They came on some time during the summer. I have not tried to doctor them yet. Please tell me what to do for them.

The wart on the foreleg may be easily and safely removed by operation, but if you cannot have this done saturate the part once daily with glacial acetic acid applied drop by drop. The wart on the stifle is in such a dangerous position that you had better let it alone unless you can have it attended to by a qualified veterinarian.

#### ABSCCESS.

I should like to know what is the matter with my mare and what to do for her. She is a bay, thirteen years old. The trouble began by mare getting stiff and unable to roll or shake a fly off, and she was this way for about a month. Then for a week or two she seemed to be all right. Her breast then began to swell considerably, swelling extending one or more feet back of front legs, and stayed this way for four weeks, when a lump formed on breast the size of a fist. At this state I applied coal oil and then liniment. It came to a sharp head and a little of the hair came off of point. Then I opened it by cutting across with a sharp knife. It discharged a great deal of yellow matter, rather thick and has been running freely ever since, and now the swelling has mostly gone. Mare seems to be in good health, looks well and eats well and her hair looks all right.

Open the abscess freely and after syringing it out, pack it full of oakum saturated in a mixture of equal parts turpentine and raw linseed oil. Renew the packing once daily. The abscess may have followed an attack of influenza or strangles.

#### QUITTOR.

In September I had a gray mare get cut on a barb-wire fence. The injury was a mere scratch on the fetlock, on her front foot. I applied antiseptics, but it commenced to swell. The veterinarian pronounced it blood poison. We poulticed it until the swelling went down some, and it nearly all healed excepting two places where it still runs. She goes somewhat lame and it is swollen above the fetlock. The mare eats well. Please give me your advice as to what can be done.

We would advise you to remove hair from part, then inject into the discharging places once daily a little of a mixture of twenty drops of formaldehyde in half a pint of pure water and afterwards apply a flaxseed meal poultice made with a couple of drams of coal tar disinfectant in poultice water. When discharge ceases blister part with cerate of cantharides. Peroxid of hydrogen also would be a good medicine to inject if the other does not seem to do the work. It may be that foreign bodies or diseased tissues are present in which case they will have to be removed by operation before the fistula will close.

#### TUBERCULOSIS IN SWINE.

What are the symptoms of tuberculosis in hogs and what is the treatment for same?

Tuberculosis of hogs and other animals is incurable. There are few symptoms that would lead one to conclude with certainty that the disease was present in a hog and the disease may be there to a greater or less degree without causing appreciable symptoms; in other words the evidences of the disease may not be discovered until after

## Chief Cause of Hog Losses

This exposure shows stomach and intestines taken from a twenty-five pound shoat, full of intestinal worms.

This shows liver of same shoat, with worm in bile bladder. The duct through which worm has come was split with knife to show worm.

#### To Whom It May Concern:

During the month of August, 1906, my shoats got sick, and a number of them died. On August 27th, Mr. Deal, representing the Iowa Stock Food Company, called at my place and told me my hogs were dying on account of worm trouble. In order to make sure of this, we killed one pig. On examination we found the stomach and a portion of the small intestines full of intestinal worms. Some of the worms had worked their way through the bile duct and into the bile bladder and liver.

The jar that Mr. Deal carries with him contains the liver, stomach, intestines and worms taken from this shoat. If anyone doubts this and will write me, I will, if necessary, go before any notary public and make oath to the above fact.

I fed Iowa Worm Powder to the balance of my pigs. It cleaned them of worms, and I had no more losses. Iowa Worm Powder will accomplish all that is claimed for it. I never saw anything that would remove the worms so effectively. I also consider Iowa Stock Food the best appetizer and conditioner I ever fed. The feeding of these products has saved me my crop of pigs. Anyone can be convinced of their value by using them.

Very truly,  
G. L. POULSON.

## FREE!

To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing. Address Dept. A.

## IOWA STOCK FOOD CO., Jefferson, Iowa.

the animal has been slaughtered. The reason for these facts as compared with other animals is that hogs are usually allowed to live but a few months and so the disease rarely runs to the extreme lengths as seen in progressive consumption of cattle. Still one may suspect the disease if hogs pine away, cough and are weak, but all of these symptoms may also be due to some other trouble than tuberculosis so that it may be said that one cannot confidently diagnose the disease in the live animal. After death the disease is indicated by the presence of little and large tubercles in lungs, glands, or studding lining of chest or abdominal cavity or intestines or even implicating the muscles.

#### OPEN FOR INSPECTION.

The accompanying illustration shows one of the most popular sizes of the well-known line of Bowsher Feed Grinding Mills thrown open for inspection. This illustrates the ease of access to all the grinding parts, as the mill can be opened up as shown in a few minutes' time by simply withdrawing

four pins. This is only one of the many features which make the Bowsher the handiest mill that can possibly be devised. It will also be noticed that the grinders in this mill are cone-shaped. It can readily be seen that this cone-shape presents a large area of grinding surface and still does the work close to the center of the shaft, thus effecting a great saving of power. There are many other features about these mills which work together to give the user the best possible returns from the power he has at command, and which the Bowsher Company will be glad to explain fully to any inquirer. These mills have been on the market for the past eighteen years, and are favorably known in all parts of the country. Indeed, much of the continued suc-

## A Whole Medicine Chest.

A bottle of DEAN'S KING CACTUS OIL in time of emergency saves many dollars.

## PROF. DEAN'S

## KING CACTUS OIL

Will heal the worst barbed wire cut without leaving a scar if used in time. We have thousands of testimonials that prove this fact. Every owner of live stock should keep it on hand, for it is a positive cure for cuts, sprains, bruises, old sores, swellings, open wounds, harness and saddle galls, etc.

**KING CACTUS OIL** is equally valuable for ailments of the human race. It is magnetized and soothing, pleasant to apply and heals a wound from the bottom up.

Sold by druggists in 15c., 50c. and \$1 bottles, \$3 and \$5 decorated cans. Sent prepaid if your druggist cannot supply you by **OLNEY & MODAID, Clinton, Iowa.**

cess and steady increase of sales this firm have enjoyed is due to the fact that each mill sent out is a recommendation of their line, and a positive proof of the honest manner in which these machines are built and the superior principle of construction which makes their performance so highly satisfactory. Free, illustrated catalog, showing all the different sizes of these "combination" mills, ranging from two to twenty five horse power, also their line of sweep power mills can be secured by addressing the E. N. P. Bowsher Company, South Bend, Ind.

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## PLYMOUTH ROCKS.

ROCKY CREST FARM is offering choice Barred Rocks, both cockerel and pullet bred lines, with score cards by Judge McClave. Prices reasonable. These birds line bred for years. At Rochelle, Ill., in strong competition, won four firsts and tied for fifth first. Eggs for sale in season. Write for prices. Member American Plymouth Rock Club. Will D. Quick, Ashton, Ill.

EVERGREEN Lawn Farm, M. Hummel, prop., Monroe, Iowa, breeder of heavy-boned Barred Plymouth Rocks for 22 years, has for sale 450 birds sired by high-scoring Iowa State Fair and Jasper County Fair first prize winners. We won nine first prizes at the Jasper County Fair in 1905. Nothing but first-class stock shipped.

BARRED Plymouth Rocks for sale. 300 cockerels, hens and pullets at a bargain. Large-boned, vigorous, farm raised, scored birds that win. I have developed heavy egg producing strains. Mrs. A. A. Berry, Box 125, Clarinda, Iowa.

RILEY'S Pure Barred Rocks, Hawkins-Thompson strain. Get eggs of us if you want good value. There's a reason. Ask why and get prices. Any number. Orders now or later. Mrs. J. Willis Riley, Box 64, Grand River, Iowa.

BARRED Plymouth Rocks, Hawkins, Thompson, Felch and Todd strains, cockerels, \$1.50 to \$2.00 each; hens and pullets \$9.00 a dozen, if taken soon, as we intend to leave. Lou Blattner & Co., Prairie City, Iowa.

WHITE ROCKS—Exclusively. Fishel strain. Range bred, healthy and vigorous. Scored, \$2.00 up. Unscored without disqualifications, \$1.50. G. H. Blake, Route 2, Oelwein, Iowa.

WHITE ROCKS, pure bred. Pullets, \$1.00, cockerels, \$2.00 during January. Buff Rocks, July hatch, cheap to close. All are good; culs all sold. A. H. Prater, Council Grove, Kansas.

WHITE Plymouth Rock pullets and cockerels and Silver Comb Buff Leghorn cockerels, prize winners. Free circular. D. W. Harberts, Marion, South Dakota.

FOR SALE—Barred Plymouth Rock cockerels, Mammoth Bronze turkeys, raised from high scoring stock. Eggs in season. Mrs. Eugene Scott, Lathrop, Mo.

BUFF ROCK cockerels; big strong range birds with solid color. Cash with first letter, \$1.50. Satisfaction guaranteed. Kelley Poultry Farm, Altoona, Iowa.

FOR SALE—White Plymouth Rocks. A large number of cockerels and pullets. Good size, pure white; prices reasonable. Mrs. B. Treloar, Ogden, Iowa.

BARRED ROCKS—Pullete, cockerels, scored 88½ to 93½. Large, vigorous. Write your wants. Prices low. Circular free. Eddie Anderson, Alta, Iowa.

75 BARRED Plymouth Rock cockerels for sale. Nicely barred and with large bone. Prices reasonable. L. M. Churchill, Fairmount, Iowa.

CASEY'S Partridge Cochins won again at Iowa State show. Can sell you beautiful exhibition bird for \$10; good farm and market birds, \$1.00 to \$2.00. W. J. Casey, Knoxville, Iowa.

## ORPINGTONS.

ROSE COMB Buff Orpington cockerels for sale at reasonable prices. Eggs in season. Mrs. D. D. Lindsay, Aurelia, Iowa.

## TURKEYS.

MAMMOTH Bronze turkeys, sired by a 40-lb. tom. Walter Ames, Albion, Iowa.

## WANTED.

WANTED—A thoroughly practical farmer capable of taking charge of 50 acre stock and grain farm. Must thoroughly understand hog raising and cattle feeding. Address with references, Box 302, Marshalltown, Iowa.

WANTED—All cream producers to know that the Des Moines Creamery Company pays at all times top prices for cream. Write for proposition. Des Moines Creamery Co., Des Moines, Iowa.

WANTED AT ONCE—An experienced handy farm hand by the year. Must be strictly temperate. Good wages and a good home. W. A. Shelden, Paxton, N. D.

## The Week in Kansas.

To the Editor of The Homestead:

To those living outside of Kansas, the state must appear a collecting place for storms, if they believe the black headlines on the front pages of the daily newspapers. Again, according to the last Topeka daily paper, "A Blizzard is Raging in Kansas." The cold is said to be intense and stock is suffering. But that comes from a steam-heated room in the state capitol. Out here on the farm we do not know a blizzard is raging; we feel no intense cold and we know of no stock that is suffering.

It all happened by a storm of sleet falling, then a little snow, then more sleet, a little rain, and still sleet, rain and snow. This is the kind of weather we have been having ever since

## WYANDOTTES.

SILVER, Golden and Buff Wyandottes. 100 cockerels at \$2.00 each, scored birds, eggs. Iowa State Fair, Iowa State Poultry Show winners. Catalog. V. G. Warner, Bloomfield, Iowa.

30 WHITE WYANDOTTE cockerels. They are beauties. Write me about them. S. W. Harr, Riverside, Iowa.

SILVER LACED Wyandotte cockerels for sale. Eggs in season. S. R. Young, Greenville, Iowa.

## LEGHORNS.

HOSE Comb Brown Leghorns exclusively. The best lot of cockerels ever raised at Pike Timber Stock Farm, for sale. T. A. Davenport, Belmont, Iowa.

320 ACRES, 10 acres cleared, \$500 worth of buildings, drilled well, two springs, young orchard, \$1,800; would sell half. Address, J. C. Heins, Argyle, Mo.

FOR SALE or Trade—Our Short-horn herd bull, Banff's Lord 202930. Got by Lord Banff 150718 out of Glosterina 5th. H. Couklin & Son, Altamont, Ia.

KANSAS WHEAT LAND—100 quarter sections of smooth land, good soil, \$7.50 to \$12.50 per acre; also Iowa farms. Jenk E. Wright, Chariton, Iowa.

A SNAP in 200 acre, well improved, Buena Vista county farm, German settlement; 800 per acre, good terms. James M. Hoskins, Sioux Rapids, Ia.

160-ACRE well improved farm in Oklahoma, 85 acres in growing wheat. Will sell reasonable; one-third on time. T. A. Schnelle, Kiowa, Kan.

FOR SALE. A fine lot of farm bargains in east Kansas. Any size; write for free list and map. Iler & Mansfield, Garnett, Kansas.

## REAL ESTATE.

FOR SALE—Walnut Valley Stock Farm, near Osceola, Iowa. 360 acres, rich valley land, no overflow; northern border upland; scattering timber in pasture thickly set to blue grass. Large two story house on upland, tenant house, large barn, double cribs, cattle sheds, other improvements, all new. Unlimited supply of water forced to house, barn, lots with gasoline engine. Best feed lot in county, facing south, surrounded by natural grove. Rent corn netted owner \$12 per acre. Bargain, \$60 per acre. Also an 88-acre farm, same price. Address owner, E. T. Beede, trout I, Osceola, Iowa.

280 ACRES, 12 miles west of Beloit, Wis., improved, cheap buildings, mostly grass land, \$25 per acre. 340 acres, Worth county, Mo., 12 miles south Mt. Airy, Iowa; \$5,000 worth buildings, \$38 per acre. 80 acres, Harrison county, Iowa; no buildings, medium soil, \$30 per acre; one-fourth down, balance 5½%. No trades considered. Also for rent for term of years, 350 acres Decatur county, Iowa. Good buildings, 7 miles hog fence, one-half plow land, spring water. L. M. Mann, owner, Des Moines, Iowa.

160-ACRE farm, 40 miles west of Kansas City 9 miles southeast of Lawrence, Douglas County, Kan.; 1½ miles from railroad. Creamery and school near by. Four-room house, basement barn, corn crib and granary; good well, windmill, 40 acres blue grass, pasture, 50 acres tame grass, five acres timber, balance under cultivation. All improvements good. On rural route and telephone line, near State and Baker Universities. Address, B. Thomas, Eudora, Kan.

ARE YOU looking for a home? If so, don't buy before seeing copy of the Real Estate Journal. It has nearly 4,000 farms, city property and stocks of goods advertised in it, and reaches 45,000 readers each issue. Advertising rates 2 cents per word. Send 10c. in silver for two months' trial subscription. Farm and Real Estate Journal, Traer, Iowa.

220 ACRES rolling hazel brush and burr oak timber land, ten miles west of Winterset. Fenced, fair improvements and some cleared. Deep, black soil, good location on It. P. R. \$40 an acre. Thousands cash or good property, balance ten years, low interest, might divide. T. D. Peterman, owner, Winterset, Iowa.

320 ACRE FARM in Sherman County, Kansas 60 acres creek-bottom land, suitable for alfalfa, 200 acres level wheat land. Two miles to postoffice, school, church, and general store. Ten miles to town of 2,000 people. No improvements. Price, \$10 per acre. Apply to Albert E. King, McPherson, Kansas.

KANSAS FARM BARGAIN.—320 acres choice land, good house, barn, granary, cribs, good wells, windmill, orchard; 180 acres in cultivation, 20 acres alfalfa, balance pasture; all fenced, 135 acres growing wheat goes with sale. I have other good bargains. Call on or address, J. K. Bremyer, McPherson, Kan.

THIS will not appear again. For sale by owner, 120 acres, Bates County, Mo., 60 miles south of Kansas City; lays fine, all can be farmed. Price for 60 days, \$5,000, one-half cash, balance ten years at 6%. F. C. Little, Boone, Iowa.

FOR SALE—Retail dairy and farm; 160 acres, 2½ miles from Chariton, town of 4,000. Good improvements; equipped for business. Having been elected county treasurer, will sell on fair terms. Frank P. Wright, Chariton, Iowa.

240 ACRES top wheat, corn, alfalfa land for sale; 3½ miles from college town of Nickerson, direct to purchaser, less real estate dealer's commission. For description, price, Eliza A. Stroup, Nickerson, Kan.

560 ACRE ranch, well improved, in Coffey county. No better in eastern Kansas. At a bargain if taken soon. For descriptions and maps write, Lane & Kent, Burlington, Kansas.

A BIG SNAP—320 acres, Kay county, Oklahoma; all smooth land, 200 acres broken, balance grass land. Price less than \$35 per acre. Write Chas. E. Vogele, Newkirk, Oklahoma.

\$800.00, HALF CASH, buys 120 acres good level land, half under cultivation, balance timber; house, barn, fruit, well; station 6½ miles. Frank Pearce, Fredericktown, Mo.

I CAN SAVE you \$1.00 to \$5.00 per acre on land in Southwestern Kansas, Oklahoma and Texas. Write for particulars. C. R. Oard, 728 East Douglas, Wichita, Kan.

FOR SALE—Farms, Reno and adjoining counties, ranches well situated bargains. Write me what you want. A. M. Jewell, North Main Street, Hutchinson, Kansas.

KANSAS, Oklahoma and Texas lands. We are located in the finest wheat, corn and alfalfa country in the world. Write us. Southwest Land Co., Newton, Kansas.

SEE MY improved quarter, best vicinity state, rich soil, nice lay, markets, school, mail, telephone. Price and terms right. Reil Johnson, Long Island, Kansas.

BELLEW & CO., Wichita, Kansas, handle the best farms in Kansas and Oklahoma, also timber lands in all parts of the south. Write for list.

IF YOU WANT a dairy, fruit or poultry farm in the Willamette valley, Oregon, do not wait. Write, F. B. Phillips, Cottage Grove, Oregon.

ter than 30 below zero, and three feet of snow on the ground. Henry Hatch. Coffey Co., Kan., Jan. 17, 1907.

Volume twenty-six of the American Berkshire Record is now ready for distribution. It contains pedigrees from 90001 to 95000, and also contains a list of transfers of animals sold whose pedigrees are recorded in previous volumes. It also contains the index of breeders, owners and animals, rules of entry, etc. This book is of course free to members, and to non-members the price is \$1.00. Address F. S. Springer, Secretary, Springfield, Ill.

PILES CURED IN 6 TO 14 DAYS. PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

is going to put them behind with their work in the spring. They will have hay to haul to market and grain to get, either to the feeders or shippers, during the early spring and summer months.

The man who has a good-sized bunch of thrifty shoats is the one who is getting the best price for his corn these days, and he is not being bothered with the problem of hauling it to market, either. In one day he can get his hogs to market, and when he sells them he has sold his corn, at a price much better than the present market affords, too.

This morning the weather is like it has been, and like it appears to continue to be for the rest of the week. The name, Sunny Kansas, is now a misnomer. The sun hasn't shone clear and bright for two weeks. It has been dark, cloudy and dismal; yet, for all this, bet-

last Monday evening, with the end not in sight. It has not been cold, but, on the other hand, unusually mild for the season of the year; no great amount of snow, sleet or rain has fallen, not as much as we should expect at this season of the year, and yet it is a blizzard, according to the ideas of the daily newspaper weather sharps. The people of other states are only pitying us when we need not their pity.

It is a good time to hunt rabbits, and that's about all this weather is good for. No work, except the chores, can be done, unless a person likes to work under difficulties and when disagreeable. As to getting any of the grain and hay to market, that is beyond a possibility. With a great many, who were depending upon working all winter the same as during the summer, this

## OUR DAIRY DEPARTMENT

## Silage for Dairy Cows.

To the Editor of The Homestead:

I never knew of a dairyman who did not regard the silo as a valuable and essential adjunct to his business. Milk is more cheaply made by good grass than in any other way, and next to grass comes silage because it furnishes the cheapest and most desirable substitute for grass. It is true that it costs considerable to make silage because of the necessary machinery the farmer has to purchase, but careful tests made at various experiment stations show quite conclusively that silage from corn is a more desirable feed for cows than the corn crop preserved and fed in various other ways, and this after allowing for the cost of harvesting and storing the crop after various methods.

There is nothing like silage to keep the dairy cow's appetite on edge throughout the long winter feeding period. It also keeps her system in good condition, which is a very important matter, and gives her a relish for her food. In fact, silage well made can often be fed in the summer to great advantage. The dairyman who proposes to maintain the milk flow of his herd will find either soiling crops or silage a necessity during the long, hot, dry summer, for even on the best managed farms the grass if utilized to best advantage will become dry and short from three to four months, depending on the season.

It would take very large barns to store the same quality of forage that one can put in a silo, say sixteen to twenty feet in diameter and twenty-five to thirty feet high, and the food put in

a properly constructed silo will come out with comparatively little loss and be in almost ideal condition for feed. Then when stored in a silo and the work largely done by machinery, as it is on a well managed farm, there is nothing to do, but throw it down day by day as needed.

On the other hand, the coarse rough fodders must be handled over two or three times, and there is of necessity a good deal of loss from exposure and handling, and the labor involved is much greater. It is true that the dairy cow cannot be maintained to best advantage on silage alone, but she needs only a moderate amount of some protein like red clover and alfalfa hay, and corn-and-cob meal finely ground with cottonseed meal to make an ideal ration for her maintenance; so the handling over of a large amount of roughness is not a necessity in the dairy and should be avoided as much as possible.

It is true that dry foods can be improved greatly by running through a cutting box, moistening with water and scattering meal over it and allowing the mass to stand ten to twelve hours before feeding. In this way very slight fermentation is set up and the palatability of the food greatly increased, but when you think of all the labor involved, how much farther ahead are you than if you use silage in the beginning? An experience of a life-time in handling and feeding dairy cows leads me to believe that the silo is an absolute necessity on the dairy farm. Silage can be made very cheaply on land well managed, from ten to fifteen tons of corn silage being obtained per acre. The heavy work in connection with the preservation of the crop in the form of silage is all done in a comparatively short time, and though it may call for a good deal of trouble and expense, the experience of thousands of dairymen shows clearly that they cannot disregard the silo in their daily dairy operations.

As regards the kind of silo to erect, I should recommend a good factory-made silo as being perhaps more satisfactory than any other. I consider the cost of filling the silo as less in proportion to the amount of feed stored than that of earing for the corn crop in any other way. The season for filling comes when the days are long and the weather fine, so that a maximum amount of labor can be accomplished. Shredding the fodder later in the season when the days are short and the weather changeable is a much more expensive way of caring for the corn crop, and unless the winter weather is exceptionally fine it is a

Mrs. J. Renken, Trenton, Ia., says "We cleared \$100.00 in six months off seven cows."

THE SHARPLES SEPARATOR CO.,  
TORONTO, CAN. WEST CHESTER, PA.

Chicago, Ill.

## TO FARMERS AND DAIRYMEN

It will pay every farmer or every farmer's wife to sit right down and write for Sharples "Business Dairying." This valuable book contains information that can be found in no other book, and will help any dairyman to make his business more profitable. It tells How to Feed, What to Feed, How to Care for Feed, What Foods Produce Greatest Amount of Milk, How to Care for the Dairy Cow in the way to get best results, and the whole book is practical. To get all the good out of your milk you should of course use

## THE SHARPLES TUBULAR CREAM SEPARATOR

It is not only guaranteed to more than pay for itself annually, but the ease with which you can skim, the low can, the self-oiling bearings, the simple Tubular bowl with only one little part inside to wash, the moderate price, are all points you should know about. Send today for the free "Business Dairying" and full information about the Sharples Tubular, giving number of cows you keep. Ask for booklet G. 121

great waste to feed fodder without shredding. It is almost impossible some seasons to get fodder shredded and stored away without dampness, which causes a great loss in feeding value. In filling the silo it is necessary to keep one man tramping all the time, and the middle should be kept at least a foot lower than the edges, so that in settling the silage will press against the walls and leave no space for air to get in, which is sure to result if less carefully packed.

Many farmers in various parts of the corn-belt are making use of the silo for

summer feeding by filling with freshly cut clover. This is done by means of a hay fork, pulley and rope, or run it through the ensilage cutter, and it is surely a much more economical way of keeping cattle in summer time than of depending on grass alone, especially during a season of protracted drouth. I have never used anything but corn in filling my silos. Some farmers recommend planting cow-peas with the corn to supply the protein element for the food, which I shall try this year. The question of a protein ration in connection with silage I consider the most important one aside from the silo itself. With bran hanging around \$20 a ton the year round, and other protein feeds proportionately high, it stands us in hand to at least make the attempt to provide a protein food that will be less expensive. To that end we can each experiment in a small way with cow-peas, soy beans and alfalfa.

In conclusion, let me say to every dairyman and stock raiser to build a silo corresponding in size to the size of your herd; don't put it off from year to year, but be sure to build it.

J. P. Fletcher.

## The Farm Milk Cow.

To the Editor of The Homestead:

The farm milk cow is perhaps the most important individual among all the farm stock. Upon her depends the supply of butter and milk which are the foundation of the farmer's table and which enter into the composition of nearly all other dishes. Milk is the national farm drink for children and to a large extent, that for the older members of the family.

The real worth of the family milk cow is seldom computed in dollars and cents. This is to be regretted, for if it were, it would usually have the effect of raising her vastly higher in the family's estimation. It ought surely, too, to carry with it an improvement in her general treatment as well as in respect for her.

Let us suppose that good old "Bossy" could talk for a time; what do we imagine she would say? Well, I imagine that she would first begin to complain about some things that she did not like. She would probably say that her services deserved better board and lodging than she was getting. She would ask for special quarters for herself, a good roomy box stall, instead of being knocked about among the other stock and milked at whatever place her master or mistress happened to find her. She would request more and better feed

Can you count these dots? Two pianos, big cash prizes Free.

In this issue will be found on page 15 an advertisement of Successful Farming, of Des Moines, Iowa, which is one of the best and most successful agricultural papers in the United States. They are making a remarkable offer to our readers of two pianos and some large cash prizes to those who count the dots correctly in the picture of a piano which appears in their advertisement. Full conditions are given and we would suggest that our readers should look this up and go after these prizes. We would be more than pleased if some of these big prizes should be won by readers of our paper, and, while it is not so easy to count these dots as it may seem from first glance, we see no reason why readers of our paper should not be the fortunate ones. Successful Farming is responsible and refers to every bank and business house in Des Moines and awarding of prizes will be wholly in the hands of disinterested judges, among whom is the treasurer of state of Iowa, a judge of the district court and a minister. It would seem this is an opportunity for somebody to get large prizes free. We publish above for the benefit of our readers an extra copy of the dot picture. Look up the offer on page 15 and get in your counts.

## You Want All The Cream

Therefore You Want the

## Iowa Dairy Separator

No other Separator made extracts every particle of cream. Some is always left, and this "some" is your loss.

The "IOWA" does not take part of the cream part of the time. If it did, it would be no better than the others; but it takes all the cream all the time. A Separator that does less than this you cannot afford to buy. Gold medals at World's Fair and Portland mean something. Write today and ask for catalog 25. It's free, and you will find your investment of one cent in a postal card the best you ever made. All sizes from 250 to 750 pounds. Address,

The Iowa Dairy Separator Co.,  
Waterloo, Iowa.

## DAVIS LOW DOWN SEPARATOR

Goes direct from factory to you. No state agents or traveling salesmen to pay. Straight factory prices. And it's absolutely the

Easiest to clean, easiest running, simplest separator on earth. We guarantee that with a Davis your profits will increase \$10 per cow while cutting your labor in two.

Freight prepaid. Send for money saving catalog No. 110 right now and investigate.  
DAVIS CREAM SEPARATOR CO.  
54 L North Clinton St., Chicago, Illinois.

and ask how she should be expected to give a bucketful of milk unless she was given something to manufacture it out of; that she could not make it out of her own blood and bone nor out of the air or water. She would say that while her breakfast was good, there was not nearly enough of it; that instead of one gallon of bran she would like three, and five ears of corn instead of two. She would say that her preference was for well cured clover hay, that cow peas were her next choice and then bright fodder, and that any master who expected his milk cow to find anything fit to eat in a straw stack, did not deserve to get any milk or butter.

Another improvement she would mention would be a more plentiful supply of bedding. She decidedly objected to lying down on a wet and filthy bed and then being scolded at milking time for being so dirty; she appreciated a clean bed as much as anybody and if she were only able to handle the fork, she would help herself to a supply of straw. She would explain that the reason she kicked the hired man the other morning was because he had roughly seized a teat that was chapped and sore; that she had not meant to soil the milk but had used her foot involuntarily; that he was not a good milker anyhow, that he scolded her without cause and sometimes struck her, that he did not strip her thoroughly and that her milk was therefore decreasing; that her feed was irregular in quantity, and that her feed box and manger were not kept clean. Some and maybe all and more of such complaints many a good "Bossy" would make if she were given tongue to speak. How many of us would expect to hear an accusing voice from our own stable?

L. R. Johnson.

#### An Old-Fashioned Cheese Recipe.

To the Editor of The Homestead:

In our home we make a kind of cheese that is very little known, we find, in the homes of our neighbors. We learned the recipe from our grandmother. She used to make it for the harvest hands and they thought that there was nothing better for roughage than this cheese with good bread and butter. While it differs considerably from the ordinary American or cheddar cheese, in that it is much stronger, perhaps more like brick cheese, we like it very well. Those who have eaten of it and who are generally fond of cheese also think it very good. We will give the recipe as we make it, and hope that some of your

readers may try it and find the result to their liking.

We use either skim or whole milk, as is desired, and precipitate the curd by heat or cheese tablets. We separate the whey from the curd just as in making ordinary cottage cheese. Then, instead of using this curd for cottage cheese, we set it away in open pans or cheesecloth sacks and allow it to drain and ripen. This requires a moderately warm room, though in winter we find it ripens just the same, only it requires considerably longer time than in warm weather. Every day we stir the curd so that it ripens fairly uniform, and when it has developed a rather strong odor and a salty consistency it is then placed in a frying pan and melted together. The heat should be gentle, so as not to burn it, and as soon as it is well melted together it may be taken from the stove, poured into a platter or dish so that it will not be more than an inch deep and placed where it will cool.

In several hours it may be cut, and the cut surfaces will glisten. The flavor of this cheese is quite similar to that of the mild brick cheese, and we think it is just as good. The advantage of making cheese in this way is that it requires little work and the process is short, while we think the cheese just as healthful and digestible as any.

L. E. Troeger.

Having published the Litchfield serial story for some time, and knowing that this has a great many interested readers each week, we feel that some of our patrons who are not following these stories are perhaps missing a good deal. If you are not already reading these stories, begin with this issue which is published on page 5.

#### NEEDS NO INTRODUCTION.

In the last issue of this paper we published the picture of Dr. T. F. Williams, of Des Moines, Iowa, but neglected to give his name and address. However, the doctor needs no introduction to the readers of this paper, for his announcement has appeared from week to week for a number of years. We wish to call special attention to the claim made by Dr. Williams. The doctor claims to cure catarrh and its allied diseases, and we believe this to be an honest claim because it is substantiated by grateful testimonials of cured patients. If you are suffering from catarrh, write Dr. Williams at once for his free book and symptom blanks. To convince you that his methods are effective he offers to all who apply one month's treatment free. This is a genuine offer and one that has been thoroughly investigated by a representative of this paper. If the reader did not see the illustration referred to, it will be found with a large sized picture of the doctor in the last issue of this paper. For full particulars address Dr. T. F. Williams, 211-218 Crocker Bldg., Des Moines, Iowa.

## W H Y

### 98% OF THE WORLD'S CREAMERIES USE DE LAVAL CREAM SEPARATORS.

Today over 98 per cent of the world's creameries use DE LAVAL separators. This fact means much to every cow owner. Without the separator creamery operation would be almost impossible. No matter whether the creamery is buying whole milk or cream its success rests upon the centrifugal cream separator. Those who are buying whole milk skim it at the factory with DE LAVAL Power machines—those who are buying cream advise their patrons to purchase DE LAVAL Hand machines. The biggest and most successful creamery in the world is buying cream from more than 40,000 patrons to whom it has sold DE LAVAL Farm machines, after many years of experience with all kinds of separators. Had the DE LAVAL not been the best and by far the most profitable separator for anyone owning two or more cows, this great creamery would never have taken the responsibility of placing them with its patrons. And this is true in hundreds of other instances, for creameries can be found in every part of the world having from a few hundreds to many thousand DE LAVAL patrons. Wouldn't it pay you to find out why experienced creamerymen prefer the DE LAVAL to other separators? You may learn the reason by asking for a DE LAVAL catalog, or better still a DE LAVAL machine—to examine and try out at your own home free of all expense. Don't wait, but write us today.

## THE DAIRY QUEEN

THE CREAM SEPARATOR THAT SUITS ALL.

The Dairy Queen is as near perfection as can be reached in cream separators. It fills every requirement, its low and large supply can, its simple and easy bowl to clean, its light running and close skimming is just what you have been wanting. It never gets out of order, it's always ready to skim, and leaves the cream in perfect condition.

#### You Can Try It Before You Buy.

The Dairy Queen is sold on guarantee and free trial. We have all confidence and know it is right or we could not offer them this way. We only want a chance to prove this to you, that the Dairy Queen is the most convenient, easiest to operate and most durable separator on the market. Ask your dealer about it or send for free catalog.

Address, E. R. Bailey, Clarinda, Iowa, or  
DAIRY QUEEN MFG. CO., FLORA, IND.

WHEN WRITING TO ADVERTISERS PLEASE MENTION THIS PAPER.

We present to our readers a good likeness of several of the good sires and dams whose produce is included in the public sale of Poland Chinas owned by Messrs. Bridgford & Nesbitt, of Alledo, Ill. The sale will be held on Thursday, February 7th. See field notes.

all drinking vessels which have been used by them, scalding with the utmost thoroughness. Disinfect the quarters where they have been burning all litter and droppings. A little turpentine in the drinking water is also good.

Another cure for canker comes highly recommended. The authority for it claims that in the course of twenty years breeding of poultry, it has never failed to cure. It is as follows: Six yolks of eggs, one pint good vinegar, one-fourth ounce turpentine. Put in a bottle and shake well. After it is thor-

oughly mixed, place it in a vessel of some kind in which the head of the fowl may be completely immersed. The head should be held in the liquid for just a moment, not long enough to strangle the fowl. One application each day for three or four days will effect a cure, according to this authority.

#### RHEUMATISM IN FOWLS.

One of our subscribers asks the following question:

-Having been a reader of your paper for years, I thought I would venture to inquire through your columns what is the trouble with my chickens, also give remedy. They become lame in one foot and soon are lame in both and are perfectly helpless. They linger along in this condition for some time, then die. If I shut them up and feed on soft feed for a time they recover somewhat, but never fully. I have a duck affected in the same way. They have a good appetite and will eat to the very last. They are fed principally on corn and have a large range. They have never been confined to the chicken house or yards and have a dry, comfortable roosting place. They have been troubled with lice just a little.

The symptoms described point strongly toward rheumatism. This disease is usually caused by cold and dampness. Even with dry quarters, a long spell of damp weather has been known to bring it on. Unsanitary conditions of any sort favor its development.

The remedies for rheumatism, like those for roup are legion. One quite practical is as follows: Affected birds should have frequent change of ration with plenty of green food. Begin treatment with twenty or thirty grains of Epsom salts. The following day add thirty or forty grains of baking powder to a quart of drinking water and give two or three grains of salicylic acid twice a day. Apply camphorated or carbolic ointment to the affected parts often. Birds seriously affected are better dead than alive.

Rheumatism sometimes arises from the fowls running in wet grass. When the legs and feet are affected, as in this case, relief will often come if bathed with very warm mustard water, then wiped dry, and anointed with witch-hazel ointment, lard, or sweet oil.

No remedy, however, will be wholly efficacious, unless the cause of the trouble is found and if possible, remedied. Rheumatism in fowls, as in the human race, is a baffling and uncertain disease. What helps in one case may fail in the next, and so it goes.

Commercial Poultry tells the story of a farmer who opened a ledger account for everything on the farm. There was a page to the poultry, a page to the cows, a page to the swine, a page to each to large and small fruits, a page to the vegetables, and so on. At the end of the year he was surprised to learn that the poultry had led all the rest. The other crops, in a number of instances, brought in more money, but there was more expense attached to them, and much more money invested; and for capital and labor invested, the fowls were in the lead. There are apt to be surprises in store for the careful record keeper.

"Out of 50 chickens that had the roup bad, some blind, we never lost one after using Walker's Roup Remedy." Mary Ann Orfield, Lamoni. For trial send 25c for 50c package. Walker Remedy Company, Lamoni, Iowa.

#### Common Sense in the Henney

The American hen is the greatest bird in the world. All the gold and silver mined in a year, added to the value of sheep and wool, doesn't equal the money worth of poultry products. Biddy produces in 365 days' time. That sounds big, but it's a big fact and can't be expressed in small figures. If it's hard to believe, take the same truth in another way. Think of a railway train 900 miles long, composed of 107,818 cars. Well! If all the eggs produced on Uncle Sam's farm in one year were packed in crates containing 360 eggs each, it would take just such a train to transport them all between any two points. Now, what about our hen! Nothing small in the poultry industry, is there? No, there is not, and if every man with a hen used Dr. Hess Poultry Pan-a-ce-a, giving a small portion every day in soft food, the business would be far more colossal than it is. Pan-a-ce-a is the key-note of success in poultry culture.

Some breeders, crusted with the barnacles of old traditions and prejudices, think hens and corn are the only two things necessary for making money out of eggs. Some, again, think there may be something in the "tonic idea," but lack sufficient faith to try it. And in the meantime, while these men are growing poorer, thousands of others, with a full knowledge of what hens require, are giving Poultry Pan-a-ce-a and coining money. Poultry Pan-a-ce-a is not a stimulant. It doesn't force the hen to a short period of large production, only to leave her exhausted and unproductive for a much longer time.

Poultry Pan-a-ce-a gets at the root of the trouble in another way. It makes the hen feel natural when her whole environment is contrary to nature. If at liberty to scratch and forage at will, she would find in Nature's

lavish providing most of the things she needs to promote the healthful activity of every organ. But, being restricted in range, she needs Poultry Pan-a-ce-a to take the place of Nature's providing by making food available, and by strengthening and assisting the digestive process till the largest possible amount of nutrition which nature can use is wrung from the food eaten, and directed into proper channels for building healthy flesh or producing eggs. This statement of fact is not overdrawn—hens cannot lay when confined or at liberty, if forced beyond a certain point—unless a preparation of this kind is given.

The truth of all this is sufficiently evident in the number of deserted and abandoned "coops" one sees about the country, where people have literally killed the hen which laid the golden egg by requiring the impossible and unreasonable. Dr. Hess and Clark (who make Poultry Pan-a-ce-a) are so well assured of the real value of the compound, that they back it with their personal guarantee—no profit from using Pan-a-ce-a—no pay. If you try it and are disappointed, you get your money back, that is their offer.

Very likely your dealer has Dr. Hess Poultry Pan-a-ce-a; if not, a postal order will bring it. Thousands more are using it this year than ever before. Try it yourself—get in line for prosperity.

#### POINTERS.

—Mr. W. W. Vaughn, of Marion, Iowa, has twenty large-framed Buff Cochins cockerels which he is offering for sale in his advertisement which appears on this page of The Homestead.

—Mrs. T. W. Glass, of Sac City, Iowa, reports that she is sold out of Muscovy ducks. She wishes Homestead readers to watch for her advertisement in the spring offering eggs from this breed for sale.

—Mr. W. J. Dooley, of Keosauqua, Iowa, who has made a specialty of breeding Barred Plymouth Rocks for a number of years, has an advertisement offering cockerels for sale on this page of The Homestead.

—The advertisement of Mr. C. W. H. Beyer, of Grinnell, Iowa, offering White Wyandotte cockerels of the Fishel strain for sale, will be found on this page of this issue. He is also quoting eggs for sale.

—Mr. F. Bowman, of Eldora, Iowa, has an advertisement on this page of The Homestead. He writes: "I have a nice lot of Rose Comb Brown Leghorns for sale in lots from one to a dozen. Prices reasonable."

—In the advertisement of Mrs. D. C. Molsberry, of Plymouth, Iowa, that appeared in last week's issue of The Homestead, there was a slight mistake in regard to her forty-seven-pound Mammoth Bronze turkey. His score was given at 93%; it should have been 96%.

—Mrs. C. F. McLochlin, of Gray, Iowa, whose new advertisement appears on this page, writes that she has some nice, large

cockerels to draw from. See advertisement on this page.

—Mr. C. A. Molsberry, of Plymouth, Iowa, can furnish Homestead readers with Mammoth Bronze heavy-boned turkeys. They are from high-scoring stock. His advertisement appears on page 13.

—Mr. Peter Geiger, of Minden, Iowa, is offering Buff Cocbin, White Wyandotte and Cornish Indian Game chickens and White Holland turkeys for sale in his advertisement on page 13 of The Homestead.

—Mr. R. R. Stewart, of Charles City, Iowa, breeds Rose Comb Brown Leghorns exclusively. He has cockerels for sale from high-scoring stock at prices named in the advertisement, which will be found on page 13 of The Homestead.

—Barred Plymouth Rocks of the E. B. Thompson strain, large, heavy-boned birds, that will please both the farmer and the fancier, are offered for sale by Mr. J. A. Penn, of Alta, Iowa, in his advertisement which appears on page 13.

—Mrs. Anna Dockey, of Pilot Mound, Iowa, breeder of Barred Plymouth Rocks, in furnishing copy for her advertisement found on page 13 of The Homestead, writes: "I have a fine lot of birds for sale, the best I ever owned. My birds have great size and bone, as well as fine markings." Write Mrs. Dockey your wants.

—Mr. George E. McGrew, of Selma, Iowa, in furnishing copy for his advertisement found on page 13, writes: "We have some fine Mammoth Bronze turkeys. Our tom was the first-prize bird at the Northern Iowa poultry show held at Spencer, Iowa, February 1 to 3, 1906. We have yearling hens that weigh twenty-four pounds."

—Mr. M. A. Easthouse, of Hartley, Iowa, whose advertisement offering Barred Plymouth Rock cockerels for sale appears on page 13, writes: "These cockerels are in fine condition, the best I have ever raised, and any Homestead reader in want of good cockerels to head their flocks or pens can get them from me at a reasonable price."

—Mrs. A. H. Graham, of Alexis, Ill., writes in regard to the White Wyandotte cockerels and pullets which she is offering for sale in her advertisement on page 13: "My White Wyandotte chickens are large, healthy, farm-raised birds and from a good laying strain. I have about 300 of these birds and I offer them for sale at reasonable prices."

—Mr. C. G. Good, of Ogden, Iowa, whose advertisement appears on page 13 of The Homestead, writes: "I have the best lot of Barred Plymouth Rocks I ever owned, many weighing up to eleven pounds, with bone to spare. They are well barred and healthy, vigorous birds and bred from a strain noted for its laying quality." Write Mr. Good your wants.

—Messrs. Larkin & Hersberg, proprietors of the Maple Grove Poultry Farm, of Mankato, Minn., are among our new advertisers. They have something to say to our readers who want eggs for hatching purposes. They have twenty-five of the leading varieties of fowls. Two farms have recently consolidated and they are now amply able to care for a large egg trade of land and water fowls.

—Mrs. Wm. Barr, of Kirkman, Iowa, has an advertisement on page 13 of The Homestead. In furnishing copy Mrs. Barr writes: "I have twenty-five Black Langshan and Silver Laced Wyandotte cockerels for sale. All of them are healthy and well-developed birds and have had the range of the farm. I also have one yearling cock for sale, scoring 94 points. All orders will be promptly filled."

—"The Mammoth Bronze turkeys which I offer for sale are sired by a forty-pound tom," writes Mrs. T. O. Cooper, of Knierim, Iowa, in sending copy for her advertisement on this page. She further says: "I took first on both old and young turkeys at the Calhoun County Fair in 1904, the stock being judged by Judge Todd. I also took same prizes in 1905. The Barred Plymouth Rock cockerels are large, well-barred stock and are good enough to head any flock."

—Mrs. H. L. Jones, of Montezuma, Iowa, in furnishing copy for her advertisement offering Single Comb Brown Leghorn and Barred Plymouth Rock cockerels for sale, found on page 13, writes: "I have a fine lot of cockerels from prize winners. My Barred Plymouth Rocks are large, heavy-boned birds and well barred. My Single Comb Brown Leghorns are first class in every way and are easily worth twice the money I ask for them. They scored 92 to 94 at the poultry show. My Pekin ducks are all right."

—The Berry Poultry Farm, of Clarinda, Iowa, in furnishing copy for advertisement on page 13, sends the following letter lately received from Mr. A. Lee Renchar, dated at Eagar, Arizona. Mr. Renchar says: "My Leghorn chickens arrived yesterday. They came through in perfect condition. They are beauties and I am more than satisfied with them. I am glad to find a poultry farm that will do exactly what they say they will. By your manner of treating your customers, your firm is fully entitled to its name, Golden Rule. I thank you for my fine birds."

—Mr. J. B. McAllister, of Palo, Iowa, in furnishing copy for his new advertisement on this page of The Homestead, writes: "The Silver Spangled Hamburgs I have for sale are extra nice ones of the same strain as my noted prize winner at the Cedar Rapids, Ottumwa and West Liberty poultry shows. This most beautiful variety and profitable breed of chickens, because of their great laying qualities, have only to be tried to be appreciated. I am offering either cockerels, hens or pullets for sale at prices that should move them. I would be pleased to correspond with any of your readers interested in the Silver Spangled Hamburgs."

### POULTRY.

BUFF PLYMOUTH ROCKS at bargain prices for the next thirty days. Address, O. N. Woody, Newton, Iowa.

FINE LARGE MAMMOTH BRONZE TURKEYS and Rouen Ducks. J. H. Howarth, Moulton, Iowa.

## DAY BY DAY

Agricola

Man, born of woman, is apt to jump to conclusions not warranted by the premises. It was so in Bible times; it was so when our nation was in swaddling clothes, and we of the blessed twentieth century ever and anon do some spasmodic jumping.

Just read this from history: In 1797 Charles Newbold, of Burlington, N. J., invented a cast iron plow, spending \$30,000 in perfecting it. But the farmers said that a cast iron plow "poisoned the soil, ruined the crops and promoted the growth of rocks." This terrible indictment bankrupted the manufacturer and it was twenty odd years before farmers acknowledged their mistake.

It was in the year 1819 that a man named Jethro Wood patented a plow which forced recognition from farmers, and acknowledgements that it was far ahead of the primitive style which came down from the days beyond the deluge. In fact, Wood's invention is the basis of the up-to-date plows turned out today. In other words, he is the man to whom the civilized world is indebted for the modern plows.

A generation ago O. C. Gibbs, M. D., of Ohio, and Ohio is a mother of presidents—combated the advice in agricultural papers regarding fall plowing. And this is, in part, what he wrote to the Country Gentleman: "If the surface of the land is not protected so as to prevent the escape of those fertilizing elements, rendered gaseous by the process of decomposition, they are, in a great measure, evaporated and utterly lost."

As to the measure of damage by fall plowing, the learned doctor said that the land was impoverished nearly, if not quite as much, as though a crop had actually been taken from it without any return.

To the above, S. Edwards Todd replied that if this were true, the air would become so overloaded with the poisons evaporated from the soil that it would kill us, doctors and all.

In these latter days of grace and Teddy Roosevelt, every farmer who plowed all he could last fall feels better and has better digestion because of his happy frame of mind; his own experience having shown him that he can plow in the fall and have better crops and keep his land more productive than by spring plowing. But it was not always thus, nor is it now in some kinds of soil, so let us bear in mind the old maxim that circumstances alter cases, and study each his own case.

By the way, Jethro Wood, the father of modern plows, was a "whittling Yankee." He made the models of his plows by whittling out potatoes, first one form, then another, until he hit upon the geometrical form which was scientific and practical. Nowadays our institu-

## THE HAWKEYE Grain Grader and Cleaner

BUILT EXPRESSLY FOR FARMERS

It is both a grain grader and fanning mill with large capacity and does the best of work. It separates wheat or oats in two grades and cleans them at the same time.

It will clean and grade seed corn.  
It will clean and grade seed wheat.  
It will clean and grade seed oats.  
It will separate oats from wheat.  
It will separate timothy from clover.  
In short, it will do any work required of a fanning mill and grade seed grains besides.  
If your dealer does not handle it, write us for illustrated circular and prices. Manufactured by

PARSONS HAWKEYE MFG. COMPANY, NEWTON, IOWA.

## TWO PIANOS! CASH! BIG PRIZES FREE!

If this chart gets destroyed another printed upon heavy paper will be sent upon receipt of 2c stamp for postage.

**CONDITIONS**—50 cents pays for a year's subscription to **SUCCESSFUL FARMING** and one count; \$1.00 pays for two years and three counts and makes you eligible for the special \$50.00 prizes given to winners of 1st prizes if they have three counts. See below.

**AWARDS** will be made as follows—The person giving correct or nearest correct count will get first prize. Next nearest second, etc. **\$50 PRIZES**—We believe everybody should have three counts so they can have one each side of what they think is correct to be more sure to hit it. To encourage this we will give \$50.00 extra to winners of 1st prizes if they have three counts. Remember if you have one count you get piano only, but if you have three counts you get \$50 extra.

**TIME PRIZES**—\$25.00 Extra. We feel early counters should be rewarded and we will give \$25.00 to the person sending best answers by Feb. 28th.

**OUR RESPONSIBILITY**—We are a responsible business house, and every prize must be paid and will be paid as Savings Bank; in fact any Bank, Express Company, business house or individual in Des Moines, as well as Dunn or Bradstreet's Agency, or the publisher of this paper.

**JUDGES**—We have wholly disinterested judges to award prizes. Here is what they say:

**TO WHOM IT MAY CONCERN:** We have been asked by the publishers of **SUCCESSFUL FARMING** to act as judges in their contest and see that prizes are all awarded fairly. This we will gladly do guaranteeing each contestant absolute fair treatment. Signed—W. W. MORROW, Treasurer State of Iowa; HUGH BRENNAN, Judge District Court; Rev. A. J. WILLIAMS.

In case of tie we will write each person so tied asking them to make as few words as possible from the letters of the alphabet, using each letter of the alphabet twice and only twice, and no one word more than once, each letter left over counting as one word. To the one tied in the counting who gives us the fewest words as above will be awarded first prize. This practically eliminates all question of tie, but if there should be any possibility be a tie in this the prize will be divided equally between these so tying.

Subscription without counts is 25 cents per year, additional counts after you have three entered as per our terms in paragraph "condition" above may be entered at 25 cents each.

This contest is not to be confused with the guessing or estimating contests. Our contest is a test of skill in planning and counting and the best man wins. Nobody connected with our paper will be allowed to compete. Contest closes June 30, but get your counts in at once. See about time prize above.

tions of learning turn out students who will apply rules already deduced and "blue print" for you anything from a steam shovel to a septic sewerage tank. "Science with practice" is the motto of our modern agricultural colleges—science born of practice is a godfather of the curriculum.

Talking about swollen fortunes, they do not seem to be a present menace here in the corn belt, and this is a cause for rejoicing. But if you want to see the look which may be inferred to belong to a man thinking himself able to buy a big diamond or two just look at the farmer riding home from town in an empty hog rack.

But when you run across a farmer whose hogs "went dead" with cholera just before he intended to sell them you behold another kind of picture. Well, this adds to the spice of life. If Edward Bellamy's "Looking Backward" policy were our rule of life, and each and every man had a stated income credited to him with no chance to better it by doing better work, and no risk of losing it by doing fool tricks, life would be free from many great troubles and made as uninteresting and unrelishable as dish-water soup.

Acting upon this theory the girl on this farm has taken turkey raising for her special industry, although small fruit and garden truck also come under her supervision. The surplus of the latter are hers, and all of the turkey money is hers.

From her account book the following interesting facts are gleaned: She had one tom and six turkey hens. The num-

ber of eggs laid was 119, of which she set 114, and ninety-four were hatched and just half of those hatched reached turkeyhood and sold for \$102, net.

A little figuring on the above shows that each of the 119 eggs laid brought ninety cents when grown to turkeyhood, the ninety-four young turkeys which serabbed out of the shell averaged \$1.08 each, and the ninety-four which lived to a marketable age averaged \$2.17 each. This was one year ago, and poultry was higher than it is this year.

Agricola made a resolution several years ago to grow a patch of wheat every year for the benefit of the hens. A sheaf or two of wheat thrown into their scratching shed works wonders in egg production, because it makes the egg-producers work, makes them exercise.

But exercise is effective according to the enjoyment of the exercise. Walking for the health is less healthful than walking under a delightful incentive. Seeing the hens around the farm with dogs and sticks furnishes them exercise, but not a productive exercise.

It only remains to say that I no longer raise wheat because of the bother. But sheaf wheat takes the place of wheat.

One year ago there was some dissatisfaction because the institutions of the state did considerable lobbying during the session of the legislature. It almost caused a scandal, and it is to be hoped that there will be no occasion to be suspicious of a repetition. But still suspicions last year may have been groundless so far as manifest impropri-

## CAN YOU COUNT THESE DOTS?

SUCCESSFUL FARMING WILL GIVE TO THOSE WHO CAN COUNT THE DOTS IN THE PIANO CORRECTLY OR NEAREST CORRECTLY, THE FOLLOWING LIST OF PRIZES: CAN YOU DO IT?

**Two Elegant Pianos**, one to a lady and one to a gentleman.

**2nd. Two Hundred Dollars Cash.**

**3rd. One Hundred Dollars Cash.**

**4th. Fifty Dollars Cash.**

**5th. Twenty-five Dollars Cash.**

**Next 5. Ten Dollars Each.**

**Next 10. Five Dollars Each.**

**Next 25. Two Dollars Each.**

**CONDITIONS:** 50 cents pays for one year and one count. \$1.00 pays for two years and three counts. You get \$50 extra if you have three counts. It will pay you to have three. See conditions below.

## DON'T DELAY!

IF YOU WANT A PIANO OR OTHER PRIZES **FREE** SEND YOUR COUNTS AT ONCE

**PRIZE WINNERS IN PAST CONTESTS**

**A Piano for \$1.00.** Surely people may enter that they will receive fair treatment. How glad I was to win a piano for so small an amount and wholly unexpected. The paper alone is worth all I paid.

MRS. L. W. NOTT, Marion, Ia.

**He Won a Piano.** went to know whether you are honest. I got a piano for a prize and never heard of you until I answered your ad. Your paper is worth twice the subscription price.

W. C. ELLIOTT, Audubon, Iowa.

**\$100.00 Prize.** easiest I ever earned. The dots are hard to count but I know the prizes go to those who win them fairly.

AMY R. BARNES, Van Horn, Iowa.

**Won \$350 Cash.** I won grand prize of \$350 Cash in last contest. I was much surprised.

JOHN A. GOODWIN, Richmond, Va.

**\$50.00 for Canada.** I never knew there was such a paper until I answered ad, now I will never be without it again.

MISS E. FORNIER, Montene, Quebec

**Won a Piano.** I received the elegant piano which I won in your recent contest, and all was perfectly grand. I am recommending you to all my friends and you are at liberty to use my name as reference any time you wish.

ISAAC SHOTWELL, Rockland, Ohio.

**OTHERS WHO HAVE WON:**

**Pianos**—Myra A. Fursman, Panama, Ill. E. L. Jones, 82 Cottage Ave., Ansonia, Conn. Mr. Libbie Groulick, St. Paul, Minn. W. S. Keever, 817 Freeman St., Cincinnati, O. J. Gemmlich, Kensington, Kan. Edith Hutchinson, Leonard, North Dakota.

**\$100**—Eve I. Buckner, Fredonia, Kas. C. S. Wyman, Vinton, Iowa. E. M. Hall, Montrose, Mo. J. W. Smith, Rome, Okla.

**\$50**—S. Irving Steyer, 225 E. Balt, Baltimore, Md. L. F. Stinson, Arcata, Calif. A. J. Perdue, Altoona, Ia. Albert Peterson, Holdrege, Neb. Ches. McBride, Peoria, Ill. Jos. Unser, Bellevue, O. Mrs. D. H. Stoner, Granger, Ia.

**THESE ARE BUT A FEW OF MANY. WE COULD GIVE A LIST OF HUNDREDS IF WE HAD SPACE. YOU MIGHT AS WELL BE A WINNER IF YOU GO AT IT AT ONCE.**

**Publisher SUCCESSFUL FARMING** 1303 Tenth St., Des Moines, Iowa.

I enclose \$..... for subscription to **SUCCESSFUL FARMING**, and I wish to enter the..... (write ladies' or gents') Contest. If \$1.00 is paid send three counts; if only 50c is paid send **ONLY ONE** count. The extra \$50.00 go only to those having **THREE** or more counts entered.

My Count is: (1).....(2).....(3).....

## HOG CHOLERA

CURED and prevented, worms run out and hogs made healthy and thrifty in a few days at a small expense. Write for book of reliable information on care and treatment of hogs. Also reports of public tests. Address,

**Dr. J. H. Snoddy Remedy Co.,**  
Box 852, Des Moines, Iowa.

eties go. Confidence in our state institutions is a most valuable asset, and those concerned should be heedful not to jeopardize it, even unintentionally.

I wish that some courageous adventurer in science, realizing that there are millions in it, would succeed in inventing a light, cheap, successful storage battery for electricity. Once when in New Orleans, Agricola was astonished at seeing steam cars running in Canal street with no tender for fuel and, wonder of wonders, no fire, and no firebox for burning it! Yet the engine spouted steam, and whistled and puffed and speeded up, all with steam. When I learned that it was charged with compressed steam at a power house the mystery was swept away.

But come to think about it, there would be little occasion to do even that much. The windmill could run and store up electricity as well as store up water, and we could draw it from the storage battery and use it "according to the dictates of our own conscience," provided—there is the rub—we had a workable storage battery. Well, Edison is working away, "has almost arrived at success" is and has been the report for I don't know how long. The good time is still coming—the time so long on the way.

**"Good as Gold"**

This mark [©] now called a *bull's eye* was used by the ancient alchemists to represent gold. If you want the choicest vegetables you should follow the Bull's Eye [©] wherever it appears in

**BURPEE'S Farm Annual for 1907**

the "Silent Salesman" of the world's largest mail-order seed trade. An Elegant New Book of 200 pages, with hundreds of illustrations from photographs, it tells the plain truth about the Best Seeds that Grow. It describes Grand Novelties in Flowers and Vegetables, of unusual importance, which cannot be obtained elsewhere. If interested, WRITE TO-DAY, and the Book is yours.

**SEED CORN**

IMPROVED, DEEP GRAIN STRAINS: Shipped to you on  
EARLY MATURING. BRED FOR 10 Days' Approval  
HIGH YIELD PER ACRE.

Pure-bred, hand selected, fire-dried REID'S YELLOW DENT—(High oil) and BOONE COUNTY WHITE—(High Protein.) Grown under most approved methods, insuring heavy yield. Every ear selected early and carefully inspected. Fire dried and vigorous, and proved of HIGHEST GERMINATING POWER. Recent tests show 97 to 99 PER CENT BRED FOR RIG, RIPE EARS. If you want corn that will YIELD and GET RIPE, plant my HIGH-YIELDING NORTHERN ILLINOIS GROWN SEED. EVERY EAR INSPECTED, and SHIPPED UNDER POSITIVE GUARANTEE to satisfy you when you get it. THAT'S THE SAFE WAY TO BUY SEED CORN. Headquarters for seed that will mature between latitude 40° and 42°. CHANGE SEED OATS for BIGGER YIELD and BETTER QUALITY. FINE SWEDISH SELECT, PURE WHITE, and heavy. Best oats in America. Send today for my free Catalog. L. C. BROWN, LAGRANGE, COOK CO., ILLINOIS.

**We Breed 7 Varieties of SEED CORN**

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties.

We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

**HORTICULTURAL TOPICS**

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

**Where to Plant.**

To the Editor of The Homestead:

Planting time will soon be here. Order the stock you want early so that it will not be far down on the nurseryman's list and reach you late in the season. Late planting in the spring is hazardous and a large per cent of late-planted trees are always lost. Nursery stock should be planted just as early as the soil will do to work and knowing when such time usually comes in your section, urge your nurseryman to ship on a date that will get them there on time. The nurseryman is only human and while he will fill most orders in rotation, he will be influenced by that patron who knows just what he wants and when he wants it. Write a letter of inquiry about your stock about the time you ordered it shipped, that no mistake may be made in the time.

If your farm is all prairie, of the same kind of soil, the question of where to plant each variety is merely a question of general consideration. If, on the other hand, it is rolling or hilly and varies much in the character of soil, then the question of where to plant assumes a new importance.

Plant the apple trees on the richest ground. They need good soil to do well and bear large crops. They will stand high feeding. Not so with the pear. Plant the pears on the poorest ground you have. If it be rocky, so much the better. It may be too rough to ever cultivate—that matters not. High fertility and cultivation mean death to the pear by blight. But the trees will not blight before coming into bearing; therefore if the ground be too poor for them to make a healthy growth, mulch them with manure for the first two or three years; then sow grass and let them alone except to spray. The peach trees also should not be highly fed. They make too much wood and the fruit rots easily. Large peach orchards are always cultivated, but a few trees for the family will do well enough in sod if they are vigorous enough to make an annual growth of two or more feet. Plant them in any rough place or corner, feed them with some ashes, and spray twice a year, just before the buds open and just after the blossoms fall. Plum trees like a moist soil. Along a stream, in a hollow or bottom, they will do well without attention; the plum, however, is a hardy tree and will bear in almost any soil. They are a good tree to plant in the hog pasture. Cherries should be planted on good well-drained soil. They will not endure wet feet like the plum. They also require rich soil. For the first few years at least the cherry should have attention in the way of cultivation and manure so as to make a good vigorous growth. L. R. JOHNSON.

**Pruning Apple Trees.**

In a general way it may be said that the best time for pruning is in the spring, just before growth starts. Wounds made at that time will not dry out as much as when made in the fall or winter, and when the ends of the branches are to be cut back, there is often danger that they will be killed back still more by the winter, whereas there is no danger of this when the trees are pruned in March or April, as soon as severe freezing weather is over. Spring pruning is especially desirable for tender varieties, as it not only lessens the tendency to winter-killing, but at that time it will be possible to tell how much the trees or plants have been killed back and to cut below the injured portion.

The rule, however, is not an inflexible one, and, in sections where there is little trouble from winter-killing, the pruning may be done at any time after the leaves drop in the fall and before growth starts in the spring.

It used to be said that fall and winter pruning induced leaf growth, while summer pruning promoted fruitfulness. It is not strange that, if we remove a portion of the branches during the winter, the full vigor of the tree being turned into those that remain, a stronger growth should be secured than with the trees unpruned. We can then say that

**Do You Want to Farm it Right?**

Then sow our Hardy and Reliable Northern Grown Seeds most productive everywhere. We make it a specialty to grow from pedigreed Seed Stock, on our own farms, Right here at Faribault, Minn., all the standard varieties of Seed Grain, Seed Corn and Seed Potatoes. We also offer novelties of wonderful productivity, of our own origination. Try our Canadian Giant Oats, a giant on account of stiff straw and enormous yield. Our Canadian Chief Wheat, produces large, plump grain and heavy crops. Having such heavy chaff, it resists smut, rust and blight better than other kinds. For 10c. we will send 8 samples of pedigreed Seed Grain, also sample of Faribault Jewell Corn, earliest, largest, best yielding Yellow Dent Corn. Spring catalog, English or German, free. Write for it. Farmer Seed Co., Wm. Kueker, Mgr. Box 14, Faribault, Minn.

Our seeds are the best tested seeds that you can buy. The crop tells the story. Get our catalog of Garden Seeds. The Adams Seed Co., Decatur, Ia.

to improve the growth of a tree the pruning should be done while it is dormant.

On the other hand, when a tree is making a strong growth without developing fruit buds it can often be brought into fruitfulness if it is given a severe pruning after growth is under way. This will result in a check to the growth and the tree will be able not only to develop and ripen up the remaining branches but to form fruit buds for the coming year.

For young trees a strong knife answers very well, and for larger ones

much of the work can be done with hand shears. Pruning saws are needed for large branches, and for some purposes some of the level shears may be used.

To secure the best results it is important that the cuts should be made at the right point. If cut too long a bad stub will be formed, while if cut too close beneath the bud, it will dry out. The proper way is to have the cut start on the side opposite the bud, about even with its tip, and, with a slant of about 30 degrees from a cut at right angles, come out just above the bud.

Even greater care should be taken in cutting off large branches from the trunk or other branches. Sometimes the cut is made at right angles to the branch that is cut. This leaves a bad stub, which will be unsightly and the end of which will heal over very slowly, if at all. As a rule the interior of the stub decays, and a cavity is formed in the tree. On the other hand, the cut is often made parallel with the main trunk or branch. This is sometimes all right, but generally there is a large shoulder at the base of the branch and a wound of considerable size is produced. By cutting at an angle of 15 or 20 degrees from the last-named cut, the wound would often be reduced in size fully one-half, and it would not project so far but that the healing would be even more rapid than with a parallel cut.

If the trees have large roots that have ragged ends or that have been broken in handling, they should be cut off smoothly. This applies to trees of all kinds.

The head of an apple tree trunk should not be more than three or four feet from the ground. They can be so pruned that it will not be difficult to work beneath them, and when they have low heads there is far less risk of the trunks becoming sunburned; further, as the trees grow it will be easier to prune and spray them, and to thin and gather the fruit, than when the heads are six or more feet from the ground.

During the first year the young apple trees will need but little pruning, but if the heads are very thick or sprouts appear on the trunk they should have attention. The second and third springs the surplus shoots in the center of the tree should be cut out, giving particular attention to those that cross or grow

close together. If the head is poorly balanced, an attempt should be made to improve its symmetry. The branches should be left longest on the southwest side, that they may shade the trunk, especially if that is the direction of the prevailing winds.

When the trees are of an open habit it is a good plan to head back the branches from one-fourth to one-half. This will strengthen the trunk and branches. The same rules can be followed as the trees develop. All dead branches and the watersprouts, if not needed to fill up the head, should be cut out, and if the tree becomes too thick the thinning out process should be resorted to.—[Practical Gardening.

#### HORTICULTURAL NOTES.

We desire to call the attention of our readers to the advertisement of Mr. Geo. H. Whiting, of Yankton, S. D., that appears on this page of this issue. Mr. Whiting can supply our readers from his nursery, a general line of fruit, shade and ornamental trees including evergreens, shrubs, bulbs, small fruit, etc. He has been in Dakota for twenty-three years in this business. Send to him for his free catalog.

The evergreen specialist, Mr. D. Hill, of Dundee, Ill., is making bargain prices for spring plantings of Scotch pine, white pine, Norway spruce, white spruce, Ponderosa pines that will be found on this page of this and American arbor vitae, in an advertisement. The trees that Mr. Hill is offering are suitable for wind-break purposes or ornamental planting. Besides those mentioned above, he has fifty other bargain lots and he requests readers of this paper to write him for catalog.

Readers of The Homestead who contemplate putting in any considerable area of onions the coming season will be interested in the advertisement of Messrs. H. D. Chester & Co., of Chicago, Ill., that appears on this page of this issue of The Homestead. Onions can be grown in any soil or climate and will require no more care than any other product. The above firm will agree to buy, from those who purchase their seed, the crop raised, or the raiser can sell his crop to his own grocer or dealer if he prefers.

Mr. L. C. Brown, of LaGrange, Ill., is offering seed corn of the improved deep grain strain and early-maturing varieties for sale in his advertisement which appears on page 16 of this issue. He is not only doing this, but he agrees to ship it on ten days' approval. Mr. Brown's seed corn has been grown under the most approved methods, which insures a heavy yield. Every year it is inspected and shipped under positive guarantee to satisfy the purchaser. He also has for sale Swedish Select oats, pure white and a heavy yielder. He considers it the best oats in America. Send for his three catalogs.

The members of the Farmer Seed Company, of Faribault, Minn., whose advertisement appears on page 16 of this issue, are practical farmers and gardeners. They own extensive farm lands, and have been engaged in farming and seed growing the last eleven years at Faribault, Minn., a section that is renowned for the production of choice seed grain, seed corn and seed potatoes, and also for the growing of fine vegetables. Clover, timothy and other grass seeds, produced in the neighborhood of Faribault, are unsurpassed for high quality, and for this reason the Farmer Seed Company are headquarters for them. They give special attention to the growing of carefully selected clover-grass mixtures for permanent pastures and meadows. The Farmer Seed Company claim, and their customers prove it, that with their carefully-selected clover-grass mixtures, one can make two and three spears of grass grow where but one grew before. The readers of this paper, who are interested in farming and gardening, should write to the Farmer Seed Company for their new, illustrated catalog, which is a very attractive and instructive book. They offer it free to the readers of this paper. Write for it.

**THE NEW IDEAL SEED CORN TESTER.**  
The advertisement of the New Ideal Seed Corn Tester will be found on this page of this issue. This tester is something that will do away entirely with old-fashioned methods of testing seed corn. The blotting paper or cigar box plans were always makeshifts, but these have been put entirely in the background by this new tester. It makes the seed come up through soil, which of course is the natural and only way to test corn. Professor Holden, the noted expert of the Iowa Agricultural College, has strongly endorsed this tester. The season for testing is at hand. Write at once for catalog to the Ulbrich Seed Corn Tester Company, Atlantic, Iowa, and please mention this paper when you write.

**CLOVER SEED.**  
Clover is unquestionably a crop of the greatest importance to agriculture, not only on account of its great value for pasture and hay production, but also because its cultivation adds so greatly to the fertility of the soil, enriching it in nitrogen and restoring it when exhausted by frequent cropping. It is now a generally recognized fact that it is impossible to secure the best results from any farm without clover, and the farming lands of Iowa and the West are increasing so rapidly in value that in order to make farming profitable it is necessary to have the purest and best seed possible. For several years past the clover crop in the West has been nearly a failure, but this year, while the crop was not large, still there was some very nice seed grown here, and the Iowa Seed Company, of Des Moines, Iowa, state that they have spent considerable time and money in sending out men over the state searching among the best seed growers and secured some lots of seed of exceptional purity and value. These they have thoroughly re-cleaned and tested, and in order to distinguish them from all ordinary grades, they call them the "Anchor Brand." Each bag of this seed is branded with an anchor and also sealed with a lead seal. They are using the same brand also for fancy grades of mammoth red, alsike, alfalfa, white clover, timothy and blue grass, and in each case it represents strictly new crop seed of unusual

## GENUINE AVERY Stalk Cutter

The Original Spiral Knife.

IT CUTS AT A SLANT. Does better work than any other, yet avoids that terrible jolting and jerking common to others. Pleasant to use. Lasts a lifetime.

**Special Proposition** mailed on request. Write for free Catalog now.

One or Two Row.

AVERY MFG. CO., 169 Iowa St., PEORIA, ILL.

**Ulbrich Seed Corn Tester Co.,**  
Atlantic, 424 Walnut St., Iowa

## WRAGG TREES

WE PAY FREIGHT.  
SELL direct, guarantee lowest prices, and the finest of everything in Trees, Shrubs, Roses, Evergreens, etc. Send for special cut-rate price list. Free.

**M. J. WRAGG NURSERY Co.,**  
330 GOOD BLOCK, DES MOINES, IA.

purity, which has been thoroughly re-cleaned, also carefully tested and proven to be of strong germinating qualities. There is an unusually large demand for clover and this firm state that they have already shipped over 1,000 bushels of their best Iowa grown,

re-cleaned clover to customers in Ohio as well as large quantities to other parts of the country. Remember that it does not pay to sow weed seeds on your land and every pound of dirt or refuse in clover reduces the value or increases the actual cost for the good seed. The supply of this high-grade seed is of course limited, and we believe that it would pay farmers to order early this season. The Iowa Seed Company have agreed to send a free sample of any of these seeds to those of our readers who are going to require seed for sowing this season. Mention this paper in writing them.

## GOLDEN NUGGET TOMATO

THIS grand novelty is a real gold nugget in value. Wonderfully prolific; each plant bears 150 to 200 fruits. Rich golden yellow color, delicious flavor and very solid. We are offering:

**\$25.00 IN CASH PRIZES**

to the persons growing the greatest number of fruits on a single plant. Seed sells at 20 cents a packet, but if you mention this paper, we will send a Prize Competitor's package of 25 seeds for two 2-cent stamps, with privileges of competing for prizes. Large, illustrated catalogue of

Vegetable, Flower and Farm Seeds, FREE.

**IOWA SEED CO.,**  
Des Moines, Iowa.
